Grant Applications Update

New in GEMS: "Document Locker"

In the Grant Enterprise Management System, GCC has a new feature to make uploading documents easier. Instead of uploading all required GCC documents and forms to each individual grant project, GCC has consolidated all documents that are required at the subrecipient level in the Organization Documents section within the Organization tab in GEMS. Ensure all your documents have been uploaded there as indicated in this section. See which have been approved or not approved and make corrections. Keep this section in GEMS up to date as it affects both your open grant projects and new applications.
