SECTION 1: INTRODUCTION

This section provides a general introduction to the Tar River Regional Hazard Mitigation Plan. It consists of the following five subsections:

- 1.1 Background
- 1.2 Purpose
- 1.3 Scope
- 1.4 Authority
- 1.5 Summary of Plan Contents

1.1 Background

Natural hazards, such as winter storms, floods, and tornadoes, are a part of the world around us. In some cases, their occurrence is natural and inevitable, and there is little we can do to control their force and intensity. In others, we have more power to control the intensity and probability but can never truly eliminate the threat entirely. In either case, we must consider these hazards to be legitimate and significant threats to human life, safety, and property.

The Tar River Region is in the north central portion of North Carolina and includes the counties of Franklin, Granville, Vance, and Warren and the municipal governments within those counties. This area is vulnerable to a wide range of natural hazards such as winter storms, severe thunderstorms, and floods. These hazards threaten the life and safety of residents in the Tar River Region and have the potential to damage or destroy both public and private property, disrupt the local economy, and impact the overall quality of life of individuals who live, work, and vacation in the region.

While the threat from hazardous events may never be fully eliminated, there is much we can do to lessen their potential impact upon our communities and our citizens. By minimizing the impact of hazards upon our built environment, we can prevent such events from resulting in disasters. The concept and practice of reducing risks to people and property from known hazards is generally referred to as *hazard mitigation*.

FEMA Definition of Hazard Mitigation:

"Any sustained action taken to reduce or eliminate the long-term risk to human life and property from hazards."

Hazard mitigation techniques include both structural measures (such as strengthening or protecting buildings and infrastructure from the destructive forces of potential hazards) and non-structural measures (such as the adoption of sound land use policies and the creation of public awareness programs). It is widely accepted that the most effective mitigation measures are implemented at the local government level, where decisions on the regulation and control of development are ultimately made. A comprehensive mitigation approach addresses hazard vulnerabilities that exist today and in the foreseeable future. Therefore, it is essential that projected patterns of future development are evaluated and considered in terms of how that growth will increase or decrease a community's overall hazard vulnerability.

A key component in the formulation of a comprehensive approach to hazard mitigation is to develop, adopt, and update a local hazard mitigation plan. A hazard mitigation plan establishes the broad community vision and guiding principles for reducing hazard risk and, further, proposes specific mitigation actions to eliminate or reduce identified vulnerabilities.

Each of the four counties and their municipal jurisdictions participating in the development of the Tar River Regional Hazard Mitigation Plan had a hazard mitigation plan that evolved over the years, as described in Section 2: *Planning Process*. This regional plan draws from each of the county plans to document the region's sustained efforts to incorporate hazard mitigation principles and practices into routine government activities and functions. At its core, the Plan recommends specific actions to minimize hazard vulnerability and protect residents from losses to those hazards that pose the greatest risk. These mitigation actions go beyond simply recommending structural solutions to reduce existing vulnerability, such as elevation, retrofitting, and acquisition projects. Local policies on community growth and development, incentives for natural resource protection, and public awareness and outreach activities are examples of other actions considered to reduce the region's vulnerability to identified hazards. The Plan remains a living document with implementation and evaluation procedures established to help achieve meaningful objectives and successful outcomes over time.

1.1.1 The Disaster Mitigation Act and the Flood Insurance Reform Act

To reduce the Nation's mounting natural disaster losses, the U.S. Congress passed the Disaster Mitigation Act of 2000 (DMA 2000) in order to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Section 322 of DMA 2000 emphasizes the need for state, local, and Tribal government entities to closely coordinate on mitigation planning activities and makes the development of a hazard mitigation plan a specific eligibility requirement for any local or Tribal government applying for federal mitigation grant funds. These funds include the Hazard Mitigation Grant Program (HMGP) and the Pre-Disaster Mitigation (PDM) program, both of which are administered by the Federal Emergency Management Agency (FEMA) under the Department of Homeland Security. Communities with an adopted and federally approved hazard mitigation plan thereby become pre-positioned and more apt to receive available mitigation funds before and after the next disaster strikes.

In addition to federal requirements for hazard mitigation planning, the state of North Carolina also requires a hazard mitigation plan be in place for jurisdictions to receive mitigation and public assistance funds after a state-declared disaster. This requirement is codified in NC Senate Bill 300, which lays out the need for mitigation planning and ties it to disaster funding at the state level.

Additionally, the Flood Insurance Reform Act of 2004 (P.L. 108-264) created two new grant programs, Severe Repetitive Loss (SRL) and Repetitive Flood Claim (RFC), and modified the existing Flood Mitigation Assistance (FMA) program. One of the requirements of this Act is that a FEMA-approved Hazard Mitigation Plan is now required if communities wish to be eligible for these FEMA mitigation programs. However, as of early 2014, these programs have been folded into a single Flood Mitigation Assistance (FMA) program.

This change was brought on by new, major federal flood insurance legislation that was passed in 2012 under the Biggert-Waters Flood Insurance Reform Act (P.L. 112-141) and the subsequent Homeowner Flood Insurance Affordability Act in 2014 that revised Biggert-Waters. These acts made several changes to the way the National Flood Insurance Program is to be run, including raises in rates to reflect true flood risk and changes in how Flood Insurance Rate Map (FIRM) updates impact policyholders. These acts further emphasize Congress' focus on mitigating vulnerable structures.

The Tar River Regional Hazard Mitigation Plan has been prepared in coordination with FEMA Region IV and the North Carolina Division of Emergency Management (NCEM) to ensure that the Plan meets all applicable FEMA and state requirements for hazard mitigation plans. A *Local Mitigation Plan Review Tool*, found in Appendix B, provides a summary of federal and state minimum standards and notes the location where each requirement is met within the Plan.

1.2 Purpose

The purpose of the Tar River Regional Hazard Mitigation Plan is to:

- Complete update of existing Plan to demonstrate progress and reflect current conditions;
- Increase public awareness and education;
- Maintain grant eligibility for participating jurisdictions; and
- Maintain compliance with state and federal legislative requirements for local hazard mitigation plans.

1.3 Scope

The focus of the Tar River Regional Hazard Mitigation Plan is on those hazards determined to be "high" or "moderate" risks to the Tar River Region, as determined through a detailed hazard risk assessment. Other hazards that pose a "low" or "negligible" risk will continue to be evaluated during future updates to the Plan, but they may not be fully addressed until they are determined to be of high or moderate risk. This enables the participating counties and municipalities to prioritize mitigation actions based on those hazards which are understood to present the greatest risk to lives and property.

The geographic scope (i.e., the planning area) for the Plan includes the counties of Franklin, Granville, Vance, and Warren as well as their incorporated jurisdictions. **Table 1-1** indicates the participating jurisdictions.

Table 1-1: Participating Jurisdictions in the Tar River Regional Hazard Mitigation Plan

Franklin County	
Bunn	Louisburg
Centerville (community dissolved)	Youngsville
Franklinton	
Granville County	
Butner	Stem
Creedmoor	Stovall
Oxford	
Vance County	
Henderson	Middleburg
Kittrell	

Warren County	
Macon	Warrenton
Norlina	

1.4 Authority

The Tar River Regional Hazard Mitigation Plan has been developed in accordance with current state and federal rules and regulations governing local mitigation plans and has been adopted by each participating county and local jurisdiction in accordance with standard local procedures. Copies of the adoption resolutions for each participating jurisdiction are provided in Appendix A. The Plan shall be routinely monitored and revised to maintain compliance with the following provisions, rules, and legislation:

- Section 322, Mitigation Planning, of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as enacted by Section 104 of the Disaster Mitigation Act of 2000 (P.L. 106-390);
- FEMA's Final Rule published in the Federal Register, at 44 CFR Part 201 (201.6 for local mitigation planning requirements and 201.7 for Tribal planning requirements);
- Flood Insurance Reform Act of 2004 (P.L. 108-264), Biggert-Waters Flood Insurance Reform Act of 2012 (P.L. 112-141), and the Homeowner Flood Insurance Affordability Act

1.5 Summary of Plan Contents

The contents of this Plan are designed and organized to be as reader-friendly and functional as possible. While significant background information is included on the processes used and studies completed (i.e., risk assessment, capability assessment), this information is separated from the more meaningful planning outcomes or actions (i.e., mitigation strategy, mitigation action plan).

Section 2, ***Planning Process***, provides a complete narrative description of the process used to prepare the Plan. This includes the identification of participants on the planning team and describes how the public and other stakeholders were involved. It also includes a detailed summary for each of the key meetings held, along with any associated outcomes.

The ***Community Profile***, located in Section 3, provides a general overview of the Tar River Region, including prevalent geographic, demographic, and economic characteristics. In addition, building characteristics and land use patterns are discussed. This baseline information provides a snapshot of the planning area and helps local officials recognize those social, environmental, and economic factors that ultimately play a role in determining the region's vulnerability to hazards.

The Risk Assessment is presented in three sections: Section 4, ***Hazard Identification***; Section 5, ***Hazard Profiles***; and Section 6, ***Vulnerability Assessment***. Together, these sections serve to identify, analyze, and assess hazards that pose a threat to the Tar River Region. The risk assessment also attempts to define any hazard risks that may uniquely or exclusively affect specific areas of the Tar River Region.

The Risk Assessment begins by identifying hazards that threaten the region. Next, detailed profiles are established for each hazard, building on available historical data from past hazard occurrences, spatial extent, and probability of future occurrence. This section culminates in a hazard risk ranking based on conclusions regarding the frequency of occurrence, spatial extent, and potential impact highlighted in each of the hazard profiles. In essence, the information generated through the risk assessment serves a critical function as the participating jurisdictions in the Tar River Region seek to determine the most

appropriate mitigation actions to pursue and implement—enabling them to prioritize and focus their efforts on those hazards of greatest concern and those structures or planning areas facing the greatest risk(s).

The ***Capability Assessment***, found in Section 7, provides a comprehensive examination of the Tar River Region's capacity to implement meaningful mitigation strategies and identifies opportunities to increase and enhance that capacity. Specific capabilities addressed in this section include planning and regulatory capability, staff and organizational (administrative) capability, technical capability, fiscal capability, and political capability. Information was obtained using a detailed survey questionnaire and an inventory and analysis of existing plans, ordinances, and relevant documents. The purpose of this assessment is to identify any existing gaps, weaknesses, or conflicts in programs or activities that may hinder mitigation efforts and to identify those activities that should be built upon in establishing a successful and sustainable local hazard mitigation program.

The *Community Profile*, *Risk Assessment*, and *Capability Assessment* collectively serve as a basis for determining the goals for the Tar River Regional Hazard Mitigation Plan, each contributing to the development, adoption, and implementation of a meaningful and manageable *Mitigation Strategy* that is based on accurate background information.

The ***Mitigation Strategy***, found in Section 8, consists of broad goal statements as well as an analysis of hazard mitigation techniques for the jurisdictions participating in the Tar River Regional Hazard Mitigation Plan to consider in reducing hazard vulnerabilities. The strategy provides the foundation for a detailed ***Mitigation Action Plan***, found in Section 9, which links specific mitigation actions for each county and municipal department or agency to locally assigned implementation mechanisms and target completion dates. Together, these sections are designed to make the Plan both strategic, through the identification of long-term goals, and functional, through the identification of immediate and short-term actions that will guide day-to-day decision-making and project implementation.

In addition to the identification and prioritization of possible mitigation projects, emphasis is placed on the use of program and policy alternatives to help make the Tar River Region less vulnerable to the damaging forces of hazards while improving the economic, social, and environmental health of the community. The concept of multi-objective planning was emphasized throughout the planning process, particularly in identifying ways to link, where possible, hazard mitigation policies and programs with complimentary community goals related to disaster recovery, housing, economic development, recreational opportunities, transportation improvements, environmental quality, land development, and public health and safety.

Plan Maintenance, found in Section 10, includes the measures that the jurisdictions participating in the Tar River Regional Hazard Mitigation Plan will take to ensure the Plan's continuous long-term implementation. The procedures also include how the Plan will be regularly evaluated and updated to remain a current and meaningful planning document.

SECTION 2: PLANNING PROCESS

This section describes the planning process undertaken to develop the Tar River Regional Hazard Mitigation Plan. It consists of the following eight subsections:

- 2.1 Overview of Hazard Mitigation Planning
- 2.2 History of Hazard Mitigation Planning in the Tar River Region
- 2.3 Preparing the Updated Plan
- 2.4 The Tar River Regional Hazard Mitigation Planning Team
- 2.5 Community Meetings and Workshops
- 2.6 Involving the Public

- Regional Hazard Mitigation Planning Team was successful in getting citizens to provide input to the mitigation planning process through the use of the Public Participation Survey. The Public Participation Survey was designed to capture data and information from residents of the Tar River counties that might not be able to attend public meetings or participate through other means in the mitigation planning process.

Copies of the Public Participation Survey were distributed to the Regional Hazard Mitigation Planning Team to be made available for residents to complete at local public offices. A link to an electronic version of the survey was also posted on each county's and municipal websites. A total of 80 survey responses were received, which provided valuable input for the Regional Hazard Mitigation Planning Team to consider in the development of the plan update. Selected survey results are presented below.

- Approximately 84 percent of survey respondents had been impacted by a disaster, mainly hurricanes/tropical storms, winter/ice storms, and thunderstorm/lightning/hail.
- Respondents ranked Hurricane/Tropical Storm as the highest threat to their neighborhood (87 percent), followed by Winter Storm (85 percent), and Thunderstorm (73 percent).
- Approximately 30 percent of respondents have taken actions to make their homes more resistant to hazards and 92 percent are interested in making their homes more resistant to hazards.
- 36 percent of respondents do not know what office to contact regarding reducing their risks to hazards.
- Emergency Services and Public Education and Awareness were ranked as the most important activities for communities to pursue in reducing risks.

A copy of the survey is provided in Appendix F and a detailed summary of the survey results.

- Involving the Stakeholders
- Regional Hazard Mitigation Planning Team encouraged more open and widespread participation in the mitigation planning process. The region also went above and beyond in its local outreach efforts through the design and distribution of the Public Participation Survey. This opportunity was provided for local officials, residents, businesses, academia, and other private interests in the Tar River Region to be involved and offer input throughout the local mitigation planning process.

Moreover, the Hazard Mitigation Planning Team pushed to get input from stakeholders outside of the planning area including surrounding counties. Surrounding counties were contacted after a draft of the Plan was developed and were asked to review the Plan and provide suggestions/comments to the consultant's project manager. These suggestions and comments were vetted through the Hazard Mitigation Planning Team before they were implemented to ensure that they met the needs of the communities for whom the Plan was developed. Surrounding counties that were contacted via email to participate in the planning process included: Person County, Durham County, Wake County, Nash County, Halifax County, and

Northampton County. The neighboring counties of Franklin, Granville, Vance, and Warren were contacted to begin the plan update process in August 2020.

- Documentation of Plan Progress

44 CFR Requirement
44 CFR Part 201.6(c)(1): The plan shall include documentation of the planning process used to develop the plan, including how it was prepared, who was involved in the process and how the public was involved.

2.1 Overview of Hazard Mitigation Planning

Local hazard mitigation planning is the process of organizing community resources, identifying and assessing hazard risks, and determining how to best minimize or manage those risks. This process culminates in a hazard mitigation plan that identifies specific mitigation actions, each designed to achieve both short-term planning objectives and a long-term community vision.

To ensure the functionality of a hazard mitigation plan, responsibility is assigned for each proposed mitigation action to a specific individual, department, or agency along with a schedule or target completion date for its implementation (see Section 10: Plan Maintenance). Plan maintenance procedures are established for the routine monitoring of implementation progress as well as the evaluation and enhancement of the mitigation plan itself. These plan maintenance procedures ensure that the Plan remains a current, dynamic, and effective planning document over time that becomes integrated into the routine local decision-making process.

Communities that participate in hazard mitigation planning have the potential to accomplish many benefits, including:

- Saving lives and property
- Saving money
- Speeding recovery following disasters
- Reducing future vulnerability through wise development and post-disaster recovery and reconstruction
- Expediting the receipt of pre-disaster and post-disaster grant funding, and
- Demonstrating a firm commitment to improving community health and safety

Typically, communities that participate in mitigation planning are described as having the potential to produce long-term and recurring benefits by breaking the repetitive cycle of disaster loss. A core assumption of hazard mitigation is that the investments made before a hazard event will significantly reduce the demand for post-disaster assistance by lessening the need for emergency response, repair, recovery, and reconstruction. Furthermore, mitigation practices will enable local residents, businesses, and industries to re-establish themselves in the wake of a disaster, getting the community economy back on track sooner and with less interruption.

The benefits of mitigation planning go beyond solely reducing hazard vulnerability. Mitigation measures such as the acquisition or regulation of land in known hazard areas can help achieve multiple community goals, such as preserving open space, maintaining environmental health, and enhancing recreational opportunities. Thus, it is vitally important that any local mitigation planning process be integrated with other concurrent local planning efforts, and any proposed mitigation strategies must consider other existing community goals or initiatives that will help complement or hinder their future implementation.

2.2 History of Hazard Mitigation Planning in the Tar River Region

Each of the four counties participating in this Plan has a previously adopted hazard mitigation plan. The list of the participating municipalities for each plan, are listed below:

- ***Franklin County Hazard Mitigation Plan***
  - Town of Bunn
  - Town of Franklinton
  - Town of Louisburg
  - Town of Youngsville
- ***Granville County Multi-jurisdictional Hazard Mitigation Plan***
  - Town of Butner
  - City of Creedmoor
  - City of Oxford
  - Town of Stem
  - Town of Stovall
- ***Vance County Hazard Mitigation Plan***
  - City of Henderson
  - Town of Kittrell
  - Town of Middleburg
- ***Warren County Multi-Jurisdictional Hazard Mitigation Plan***
  - Town of Macon
  - Town of Norlina
  - Town of Warrenton

For this plan, all the aforementioned jurisdictions joined to form a regional plan. All the jurisdictions that participated in previous planning efforts have participated in the development of this regional plan.

2.3 Preparing the Updated Plan

Jurisdictions are required to update their hazard mitigation plans every five years so the jurisdictions can remain eligible for federal mitigation funding. To simplify planning efforts for the jurisdictions in the Tar River Region, Franklin County, Granville County, Vance County, and Warren County decided to join together to create the Tar River Regional Hazard Mitigation Plan. This allows resources to be shared amongst the participating jurisdictions and eases the administrative duties of all of the participants by combining the four existing county plans into one multi-jurisdictional plan.

To prepare the Updated Tar River Regional Hazard Mitigation Plan, AECOM was hired as an outside consultant to provide professional mitigation planning services. Brent Edwards, Kelly Keefe, and McKenzie Houston from AECOM served as lead planners for this project

Per the contractual scope of work, the consultant team followed the mitigation planning process recommended by FEMA (Publication Series 386 and Local Mitigation Plan Review Guide) and recommendations provided by North Carolina Division of Emergency Management (NCEM) mitigation planning staff. The Local Mitigation Plan Review Tool, found in Appendix A, provides a detailed summary of FEMA's current minimum standards of acceptability for compliance with DMA 2000 and notes the location where each requirement is met within this Plan. These standards are based upon FEMA's Final Rule as published in the Federal Register in Part 201 of the Code of Federal Regulations (CFR). The planning team used FEMA's Local Mitigation Plan Review Guide (October 2011) for reference as they completed the Plan.

The process used to prepare this Plan included twelve major steps that were completed over the course of approximately eight months beginning in August 2020. Each of these planning steps (illustrated in **Figure 2-1**) resulted in critical work products and outcomes that collectively make up the Plan. Specific plan sections are further described in Section 1: *Introduction*.

Figure 2-1: Mitigation Planning Process for the Tar River Region

2.4 The Tar River Regional Hazard Mitigation Planning Team

In order to guide the development of this Plan, the participating jurisdictions (Franklin County, Granville County, Vance County, and Warren County and their participating municipal jurisdictions) created the Tar River Regional Hazard Mitigation Planning Team. The Regional Hazard Mitigation Planning Team represents a community-based planning team made up of representatives from various county departments, municipalities, and other key stakeholders identified to serve as critical partners in the planning process.

The Regional Hazard Mitigation Planning Team members engaged in regular discussions as well as local meetings and planning workshops to discuss and complete tasks associated with preparing the Plan. This working group coordinated on all aspects of plan preparation and provided valuable input to the process. In addition to regular meetings, team members routinely communicated and were kept informed through an e-mail distribution list.

Specifically, the tasks assigned to the Regional Hazard Mitigation Planning Team members included:

- Participate in Regional Hazard Mitigation Planning Team meetings and workshops
- Provide best available data as required for the risk assessment portion of the Plan
- Provide information that will help complete the Capability Assessment section of the Plan and provide copies of any mitigation or hazard-related documents for review and incorporation into the Plan
- Support the development of the Mitigation Strategy, including the design and adoption of regional goal statements
- Help design and propose appropriate mitigation actions for their department/agency for incorporation into the Mitigation Action Plan
- Review and provide timely comments on all study findings and draft plan deliverables
- Support the adoption of the Tar River Regional Hazard Mitigation Plan
- Communicate with municipalities not represented on the HMPT and hold meetings to discuss findings and collect information needed to update plan

Table 2-1 lists the members of the Regional Hazard Mitigation Planning Team who were responsible for participating in the development of the Plan.

Table 2-1: Members of the Tar River Regional Hazard Mitigation Planning Team

NAME	POSITION/TITLE	DEPARTMENT/AGENCY
Jeff Lewis*	Emergency Management Director	Franklin County Emergency Management
Kristy Brantley	Nursing Supervisor	Franklin County Health
Amy Reagan	Shift Supervisor	Franklin County
Christy Shearin	911 Director	Franklin County
Heather Joyner	Assistant 911 Director	Franklin County
Jeff Bright	Training Officer	Franklin County
Erin Klinger	Planning and Zoning Officer	Town of Youngsville
Barry Baker	Planning Director	Granville County
Robin Edwards*	Emergency Services Coordinator	Granville County Emergency Management
Michael Felts	Manager	Granville County
Jason Reavis	Emergency Services Director	Granville County
Reba Duke	Administrative Assistant and County Safety Officer	Granville County
Ken Reeves	Fire Marshal	Granville County
Mike Ciriello	Planning Director	Town of Butner
Michael S. Frangos, AICP, CZO	Community Development Director	City of Creedmoor
Cheryl Hart	Planning Director	City of Oxford
M. Alan Thornton	City Manager	City of Oxford
David Cottrell	Fire Chief	City of Oxford

NAME	POSITION/TITLE	DEPARTMENT/AGENCY
Dave Pavlus	Commissioner	Town of Stem
Brian Short*	Emergency Operations	Vance County
Curtis Tyndall	Fire Department	City of Henderson
Paylor Spruill	Assistant City Manager	City of Henderson
Terrell Blackmon	City Manager	City of Henderson
Karen Solomon	Emergency Services	Warren County
Ken Krulik	Planning Director	Warren County
Dennis Paschall*	Emergency Manager	Warren County Emergency Management
Jim Groves	OES Director	Durham County
Brent Fisher	Emergency Manager	Nash County
Doug Young	Emergency Services Director	Person County
Carl Baker	Hazard Mitigation Planner	NCEM
John Mello	Hazard Mitigation Planner	NCEM
John Crew	Hazard Mitigation Planner	NCEM
Brent Edwards	Planner	AECOM
McKenzie Houston	Planning Coordinator	AECOM
Kelly Keefe	Planner	AECOM

* Served as the County's main Point of Contact

The table lists points of contact for municipalities who elected to designate their respective county officials to represent their jurisdiction on the planning team, generally because they did not have the time or staff to be able to attend on their own. Moreover, county officials noted early in the planning process that it would be much more effective to engage the smaller municipalities that are present throughout the region through county-level meetings. Although these representatives were not present at all the HMPT meetings, each was involved throughout the planning process and participated by providing suggestions and comments on the Plan via county-level review meetings, email, and phone conversations.

Table 2-2. Point of Contacts for Participating Municipalities

NAME	POSITION/TITLE	DEPARTMENT/AGENCY/ TITLE	Proxy
Ray Bullock	Mayor	Town of Middleburg	Brian Short, Emergency Operations
Jerry Joyner	Mayor	Town of Kittrell	Brian Short, Emergency Operations
Michael Ross	Director of Public Services	City of Henderson	Brian Short, Emergency Operations
Walter Gardner Jr.	Mayor	Town of Warrenton	Dennis Paschall, Emergency Manager
Carroll Harris	Mayor	Town of Macon	Dennis Paschall Emergency Manager
Blaine Reese	Director of Public Works	Town of Norlina	Dennis Paschall Emergency Manager
Lonnie Cole	Commissioner	Town of Stem	Robin Edwards, Emergency Management Coordinator
Janet Parrott	Mayor	Town of Stovall	Robin Edwards, Emergency Management Coordinator
Tammy Ray	Town Manager	Town of Franklinton	Hendrix Valenzuela/Robin Edwards, Emergency Management Coordinator
Judy Jeffreys	Town Administrator	Town of Bunn	Hendrix Valenzuela/Robin Edwards, Emergency Management Coordinator
Tommy King	Assistant Town Administrator	Town of Louisburg	Hendrix Valenzuela/Robin Edwards, Emergency Management Coordinator

2.4.1 Multi-Jurisdictional Participation

The Tar River Regional Hazard Mitigation Plan includes four counties and fifteen incorporated municipalities. To satisfy multi-jurisdictional participation requirements, each county and its participating jurisdictions were required to perform the following tasks:

- Participate in mitigation planning workshops;
- Identify completed mitigation projects, if applicable; and
- Develop (and/or update) and adopt their local Mitigation Action Plan.

Each jurisdiction participated in the planning process and has developed a local Mitigation Action Plan unique to their jurisdiction. This provides the means for jurisdictions to monitor and update their Plan on a regular basis.

2.5 Community Meetings and Workshops

The preparation of this Plan required a series of meetings and workshops for facilitating discussion, gaining consensus, and initiating data collection efforts with local government staff, community officials, and other identified stakeholders. More importantly, the meetings and workshops prompted continuous input and feedback from relevant participants throughout the drafting stages of the Plan. The following is a summary of the key meetings and community workshops held during the development of the plan update. In many cases, routine discussions and additional meetings were held by local staff to accomplish planning tasks specific to their department or agency, such as the approval of specific mitigation actions for their department or agency to undertake and include in the Mitigation Action Plan.

August 27, 2020

Kickoff Meeting - Microsoft Teams

Mr. Brent Edwards, Planner from the project consulting team AECOM, started the meeting by welcoming the representatives from the counties, participating municipal jurisdictions, and other stakeholders. Mr. Edwards led the kickoff meeting and began by providing an overview of the items to be discussed at the meeting and briefly reviewed each of the handouts that were distributed in the meeting packets (agenda, project description, and presentation slides). He then asked each of the meeting attendees to introduce themselves. Following introductions, he provided a brief overview of mitigation and discussed the Disaster Mitigation Act of 2000 and NC Senate Bill 300.

Mr. Edwards discussed the key objectives of the planning process and gave a list of the participating jurisdictions for the regional plan and asked if there were any changes that needed to be made to the list. He then explained the six different categories of mitigation techniques (emergency services, prevention, natural resource protection, structural projects, public education and awareness, and property protection) and gave examples of each. This explanation culminated in an Ice Breaker Exercise for the attendees.

Mr. Edwards instructed attendees on how to complete the exercise. Attendees were given an equal amount of fictitious FEMA money and asked to spend it in the various mitigation categories. Money could be thought of as grant money that communities received towards mitigation. Attendees were asked to target their money towards areas of mitigation that are of greatest concern for their community. Ideally, the exercise helps pinpoint areas of mitigation that the community may want to focus on when developing mitigation grants. The Ice Breaker Exercise results were to be reviewed and presented at the conclusion of the meeting.

Mr. Edwards then explained the mitigation planning process and specific tasks to be accomplished for this project, including the planning process documentation, risk assessment, capability assessment, mitigation strategy and action plan, and plan maintenance procedures.

The project schedule was presented along with the project staffing chart, which demonstrates the number of experienced individuals that will be working on this project. Mr. Edwards then reviewed the roles and responsibilities of AECOM, the counties, and the participating jurisdictions. The presentation concluded with a discussion of the next steps to be taken in the project development, which included strategizing for involving municipal representatives, addressing issues of regulation compliance, and fulfilling data collection needs.

The meeting was adjourned.

October 15, 2020

Capability and Risk Assessment Meeting - Microsoft Teams

Mr. Edwards with AECOM initiated the meeting with a review of the meeting handouts, which included an agenda, presentation slides, proposed goals for the regional plan, and mitigation actions from each county's existing plan. Mr. Edwards reviewed the project schedule and stated that a draft of the Hazard Mitigation Plan would be presented to the Regional Hazard Mitigation Team in late January.

Mr. Edwards then presented the findings of the risk assessment. He reviewed the Presidential Disaster Declarations that have impacted the region. He then explained the process for preparing Hazard Profiles and discussed how each hazard falls into one of four basic categories: Atmospheric, Hydrologic, Geologic, and Other. He indicated that each hazard must be evaluated and formally ruled out if it is not applicable to the study area, even where it seems obvious (such as in the case of volcano).

Mr. Edwards reviewed the Hazard Profiles:

- DROUGHT
- EXTREME HEAT
- HURRICANES AND TROPICAL STORMS.
- SEVEERE WEATHER
- TORNADOES
- WINTER STORM
- EARTHQUAKES
- DAM FAILURE
- FLOOD
- WILDFIRE

In concluding the review of Hazard Profiles, Mr. Edwards stated if anyone had additional information for the hazard profiles, or disagreed with any of the data presented, they should call or email him with their concerns.

The results of the hazard identification process were used to generate a Priority Risk Index (PRI), which categorizes and prioritizes potential hazards as high, moderate, or low risk based on probability, impact, spatial extent, warning time, and duration. The highest PRI was assigned to Severe Weather followed by Hurricane/Tropical Storm and Winter Storm. During the discussion of the PRI, members of the HMPT determined that the Tornado hazard should be moved up to a "High" hazard as it has had major impacts on the region historically and was ranked as the highest-level Moderate hazard already.

Mr. Edwards went on to present the Capability Assessment Findings. AECOM has developed a scoring system that was used to rank the participating jurisdictions in terms of capability in four major areas (Planning and Regulatory, Administrative and Technical, Fiscal, Political). Important capability indicators include National Flood Insurance Program (NFIP) participation, Building Code Effective Grading Schedule (BCEGS) score, Community Rating System (CRS) participation, and the Local Capability Assessment Survey conducted by AECOM.

Mr. Edwards reviewed the Relevant Plans and Ordinances, Relevant Staff/Personnel Resources, and Relevant Fiscal Resources. All of these categories were used to rate the overall capability of the participating counties and jurisdictions. Most jurisdictions are in the moderate range for Planning and Regulatory Capability and in the limited to moderate range for Fiscal Capability. There is variation between the jurisdictions for Administrative and Technical Capability, mainly with respect to availability of planners and staff skilled in GIS. Based upon the scoring methodology developed by AECOM, it was

determined that over half of the participating jurisdictions have moderate capability to implement hazard mitigation programs and activities.

November 19, 2020

Public Outreach Strategy, Goals and Actions Meeting - Microsoft Teams

Mr. Edwards also discussed the results of the public participation survey that was posted on several of the participating counties' and municipal websites. As of the meeting date, 21 responses had been received. Based on preliminary survey results, respondents felt that hurricane/tropical storm posed the greatest threat to their neighborhood, followed by severe thunderstorm/high wind, severe winter storm/freeze, and tornado. 82 percent of the respondents were interested in making their homes more resistant to hazards. However, 36 percent don't know who to contact regarding reducing their risks to hazards.

Mr. Edwards then gave the results of the icebreaker exercise from the first Regional Hazard Mitigation Planning Team meeting, where attendees were given "money" to spend on various hazard mitigation techniques. The results were as follows:

- Severe Weather $540
- Hurricane $480
- Flood $280
- Winter Storm $220
- Tornado $140
- Drought $120
- Extreme Heat $100
- Wildfire $80
- Dam Failure $0
- Earthquake $0

Mr. Edwards gave an overview of Mitigation Strategy Development and presented the proposed goals for the regional plan based on a review of the goals in the four existing county plans. The Regional Hazard Mitigation Team accepted the proposed goals for the regional plan. Mr. Edwards and Ms. Keefe then provided an overview and examples of suggested mitigation actions specifically tailored for the Tar River Counties. Mr. Edwards and Ms. Keefe thanked the group for taking the time to attend and the meeting was adjourned.

December 16, 2020

Mitigation Action Development Workshop - Microsoft Teams

Mr. Edwards gave another overview of Mitigation Strategy Development Mr. Edwards and Ms. Keefe then provided an overview and examples of suggested mitigation actions specifically tailored for the Tar River Counties and their jurisdictions. Ms. Keefe then asked each county and the municipalities to provide a status update for their existing mitigation actions (completed, deleted, or deferred) by January 7, 2021. Mr. Edwards also discussed the Mitigation Action Worksheets to be completed for any new mitigation actions and requested that all worksheets be returned by the same date.

Mr. Edwards and Ms. Keefe thanked the group for taking the time to attend and the meeting was adjourned.

January 14, 2021

Draft Review Meeting - Microsoft Teams

AECOM facilitated brainstorming and discussion sessions with the HMP Team that described the purpose and process of developing planning goals, a comprehensive range of mitigation alternatives, and a method of selecting and defending recommended mitigation actions using a series of selection criteria. A first draft of the plan was prepared based on input from the HMP Team regarding the draft risk assessment and the goals and activities identified in Planning Steps 6 and 7. Other agencies were invited to comment on this draft as well. HMP Team, public and agency comments were integrated into the final draft for the NCEM and FEMA Region IV to review and approve, contingent upon final adoption by the governing body of each participating jurisdiction.

2.6 Involving the Public

44 CFR Requirement
44 CFR Part 201.6(b)(1): The planning process shall include an opportunity for the public to comment on the plan during the drafting stage and prior to plan approval.

An important component of the mitigation planning process involved public participation. Individual citizen and community-based input provides the entire planning team with a greater understanding of local concerns and increases the likelihood of successfully implementing mitigation actions by developing community "buy-in" from those directly affected by the decisions of public officials. As citizens become more involved in decisions that affect their safety, they are more likely to gain a greater appreciation of the hazards present in their community and take the steps necessary to reduce their impact. Public awareness is a key component of any community's overall mitigation strategy aimed at making a home, neighborhood, school, business, or entire city safer from the potential effects of hazards.

Public involvement in the development of the Tar River Regional Hazard Mitigation Plan was sought using two methods: (1) public survey instruments were made available in hard copy and online and (2) copies of the draft Plan deliverables were made available for public review on county and municipal websites and at government offices. The public was provided two opportunities to be involved in the development of the regional plan at two distinct periods during the planning process: (1) during the drafting stage of the Plan and (2) upon completion of a final draft Plan, but prior to official plan approval and adoption. A public participation survey was made available during the planning process at various locations throughout Franklin, Granville, Vance, and Warren Counties and on county and municipal websites.

Each of the participating jurisdictions will hold public meetings before the final plan is officially adopted by the local governing bodies. These meetings will occur at different times once FEMA has granted conditional approval of the Plan. Adoption resolutions will be included in Appendix A.

2.6.1 Public Participation Survey

The Regional Hazard Mitigation Planning Team was successful in getting citizens to provide input to the mitigation planning process through the use of the Public Participation Survey. The Public Participation Survey was designed to capture data and information from residents of the Tar River counties that might not be able to attend public meetings or participate through other means in the mitigation planning process.

Copies of the Public Participation Survey were distributed to the Regional Hazard Mitigation Planning Team to be made available for residents to complete at local public offices. A link to an electronic version of the survey was also posted on each county's and municipal websites. A total of 80 survey responses were received, which provided valuable input for the Regional Hazard Mitigation Planning Team to consider in the development of the plan update. Selected survey results are presented below.

- Approximately 84 percent of survey respondents had been impacted by a disaster, mainly hurricanes/tropical storms, winter/ice storms, and thunderstorm/lightning/hail.
- Respondents ranked Hurricane/Tropical Storm as the highest threat to their neighborhood (87 percent), followed by Winter Storm (85 percent), and Thunderstorm (73 percent).

- Approximately 30 percent of respondents have taken actions to make their homes more resistant to hazards and 92 percent are interested in making their homes more resistant to hazards.
- 36 percent of respondents do not know what office to contact regarding reducing their risks to hazards.
- Emergency Services and Public Education and Awareness were ranked as the most important activities for communities to pursue in reducing risks.

A copy of the survey is provided in Appendix F and a detailed summary of the survey results.

2.7 Involving the Stakeholders

44 CFR Requirement
44 CFR Part 201.6(b)(2): The planning process shall include an opportunity for neighboring communities, local and regional agencies involved in hazard mitigation activities, and agencies that have the authority to regulate development, as well as businesses, academia and other non-profit interests to be involved in the planning process.

The Regional Hazard Mitigation Planning Team encouraged more open and widespread participation in the mitigation planning process. The region also went above and beyond in its local outreach efforts through the design and distribution of the Public Participation Survey. This opportunity was provided for local officials, residents, businesses, academia, and other private interests in the Tar River Region to be involved and offer input throughout the local mitigation planning process.

Moreover, the Hazard Mitigation Planning Team pushed to get input from stakeholders outside of the planning area including surrounding counties. Surrounding counties were contacted after a draft of the Plan was developed and were asked to review the Plan and provide suggestions/comments to the consultant's project manager. These suggestions and comments were vetted through the Hazard Mitigation Planning Team before they were implemented to ensure that they met the needs of the communities for whom the Plan was developed. Surrounding counties that were contacted via email to participate in the planning process included: Person County, Durham County, Wake County, Nash County, Halifax County, and Northampton County. The neighboring counties of Franklin, Granville, Vance, and Warren were contacted to begin the plan update process in August 2020.

2.8 Documentation of Plan Progress

Progress in hazard mitigation planning for the participating jurisdictions in the Tar River Region is documented in this plan update. Since hazard mitigation planning efforts officially began in the participating counties with the development of the initial Hazard Mitigation Plans in the late 1990s and early 2000s, many mitigation actions have been completed and implemented in the participating jurisdictions. These actions will help reduce the overall risk to natural hazards for the people and property in the Tar River Region. The actions that have been completed are documented in the Mitigation Action Plan found in Section 9.

In addition, community capability continues to improve with the implementation of new plans, policies, and programs that help to promote hazard mitigation at the local level. The current state of local capabilities for the participating jurisdictions is captured in Section 7: Capability Assessment. The participating jurisdictions continue to demonstrate their commitment to hazard mitigation and hazard

mitigation planning and have proven this by developing the Regional Hazard Mitigation Planning Team to update the Plan and by continuing to involve the public in the hazard mitigation planning process.

SECTION 3: COMMUNITY PROFILE

This section of the Plan provides a general overview of the Tar River Region. It consists of the following four subsections:

- 3.1 Geography and the Environment
- 3.2 Population and Demographics
- 3.3 Housing, Infrastructure, and Land Use

0 The Tar River Region has experienced moderate growth due to the creation of economic development initiatives, in-migration from adjacent counties, and residential development. As shown in Figure 3.1 above, there are several small incorporated municipalities located throughout the study area, and these areas are where the region's population is generally concentrated. The incorporated areas are also where many businesses, commercial uses, and institutional uses are located. Land uses in the balance of the study area generally consist of rural residential development, agricultural uses, recreational areas, and forestland with development focused along transportation corridors. With minimal population growth since 2010, and marginal decline in Warren County, the Tar River Region should not anticipate population shifts and nor any increased impacts to vulnerability.

Local land use and associated regulations are further discussed in *Section 7: Capability Assessment*.

- Employment and Industry

3.1 Geography and the Environment

The Tar River Region is located in the north central portion of North Carolina. All the counties are part of the Kerr-Tar Regional Council. For the purposes of this plan, the Tar River Region includes the counties of Franklin, Granville, Vance, and Warren. An orientation map is provided as **Figure 3-1**.The total area of each of the participating counties is presented in **Table 3-1**.

Table 3-1: Total Land Areas of Participating Counties

County	Land Area (sq. mi.)	Water Area (sq. mi.)	Total Area (sq. mi.)
Franklin County	492	2	494
Granville County	532	4	536
Vance County	254	16	270
Warren County	428	16	444
Franklin County	492	2	494

Source: United States Census Bureau

The Tar River Region is located between the Appalachian Mountains and Atlantic Ocean in the Central Piedmont region. This area has rolling hills and is known for several lake and water features, including Kerr Lake and Falls Lake.

Kerr Lake, officially named John H. Kerr reservoir, located in parts of Vance, Granville, and Warren Counties. This 50,000-acre lake extends 39 miles and continues into the State of Virginia. Kerr Lake is the largest reservoir east of the Mississippi River and is created by one of a series of seven dams along the Roanoke River. A hydroelectric plant, owned and operated by the U.S. Army Corp of Engineers, is located on the east end of the reservoir.

The Tar River Region enjoys a moderate climate that is characterized by mild winters and hot, humid summers. In general, the spring months are marked by predictable temperatures ranging in the lower 60s to the 70s. From March through May, temperatures average a high in the lower 70s and a low in the 40s.

In the summer, afternoon showers and thunderstorms are common and average temperatures increase with afternoon highs often reaching the 90s in June through August.

September through mid-November is typified by clear skies and cooler weather that alternates between warm days and cool nights. Daytime highs are usually in the 70s and 80s during September but fall to the lower 50s and 60s by early November. Precipitation is relatively consistent throughout the year ranging from three to four inches of rain each month.

Winter in the Tar River Region is generally moderate, but extremes do occur. About half of the days from mid-November through February have high temperatures of about 50˚F. Winter lows are usually at or below freezing but temperatures can drop to the upper 20s. Snow is most common during January and February. Snows of one inch or more usually occur a few times per year.

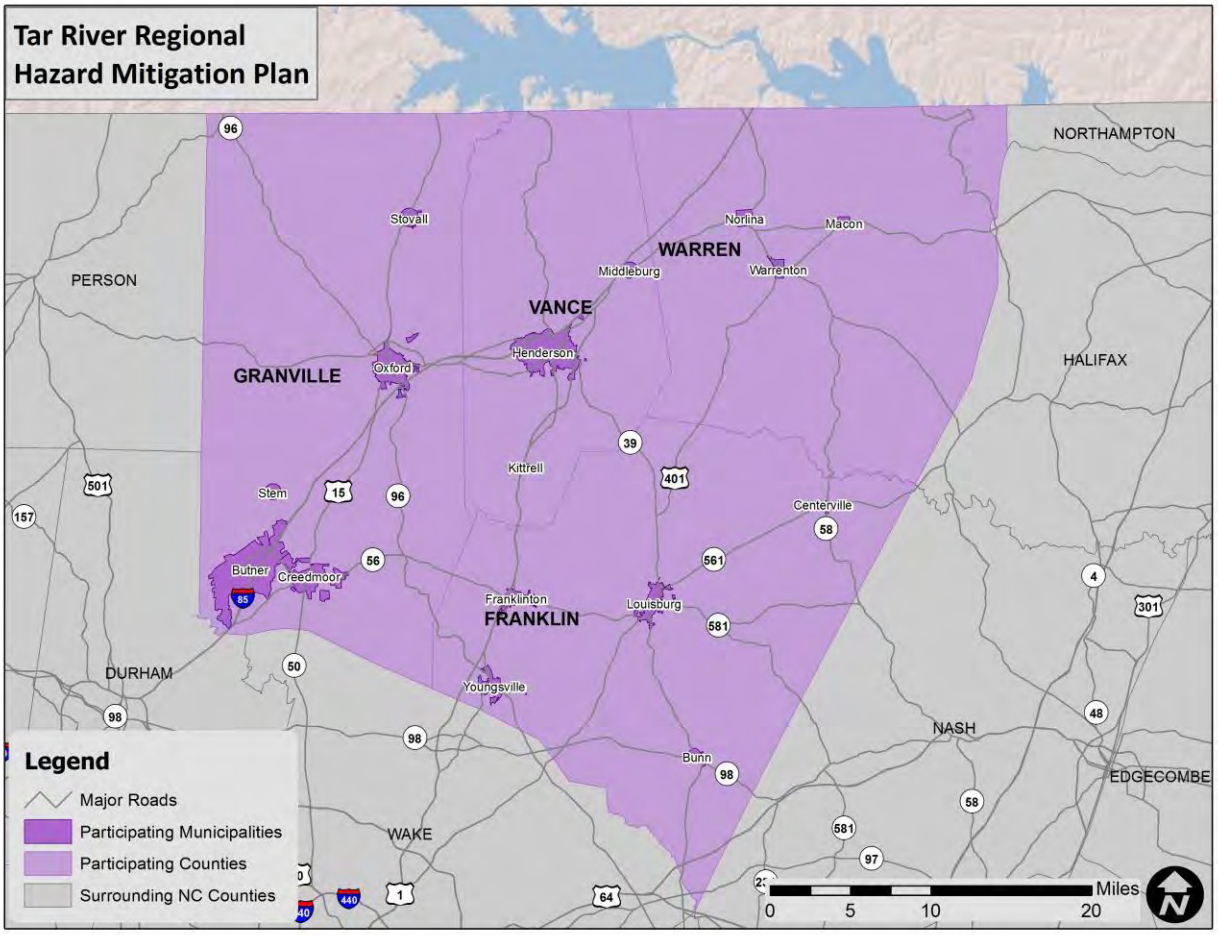

Figure 3-1: Tar River Region Orientation Map

3.2 Population and Demographics

Granville County is the largest participating county by area, but Franklin County is the largest county by population. Between 2000 and 2018, all the counties experienced some growth. The majority of the participating municipalities also experienced population growth; however, some municipalities had larger percent increases than others. Franklin County and Granville County had the highest county growth rates over a ten-year period from 2000-2010 at 28.3 percent and 23.5 percent, respectively. Population changes by 2018 show marginal growth in Franklin, Granville, and Vance Counties, with some decline (less than 1 percent) in Warren County. Population counts from the U.S. Census Bureau for 1990, 2000, and 2010, and 2018 for each of the participating counties are presented in

Table 3-2.

Table 3-2: Population Counts for Participating Counties

Jurisdiction	1990 Census Population	2000 Census Population	2010 Census Population	2018 Census Population	% Change 2000-2010
Franklin County	36,414	47,260	60,619	64.902	28.3%
Granville County	38,345	48,498	59,916	58,874	23.5%
Vance County	38,892	42,954	45,422	44,482	5.7%
Warren County	17,265	19,972	20,972	20,033	5.0%

Source: United States Census Bureau

Based on the 2010 Census, the median age of residents of the participating counties ranges from 38 to 43 years. The racial characteristics of the participating counties are presented in **Table 3-3**. Generally, whites make up the majority of the population in the region; however, blacks and African Americans make up the majority in Vance and Warren Counties.

Table 3-3: Demographics of Participating Counties

Jurisdiction	White, Percent (2010)	Black or African American, Percent (2010)	American Indian or Alaska Native, Percent (2010)	Asian, Percent (2010)	Native Hawaiian or Other Pacific Islander, Percent (2010)	Other Race, Percent (2010)	Two or More Races, percent (2010)	Persons of Hispanic Origin, Percent (2010)*
Franklin County	66.0%	26.7%	0.5%	0.5%	0.0%	4.4%	1.8%	7.9%
Granville County	60.4%	32.8%	0.6%	0.5%	0.1%	3.9%	1.7%	7.5%
Vance County	44.2%	49.9%	0.3%	0.4%	0.0%	3.9%	1.3%	6.7%
Warren County	38.8%	52.3%	5.0%	0.2%	0.0%	2.0%	1.6%	3.3%

*Hispanics may be of any race, so also are included in applicable race categories
Source: United States Census Bureau

3.3 Housing, Infrastructure, and Land Use

3.3.1 Housing

According to the 2010 U.S. Census, there were 81,292 housing units in the Tar River Region, the majority of which are single family homes or mobile homes. Housing information for the four participating counties is presented in

Table 3-4. As shown in the table, Warren County has a significantly higher percentage of seasonal units compared to the other counties in the region.

Table 3-4: Housing Characteristics of Participating Counties

Jurisdiction	Housing Units (2000)	Housing Units (2010)	Seasonal Units, Percent (2010)	Median Home Value (2010-2014)
Franklin County	20,364	26,577	4.2%	$127,200
Granville County	17,896	22,827	1.2%	$137,800
Vance County	18,196	20,082	3.8%	$99,800
Warren County	10,548	11,806	18.4%	$97,400

Source: United States Census Bureau

3.3.2 Infrastructure

Transportation

There are several major roadways that cross the Tar River Region. Interstate 85 runs across the region from north to south through Granville, Vance, and Warren Counties. Construction of one new interstate, I-495, is underway in many areas. The four-county region has many US highways that run through the area, including routes 1, 15, 64, 158, and 401. Numerous North Carolina state highways also cross the region and provide additional routes of transportation.

The Tar River Region is served by Raleigh-Durham International Airport (RDU) which is located in Raleigh. The airport currently offers direct flights on 13 airlines to cities around the country and the world. This airport served over 9 million passengers in 2011. No large airports are located directly in the region, but there are at least four small private and public airports. Triangle North Executive Airport in Franklin County is a county-owned public use airport that has general aviation facilities and aircraft. Henderson-Oxford Airport, located in Granville County, offers general aviation along with services to a number of corporate companies. In Vance County, Deer Run Airport is a privately-owned airport that provides local access within the region. Warren County Airport, located in the Town of Warrenton, is a smaller airport with limited aircraft access.

Utilities

Electrical power in the Tar River Region is provided by Duke Energy, Wake Electric, PSNC Energy, Progress, and several electricity cooperatives. Duke Energy and Wake Electric Membership Corporation provide service to Franklin, Granville, and Vance Counties. Granville County also receives services from PSNC Energy and Piedmont Electric Membership Corporation. Progress Energy provides services to Vance and Warren Counties. Additionally, Warren County is served by Halifax Electric Membership Corporation.

Water and sewer service is provided by many of the towns and counties in the Tar River Region. However, private and/or shared wells and septic systems are common as well.

Community Facilities

There are a number of public buildings and community facilities located throughout the Tar River Region. According to the data collected for the vulnerability assessment (Section 6.4.1), there are 56 fire stations, 15 police stations, and 64 public schools located within the study area.

Two hospitals are located in the Tar River Region. Granville Health System's Granville Medical Center is a community hospital with 62 beds located in Oxford in Granville County. Vance County contains Maria Parham Medical Center, a 102-bed general medical and surgical hospital, within Henderson. There are also smaller medical facilities located throughout the region.

Kerr Lake is a 50,000-acre man-made lake surrounded by the Kerr Lake State Recreation Area, which comprises 3,376 acres of woodlands. Falls Lake covers 12,410 acres with over 5,035 acres of Falls Lake State Recreation Area surrounding the lake. These recreation areas are located in Granville and Vance Counties. All of these facilities offer recreational opportunities to area residents and visitors each year.

3.3.3 Land Use

The Tar River Region has experienced moderate growth due to the creation of economic development initiatives, in-migration from adjacent counties, and residential development. As shown in Figure 3.1 above, there are several small incorporated municipalities located throughout the study area, and these areas are where the region's population is generally concentrated. The incorporated areas are also where many businesses, commercial uses, and institutional uses are located. Land uses in the balance of the study area generally consist of rural residential development, agricultural uses, recreational areas, and forestland with development focused along transportation corridors. With minimal population growth since 2010, and marginal decline in Warren County, the Tar River Region should not anticipate population shifts and nor any increased impacts to vulnerability.

Local land use and associated regulations are further discussed in *Section 7: Capability Assessment*.

3.4 Employment and Industry

The early modern economy in the Tar River Region was built around extractive based industries, such as tobacco, lumber, and other agriculture products; manufacturing; and textiles. Like many other towns in North Carolina, the jurisdictions in the Tar River Region have focused recent economic development efforts on local industries, including wood products, telecommunications, and software development, along with the service and manufacturing sectors.

According to the American Community Survey (ACS) 5-year estimates, in 2014, Franklin County had an average annual employment of 29,776 workers and an average unemployment rate of 7.4 percent (compared to 6.6 percent for the state). In 2014, the Educational Services, and Health Care and Social Assistance industry employed 21.4 percent of the county's workforce followed by Manufacturing (14.4%); Retail Trade (14.0%); Professional, Scientific, and Management, and Administrative and Waste Management Services (9.3%); and Construction (9.0%). In 2014, the average annual median household income in Franklin County was $42,763 compared to $46,693 for the state of North Carolina.

In 2014, Granville County had an average annual employment of 26,489 workers and an average unemployment rate of 5.7 percent according to the ACS 5-year estimates. In 2014, the Educational Services, and Health Care and Social Assistance industry employed 24.4 percent of the county's workforce followed by Manufacturing (16.0%); Retail Trade (10.9%); and Professional, Scientific, and Management, and Administrative and Waste Management Services (9.9%). The average annual median household income in Granville County was $49,655 in 2014.

As reported by the ACS 5-year estimates, Vance County had an average annual employment of 19,584 workers and an average unemployment rate of 6.5 percent in 2014. In 2014, the Educational Services, and Health Care and Social Assistance was the largest employment sector with 26.7 percent of the county's workforce. The other leading industries were Manufacturing (16.5%); Retail Trade (14.6%); Arts, Entertainment, and Recreation, and Accommodation and Food Services (7.7%); and Public

Administration (6.9%). The average annual median household income in Vance County was $34,075 in 2014.

The ACS 5-year estimates report an annual average employment of 7,920 workers and average unemployment rate of 4.5 percent in Warren County for 2014. In 2014, the top employment industry was Educational Services, and Health Care and Social Assistance, making up 27.9 percent of total employment. Other major industries were Manufacturing (15.2%); Retail Trade (11.5%); and Public Administration (7.8%). The county's average annual median household income was $34,953 in 2014.

SECTION 4: HAZARD IDENTIFICATION

This section describes how the planning team identified the hazards to be included this plan. It consists of the following five subsections:

- 4.1 Overview
- 4.2 Description of Full Range of Hazards
- 4.3 Disaster Declarations
- 4.4 Hazard Evaluation
- 4.5 Hazard Identification Results

44 CFR Requirement
44 CFR Part 201.6(c)(2)(i): The risk assessment shall include a description of the type, location and extent of all-natural hazards that can affect the jurisdiction. The plan shall include information on previous occurrences of hazard events and on the probability of future hazard events.

4.1 Overview

The Tar River Region is vulnerable to a wide range of natural and human-caused hazards that threaten life and property. Current FEMA regulations and guidance under the Disaster Mitigation Act of 2000 (DMA 2000) require, at a minimum, an evaluation of a full range of natural hazards. An evaluation of human-caused hazards (i.e., technological hazards, terrorism, etc.) is encouraged, though not required, for plan approval. The Tar River Region has included an assessment of only natural hazards.

Upon a review of the full range of natural hazards suggested under FEMA planning guidance, the participating counties in the Tar River Region (Franklin, Granville, Vance, and Warren) have identified a number of hazards that are to be addressed in its Regional Hazard Mitigation Plan. These hazards were identified through an extensive process that utilized input from the Tar River Regional Hazard Mitigation Planning Team members, research of past disaster declarations in the participating counties,[1] and review of the North Carolina State Hazard Mitigation Plan (2018). Readily available information from reputable sources (such as federal and state agencies) was also evaluated to supplement information from these key sources.

Table 4-1 lists the full range of hazards initially identified for inclusion in the Plan and provides a brief description for each. This table includes 21 individual hazards. Some of these hazards are considered to be interrelated or cascading, but for preliminary hazard identification purposes these individual hazards are broken out separately.

Next, **Table 4-2** lists the disaster declarations in the Tar River Region.

Next, **Table 4-3** documents the evaluation process used for determining which of the initially identified hazards are considered significant enough to warrant further evaluation in the risk assessment. For each hazard considered, the table indicates whether or not the hazard was identified as a significant hazard to be further assessed, how this determination was made, and why this determination was made. The table works to summarize not only those hazards that were identified (and why) but also those that were not identified (and why not). Hazard events not identified for inclusion at this time may be

[1] A complete list of disaster declarations for the Tar River Region can be found below in Section 4.3.

addressed during future evaluations and updates of the risk assessment if deemed necessary by the Regional Hazard Mitigation Planning Team during the plan update process.

Lastly, **Table 4-4** provides a summary of the hazard identification and evaluation process noting that 13 of the 21 initially identified hazards are considered significant enough for further evaluation through this Plan's risk assessment (marked with a "⇛").

4.2 Description of Full Range of Hazards

Table 4-1: Descriptions of the Full Range of Initially Identified Hazards

Hazard	Description
ATMOSPHERIC HAZARDS	
Avalanche	A rapid fall or slide of a large mass of snow down a mountainside.
Drought	A prolonged period of less than normal precipitation such that the lack of water causes a serious hydrologic imbalance. Common effects of drought include crop failure, water supply shortages, and fish and wildlife mortality. High temperatures, high winds, and low humidity can worsen drought conditions and also make areas more susceptible to wildfire. Human demands and actions have the ability to hasten or mitigate drought-related impacts on local communities.
Extreme Heat/Heat Wave	A heat wave may occur when temperatures hover 10 degrees or more above the average high temperature for the region and last for several weeks. Humid or muggy conditions, which add to the discomfort of high temperatures, occur when a "dome" of high atmospheric pressure traps hazy, damp air near the ground. Excessively dry and hot conditions can provoke dust storms and low visibility. A heat wave combined with a drought can be very dangerous and have severe economic consequences on a community.
Hailstorm	Any storm that produces hailstones that fall to the ground; usually used when the amount or size of the hail is considered significant. Hail is formed when updrafts in thunderstorms carry raindrops into parts of the atmosphere where the temperatures are below freezing.
Hurricane and Tropical Storm	Hurricanes and tropical storms are classified as cyclones and defined as any closed circulation developing around a 10 to 30 mile (on average) in diameter low-pressure center in which the winds rotate counterclockwise in the Northern Hemisphere (or clockwise in the Southern Hemisphere). When maximum sustained winds reach or exceed 39 miles per hour, the system is designated a tropical storm, given a name, and is closely monitored by the National Hurricane Center. When sustained winds reach or exceed 74 miles per hour the storm is deemed a hurricane. The primary damaging forces associated with these storms are high-level sustained winds, heavy precipitation, and tornadoes. Coastal areas are also vulnerable to the additional forces of storm surge, wind-driven waves, and tidal flooding which can be more destructive than cyclone wind. The majority of hurricanes and tropical storms form in the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico during the official Atlantic hurricane season, which extends from June through November.
Lightning	Lightning is a discharge of electrical energy resulting from the buildup of positive and negative charges within a thunderstorm, creating a "bolt" when the buildup of charges becomes strong enough. This flash of light usually occurs within the clouds or between the clouds and the ground. A bolt of lightning can reach temperatures approaching 50,000 degrees Fahrenheit. Lightning rapidly heats the sky as it flashes, but the

Hazard	Description
	surrounding air cools following the bolt. This rapid heating and cooling of the surrounding air causes thunder. On average, 73 people are killed each year by lightning strikes in the United States.
Nor'easter	Similar to hurricanes, nor'easters are ocean storms capable of causing substantial damage to coastal areas in the Eastern United States due to their associated strong winds and heavy surf. Nor'easters are named for the winds that blow in from the northeast and drive the storm up the East Coast along the Gulf Stream, a band of warm water that lies off the Atlantic coast. They are caused by the interaction of the jet stream with horizontal temperature gradients and generally occur during the fall and winter months when moisture and cold air are plentiful. Nor'easters are known for dumping heavy amounts of rain and snow, producing hurricane-force winds, and creating high surf that causes severe beach erosion and coastal flooding.
Severe Weather	Thunderstorms are caused by air masses of varying temperatures meeting in the atmosphere. Rapidly rising warm moist air fuels, the formation of thunderstorms. Thunderstorms may occur singularly, in lines, or in clusters. They can move through an area very quickly or linger for several hours. Thunderstorms may result in hail, tornadoes, or straight-line winds. Windstorms pose a threat to lives, property, and vital utilities primarily due to the effects of flying debris and can down trees and power lines.
Tornado	A tornado is a violently rotating column of air that has contact with the ground and is often visible as a funnel cloud. Its vortex rotates cyclonically with wind speeds ranging from as low as 40 mph to as high as 300 mph. Tornadoes are most often generated by thunderstorm activity when cool, dry air intersects and overrides a layer of warm, moist air forcing the warm air to rise rapidly. The destruction caused by tornadoes ranges from light to catastrophic depending on the intensity, size, and duration of the storm.
Winter Storm	Winter storms may include snow, sleet, freezing rain, or a mix of these wintry forms of precipitation. Blizzards, the most dangerous of all winter storms, combine low temperatures, heavy snowfall, and winds of at least 35 miles per hour, reducing visibility to only a few yards. Ice storms occur when moisture falls and freezes immediately upon impact on trees, power lines, communication towers, structures, roads, and other hard surfaces. Winter storms and ice storms can down trees, cause widespread power outages, damage property, and cause fatalities and injuries to human life.
GEOLOGIC HAZARDS	
Earthquake	A sudden, rapid shaking of the Earth caused by the breaking and shifting of rock beneath the surface. This movement forces the gradual building and accumulation of energy. Eventually, strain becomes so great that the energy is abruptly released, causing the shaking at the earth's surface which we know as an earthquake. Roughly 90 percent of all earthquakes occur at the boundaries where plates meet, although it is possible for earthquakes to occur entirely within plates. Earthquakes can affect hundreds of thousands of square miles, cause damage to property measured in the tens of billions of dollars, result in loss of life and injury to hundreds of thousands of persons, and disrupt the social and economic functioning of the affected area.
Expansive Soils	Soils that will exhibit some degree of volume change with variations in moisture conditions. The most important properties affecting degree of volume change in a soil are clay mineralogy and the aqueous environment. Expansive soils will exhibit expansion caused by the intake of water and, conversely, will exhibit contraction when

Hazard	Description
	moisture is removed by drying. Generally speaking, they often appear sticky when wet and are characterized by surface cracks when dry. Expansive soils become a problem when structures are built upon them without taking proper design precautions into account with regard to soil type. Cracking in walls and floors can be minor or can be severe enough for the home to be structurally unsafe.
Landslide	The movements of a mass of rock, debris, or earth down a slope when the force of gravity pulling down the slope exceeds the strength of the earth materials that comprise to hold it in place. Slopes greater than 10 degrees are more likely to slide, as are slopes where the height from the top of the slope to its toe is greater than 40 feet. Slopes are also more likely to fail if vegetative cover is low and/or soil water content is high.
Land Subsidence	The gradual settling or sudden sinking of the Earth's surface due to the subsurface movement of earth materials. Causes of land subsidence include groundwater pumpage, aquifer system compaction, drainage of organic soils, underground mining, hydro compaction, natural compaction, sinkholes, and thawing permafrost.
Tsunami	A series of waves generated by an undersea disturbance such as an earthquake. The speed of a tsunami traveling away from its source can range from up to 500 miles per hour in deep water to approximately 20 to 30 miles per hour in shallower areas near coastlines. Tsunamis differ from regular ocean waves in that their currents travel from the water surface all the way down to the sea floor. Wave amplitudes in deep water are typically less than one meter; they are often barely detectable to the human eye. However, as they approach shore, they slow in shallower water, basically causing the waves from behind to effectively "pile up," and wave heights increase dramatically. As opposed to typical waves which crash at the shoreline, tsunamis bring with them a continuously flowing 'wall of water' with the potential to cause devastating damage in coastal areas located immediately along the shore.
Volcano	A mountain that opens downward to a reservoir of molten rock below the surface of the earth. While most mountains are created by forces pushing up the earth from below, volcanoes are different in that they are built up over time by an accumulation of their own eruptive products: lava, ash flows, and airborne ash and dust. Volcanoes erupt when pressure from gases and the molten rock beneath becomes strong enough to cause an explosion.
HYDROLOGIC HAZARDS	
Dam Failure	Dam failure is the collapse, breach, or other failure of a dam structure resulting in downstream flooding. In the event of a dam failure, the energy of the water stored behind even a small dam is capable of causing loss of life and severe property damage if development exists downstream of the dam. Dam failure can result from natural events, human-induced events, or a combination of the two. The most common cause of dam failure is prolonged rainfall that produces flooding. Failures due to other natural events such as hurricanes, earthquakes, or landslides are significant because there is generally little or no advance warning.
Erosion	Erosion is the gradual breakdown and movement of land due to both physical and chemical processes of water, wind, and general meteorological conditions. Natural, or geologic, erosion has occurred since the Earth's formation and continues at a very slow and uniform rate each year.
Flood	The accumulation of water within a water body which results in the overflow of excess water onto adjacent lands, usually floodplains. The floodplain is the land

Hazard	Description
	adjoining the channel of a river, stream ocean, lake, or other watercourse or water body that is susceptible to flooding. Most floods fall into the following three categories: riverine flooding, coastal flooding, or shallow flooding (where shallow flooding refers to sheet flow, ponding, and urban drainage).
Storm Surge	A storm surge is a large dome of water often 50 to 100 miles wide and rising anywhere from four to five feet in a Category 1 hurricane up to more than 30 feet in a Category 5 storm. Storm surge heights and associated waves are also dependent upon the shape of the offshore continental shelf (narrow or wide) and the depth of the ocean bottom (bathymetry). A narrow shelf, or one that drops steeply from the shoreline and subsequently produces deep water close to the shoreline, tends to produce a lower surge but higher and more powerful storm waves. Storm surge arrives ahead of a storm's actual landfall and the more intense the hurricane is, the sooner the surge arrives. Storm surge can be devastating to coastal regions, causing severe beach erosion and property damage along the immediate coast. Further, water rise caused by storm surge can be very rapid, posing a serious threat to those who have not yet evacuated flood-prone areas.
OTHER HAZARDS	
Wildfire	An uncontrolled fire burning in an area of vegetative fuels such as grasslands, brush, or woodlands. Heavier fuels with high continuity, steep slopes, high temperatures, low humidity, low rainfall, and high winds all work to increase risk for people and property located within wildfire hazard areas or along the urban/wildland interface. Wildfires are part of the natural management of forest ecosystems, but most are caused by human factors. Over 80 percent of forest fires are started by negligent human behavior such as smoking in wooded areas or improperly extinguishing campfires. The second most common cause for wildfire is lightning.

4.3 Disaster Declarations

Disaster declarations provide initial insight into the hazards that may impact the Tar River Regional planning area. Since 1988, 21 presidential disaster declarations have been reported in the Tar River Region. This includes 6 winter storm-related events, 11 hurricanes and tropical storms, 2 storms related to tornadoes, and 2 pandemic-related events.

Table 4-2: Tar River Region Disaster Declarations

Year	Disaster Number	Description	Franklin County	Granville County	Vance County	Warren County
1988	818	SEVERE STORMS & TORNADOES	X			
1989	827	TORNADOES		X		
1996	1087	BLIZZARD OF 96	X	X	X	X
1996	1103	WINTER STORM				X
1996	1134	HURRICANE FRAN	X	X	X	X
1999	1292	HURRICANE FLOYD MAJOR DISASTER	X	X	X	X

Year	Disaster Number	Description	Franklin County	Granville County	Vance County	Warren County
		DECLARATIONS				
2000	1312	SEVERE WINTER STORM	X	X	X	X
2002	1448	SEVERE ICE STORM	X	X	X	X
2003	1457	ICE STORM		X		
2003	1490	HURRICANE ISABEL	X	X	X	X
2011	4019	HURRICANE IRENE			X	X
2014	4167	SEVERE WINTER STORM		X		
2016	3380	HURRICANE MATTHEW	X	X	x	X

4.4 Hazard Evaluation

Table 4-3: Documentation of the Hazard Evaluation Process

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
ATMOSPHERIC HAZARDS			
Avalanche	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of the NC State Hazard Mitigation Plan • Review of previous Tar River county hazard	• The United States avalanche hazard is limited to mountainous western states including Alaska as well as some areas of low risk in New England. • Avalanche hazard was removed from the North Carolina State Hazard Mitigation Plan after determining the mountain

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
		mitigation plans • Review of US Forest Service National Avalanche Center website	elevation in Western North Carolina did have enough snow not produce this hazard. • Avalanche is not included in any of the previous Tar River hazard mitigation plans. • There is no risk of avalanche events in North Carolina.
Drought	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of the NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of the NC State Climate Office website	• Drought is a normal part of virtually all climatic regimes, including areas with high and low average rainfall. • Droughts are discussed in the NC State Hazard Mitigation Plan as a lesser hazard. • The NC State Hazard Mitigation Plan lists drought as a top hazard for the Piedmont 3 Region, which includes the Tar River counties. • Drought is included in all of the previous hazard mitigation plan. •
Extreme Heat	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of the North Carolina State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of NOAA NCDC Storm Events Database	• Many areas of the United States are susceptible to heat waves, including North Carolina. • The NC State Hazard Mitigation Plan does not include heat wave as a top hazard for the Piedmont 3 Region, which includes the Tar River counties. • The NC State Hazard Mitigation Plan reports the Piedmont Region as having moderate vulnerability to heat wave compared to the state. • Heat wave is included in most of the previous hazard mitigation plan in tandem with the drought hazard.
Hailstorm (included in Severe Weather)	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of NOAA NCDC	• Although hailstorms occur primarily in the Midwestern states, they do occur in every state on the mainland U.S. Most inland regions experience hailstorms at least two or more days each year. • Hailstorm events are discussed in the NC State Hazard Mitigation under the severe thunderstorm hazard.

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
		Storm Events Database	• Hail is addressed under the severe thunderstorm hazard in all of the previous hazard mitigation plan. Given the frequency of the event, individual analysis is warranted.
Hurricane and Tropical Storm	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Analysis of NOAA historical tropical cyclone tracks and National Hurricane Center Website • Review of NOAA NCDC Storm Events Database • Review of historical presidential disaster declarations	• The Atlantic and Gulf regions are most prone to landfall by hurricanes and tropical storms. • Hurricane and tropical storm events are discussed in the NC State Hazard Mitigation and are listed as the top hazard in the Piedmont 3 Region, which includes the Tar River counties. • Hurricane and tropical storm was addressed in the previous plan.
Lightning (included in Severe Weather)	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of NOAA NCDC Storm Events Database • Review of Vaisala's NLDN Lightning Flash Density Map	• The central region of the Florida has the highest density of lightning strikes in the mainland U.S.; however, lightning events are experienced in nearly every region. • Lightning events are discussed in the NC State Hazard Mitigation Plan as part of the severe thunderstorm hazard. • Although lightning is addressed under the severe thunderstorm hazard in all of the previous hazard mitigation plans, given the damage and reported injuries, individual analysis is warranted.

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
Nor'easter	NO	• Review of NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of NOAA NCDC Storm Events Database	• Nor'easters are discussed in the NC State Hazard Mitigation Plan and tend to have an impact on communities closer to the coast. The Piedmont Region, which includes the Tar River counties, has relatively low vulnerability compared to the state. • NCDC has not reported any major nor'easter activity for the Tar River Region.
Severe Weather	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of NOAA NCDC Storm Events Database • Review of historical presidential disaster declarations	• Over 100,000 thunderstorms are estimated to occur each year on the • U.S. mainland, and they are • experienced in nearly every region. • Severe thunderstorm events are discussed in the NC State Hazard Mitigation Plan and are identified as a top hazard in the Piedmont 3 Region, which includes the Tar River counties. • Severe storm events were addressed in previous Tar River hazard mitigation plan.
Tornado	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous hazard mitigation plan • Review of NOAA NCDC Storm Events Database • Review of historical presidential disaster declarations	• Tornado events are discussed in the NC State Hazard Mitigation Plan as a lesser hazard, but this is becoming a more significant threat to central North Carolina. • The NC State Hazard Mitigation Plan reports that the Piedmont Region, which includes the Tar River counties, shares the highest vulnerability in the state. • Tornado events were addressed in the previous Tar River hazard mitigation plan.
Winter Storm	YES	• Review of NC State Hazard Mitigation Plan • Review of previous mitigation plan • Review of NOAA/NCDC Storm Events Database • Review of historical presidential disaster declarations	• Winter storms affect every state in the continental U.S. and Alaska. • Severe winter storms, including snowstorms and ice storms, are discussed in the NC State Hazard Mitigation Plan. They are listed as a top hazard in the Piedmont 3 Region, which includes the Tar River counties. • Winter storm events were addressed in the previous Tar River plan.

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
GEOLOGIC HAZARDS			
Earthquake	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan. • Review of the National Geophysical Data Center • USGS Earthquake Hazards Program website	• Although the zone of greatest seismic activity in the United States is along the Pacific Coast, eastern regions have experienced significant earthquakes. • Earthquake events are discussed in the NC State Hazard Mitigation Plan and several of the previous Tar River county plans. • Earthquakes have occurred in and around the State of North Carolina in the past. The state is affected by several major fault lines: the Charleston and New Madrid (near Missouri) fault lines which have generated a magnitude 8.0 earthquake in the last 200 years. The region is mainly susceptible to impacts from the Eastern Tennessee and Virginia seismic zones.
Expansive Soils	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of USDA Soil Conservation Service's Soil Survey	• The effects of expansive soils are most prevalent in parts of the Southern, Central, and Western U.S. • Expansive soils are discussed in the NC State Hazard Mitigation as a lesser hazard. • Previous Tar River hazard mitigation plan did not identify expansive soils as a potential hazard. • According to FEMA and USDA sources, the Tar River Region is located in an area that has "little to no" clay swelling potential.
Landslide	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of USGS Landslide Incidence and Susceptibility Hazard Map	• Landslides occur in every state in the U.S, and they are most common in the coastal ranges of California, the Colorado Plateau, the Rocky Mountains, and the Appalachian Mountains. • Landslide/debris flow events are discussed in the NC State Hazard Mitigation Plan as a lesser hazard. • Some of the previous Tar River hazard mitigation plans address landslides. • USGS landslide hazard maps indicate

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
		• Review of the North Carolina Geological Survey database of historic landslides	"low susceptibility" is found throughout the Tar River Region. • Data provided by NCGS do not indicate any recorded landslide events in the Tar River Region.
Land Subsidence	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan	• Land subsidence affects at least 45 states, including North Carolina. However, because of the broad range of causes and impacts, there has been limited national focus on this hazard. • The NC State Hazard Mitigation Plan delineates certain areas that are susceptible to land subsidence hazards in North Carolina; however, the Piedmont Region, which includes the Tar River counties, has moderate vulnerability compared to the state.
Tsunami	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of FEMA • "How-to" mitigation • planning guidance (Publication 386-2, "Understanding Your Risks – Identifying Hazards and Estimating Losses)	• No record exists of a catastrophic Atlantic basin tsunami impacting the mid-Atlantic coast of the United States. • Tsunami inundation zone maps are not available for communities located along the U.S. East Coast. • Tsunamis are discussed in the NC State Hazard Mitigation Plan as a greater hazard for the state. However, the Piedmont 3 Region, which includes the Tar River Counties, scored a zero for tsunami risk hazard due to its inland location. • Tsunami was mentioned in some of the previous Tar River hazard mitigation plans; however, since there is no record of tsunamis impacting North Carolina, it was not analyzed as a potential hazard. • FEMA mitigation planning guidance suggests that locations along the U.S. East Coast have a relatively low tsunami risk and need not conduct a tsunami risk assessment at this time.
Volcano	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan	• More than 65 potentially active volcanoes exist in the United States and most are located in Alaska. The Western states and Hawaii are also potentially affected by volcanic hazards.

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
		• Review of USGS Volcano Hazards Program website	• There are no active volcanoes in North Carolina. • There has not been a volcanic eruption in North Carolina in over 1 million years. • No volcanoes are located near the Tar River Region.
HYDROLOGIC HAZARDS			
Dam Failure	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of North Carolina Division of Energy, Mineral, and Land Resources website	• The National Inventory of Dams shows dams are located in every state. • Dam failure is discussed in the NC State Hazard Mitigation Plan and is listed as a top hazard for the Piedmont 3 Region, which includes the Tar River counties. • Of the 155 dams reported on the North Carolina Inventory of Dams in the region, 11 are high hazard. (High hazard is defined as "where failure or mis-operation will probably cause loss of human life.")
Erosion	NO	• Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan	• Coastal erosion is discussed in the NC State Hazard Mitigation Plan but only for coastal areas (there is no discussion of riverine erosion). The Tar River is not located in a coastal area. • Erosion was not previously identified as a top hazard and it was determined that it did not warrant inclusion as a potential hazard.
Flood	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of NOAA NCDC Storm Events Database • Review of historical disaster declarations • Review of FEMA DFIRM data • Review of FEMA's NFIP Community Status Book	• Floods occur in all 50 states and in the • U.S. territories. • The flood hazard is thoroughly discussed in the NC State Hazard Mitigation Plan. The Tar River Region was found to have moderate vulnerability compared to the state. • All of the previous hazard mitigation plans in Tar River Region address flood as a hazard. • 8.42% of the Tar River Region is located in an identified floodplain (100- or 500-year). • 15 of the 19 jurisdictions in the Tar River Region participate in the NFIP; however, no jurisdictions currently participate in

Natural Hazards Considered	Was this hazard identified as a significant hazard to be addressed in the plan at this time? (Yes or No)	How was this determination made?	Why was this determination made?
		and Community Rating System (CRS)	the CRS.
Storm Surge	NO	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of NOAA NCDC Storm Events Database	• Given the inland location of the Tar River Region, storm surge would not affect the area. • Storm surge is discussed in the NC State Hazard Mitigation Plan under the hurricane hazard. The Piedmont Region, which includes the Tar River counties, has zero vulnerability to storm surge. • None of the previous hazard mitigation plans in the Tar River Region include storm surge as a potential hazard. • No historical events were reported by NCDC.
OTHER HAZARDS			
Wildfire	YES	• Review of FEMA's Multi-Hazard Identification and Risk Assessment • Review of NC State Hazard Mitigation Plan • Review of previous Tar River hazard mitigation plan • Review of Southern Wildfire Risk Assessment (SWRA) Data • Review of the NC Division of Forest Resources website	• Wildfires occur in virtually all parts of the United States. Wildfire hazard risks will increase as low-density development along the urban/wildland interface increases. • Wildfires are discussed in the NC State Hazard Mitigation Plan as a greater hazard of concern; although, the Piedmont Region, which includes the Tar River counties, shares the lowest vulnerability in the state. • The previous hazard mitigation plan addressed wildfire. • A review of SWRA data indicates that there are some areas of elevated concern in the Tar River Region.

4.5 Hazard Identification Results

Table 4-4: Summary Results of the Hazard Identification and Evaluation Process

ATMOSPHERIC HAZARDS	GEOLOGIC HAZARDS

⇛ = Hazard considered significant enough for further evaluation in the Tar River Region hazard risk assessment.

SECTION 5: HAZARD PROFILES

This section includes detailed hazard profiles for each of the hazards identified in the previous section (*Hazard Identification*) as significant enough for further evaluation in the Tar River Regional Hazard Mitigation Plan. It contains the following subsections:

- 5.1 Overview
- 5.2 Study Area
- 5.3 Drought
- 5.4 Extreme Heat
- 5.5 Hurricane and Tropical Storm
- 5.6 Severe Weather
- 5.7 Tornado
- 5.8 Winter Storm
- 5.9 Earthquake
- 5.10 Dam Failure
- 5.11 Flood
- 5.12 Wildfire
- 5.13 Final Determinations

44 CFR Requirement
44 CFR Part 201.6(c)(2)(i): The risk assessment shall include a description of the type, location and extent of all-natural hazards that can affect the jurisdiction. The plan shall include information on previous occurrences of hazard events and on the probability of future hazard events

5.1 Overview

This section includes detailed hazard profiles for each of the hazards identified in the previous section (*Hazard Identification*) as significant enough for further evaluation in the Tar River Region hazard risk assessment by creating a hazard profile. Each hazard profile includes a general description of the hazard, its location and extent, notable historical occurrences, and the probability of future occurrences. Each profile also includes specific items noted by members of the Tar River Regional Hazard Mitigation Planning Team (Planning Team) as it relates to unique historical or anecdotal hazard information for the counties in the Tar River Region, or a participating municipality within them.

The following hazards were identified:

- **Atmospheric**
  - Drought
  - Extreme Heat
  - Hurricane and Tropical Storm
  - Severe Weather
  - Tornado
  - Winter Storm
- **Geologic**
  - Earthquake
- **Hydrologic**
  - Dam Failure
  - Flood
- **Other**
  - Wildfire

5.2 Study Area

The Tar River Region includes four counties: Franklin, Granville, Vance, and Warren. Table 5-1 provides a summary table of the participating jurisdictions within each county. In addition,

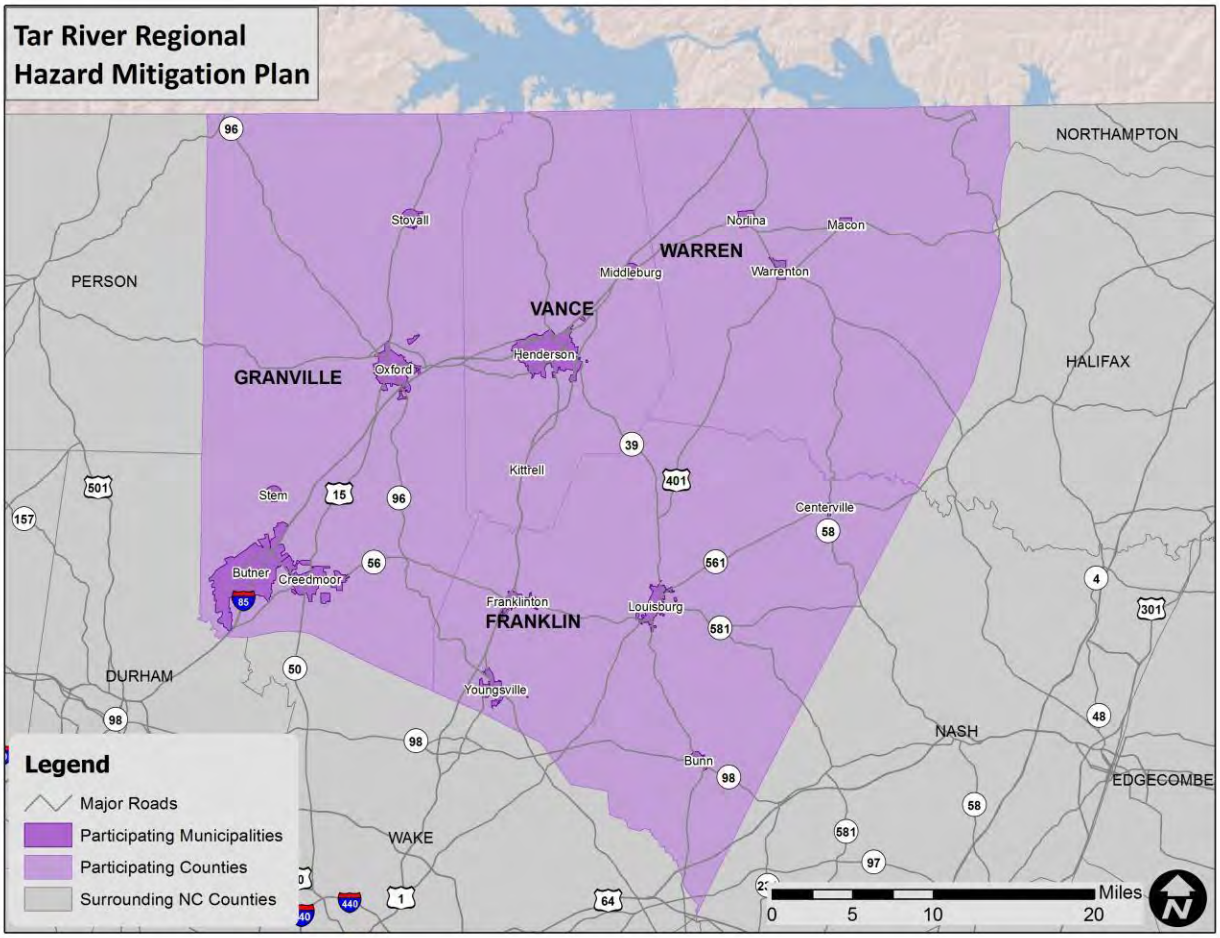

Figure 5-1 provides a base map, for reference, of the Tar River Region.

Table 5-1: Participating Jurisdictions in the Tar River Regional Hazard Mitigation Plan

Franklin County	
Bunn	Louisburg
Centerville (community dissolved in 2017)	Youngsville
Franklinton	
Granville County	
Butner	Stem
Creedmoor	Stovall
Oxford	
Vance County	
Henderson	Middleburg

Kittrell	
Warren County	
Macon	Warrenton
Norlina	

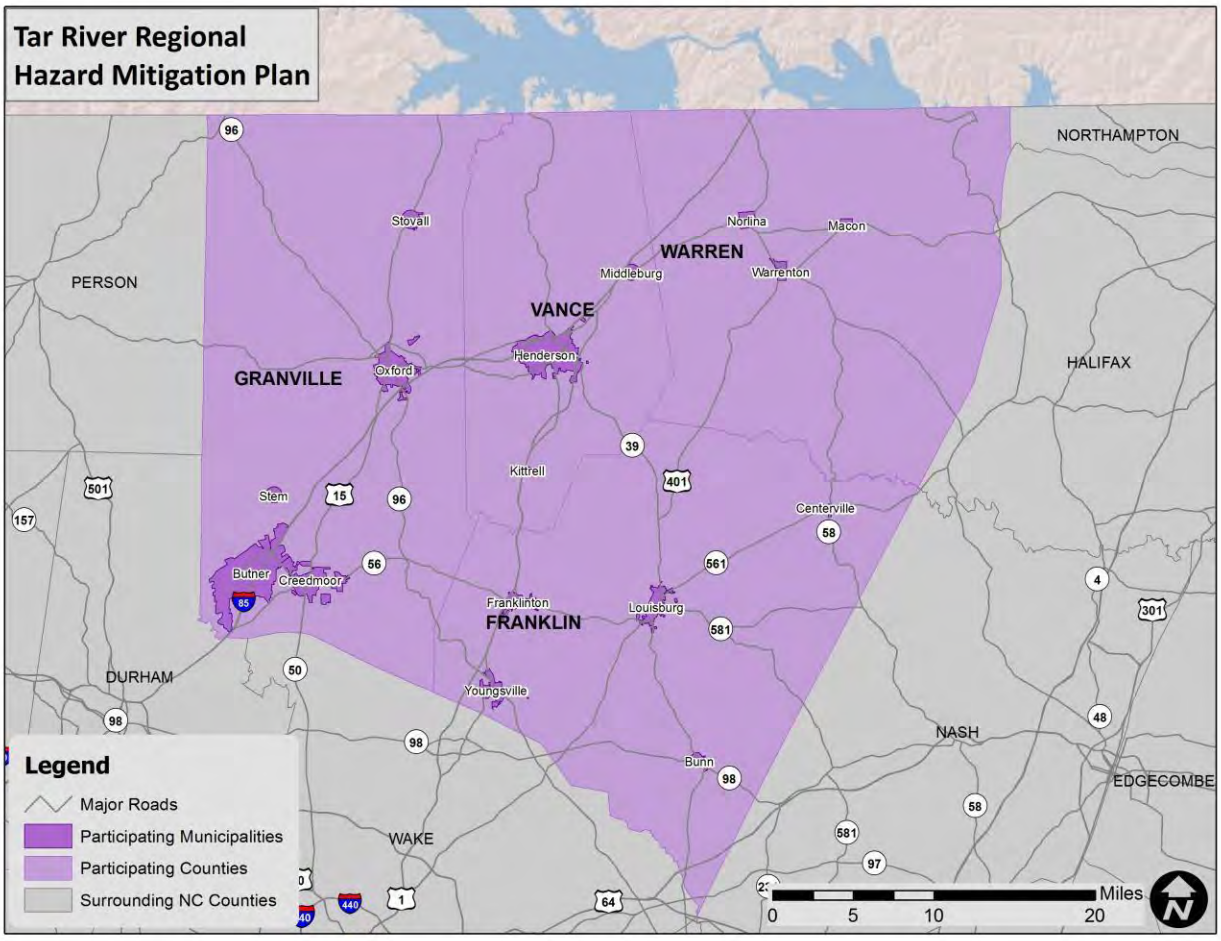

Figure 5-1: Tar River Region Base Map

lists each significant hazard for the Tar River Region and identifies whether or not it has been determined to be a specific hazard of concern for the 15 municipal jurisdictions and each of the 4 county's unincorporated areas. This is the based on the best available data and information from the Planning Team. (● = hazard of concern)

ATMOSPHERIC HAZARDS

5.3 Drought

5.3.1 Background

Drought is a normal part of virtually all climatic regions, including areas with high and low average rainfall. Drought is the consequence of a natural reduction in the amount of precipitation expected over an extended period of time, usually a season or more in length. High temperatures, high winds, and low humidity can exacerbate drought conditions. In addition, human actions and demands for water resources can hasten drought-related impacts. Drought may also lead to more severe wildfires.

Droughts are typically classified into one of four types: 1) meteorological, 2) hydrologic, 3) agricultural, or 4) socioeconomic. **Table 5-3** presents definitions for these types of drought.

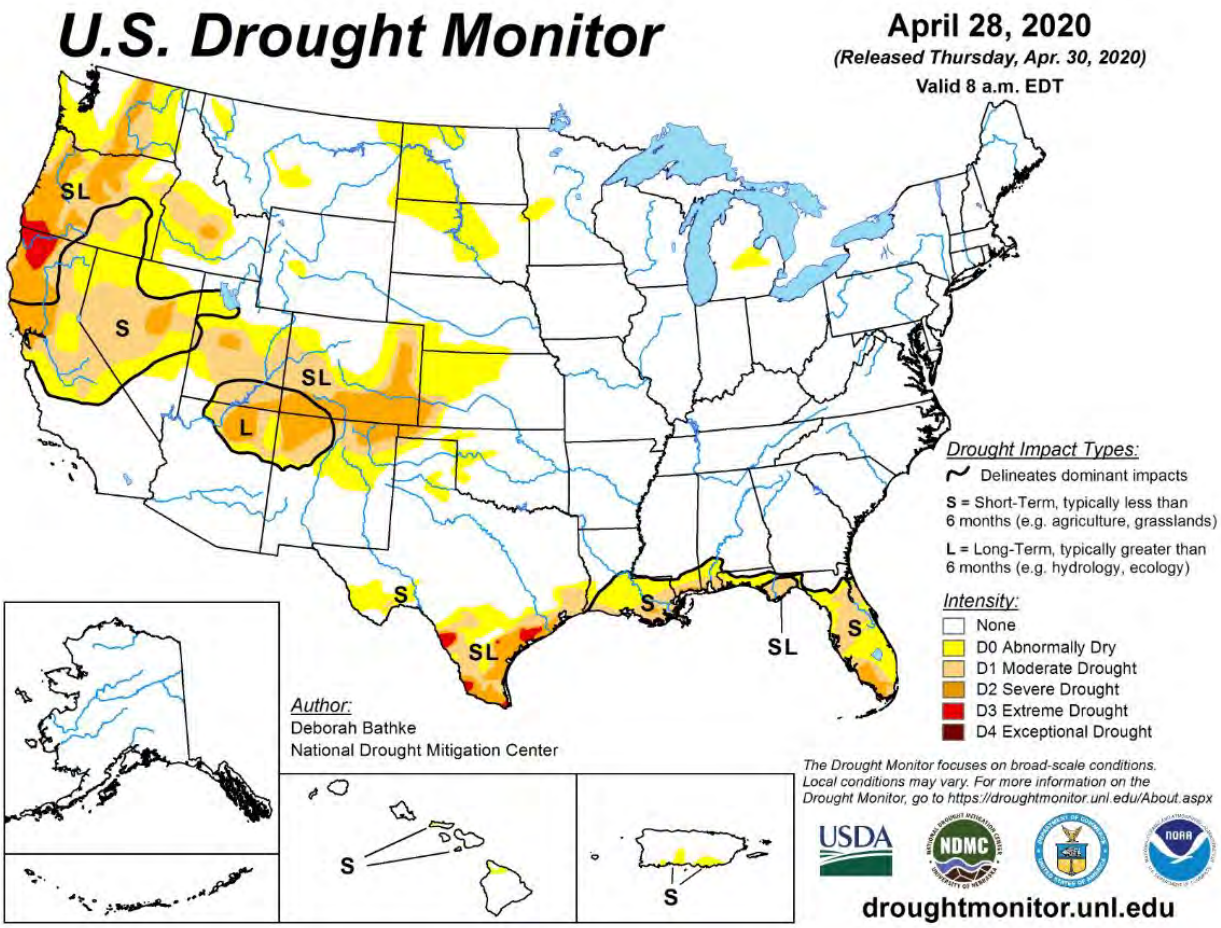

Table 5-3: Drought Classification Definitions

Meteorological Drought	The degree of dryness or departure of actual precipitation from an expected average or normal amount based on monthly, seasonal, or annual time scales.
Hydrologic Drought	The effects of precipitation shortfalls on stream flows and reservoir, lake, and groundwater levels.
Agricultural Drought	Soil moisture deficiencies relative to water demands of plant life, usually crops.
Socioeconomic Drought	The effect of demands for water exceeding the supply as a result of a weather-related supply shortfall.

Source: Multi-Hazard Identification and Risk Assessment: A Cornerstone of the National Mitigation Strategy, FEMA

Droughts are slow-onset hazards, but, over time, can have very damaging affects to crops, municipal water supplies, recreational uses, and wildlife. If drought conditions extend over a number of years, the direct and indirect economic impact can be significant.

The Palmer Drought Severity Index (PDSI) is based on observed drought conditions and range from -0.5 (incipient dry spell) to -4.0 (extreme drought). Evident in **Figure 5-2**, the Palmer Drought Severity Index Summary Map for the United Stated, drought affects most areas of the United States, but is less severe in the Eastern United States.

Source: National Drought Mitigation Center

Figure 5-2: Palmer Drought Severity Index Summary Map for the United States

5.3.2 Location and Spatial Extent

Drought typically covers a large area and cannot be confined to any geographic or political boundaries. According to the Palmer Drought Severity Index (**Figure 5-2**), north central North Carolina has a relatively low risk for drought hazard. However, local areas may experience much more severe and/or frequent drought events than what is represented on the Palmer Drought Severity Index map. Furthermore, it is assumed that the Tar River Region would be uniformly exposed to drought, making the spatial extent potentially widespread. It is also notable that drought conditions typically do not cause significant damage to the built environment. The North Carolina Drought Management Advisory Council reports data on North Carolina drought conditions from 2000 to 2020 through the North Carolina Drought Monitor. It classifies drought conditions by county on a scale of D0 to D4 (which are depicted below):

D0: Abnormally Dry;
D1: Moderate Drought;
D2: Severe Drought;
D3: Extreme Drought; and
D4: Exceptional Drought.

Category	Impact
D0	Pastures are dry; mild crop stress is noted; irrigation increases
	Lawns are brown
D1	Crop stress increases
	Hay production is reduced; producers feed hay to cattle early
	Wildfire danger is higher than the seasonal normal
	Increased signs of wildlife; trees and landscape are drought stressed
	Streamflow is reduced; lake and reservoirs levels decline
	Voluntary water conservation begins
D2	Dryland crop yields are low
	Wildfires are difficult to extinguish
	Swimming areas and boat ramps begin to close
	Voluntary and mandatory water use restrictions are implemented, people are asked to refrain from nonessential water use
D3	Hay is scarce, producers are purchasing outside of state; nitrate levels in forage are high
	Outdoor burn bans are implemented; wildfires are widespread
	Landscaping and greenhouse businesses lose revenue
	Aquatic wildlife is dying; fewer trout are stocked
	Hydropower generation decreases
	Voluntary conservation is requested even in sufficient water level areas; mandatory restrictions become more severe and fines are given to violators; stream levels are extremely low
D4	Producers sell cattle; hay shortages and crop loss occur; farmers are stressed

Category	Impact
	Daily life is affected for all citizens; people pray for rain; drought education seminars increase
	Epizootic hemorrhagic disease is widespread in deer
	Reservoirs are low; officials are counting the days of remaining water supply; well water is low; residents are hauling water

5.3.3 Extent

According to the United States Drought Monitor, all of the counties in the Tar River Region had drought occurrences (including D0: abnormally dry) in at least 18 of the last 20 years (2000-2020) as shown in **Table 5-4**. It should be noted that the United States Drought Monitor also estimates what percentage of the county is in each classification of drought severity. For example, the most severe classification reported may be exceptional, but a majority of the county may actually be in a less severe condition.

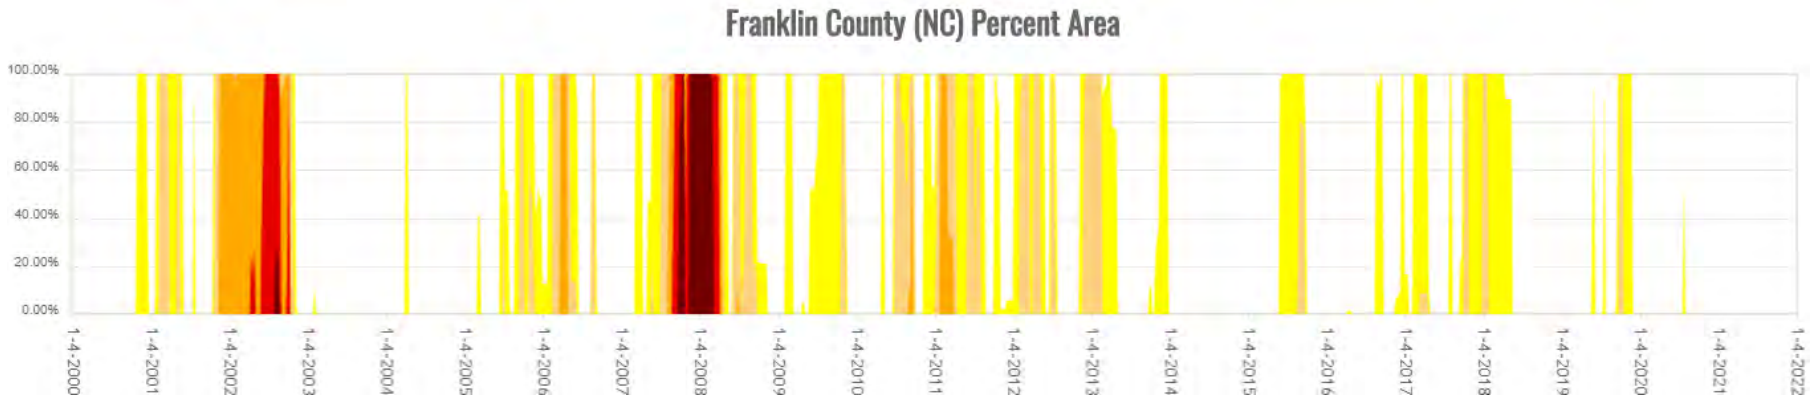

Table 5-4: SUMMARY OF DROUGHT OCCURRENCES IN THE TAR RIVER REGION

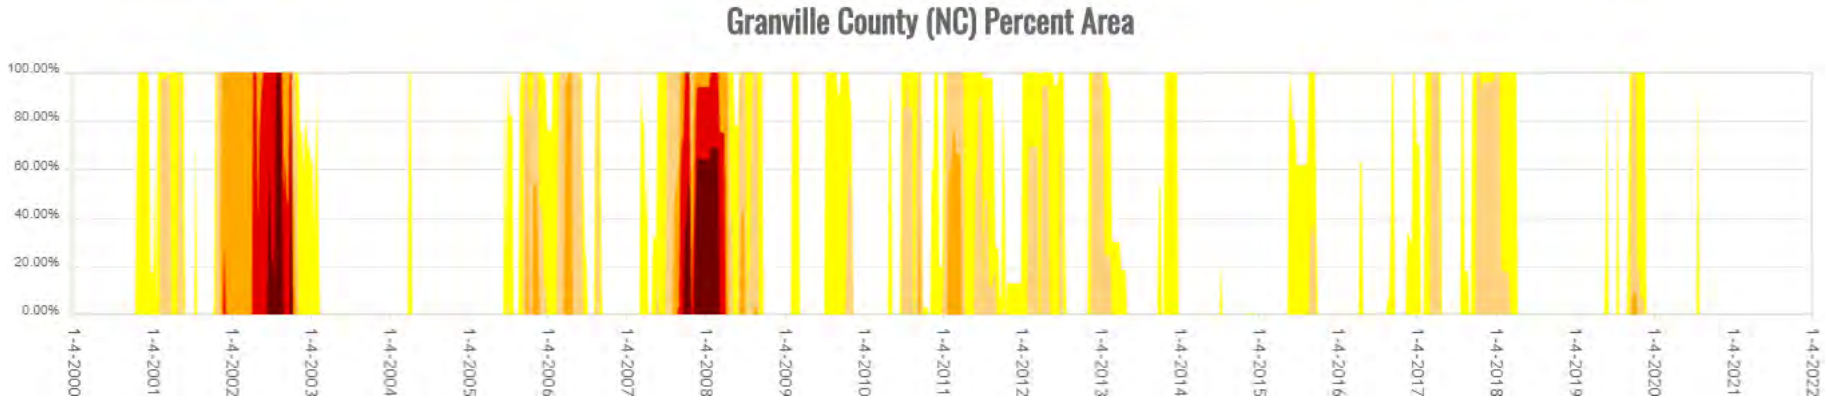

Location	Number Years with Drought Occurrences	Number Years with Exceptional Drought Occurrences
Franklin County	1	3
Granville County	2	3
Vance County	1	3
Warren County	18	3

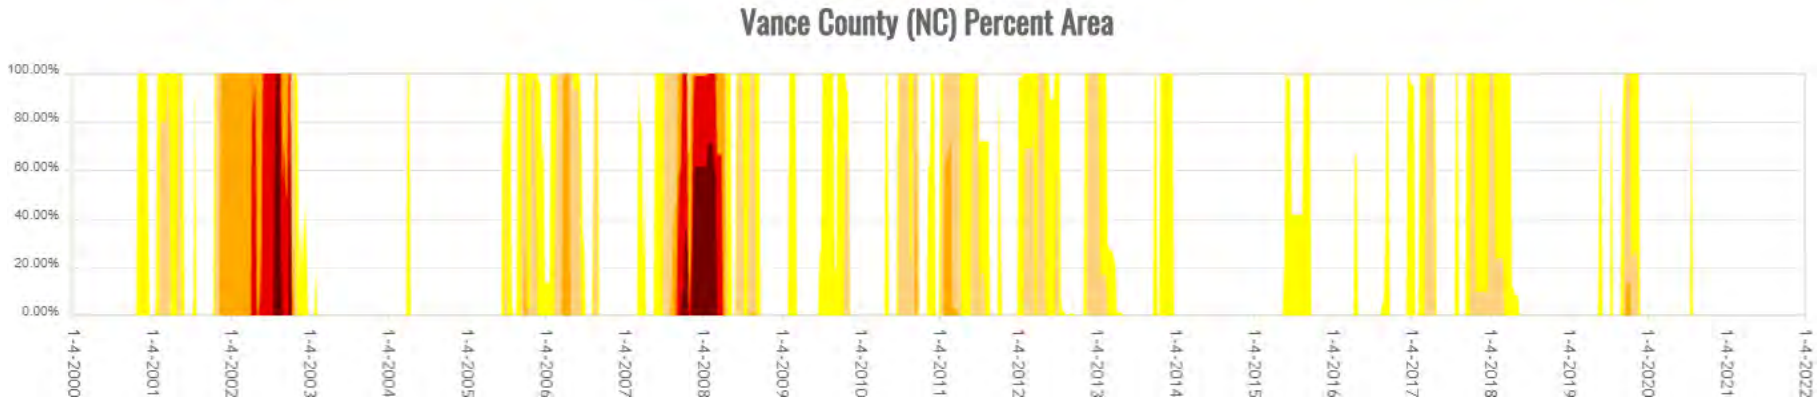

Source: United States Drought Monitor

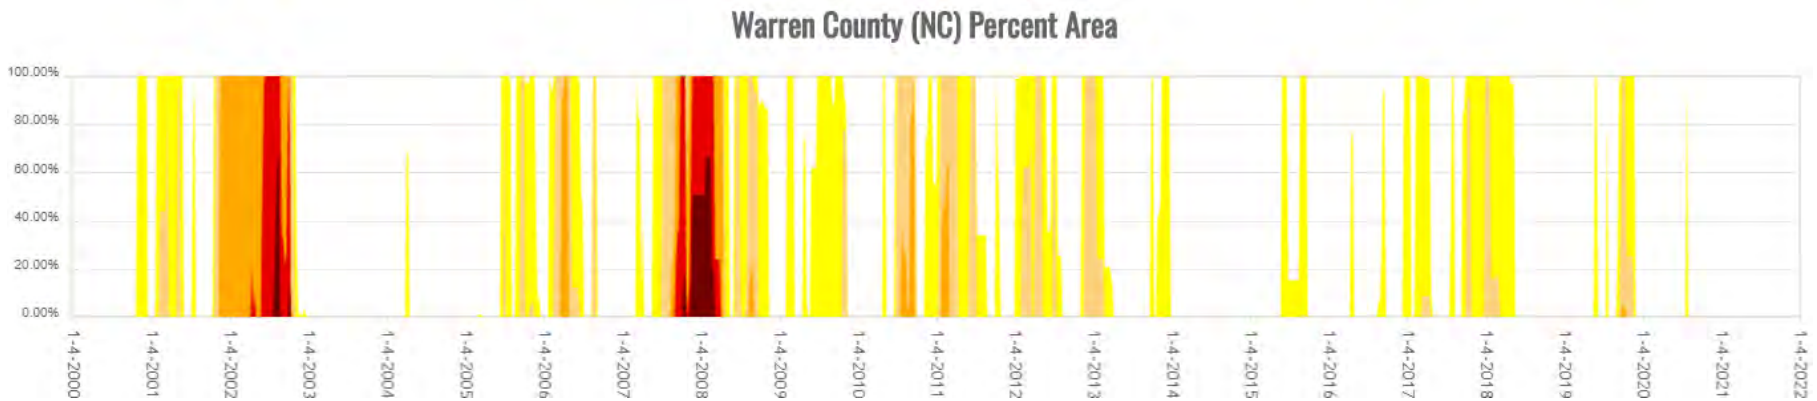

The North Carolina State Climate Office also reports data on North Carolina drought conditions from 2000 to 2020. It classifies drought conditions based on the Palmer Drought Severity Index (-4.0 to 4.0). According to the North Carolina State Climate Office, the Tar River Region has experienced at least moderate drought in 8 of the last 20 years. The region's highest level of drought each year according to the Palmer Drought Severity Index can be found in **Table 5-5.**

5.3.4 Historical Occurrences

Data from the United States Drought Monitor and North Carolina State Climate Office were used to ascertain historical drought events in the Tar River Region. The United States Drought Monitor reports data on North Carolina drought conditions from 2000 to 2015. It classifies drought by county on a scale of D0 to D4 where:

- D0: Abnormally Dry
- D1: Moderate Drought
- D2: Severe Drought
- D3: Extreme Drought
- D4: Exceptional Drought

According to the United States Drought Monitor, all of the counties in the Tar River Region had drought occurrences (including D0: abnormally dry) in at least 18 of the last 20 years (2000-2020) as shown in **Table 5.6**. It should be noted that the United States Drought Monitor also estimates what percentage of the county is in each classification of drought severity. For example, the most severe classification reported may be exceptional, but a majority of the county may actually be in a less severe condition.

Table 5-6: Summary of Drought Occurrences in the Tar River Region

Location	Number Years with Drought Occurrences	Number Years with Exceptional Drought Occurrences
Franklin County	19	3
Granville County	20	3
Vance County	19	3
Warren County	18	3

5.3.6 Consequence and Impact Analysis

People

Drought can affect people's health and safety. Examples of drought impacts on society include anxiety or depression about economic losses, conflicts when there is not enough water, reduced incomes, fewer recreational activities, higher incidents of heat stroke, and even loss of human life all of the jurisdictions are vulnerable in this respect.

First Responders

The overall effect on first responders would be relatively limited when compared to other hazards. Exceptional drought conditions may impact the amount of water immediately available to respond to wildfires.

Continuity of Operations

Drought would have minimal impacts on continuity of operations due to the relatively long warning time that would allow for plans to be made to maintain continuity of operations.

Built Environment

Drought has the potential to affect water supply for residential, commercial, institutional, industrial, and government-owned areas. Drought can reduce water supply in wells and reservoirs. When drought conditions persist with no relief, local or State governments must often institute water restrictions.

Economy

Examples of economic impacts include farmers who lose money because drought destroyed their crops or who may have to spend more money to feed and water their animals. Businesses that depend on farming, like companies that make tractors and food, may lose business when drought damages crops or livestock. Extreme drought also has the potential to impact local businesses such as landscaping, recreation and tourism, and public utilities. Businesses that sell boats and fishing equipment may not be able to sell some of their goods because drought has dried up lakes and other water sources. Granville County and the jurisdictions of Louisburg and Youngsville appear to be more vulnerable to this impact.

Natural Environment

Plants and animals depend on water, just as people do. Drought can shrink their food supplies and damage their habitats. Sometimes this damage is only temporary, and other times it is irreversible.

Drought conditions can also provide a substantial increase in wildfire risk. As plants and trees wither and die from a lack of precipitation, increased insect infestations, and diseases—all of which are associated with drought—they become fuel for wildfires. Long periods of drought can equate to more wildfires and more intense wildfires, which affect the economy, the environment, and society in many ways such as by destroying neighborhoods, crops, and habitats.

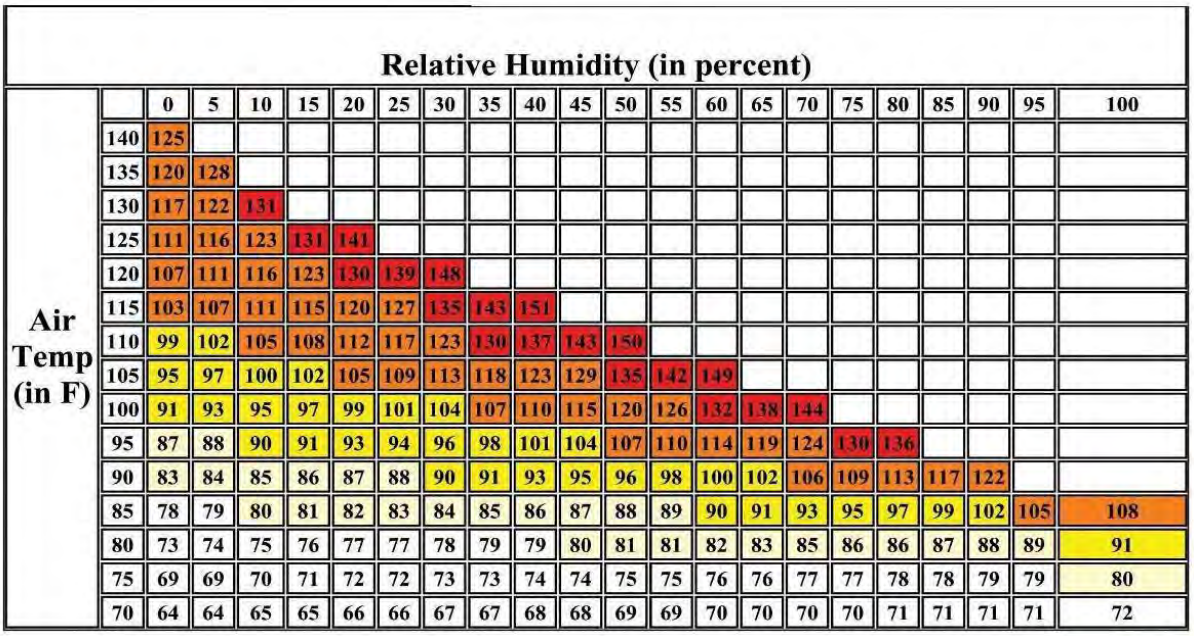

5.4 Extreme Heat

5.4.1 Background

Extreme heat, like drought, poses little risk to property. However, extreme heat can have devastating effects on health. Extreme heat is often referred to as a "heat wave." According to the National Weather Service, there is no universal definition for a heat wave, but the standard U.S. definition is any event lasting at least three days where temperatures reach ninety degrees Fahrenheit or higher. However, it may also be defined as an event at least three days long where temperatures are ten degrees greater than the normal temperature for the affected area. Heat waves are typically accompanied by humidity but may also be very dry.

According to the National Oceanic and Atmospheric Administration, heat is the number one weather-related killer among natural hazards, followed by frigid winter temperatures. The National Weather Service devised the Heat Index as a mechanism to better inform the public of heat dangers. The Heat Index Chart, shown in **Figure 5-3**, uses air temperature and humidity to determine the heat index or apparent temperature. **Table 5-7** shows the dangers associated with different heat index temperatures. Some populations, such as the elderly and young, are more susceptible to heat danger than other segments of the population.

Figure 5-3. Heat Index Chart

Air Temp (in F) \ Relative Humidity (in percent)	0	5	10	15	20	25	30	35	40	45	50	55	60	65	70	75	80	85	90	95	100

Table 5-7: Heat Disorders Associated with Heat Index Temperature

Heat Index Temperature (Fahrenheit)	Description of Risks
80°- 90°	Fatigue possible with prolonged exposure and/or physical activity
90°- 105°	Sunstroke, heat cramps, and heat exhaustion possible with prolonged exposure and/or physical activity
105°- 130°	Sunstroke, heat cramps, and heat exhaustion likely, and heatstroke possible with prolonged exposure and/or physical activity
130° or higher	Heatstroke or sunstroke is highly likely with continued exposure

Source: National Weather Service, National Oceanic and Atmospheric Administration

Finally, it should be noted that stagnant atmospheric conditions trap pollutants, thus adding unhealthy air to excessively hot temperatures. In addition, the "urban heat island effect" can produce significantly higher nighttime temperatures because asphalt and concrete (which store heat longer) gradually release heat at night. Thus, urban areas tend to be at greater risk to heat effects.

5.4.2 Location and Spatial Extent

Excessive heat typically impacts a large area and cannot be confined to any geographic or political boundaries. The entire Tar River Region is susceptible to extreme heat conditions.

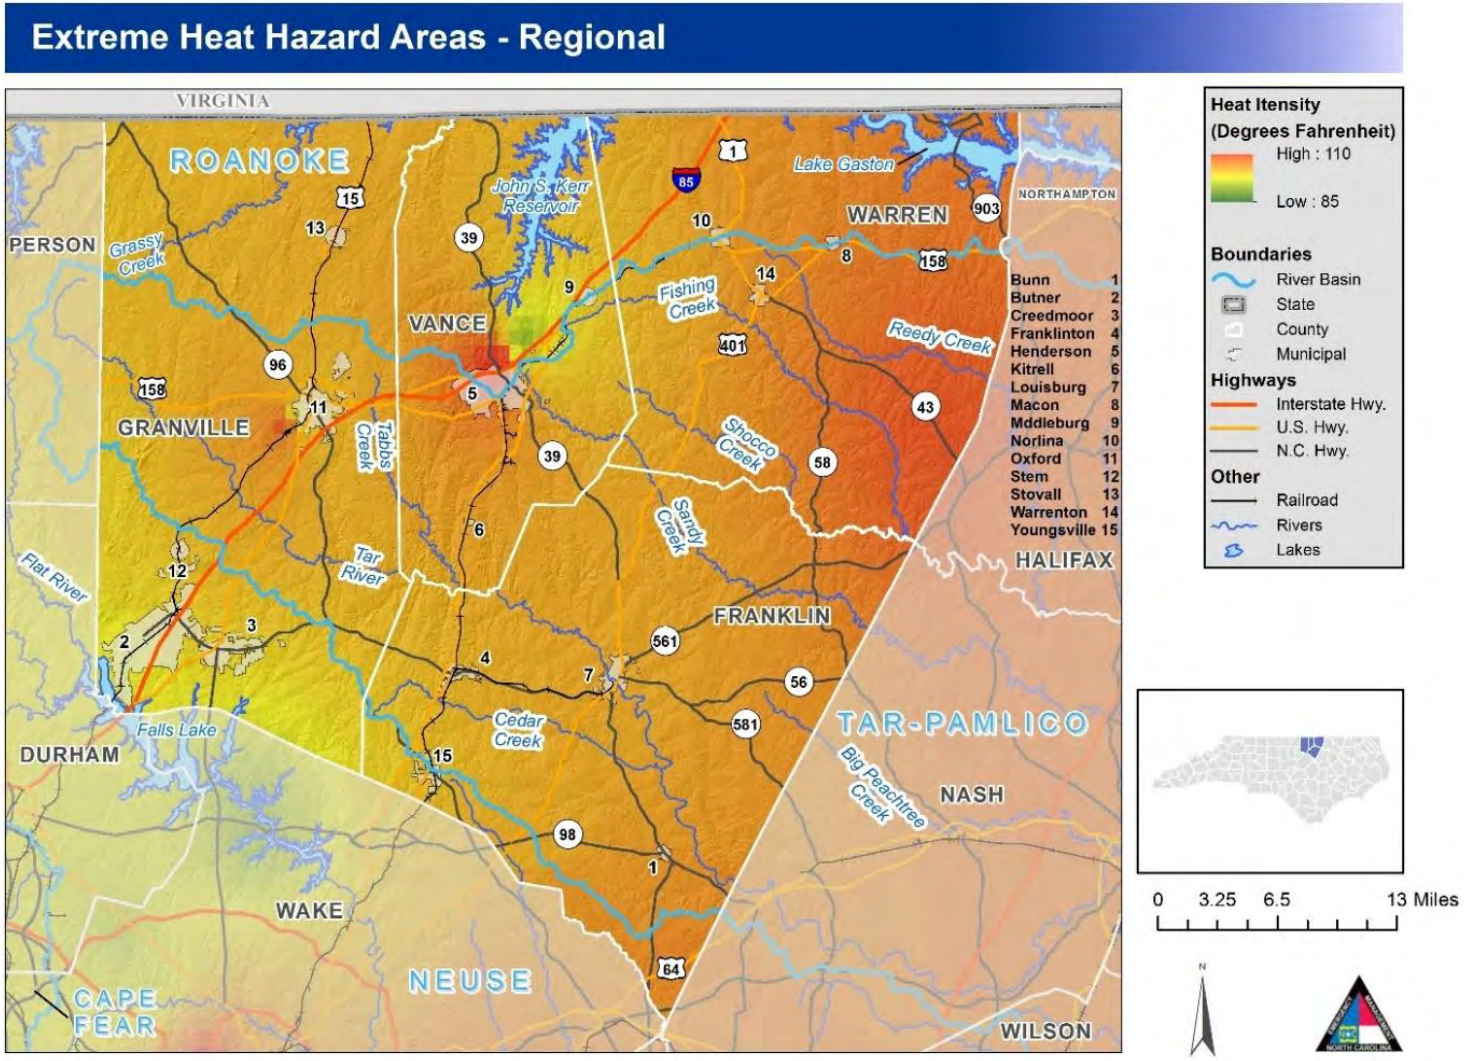

Figure 5-4: **Extreme Heat Hazard Areas - Regional**

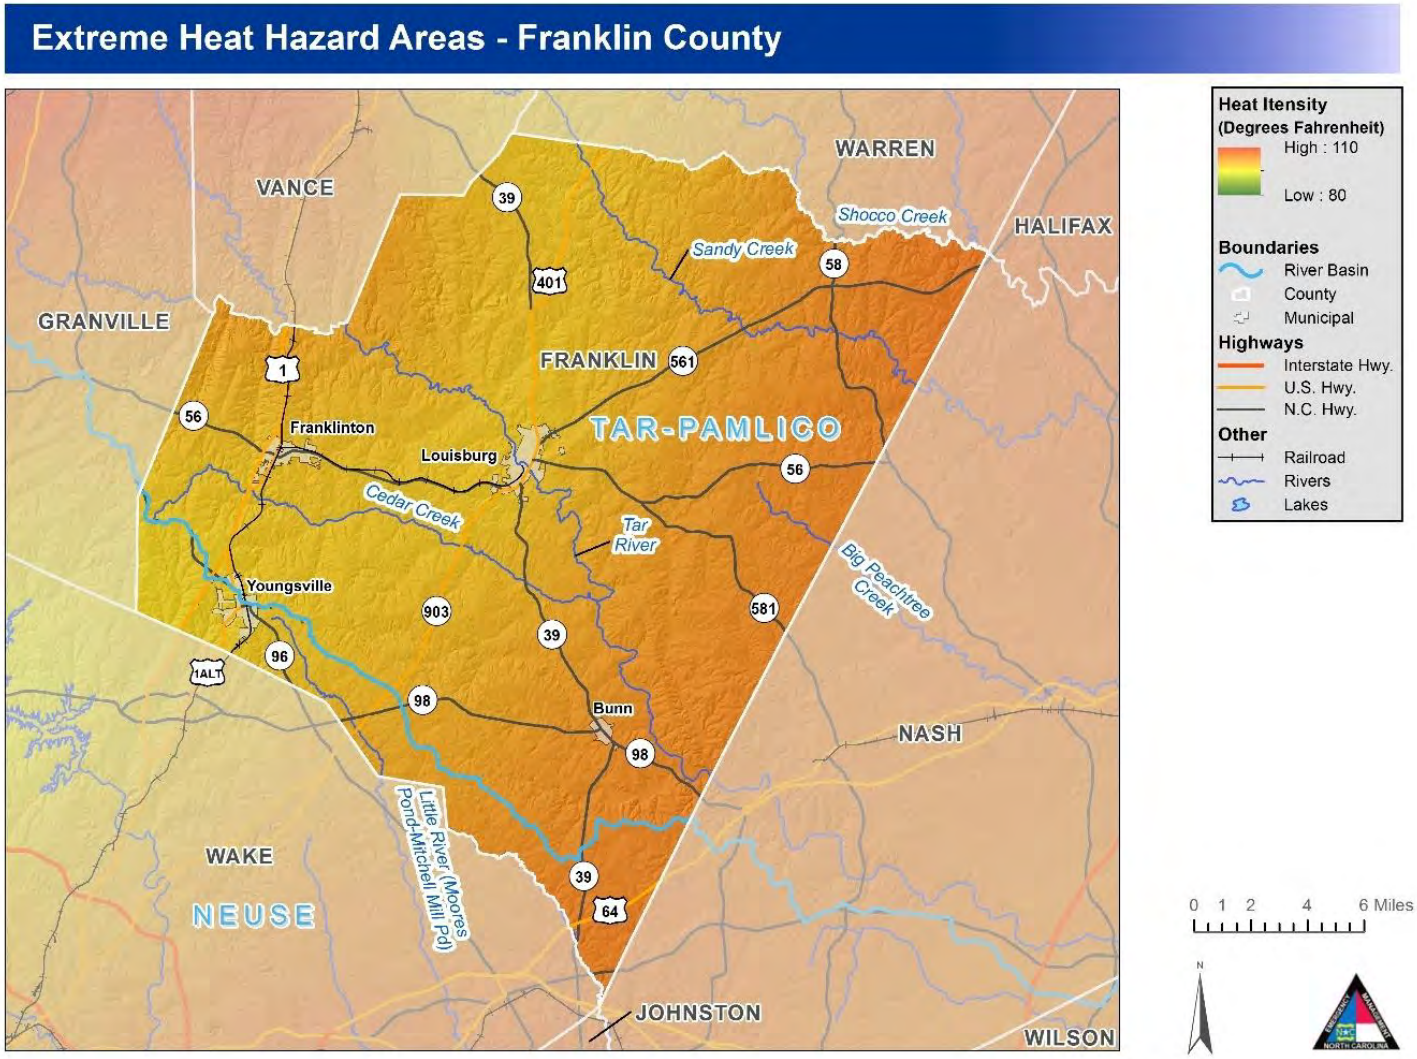

Figure 5-5: **Extreme Heat Hazard Areas – Franklin County**

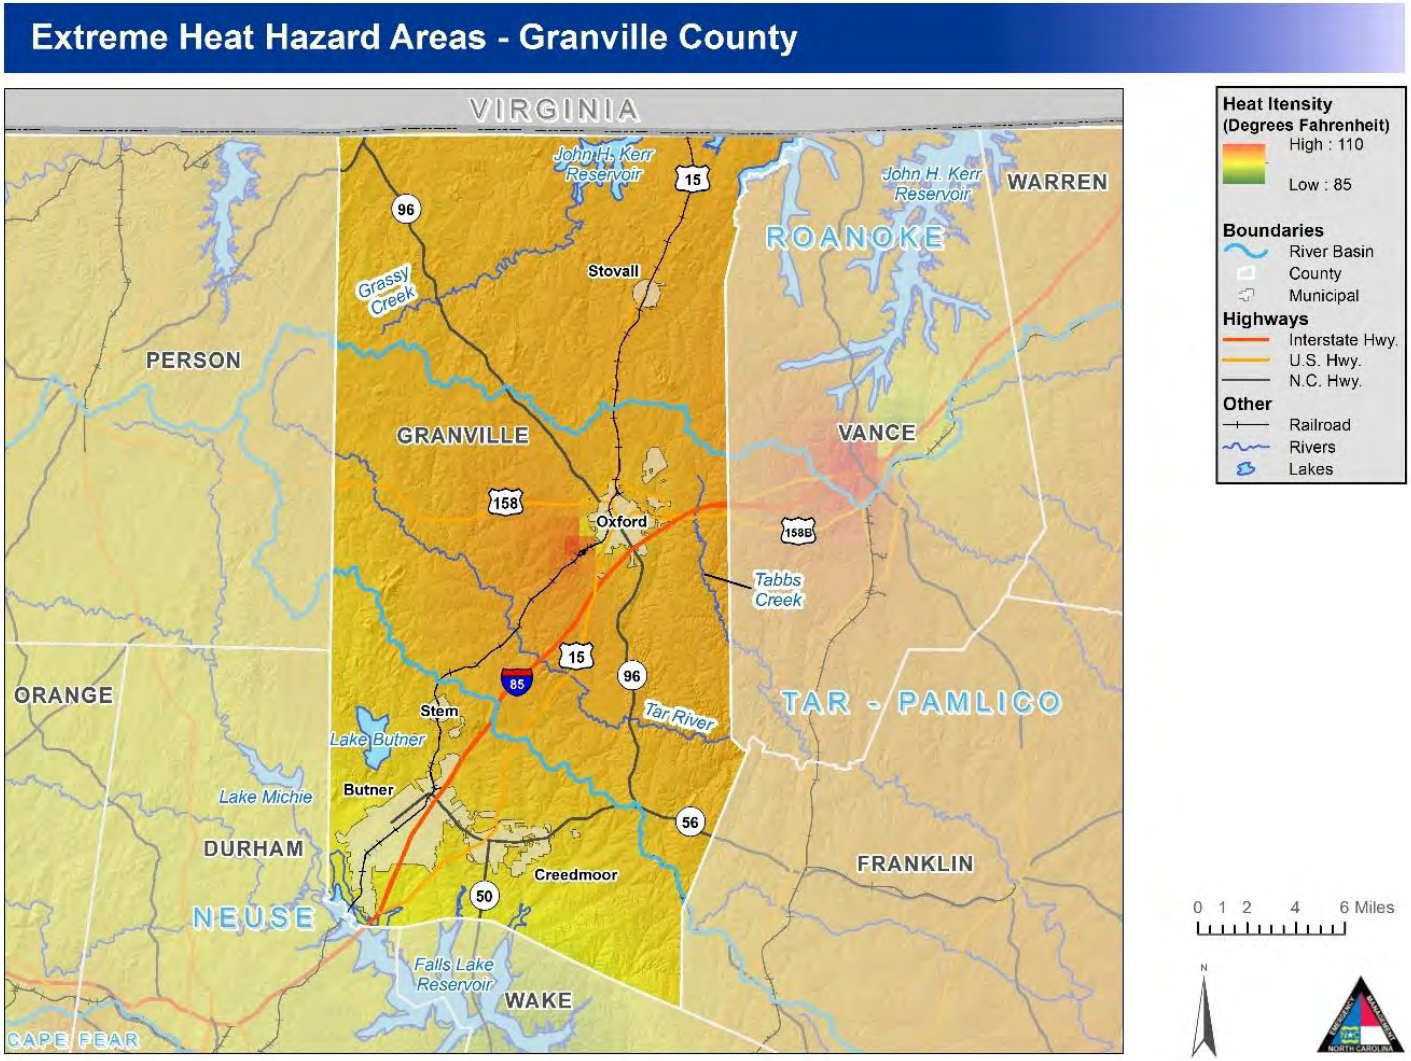

Figure 5-6: **Extreme Heat Hazard Areas – Granville County**

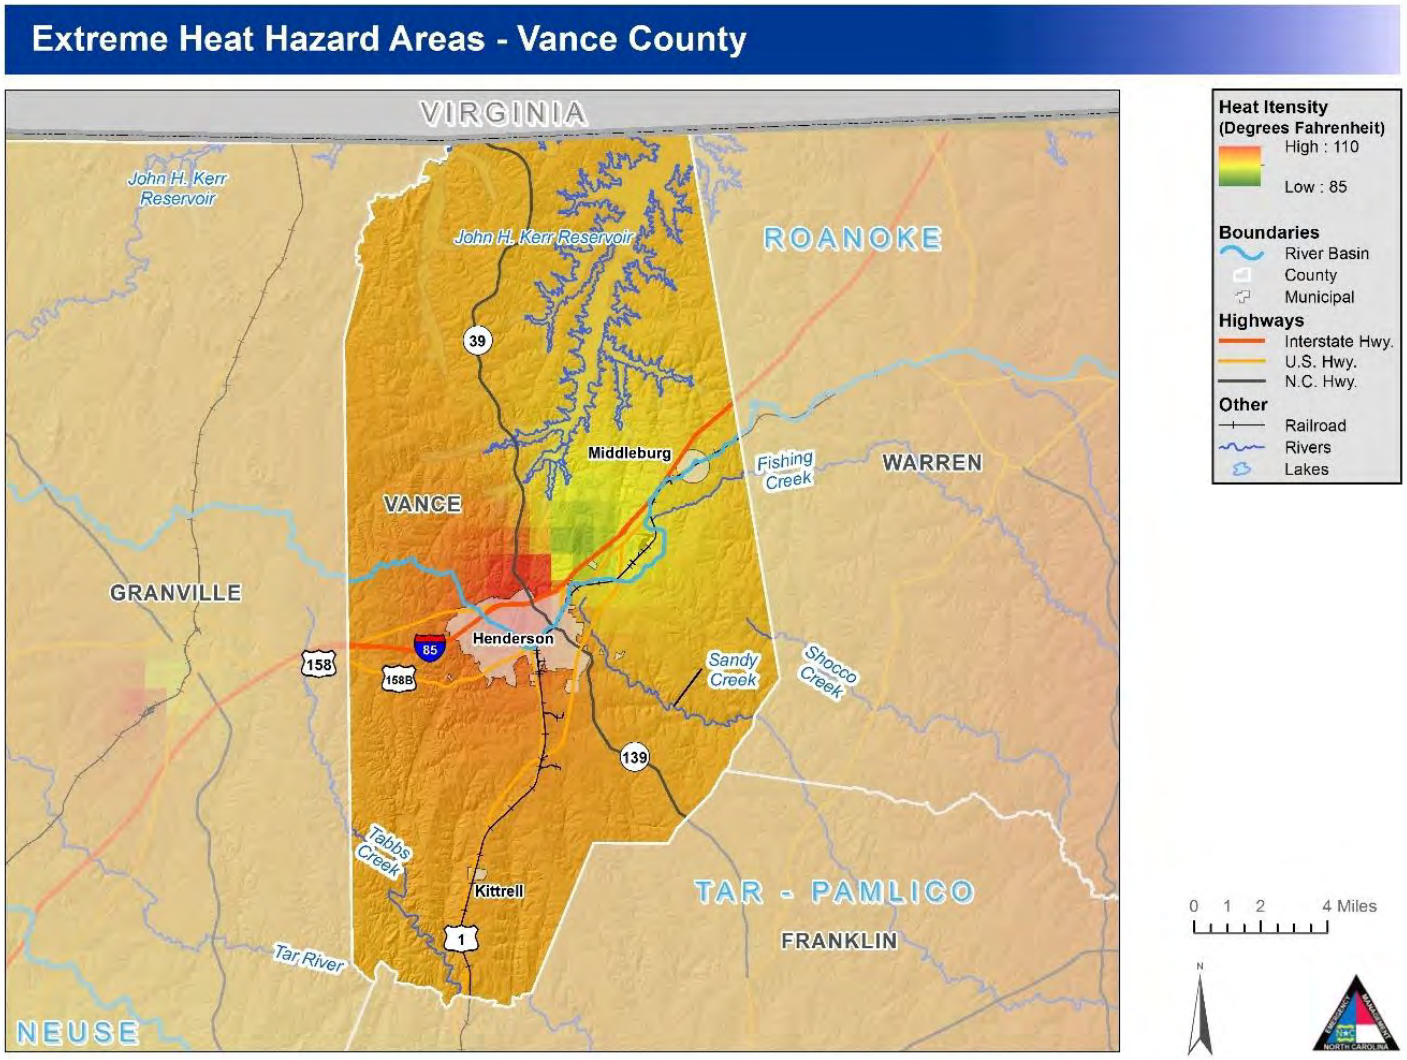

Figure 5-7: **Extreme Heat Hazard Areas – Vance County**

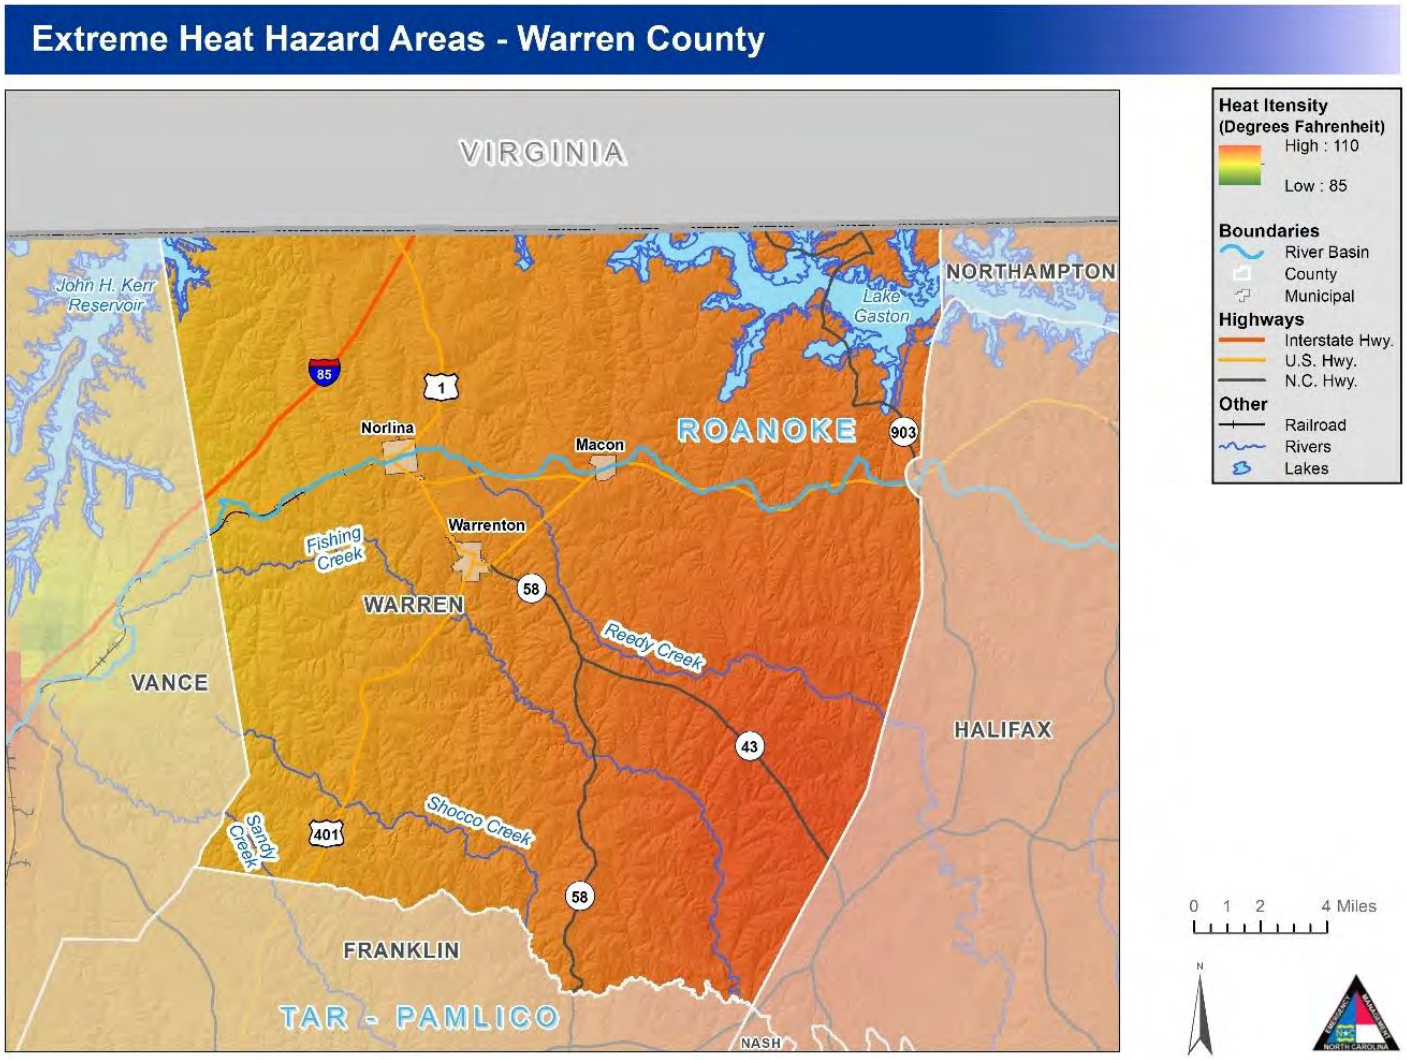

Figure 5-8: **Extreme Heat Hazard Areas – Warren County**

5.4.3 Extent

Data from the National Climatic Data Center was used to determine historical extreme heat and heat wave events in the Tar River Region. One event was reported:

July 22, 1998 – *Heat* – Excessive heat plagued central North Carolina during July 22 through July 23. Maximum temperatures reached the 98 to 103-degree range combined with dew points in the 78 to 80-degree range with little wind to give heat index values of around 110 degrees for several hours each afternoon. To make matters worse, the minimum temperatures did not fall below 80 at several locations and those that did achieved that feat for only an hour or two. Strong thunderstorms ended the 2-day excessive heat ordeal on the evening of the 23 when rain cooled the environment enough to send temperatures into the lower 70s at most locations.

In addition, information from the State Climate Office of North Carolina was reviewed to obtain historical temperature records in the region. Temperature information has been reported since 1893. The recorded maximum for each county can be found below in **Table 5-8**.

Table 5-8: Highest Recorded Temperature in the Tar River Region

Location	Date	Temperature (°F)
Franklin County	7/27/1940	107
Granville County	8/31/1932	106
Vance County	7/21/1926	106
Warren County	6/19/1944	104
TAR RIVER REGION MAXIMUM	**--**	**107**

Source: State Climate Office of North Carolina

5.4.4 Historical Occurrences

The State Climate Office also reports average maximum temperatures in various locations in the region. The most centralized location is in Henderson (Vance County). **Table 5-9** shows the average maximum temperatures from 1971 to 2020 at the Henderson observation station which can be used as a general comparison for the region.

Table 5-9: Average Maximum Temperature in the Tar River Region

5.4.5 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future Extreme Heat is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 1% Annual Probability
- Medium: Between 1% And 10% Annual Probability
- High: More Than 10% Annual Probability

Jurisdiction	Calculated Probability (IRISK)
City of Creedmoor	Low
City of Henderson	Low
City of Oxford	Low
Franklin County (Unincorporated Area)	Low
Granville County (Unincorporated Area)	Low
Town of Bunn	Low
Town of Butner	Low
Town of Franklinton	Low
Town of Kittrell	Low
Town of Louisburg	Low
Town of Macon	Low

Town of Stem	Low
Town of Stovall	Low
Town of Warrenton	Low
Town of Youngsville	Low
Vance County (Unincorporated Area)	Low
Warren County (Unincorporated Area)	Low

5.4.6 Consequence and Impact Analysis

People

Extreme heat can affect people's health and leads to higher incidents of heat stroke, and even loss of human life. Staying hydrated and avoiding strenuous exercise outdoors during extreme heat patterns can prevent adverse health risks. Individuals with underlying health issues or those located in rural areas may be vulnerable due to medical access issues.

Built Environment

Updating building codes and landscape best management practices can increase energy efficiency during extreme heat phases. Local governments could provide public drinking fountains, cooling shelters, and swimming pools to keep individuals cooled off.

Economy

All jurisdictions in the Region are vulnerable to extreme heat whereas employees are less likely to be productive during extreme heat events. Lower productivity levels are associated with heat exhaustion.

Agriculture

Livestock are susceptible to heat-related illnesses during bouts of extreme heat. In addition, crop yields may be negatively impacted if extreme heat occurs during key development stages. Jurisdictions most vulnerable to this would be Franklin and Warren County.

Natural Environment

When trees are replaced with impervious surfaces and materials in urban areas it contributes to the heat island effect. Urban forests (street trees and wooded areas) can mitigate heat islands, reducing local air temperatures by up to 9°Farenheit.

5.5 Hurricane and Tropical Storm

5.5.1 Background

Hurricanes and tropical storms are classified as tropical cyclones and defined as any closed circulation developing around a low-pressure center in which the winds rotate counterclockwise in the Northern Hemisphere (or clockwise in the Southern Hemisphere) and whose diameter averages 10 to 30 miles across. A tropical cyclone refers to any such circulation that develops over tropical waters. Tropical cyclones act as a "safety-valve," limiting the continued build-up of heat and energy in tropical regions by maintaining the atmospheric heat and moisture balance between the tropics and the pole-ward latitudes. The primary damaging forces associated with these storms are high-level sustained winds, heavy precipitation, and tornadoes.

The key energy source for a tropical cyclone is the release of latent heat from the condensation of warm water. Their formation requires a low-pressure disturbance, warm sea surface temperature, rotational force from the spinning of the earth, and the absence of wind shear in the lowest 50,000 feet of the atmosphere. The majority of hurricanes and tropical storms form in the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico during the official Atlantic hurricane season, which encompasses the months of June through November. The peak of the Atlantic hurricane season is in early to mid-September and the average number of storms that reach hurricane intensity per year in the Atlantic basin is about six.

As an incipient hurricane develops, barometric pressure (measured in millibars or inches) at its center falls and winds increase. If the atmospheric and oceanic conditions are favorable, it can intensify into a tropical depression. When maximum sustained winds reach or exceed 39 miles per hour, the system is

designated a tropical storm, given a name, and is closely monitored by the National Hurricane Center in Miami, Florida. When sustained winds reach or exceed 74 miles per hour the storm is deemed a hurricane. Hurricane intensity is further classified by the Saffir-Simpson Scale **Table 5-10**, which rates hurricane intensity on a scale of 1 to 5, with 5 being the most intense.

Table 5-10: Saffir-Simpson Scale

Category	Maximum Sustained Wind Speed (MPH)	Minimum Surface Pressure (Millibars)
1	74–95	Greater than 980
2	96–110	979–965
3	111–129	964–945
4	130–156	944–920
5	157 +	Less than 920

Source: National Hurricane Center (2012)

The Saffir-Simpson Scale categorizes hurricane intensity linearly based upon maximum sustained winds and barometric pressure, which are combined to estimate potential damage. Categories 3, 4, and 5 are classified as "major" hurricanes and, while hurricanes within this range comprise only 20 percent of total tropical cyclone landfalls, they account for over 70 percent of the damage in the United States. **Table 5-11** describes the damage that could be expected for each category of hurricane. Damage during hurricanes may also result from spawned tornadoes, storm surge, and inland flooding associated with heavy rainfall that usually accompanies these storms.

Table 5-11: Hurricane Damage Classification

Storm Category	Damage Level	Description of Damages	Photo Example
1	MINIMAL	No real damage to building structures. Damage primarily to unanchored mobile homes, shrubbery, and trees. Also, some coastal flooding and minor pier damage.	
2	MODERATE	Some roofing material, door, and window damage. Considerable damage to vegetation, mobile homes, etc. Flooding damages piers and small craft in unprotected moorings may break their moorings.	
3	EXTENSIVE	Some structural damage to small residences and utility buildings, with a minor amount of curtainwall failures. Mobile homes are destroyed. Flooding near the coast destroys smaller structures, with larger structures damaged by floating debris. Terrain may be flooded well inland.	

4	EXTREME	More extensive curtainwall failures with some complete roof structure failure on small residences. Major erosion of beach areas. Terrain may be flooded well inland.	
5	CATASTROPHIC	Complete roof failure on many residences and industrial buildings. Some complete building failures with small utility buildings blown over or away. Flooding causes major damage to lower floors of all structures near the shoreline. Massive evacuation of residential areas may be required.	

Source: National Hurricane Center; Federal Emergency Management Agency

5.5.2 Location and Spatial Extent

Hurricanes and tropical storms threaten the entire Atlantic and Gulf seaboard of the United States. While coastal areas are most directly exposed to the brunt of landfalling storms, their impact is often felt hundreds of miles inland and they can affect Tar River Region. All areas in the Tar River Region are equally susceptible to hurricane and tropical storms.

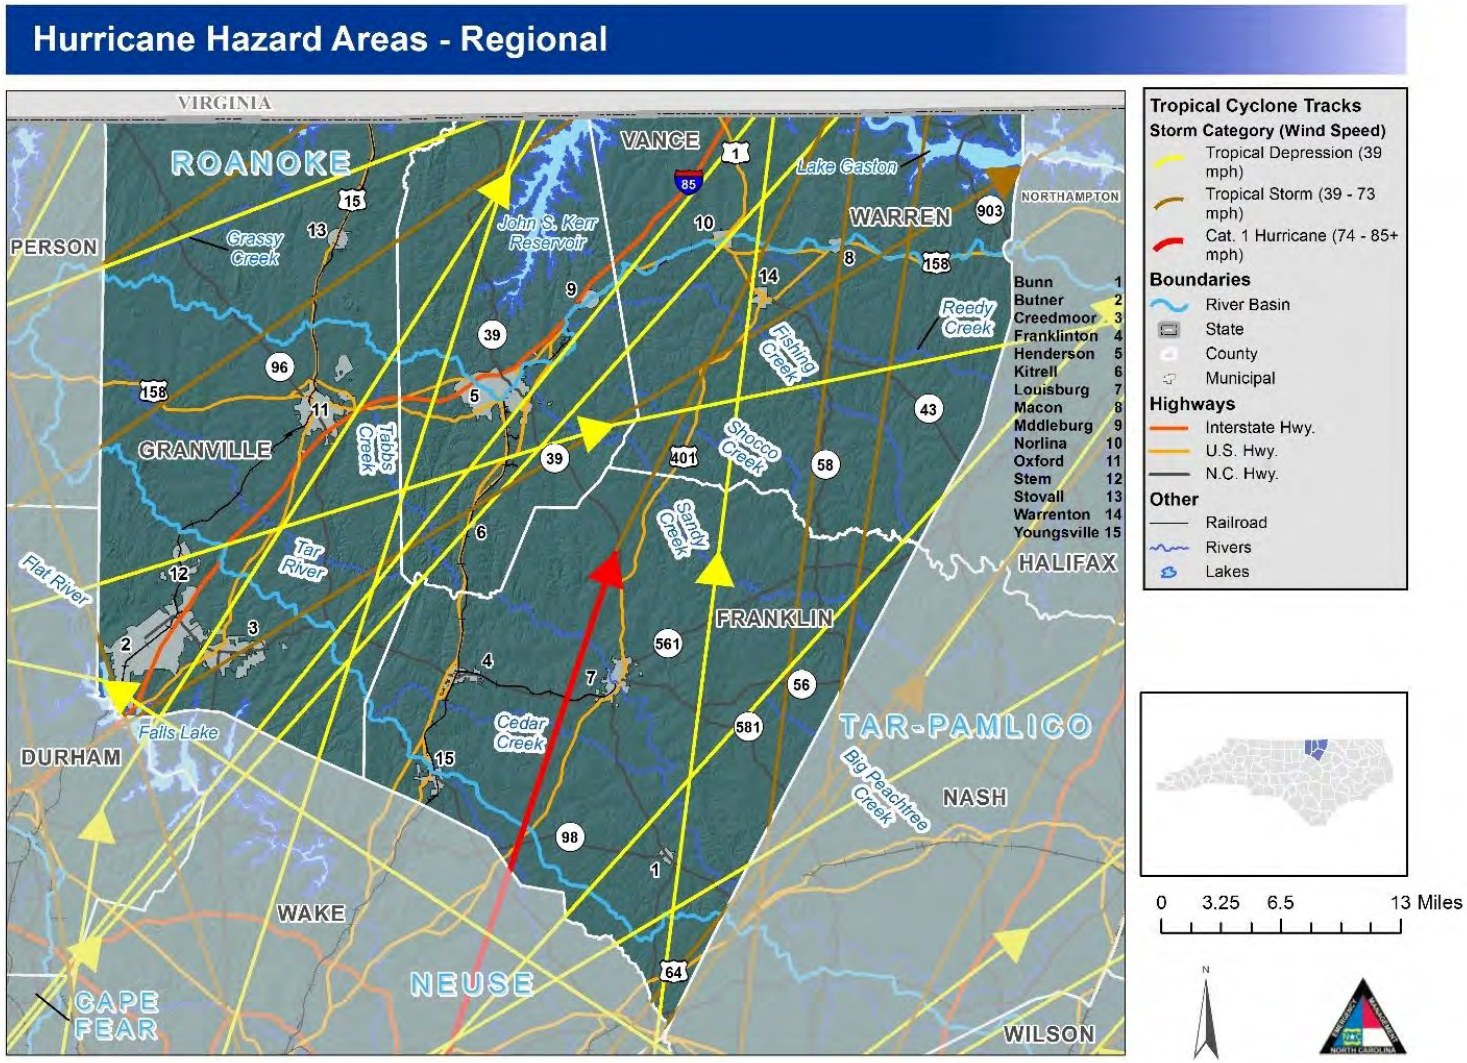

Figure 5-9: **Hurricane Hazard Areas – Regional**

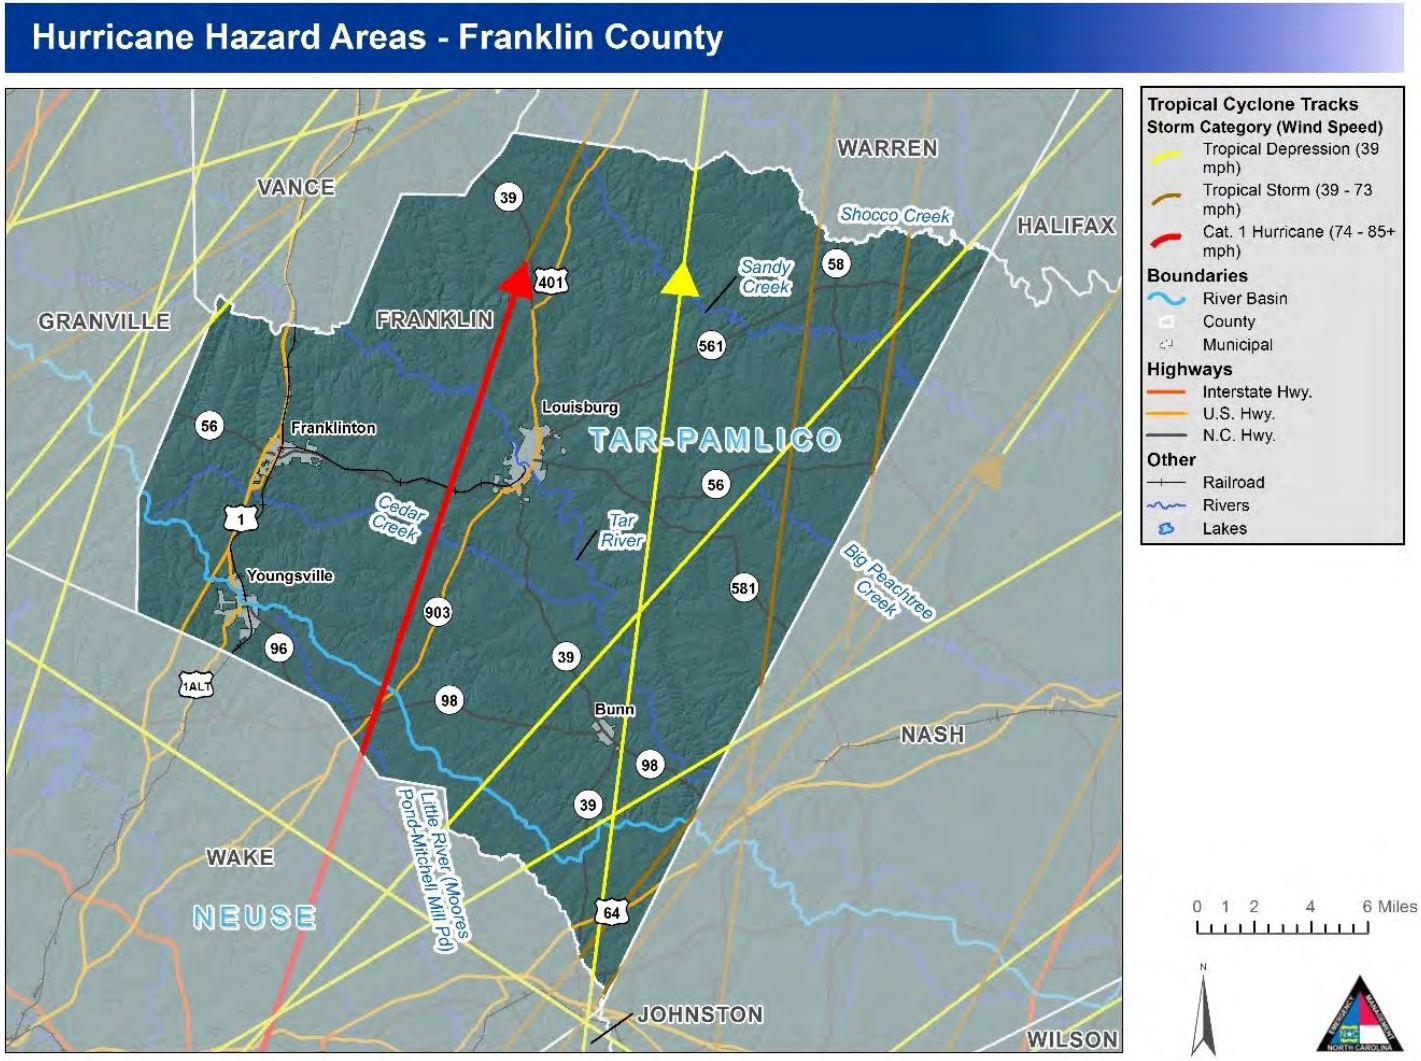

Figure 5-10: Hurricane Hazard Areas – Franklin County

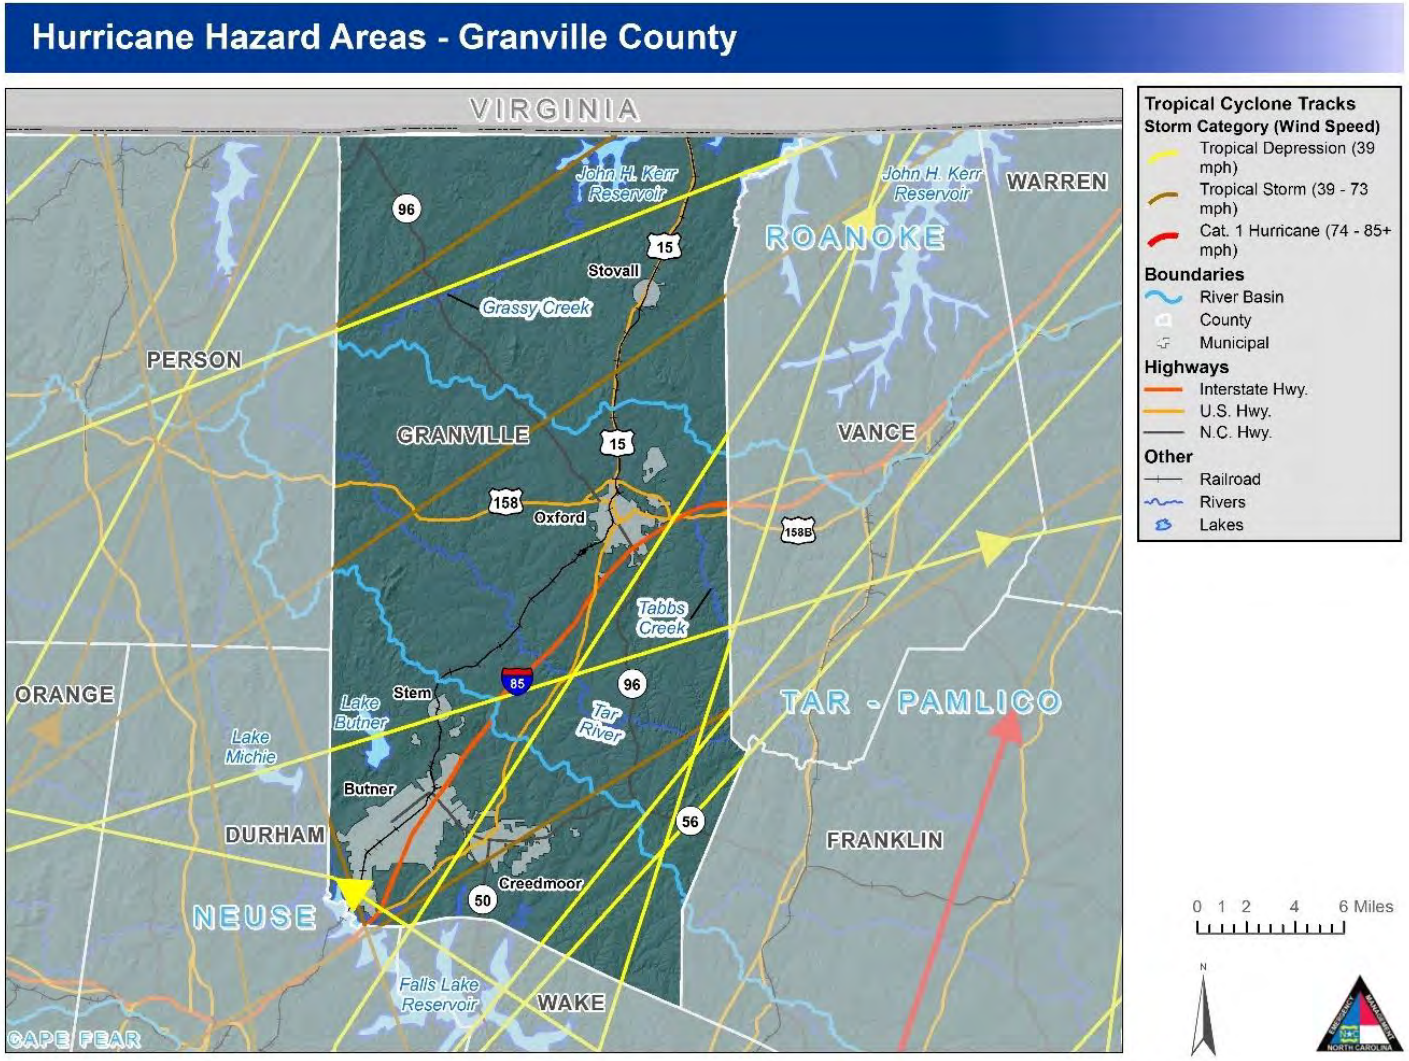

Figure 5-11: **Hurricane Hazard Areas – Granville County**

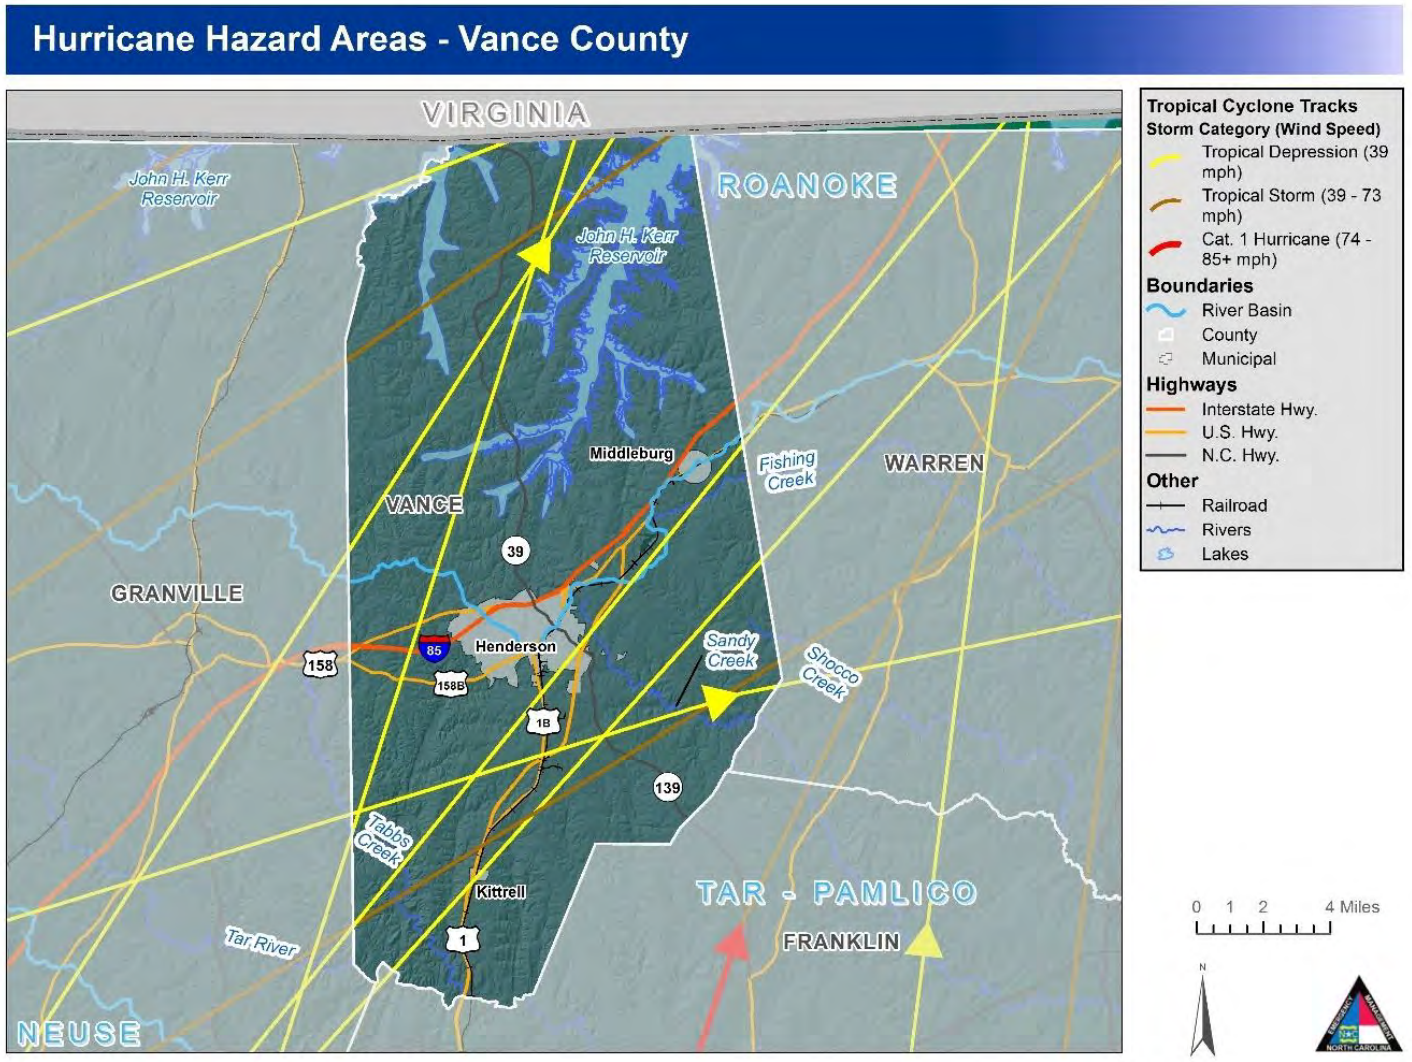

Figure 5-12: **Hurricane Hazard Areas – Vance County**

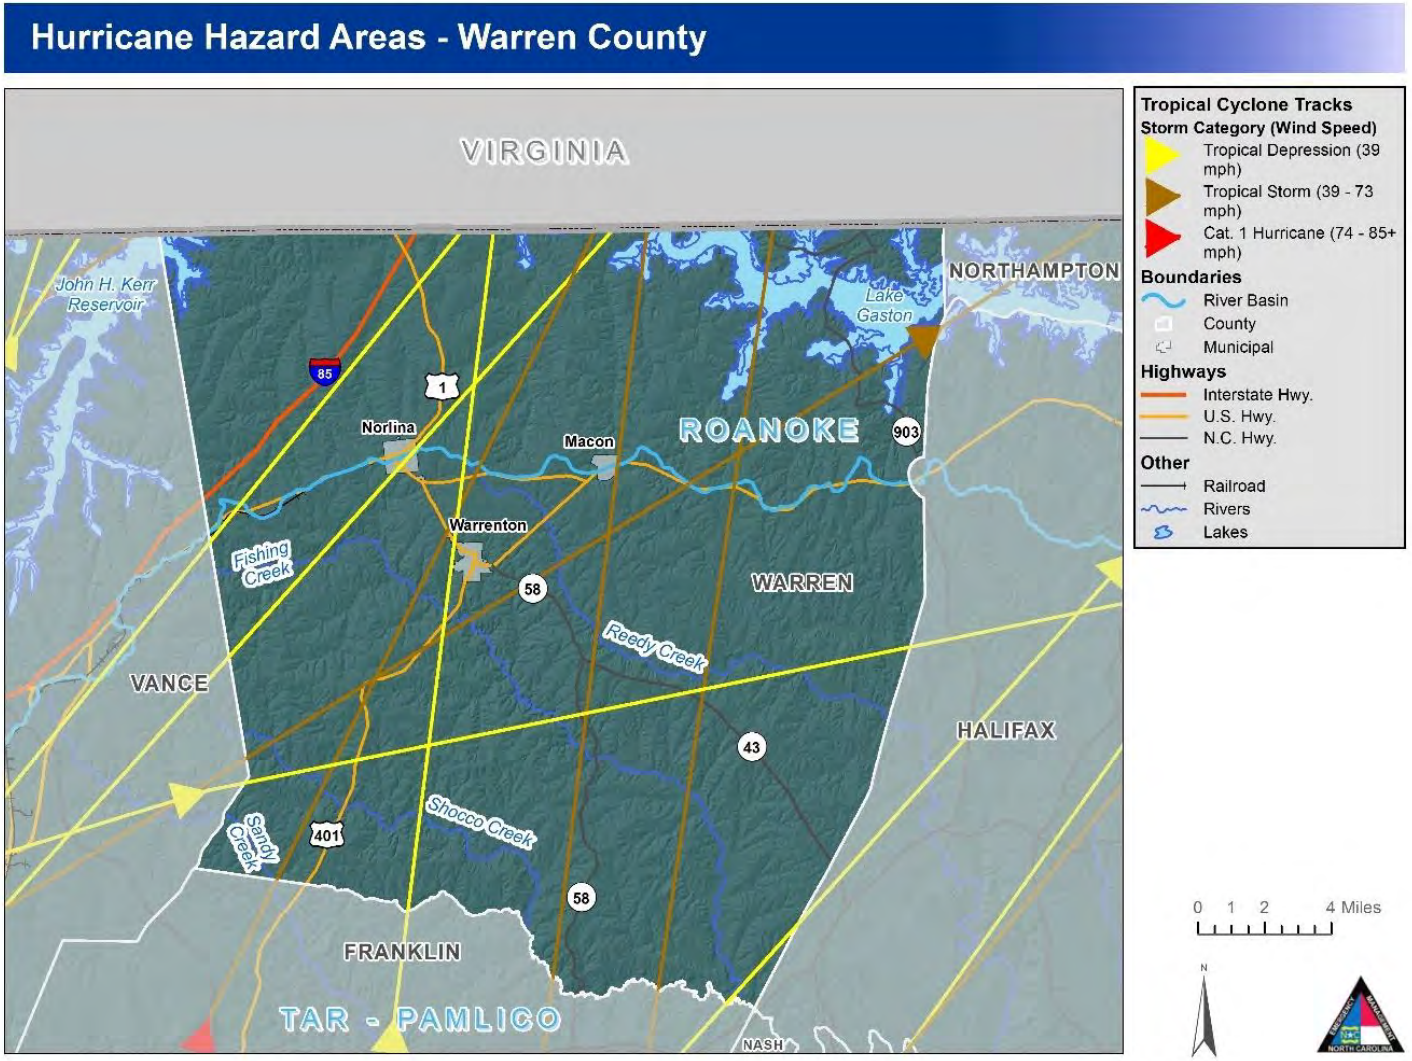

Figure 5-13: **Hurricane Hazard Areas – Warren County**

5.5.3 Extent

Hurricane extent is defined by the Saffir-Simpson Scale which classifies hurricanes into Category 1 through Category 5. The greatest classification of hurricane to traverse directly through the Region was Category 4 Hurricane Hazel in 1954 which reached a maximum wind speed of 115 knots in the Region. The following lists the greatest extent of hurricane winds to pass through the area, though it should be noted that strongest storms could impact the region without a direct hit:

- Franklin County: Hazel, Category 4 Hurricane (115 knots)
- Granville County: Hazel, Category 4 Hurricane (115 knots)
- Vance County: Hazel, Category 4 Hurricane (115 knots)
- Warren County: Hazel, Category 4 Hurricane (115 knots)

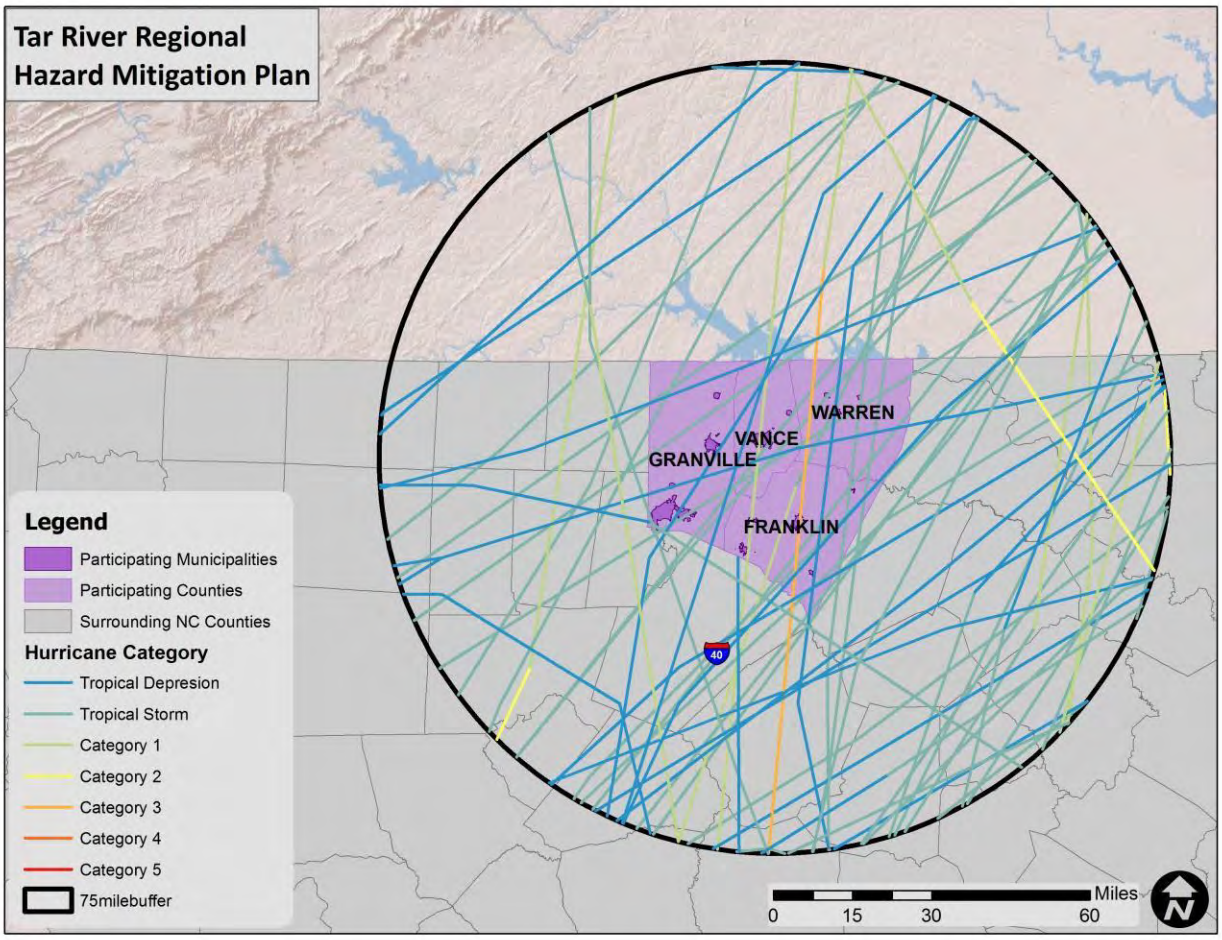

5.5.4 Historical Occurrences

According to the National Hurricane Center's historical storm track records, 61 hurricane or tropical storm tracks have passed within 75 miles of the Tar River Region since 1851.[1] This includes 11 hurricanes, 34 tropical storms, and 16 tropical depressions.

Of the recorded storm events, 31 have traversed directly through the Tar River Region as shown in **Figure 5-14**. **Table 5-12** provides for each event the date of occurrence, name (if applicable), maximum wind speed (as recorded within 75 miles of the Tar River Region), and Category of the storm based on the wind speed within the 75 mile buffer according to the Saffir-Simpson Scale.

[1]These storm track statistics do not include extra-tropical storms. Though these related hazard events are less severe intensity, they may cause significant local impact in terms of rainfall and high winds.

*Although storm track was outside of the 75-mile buffer, this event was considered significant enough to include.
Source: National Hurricane Center

The National Climatic Data Center reported seven events associated with a hurricane or tropical storm in the Tar River Region since 1996. Additionally, Federal records indicate that four disaster declarations were made in 1996 (Hurricane Fran), 1999 (Hurricane Floyd), 2003 (Hurricane Isabel), and 2011 (Hurricane Irene) for the region.[2]

Flooding is generally the greatest hazard of concern with hurricane and tropical storm events in the Tar River Region though some events do carry winds that can have significant impacts on the Tar River counties. Some anecdotal information is available for the major storms that have impacted the area as found below:

Hurricane Fran – September 5-6, 1996

After being hit just a few weeks earlier by Hurricane Bertha, North Carolina was impacted by the one of the most devastating storms to ever make landfall along the Atlantic Coast. Fran dropped more than 10 inches of rain in many areas and had sustained winds of around 115 miles per hour as it hit the coast and began its path along the I-40 corridor central North Carolina. In the end, over 3 billion dollars in damages were reported in the state. Damages to infrastructure and agriculture added to the overall toll and more than 1.7 million people in the state were left without power.

Hurricane Floyd – September 16, 1999

Hurricane Floyd, combined with the weather conditions before and immediately after this hurricane, resulted in the most severe flooding and devastation in North Carolina history. In North Carolina, the

[2]Not all of the participating counties were declared disaster areas for every event. A complete listing of historical disaster declarations, including the affected counties, can be found in Section 4: *Hazard Identification.*

storm resulted in 35 fatalities, over $3 billion in damages, 7,000 destroyed homes, 56,000 damaged homes, 1,500 people rescued from flooded areas, and more than 500,000 customers without electricity. Additionally, the flooding caused an estimated $813 million in agricultural losses affecting 32,000 farmers. There was also significant loss of livestock, including 2,860,827 poultry, 28,000 swine, and 619 cattle.

Hurricane Matthew – October 8, 2016

Hurricane Matthew, a category 1, moved up the eastern seaboard, bringing very heavy rain and strong winds. Rainfall amounts over 12 inches occurred in multiple areas of the county. Wind gusts were surprisingly high, with a gust to 67 mph at the Lumberton Airport. Tropical storm force winds and flooded ground caused widespread tree and power line damage. The river gauge at the Lumber River at Lumberton failed, however the high watermark data from the U.S. Geological Survey indicated the water level may have reached over 25 feet. This exceeded the previous record by over 4 feet. This level bypassed the levee that protects parts of Lumberton from the river due to water passing under I-95 via VFR road. One elderly male died in his home on West Fifth Street on 10/9. The man had a heart condition and when power was lost, he was without oxygen. The family believes he may have died of a heart attack and then fell into flood waters which had overtaken his home from the Lumber River. The Lumber River also exceeded record levels at Boardman by about 2.5 feet. This resulted in the closure of U. S. Route 74, the main route between Wilmington and Lumberton. Numerous water rescues were required along and near the Lumber River. Many homes were flooded in Pembroke. This was one of the hardest hit counties due to the historic river flooding. The offices of the Robesonian Newspaper were flooded.

region is impacted, the damage could be widespread, threatening lives and property throughout the planning area.

5.5.5 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future Hurricane Winds is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 0.2% Annual Probability Of 50-Year Event
- Medium: Between 0.2% And 2% Annual Probability Of 50-Year Event
- High: More Than 2% Annual Probability Of 50-Year Event

Jurisdiction	Calculated Probability (IRISK)
City Of Creedmoor	Medium

5.5.6 Consequence and Impact Analysis

People

Hurricanes may affect human beings in a number of ways including causing deaths, causing injury, loss of property, outbreak of diseases, mental trauma and destroying livelihoods. During a hurricane, residential, commercial, and public buildings, as well as critical infrastructure such as transportation, water, energy, and communication systems may be damaged or destroyed by several of the impacts associated with hurricanes. The wind and flooding hazards associated with hurricanes can be tremendously destructive and deadly. Power outages and flooding are likely to displace people from their homes. The towns of Louisburg, Butner and Creedmoor are more vulnerable due to the flood risk in their area. Furthermore, water can become polluted making it undrinkable, and if consumed, diseases and infection can be easily spread.

First Responders

First responders responding to the impacts of a tropical storm or hurricane face many risks to their health and life safety. Responders face risk of injury or death during a storm event by flooding and high winds. Personnel or families of personnel may be harmed which would limit their response capability.

Downed trees, power lines and flood waters may prevent access to areas in need which prolongs response time. Furthermore, hurricanes typically impact a large area which amplifies the number of emergency responses required.

Continuity of Operations

Continuity of operations may be affected if a hurricane event damages a critical facility or causes a loss of power. Hurricane events typically have ample lead time to prepare for and maintain continuity of operations.

Built Environment

Depending on the strength of a tropical storm or hurricane, structural damage to buildings may occur. A weak tropical storm may cause no damage whatsoever. The most likely impact from a category 1 or greater hurricane is the loss of glass windows and doors by high winds and debris. Loss of roof coverings, partial wall collapses, and other damages requiring significant repairs are possible in a major (category 3 to 5) hurricane. The level of damage is commensurate with the strength of the storm, as explained by the Saffir-Simpson Hurricane Wind Scale.

Loss of electric power, potable water, telecommunications, wastewater and other critical utilities is very possible during a hurricane. Some damage can be so severe that it may take days to weeks to restore.

Economy

Economic damages include property damage from wind, rain and flood, and also include intangibles such as business interruption and additional living expenses. Damage to infrastructure utilities include roads, water and power, and municipal buildings and all jurisdictions in the Region are vulnerable to this impact.

Natural Environment

Hurricanes can devastate wooded ecosystems and remove all the foliation from forest canopies, and they can change habitats so drastically that the indigenous animal populations suffer as a result. Specific foods can be taken away as high winds will often strip fruits, seeds and berries from bushes and trees.

Secondary impacts may occur as well. For example, high winds and debris may result in damage to an above-ground fuel tank, resulting in a significant chemical spill.

It is certain that more events have impacted the Region. Many of the reported events are those that caused damage, and it should be expected that damages are likely much higher for this hazard than what is reported.

5.6 Severe Weather

5.6.1 Background

Severe Weather can produce a variety of accompanying hazards including wind, thunderstorms, hail, and lightning. Although thunderstorms generally affect a small area, they are very dangerous and may cause substantial property damage.

Three conditions need to occur for a thunderstorm to form. First, it needs moisture to form clouds and rain. Second, it needs unstable air, such as warm air that can rise rapidly (this is often referred to as the “engine” of the storm). Third, thunderstorms need lift, which comes in the form of cold or warm fronts, sea breezes, mountains, or the sun’s heat. When these conditions occur simultaneously, air masses of varying temperatures meet, and a thunderstorm is formed. These storm events can occur singularly, in lines, or in clusters. Furthermore, they can move through an area very quickly or linger for several hours.

According to the National Weather Service, more than 100,000 thunderstorms occur each year though only about 10 percent of these storms are classified as "severe." A severe thunderstorm occurs when the storm produces at least one of these three elements: 1) hail of at least one inch, 2) a tornado, or 3) winds of at least 58 miles per hour.

Thunderstorm events have the capability of producing straight-line winds that can cause severe destruction to communities and threaten the safety of a population. Such wind events, sometimes separate from a thunderstorm event, are common throughout the Tar River Region. Therefore, high winds are also reported in this section.

High winds can form due to pressure off the Northeast coast that combines with strong pressure moving through the Ohio Valley. This creates a tight pressure gradient across the region, resulting in high winds which increase with elevation. It is common for gusts of 30 to 60 miles per hour during the winter months.

Downbursts are also possible with thunderstorm events. Such events are an excessive burst of wind in excess of 125 miles per hour. They are often confused with tornadoes. Downbursts are caused by down drafts from the base of a convective thunderstorm cloud. It occurs when rain-cooled air within the cloud becomes heavier than its surroundings. Thus, air rushes towards the ground in a destructive yet isolated manner. There are two types of downbursts. Downbursts less than 2.5 miles wide with a duration of less than 5 minutes and winds up to 168 miles per hour are called "microbursts." Larger events greater than 2.5 miles at the surface and longer than 5 minutes with winds up to 130 miles per hour are referred to as "macrobursts."

5.6.2 Location and Spatial Extent

A wind event is an atmospheric hazard and thus has no geographic boundaries. It is typically a widespread event that can occur in all regions of the United States. However, thunderstorms are most common in the central and southern states because atmospheric conditions in those regions are favorable for generating these powerful storms. Also, the Tar River Region typically experiences several straight-line wind events each year. These wind events can and have caused significant damage. It is assumed that the Tar River Region has uniform exposure to a thunderstorm/wind event and the spatial extent of an impact could be large.

The Lightning maps/figures below show the average annual cloud-to-ground lightning strikes in the Region with "High" being greater than 100 strikes per year, "Medium" 99-50 strikes per year and "Low" being less than 50 strikes per year.

Figures 5-15 – 5-29 show the locations for recorded thunderstorm and lightning events with the data ranging from 1987 – present. Per the National Weather Service Instruction 10-1605, a lightning event is defined as a sudden electrical discharge from a thunderstorm, resulting in a fatality, injury, and/or damage, so each point represented on map for event type "lightning" records exact location of lightning strike/strikes that result in a fatality, injury, and/or damage. The same manual defines Thunderstorm Winds as winds arising from convection (occurring within 30 minutes of lightning being observed or detected), with speeds of at least 50 knots (58 mph), or winds of any speed (non-severe thunderstorm winds below 50 knots) producing a fatality, injury, or damage.

5.6.3 Extent

Thunderstorm extent is defined by the number of thunder events and wind speeds reported. According to a 69-year history from the National Climatic Data Center, the strongest recorded wind event in the Region was reported on July 26, 2009 at 50 knots (approximately 65 mph) causing approximately $5 million in damages. It should be noted that future events may exceed these historical occurrences. **Table 5-13** reflects the extent for thunderstorm events in the Tar River Region for each jurisdiction.

- Franklin County: 56 knots
- Granville County: 65 knots
- Vance County: 60 knots
- Warren County: 50 knots

5.6.4 Historical Occurrences

According to NCDC 190 recorded instances of Thunderstorm Winds conditions have affected the planning area causing an estimated $16,477,000 in losses to property, $105,500 in losses to agricultural

crops, 0 death(s), and 1 injury(ies). **Table 5-14** provides the historical occurrences of thunderstorm events (2005-2020) in the Tar River Region for each jurisdiction.

Source: NCDC

According to NCDC 512 recorded instances of Thunderstorm Winds conditions have affected the planning area causing an estimated $6,317,750 in losses to property, $5,500 in losses to agricultural crops, 0 death(s), and 3 injury(ies).

Table 5-15 provides a summary of this historical information by participating jurisdiction. It is important to note that many of the events attributed to the county are countywide or cover large portions of the county. The individual counts by jurisdiction are for those events that are only attributed to that one jurisdiction.

5.6.5 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future Thunderstorm Winds is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 0.2% Annual Probability of 50-Year Event
- Medium: Between 0.2% And 2% Annual Probability of 50-Year Event
- High: More Than 2% Annual Probability of 50-Year Event

Jurisdiction	Calculated Probability (IRISK)
City of Creedmoor	Medium
City of Henderson	Medium
City of Oxford	Medium
Franklin County (Unincorporated Area)	Medium
Granville County (Unincorporated Area)	Medium
Town of Bunn	Medium
Town of Butner	Medium
Town of Franklinton	Medium

Jurisdiction	Calculated Probability (IRISK)
Town of Kittrell	Medium
Town Of Louisburg	Medium
Town of Macon	Medium
Town of Middleburg	Medium
Town of Norlina	Medium
Town of Stem	Medium
Town of Stovall	Medium
Town of Warrenton	Medium
Town of Youngsville	Medium
Vance County (Unincorporated Area)	Medium
Warren County (Unincorporated Area)	Medium

5.6.6 Consequence and Impact Analysis

People

Severe Weather are generally associated with hazards such as high wind, lightning and hail. High wind can cause trees to fall and potentially result in injuries or death and lightning can lead to house fires and serious injury. Hail can cause injury as well as severe property damage to homes and automobiles all jurisdictions in the Region are vulnerable to this impact

First Responders

First responders can be impacted in the same way as the general public. Downed trees, power lines and flood waters may prevent access to areas in need which prolongs response time.

Continuity of Operations

Severe Weather events can result in a loss of power which may impact operations. Downed trees, power lines and flash flooding may prevent access to critical facilities and/or emergency equipment.

Built Environment

Severe Weather can cause damage to commercial buildings and homes due to strong winds, lightning strikes and hail. Heavy rains associated with thunderstorm events may also lead to flash flooding which can damage roads and bridges.

Economy

Economic damages include property damage from wind, lightning and hail, and also include intangibles such as business interruption and additional living expenses. Granville County, the cities of Louisburg and Youngsville are most vulnerable to crop damage from hail.

Natural Environment

Severe Weather have a huge impact on the environment. One of the most dangerous outcomes for the environment is when lightning causes sparks to flare up in surrounding forests or immense shrubs. This is often the cause of bush fires, which then spread quickly due to the fast winds that accompany the storm. High winds can also damage crops and trees. Flooding can kill animals and cause soil erosion.

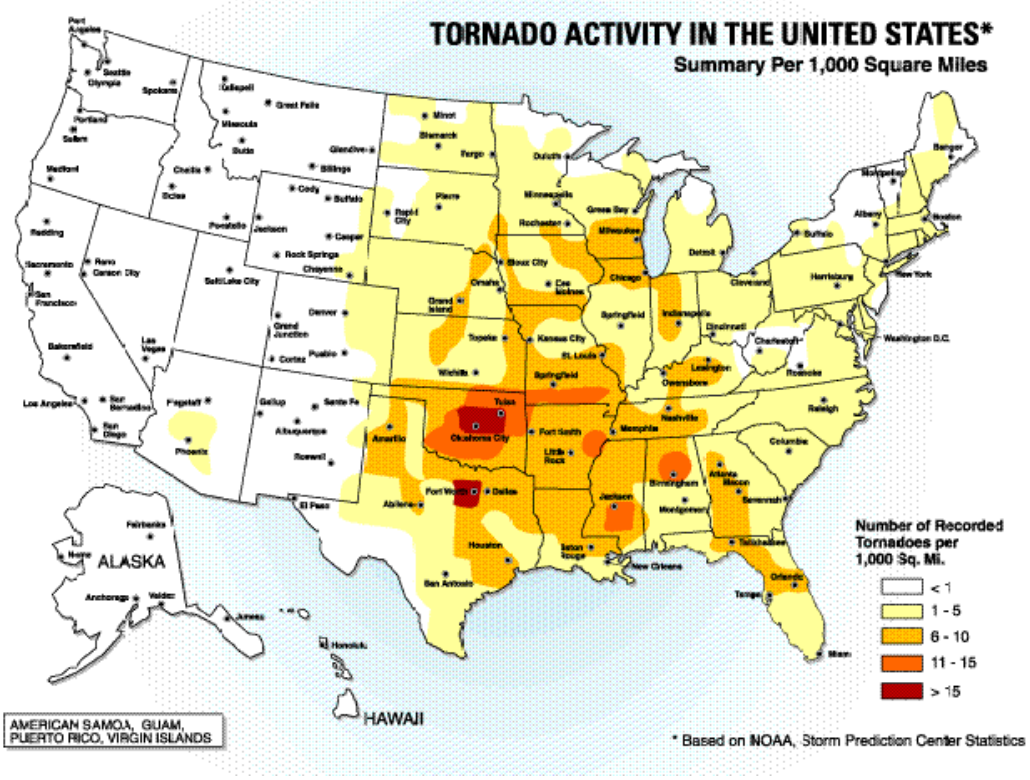

5.7 Tornado

5.7.1 Background

A tornado is a violent windstorm characterized by a twisting, funnel-shaped cloud extending to the ground. Tornadoes are most often generated by thunderstorm activity (but sometimes result from hurricanes and other tropical storms) when cool, dry air intersects and overrides a layer of warm, moist air forcing the warm air to rise rapidly. The damage caused by a tornado is a result of the high wind velocity and wind-blown debris, also accompanied by lightning or large hail. According to the National Weather Service, tornado wind speeds normally range from 40 miles per hour to more than 300 miles per hour. The most violent tornadoes have rotating winds of 250 miles per hour or more and are capable of causing extreme destruction and turning normally harmless objects into deadly missiles.

According to the NOAA Storm Prediction Center (SPC), the highest concentration of tornadoes in the United States has been in Oklahoma, Texas, Kansas, and Florida respectively. Although the Great Plains region of the Central United States does favor the development of the largest and most dangerous tornadoes (earning the designation of "tornado alley"), Florida experiences the greatest number of tornadoes per square mile of all U.S. states (SPC, 2002). **Figure 5-30** shows tornado activity in the United States based on the number of recorded tornadoes per 1,000 square miles.

Figure 5-30. Tornado Activity in the United States

Source: Federal Emergency Management Agency

Tornadoes are more likely to occur during the months of March through May and are most likely to form in the late afternoon and early evening. Most tornadoes are a few dozen yards wide and touch down briefly, but even small short-lived tornadoes can inflict tremendous damage. Highly destructive tornadoes may carve out a path over a mile wide and several miles long.

The destruction caused by tornadoes ranges from light to inconceivable depending on the intensity, size, and duration of the storm. Typically, tornadoes cause the greatest damage to structures of light construction, including residential dwellings (particularly mobile homes). Tornadic magnitude is reported according to the Fujita and Enhanced Fujita Scales. Tornado magnitudes prior to 2005 were determined using the traditional version of the Fujita Scale (

Table *5-16*). Tornado magnitudes that were determined in 2005 and later were determined using the Enhanced Fujita Scale (**Table 5-17**).

Table 5-16: The Fujita Scale (Effective Prior to 2005)

F-SCALE NUMBER	INTENSITY	WIND SPEED	TYPE OF DAMAGE DONE
F0	GALE TORNADO	40–72 MPH	Some damage to chimneys; breaks branches off trees; pushes over shallow-rooted trees; damages to sign boards.
F1	MODERATE TORNADO	73–112 MPH	The lower limit is the beginning of hurricane wind speed; peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed.
F2	SIGNIFICANT TORNADO	113–157 MPH	Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated.
F3	SEVERE TORNADO	158–206 MPH	Roof and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted.
F4	DEVASTATING TORNADO	207–260 MPH	Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown, and large missiles generated.
F5	INCREDIBLE TORNADO	261–318 MPH	Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel re-enforced concrete structures badly damaged.
F6	INCONCEIVABLE TORNADO	319–379 MPH	These winds are very unlikely. The small area of damage they might produce would probably not be recognizable along with the mess produced by F4 and F5 wind that would surround the F6 winds. Missiles, such as cars and refrigerators would do serious secondary damage that could not be directly identified as F6 damage. If this level is ever achieved, evidence for it might only be found in some manner of ground swirl pattern, for it may never be identifiable through engineering studies.

Source: National Weather Service

Table 5-17: The Enhanced Fujita Scale (Effective 2005 and Later)

EF-SCALE NUMBER	INTENSITY PHRASE	3 SECOND GUST (MPH)	TYPE OF DAMAGE DONE
EF0	GALE	65–85	Some damage to chimneys; breaks branches off trees; pushes over shallow-rooted trees; damages to sign boards.
EF1	MODERATE	86–110	The lower limit is the beginning of hurricane wind speed; peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed.
EF2	SIGNIFICANT	111–135	Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated.
EF3	SEVERE	136–165	Roof and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted.
EF4	DEVASTATING	166–200	Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown, and large missiles generated.
EF5	INCREDIBLE	Over 200	Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel re-enforced concrete structures badly damaged.

5.7.2 Location and Spatial Extent

Tornadoes occur throughout the state of North Carolina and thus in the Tar River Region. Tornadoes typically impact a relatively small area, but damage may be extensive. Event locations are completely random, and it is not possible to predict specific areas that are more susceptible to tornado strikes over time. Therefore, it is assumed that the Tar River Region is uniformly exposed to this hazard. With that in mind, **Figure 5-31** shows tornado track data for many of the major tornado events that have impacted the region. While no definitive pattern emerges from this data, some areas that have been impacted in the past may be potentially more susceptible in the future.

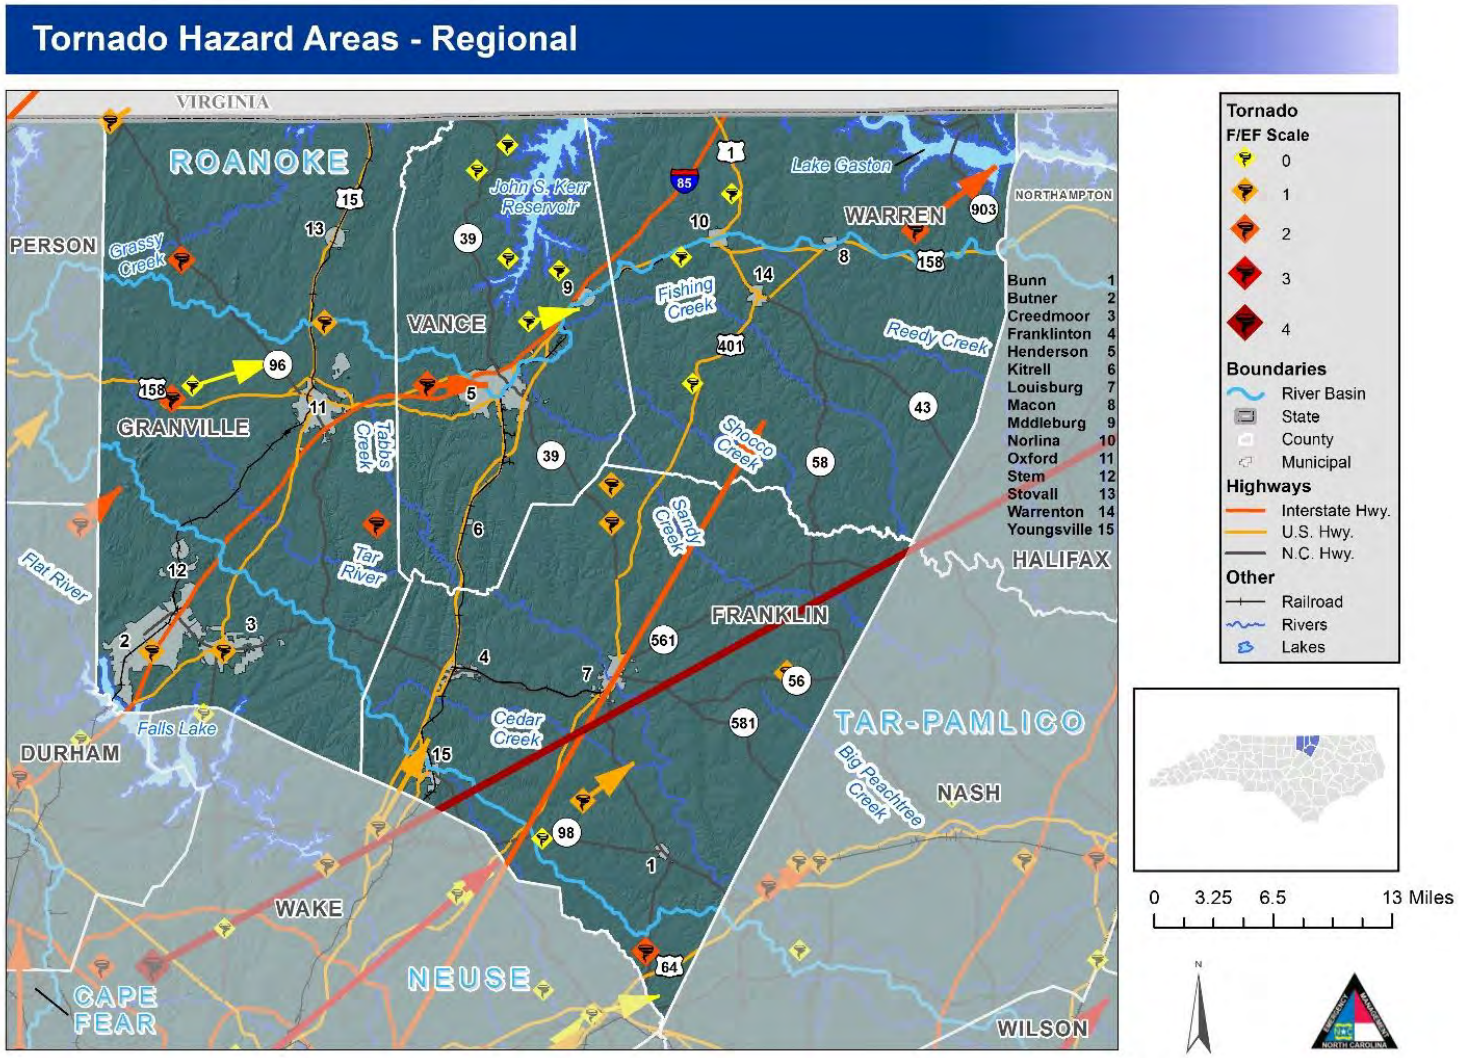

Figure 5-31. Tornado Hazard Areas - Regional

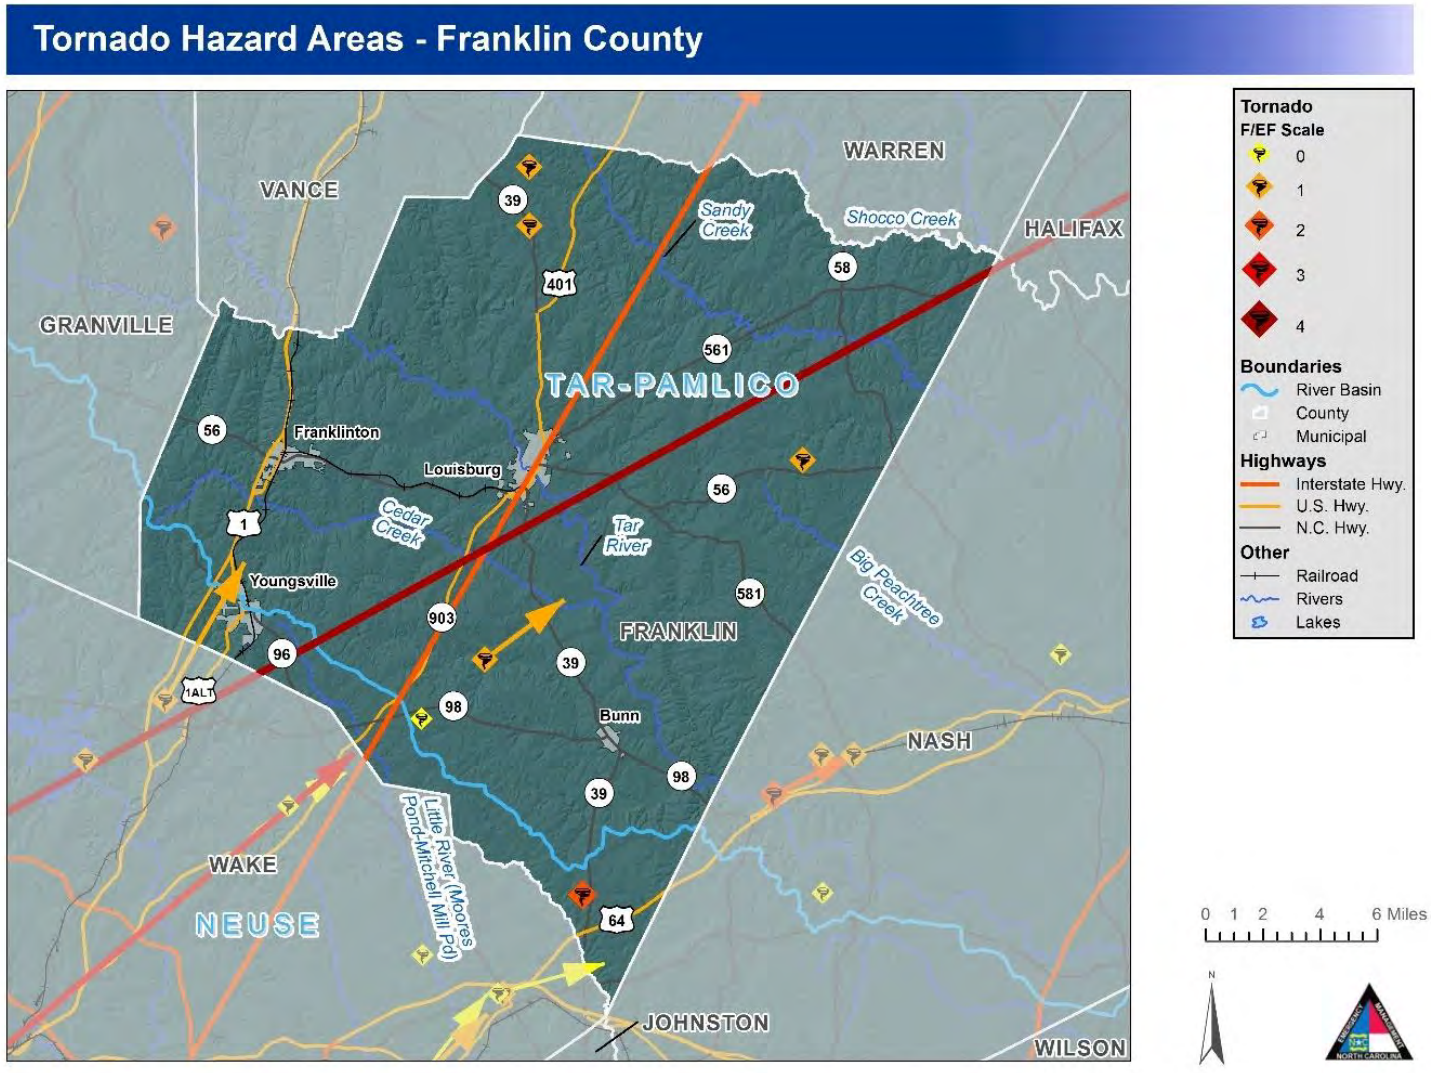

Figure 5-32. Tornado Hazard Areas – Franklin County

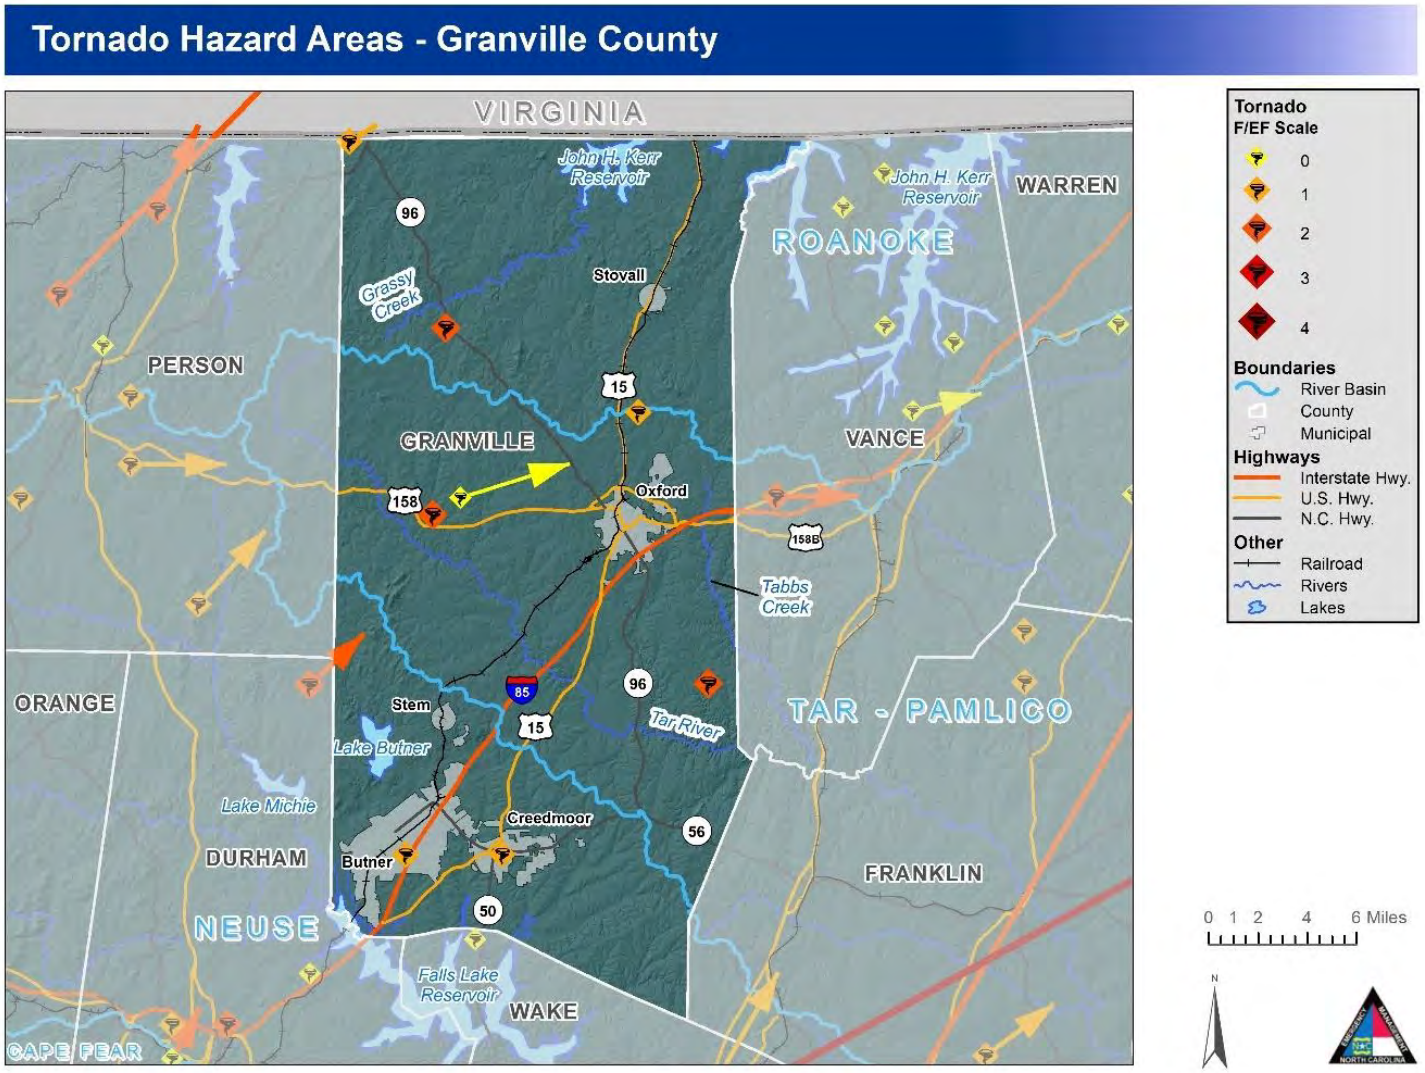

Figure 5-33. Tornado Hazard Areas – Granville County

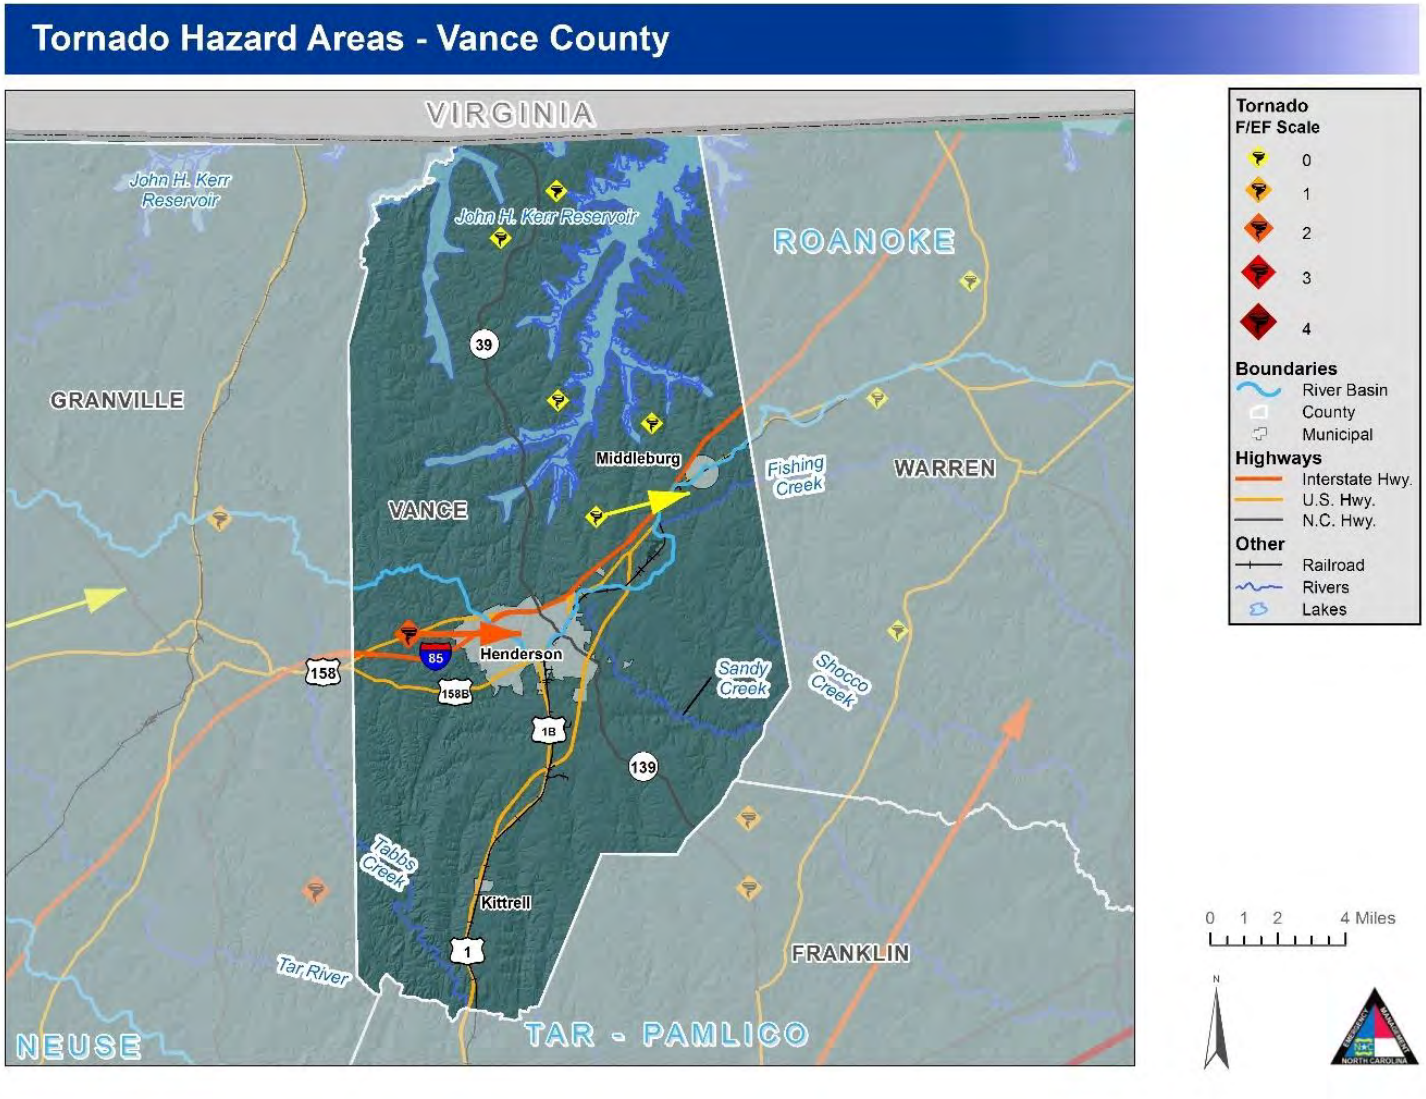

Figure 5-34. Tornado Hazard Areas – Vance County

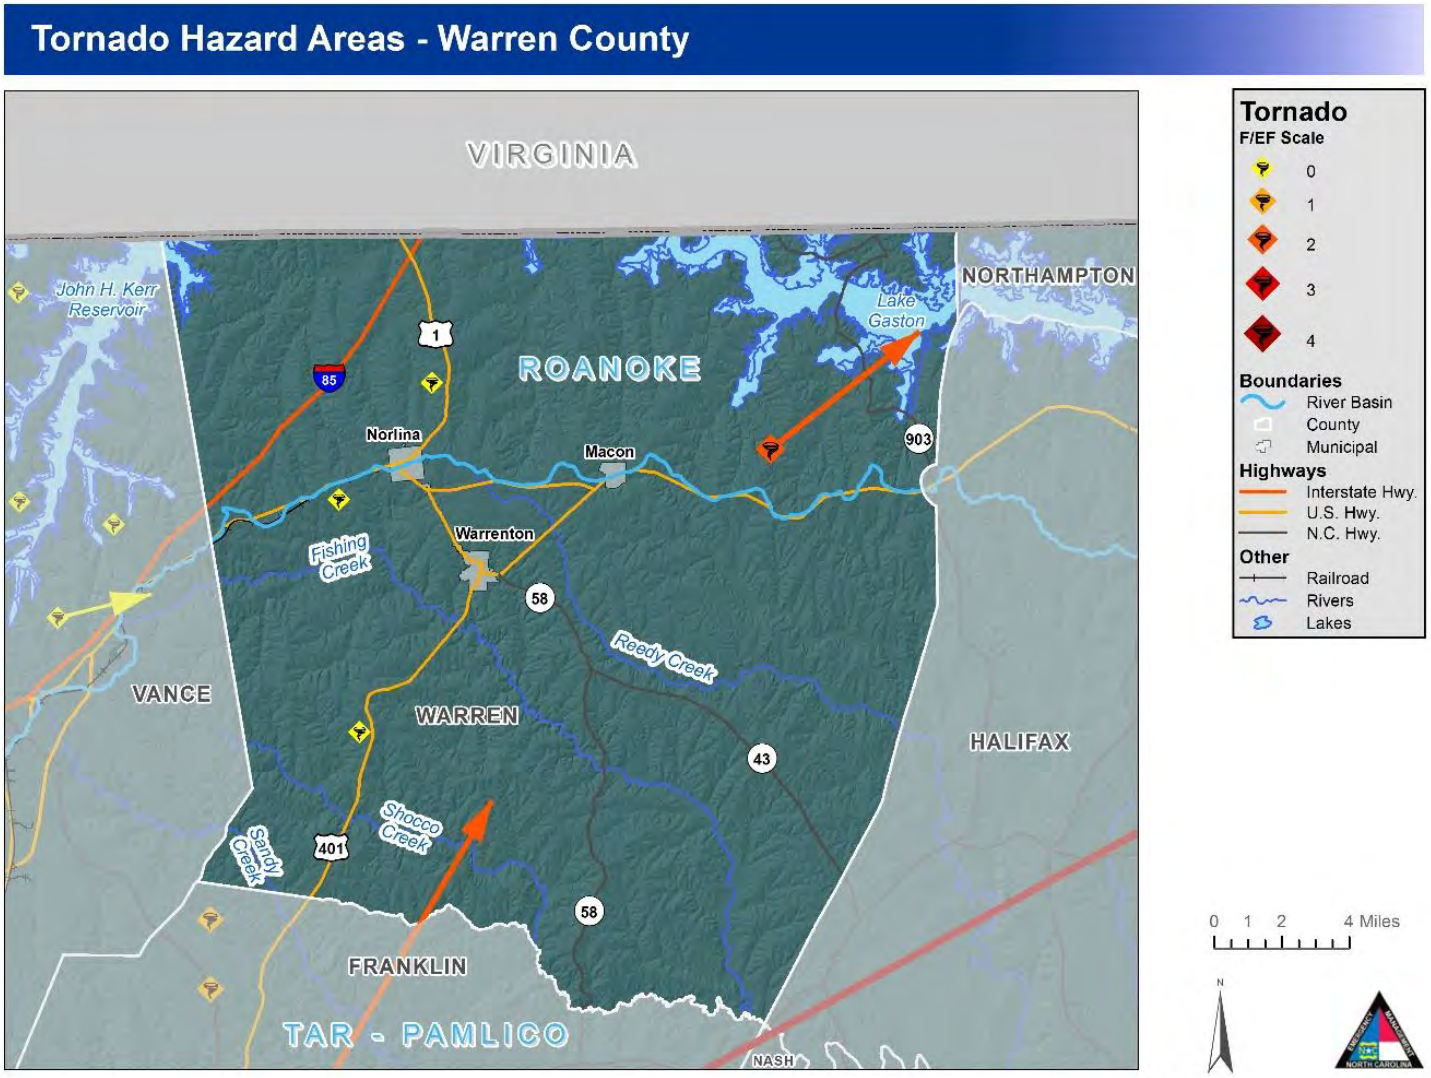

Figure 5-35. Tornado Hazard Areas – Warren County

5.7.3 Extent

Tornado hazard extent is measured by tornado occurrences in the US provided by the Fujita/Enhanced Fujita Scale. The table below provides the highest recorded events in the jurisdictions (except Franklinton, Youngsville, Butner, Creedmoor, Oxford, Stem, Stovall, Kittrell, Macon, Norlina and Warrenton; which haven't experienced tornadoes in their jurisdictions) in the Region below. It should be noted that jurisdictions can be affected by these events even though it is not depicted in the table.

Table 5-18: Tornado Hazard Events

Location	Date	Magnitude
Franklin County (Unincorporated Area)	11/28/1988	F4
Town of Bunn	5/14/2006	EF0
Town of Franklinton	N/A	N/A
Town of Louisburg	3/20/1998	F1
Town of Youngsville	N/A	N/A
Granville County (Unincorporated Area)	11/19/1952	F2
Town of Butner	9/29/1959	F1
City of Creedmoor	5/05/1989	F1
Town of Oxford	N/A	N/A
Town of Stem	N/A	N/A

5.7.4 Historical Occurrences

The following historical occurrences ranging from 1951 to 2020 have been identified based on the NCDC Storm Events database **Table 5-19**. It should be noted that only those historical occurrences listed in the NCDC database are shown here and that other, unrecorded or unreported events may have occurred within the planning area during this timeframe.

Source: National Climatic Data Center (NCDC) Storm Events Database and or potential user entered data.

According to the information provided in the preceding table, 29 recorded instances of Tornado have affected the planning area since 1951, causing an estimated $17,117,500 in property damage, $0 in crop damages, 0 death(s), and 9 injury(ies). The highest magnitude tornado on record is an Ef2. The lowest magnitude tornado on record is an Ef0

Table 5-20 provides a summary of this historical information by participating jurisdiction. It is important to note that many of the events attributed to the county are countywide or cover large portions of the county. The individual counts by jurisdiction are for those events that are only attributed to that one jurisdiction.

Table 5-20: Summary of Historical Tornado Occurrences by Participating Jurisdiction

5.7.5 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future Tornado is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 1% Annual Probability of EF2 Event
- Medium: Between 1% And 10% Annual Probability of EF2 Event
- High: More Than 10% Annual Probability of EF2 Event

Jurisdiction	Calculated Probability (IRISK)
City of Creedmoor	Low
City of Henderson	Low
City of Oxford	Low
Franklin County (Unincorporated Area)	Low
Granville County (Unincorporated Area)	Low
Town of Bunn	Low
Town of Butner	Low

Jurisdiction	Calculated Probability (IRISK)
Town of Franklinton	Low
Town of Kittrell	Low
Town of Louisburg	Low
Town of Macon	Low
Town of Middleburg	Low
Town of Norlina	Low
Town of Stem	Low
Town of Stovall	Low
Town of Warrenton	Low
Town of Youngsville	Low
Vance County (Unincorporated Area)	Low
Warren County (Unincorporated Area)	Low

5.7.6 Consequence and Impact Analysis

People

The rate of onset of tornado events is rapid, giving those in danger minimal time to seek shelter. The current average lead time according to NOAA is 13 minutes. Injury may result from the direct impact of a tornado, or it may occur afterward when people walk among debris and enter damaged buildings. A study of injuries after a tornado in Marion, Illinois, showed that 50 percent of the tornado-related injuries were suffered during rescue attempts, cleanup, and other post-tornado activities. Common causes of injury included falling objects and heavy, rolling objects. Because tornadoes often damage power lines, gas lines, or electrical systems, there is a risk of fire, electrocution, or an explosion.

First Responders

Due to the rapid onset of tornado events, first responders could be critically affected by tornado events through direct impact of the tornado itself or injury received during response efforts. Response may be hindered as responders may be unable to access those that have been affected if storm conditions persist or if they are unable to safely enter affected areas. As mentioned above, a large percentage of tornado-related injuries are suffered during rescue attempts, cleanup, and other post-tornado activities due to walking among debris and entering damaged buildings.

Continuity of Operations

Continuity of operations could be greatly impacted by a tornado. Personnel or families of personnel may be harmed which would limit their response capability. Critical facilities and resources could also be damaged or destroyed during a tornado.

Built Environment

The weakest tornadoes, EF0, can cause minor roof damage and strong tornadoes can destroy frame buildings and even badly damage steel reinforced concrete structures. Most building codes in the United States do not include provisions that provide protection against tornadic winds. Given the strength of the wind impact and construction techniques, buildings are vulnerable to direct impact, including potential destruction, from tornadoes and also from wind borne debris that tornadoes turn into missiles. All jurisdictions in the Region are vulnerable to building damages. Mobile homes particularly susceptible to damage and fatalities during tornadoes, the counties of Vance and Warren have more manufactured housing than other counties in the Region.

Economy

The largest impact of tornadoes is the economic damage caused by widespread destruction along their paths. More directly, there are many people killed by these storms, and to a lesser extent pets and farm animals. The major damage is the complete destruction of homes, buildings, and farms, the wrecking of cars and trucks, and the loss of power distribution systems. Winds as high as 300 mph blow down walls, tear up trees, and throw debris in every direction at high speeds. Indirect losses include workers who cannot report to jobs and commercial entities that most close to repair damages.

Natural Environment

There is no defense for plants and animals from a direct impact from a tornado. Plants and animals in the path of the tornado will receive significant damage or be killed. Strong tornados can shred trees and lift grass from the ground.

5.8 Winter Storm

5.8.1 Background

A winter storm can range from a moderate snow over a period of a few hours to blizzard conditions with blinding wind-driven snow that lasts for several days. Events may include snow, sleet, freezing rain, or a mix of these wintry forms of precipitation. Some winter storms might be large enough to affect several states while others might affect only localized areas. Occasionally, heavy snow might also cause significant property damages, such as roof collapses on older buildings.

All winter storm events have the potential to present dangerous conditions to the affected area. Larger snowfalls pose a greater risk, reducing visibility due to blowing snow and making driving conditions treacherous. A heavy snow event is defined by the National Weather Service as an accumulation of 4 of more inches in 12 hours or less. A blizzard is the most severe form of winter storm. It combines low temperatures, heavy snow, and winds of 35 miles per hour or more, which reduces visibility to a quarter mile or less for at least 3 hours. Winter storms are often accompanied by sleet, freezing rain, or an ice storm. Such freeze events are particularly hazardous as they create treacherous surfaces.

Ice storms are defined as storms with significant amounts of freezing rain and are a result of cold air damming (CAD). CAD is a shallow, surface-based layer of relatively cold, stably stratified air entrenched against the eastern slopes of the Appalachian Mountains. With warmer air above, falling precipitation in the form of snow melts, then becomes either super-cooled (liquid below the melting point of water) or

re-freezes. In the former case, super-cooled droplets can freeze on impact (freezing rain); while in the latter case, the re-frozen water particles are ice pellets (or sleet). Sleet is defined as partially frozen raindrops or refrozen snowflakes that form into small ice pellets before reaching the ground. They typically bounce when they hit the ground and do not stick to the surface. However, it does accumulate like snow, posing similar problems and has the potential to accumulate into a layer of ice on surfaces. Freezing rain, conversely, usually sticks to the ground, creating a sheet of ice on the roadways and other surfaces. All of the winter storm elements – snow, low temperatures, sleet, ice, etcetera – have the potential to cause significant hazard to a community. Even small accumulations can down power lines and trees limbs and create hazardous driving conditions. Furthermore, communication and power may be disrupted for days.

5.8.2 Location and Spatial Extent

Nearly the entire continental United States is susceptible to winter storm and freeze events. Some ice and winter storms may be large enough to affect several states while others might affect limited, localized areas. The degree of exposure typically depends on the normal expected severity of local winter weather. The Tar River Region is accustomed to severe winter weather conditions and often receives winter weather during the winter months. Given the atmospheric nature of the hazard, the entire region has uniform exposure to a winter storm. The maps below represent the greatest amount of one-day snowfall in inches.

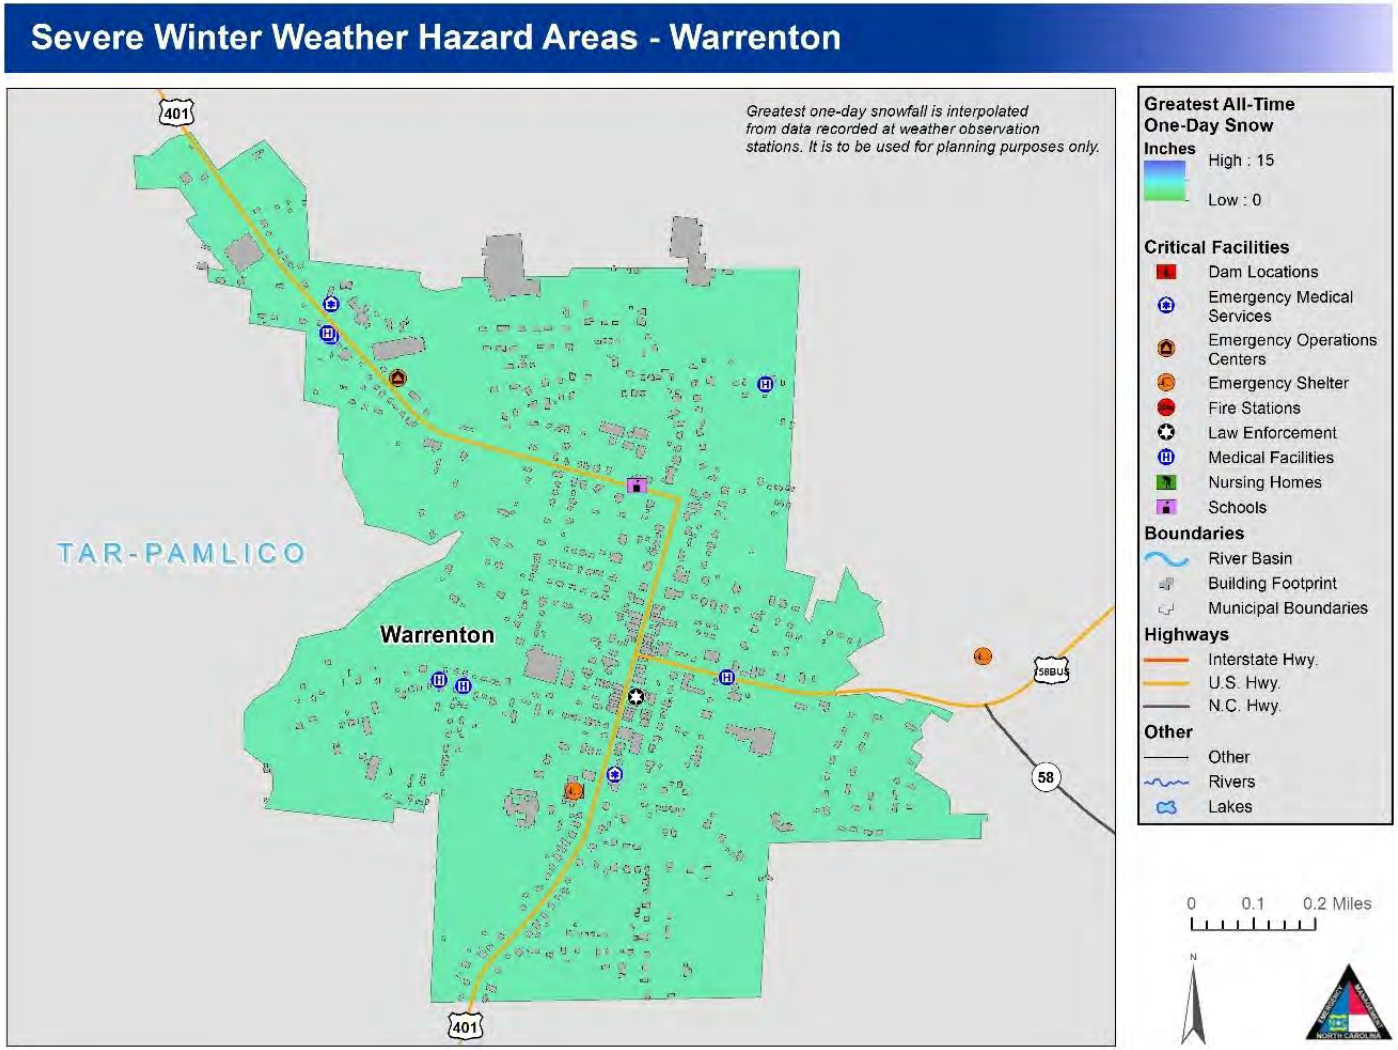

Figure 5-55. Severe Winter Storm Hazard Areas – Warrenton

5.8.3 Extent

The table below shows the worst recorded events for the Region.

The extent of winter storms can be measured by the amount of snowfall received (in inches). The greatest 24-hour snowfall reported in the region was 22.5 inches on January 28, 1922. Due to unpredictable variations in snowfall throughout the Region, extent totals will vary for each participating jurisdiction and reliable data on snowfall totals is not abundantly available.

Table 5-21: Tar River Winter Storm Extent

Community	Number of Days with Winter Weather Occurrences July 1950- July 2019	Source	Maximum Snowfall Data
Franklin County	50	NCDC	15 inches
Bunn	50	NCDC	6 inches
Franklinton	50	NCDC	8 inches

Norlina	46	NCDC	3 inches
Warrenton	46	NCDC	4 inches

5.8.4 Historical Occurrences

Winter weather has resulted in six disaster declarations in the Tar River Region. This includes the Blizzard of 1996, one subsequent 1996 winter storm, a severe winter storm in 2000, ice storms in 2002 and 2003, and a severe winter storm in 2014.[3] According to the National Climatic Data Center, there have been a total of 67 recorded winter storm events in the Tar River Region since 1996 (**Table 5.22**).[4] These events resulted in almost $2.1 million in damages as well as one fatality and three injuries.

[3] Not all of the participating counties were declared disaster areas for these events. A complete listing of historical disaster declarations, including the affected counties, can be found in Section 4: *Hazard Profiles*.
[4] These ice and winter storm events are only inclusive of those reported by the National Climatic Data Center (NCDC) from 1996. It is likely that additional winter storm conditions have affected the Tar River Region.

Table 5-22: Summary of Winter Storm Events in the Tar River Region

Source: National Climatic Data Center

There have been several severe winter weather events in the Tar River Region. The text below describes two of the major events and associated impacts on the region. Similar impacts can be expected with severe winter weather.

1996 Winter Storm – January 6-8, 1996

This storm left two feet of snow in some areas and several thousand citizens without power for up to nine days. Although shelters were opened, some roads were impassible for many days. This event cause considerable disruption to business, industry, schools, and government services.

2002 Ice Storm – December 4-5, 2002

An ice storm produced up to an inch of freezing rain in central North Carolina impacting 40 counties. A total of 24 people were killed, and as many as 1.8 million people were left without electricity. Additionally, property damage was estimated at almost $100 million. New records were also set for traffic accidents and school closing durations. The scale of destruction was comparable to that of hurricanes that have impacted the state, such as Hurricane Fran in 1996. The storm cost the state $97.2 million in response and recovery.

Winter storms throughout the planning area have several negative externalities including hypothermia, cost of snow and debris cleanup, business and government service interruption, traffic accidents, and power outages. Furthermore, citizens may resort to using inappropriate heating devices that could to fire or an accumulation of toxic fumes.

5.8.5 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future Winter Storm is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 1% Annual Probability
- Medium: Between 1% And 10% Annual Probability
- High: More Than 10% Annual Probability

Jurisdiction	Calculated Probability (IRISK)
City of Creedmoor	Low
City of Henderson	Low
City of Oxford	Low
Franklin County (Unincorporated Area)	Medium
Granville County (Unincorporated Area)	Low
Town of Bunn	Medium
Town of Butner	Low
Town of Franklinton	Low
Town of Kittrell	Low
Town of Louisburg	Low
Town of Macon	Low
Town of Middleburg	Low
Town of Norlina	Low
Town of Stem	Low
Town of Stovall	Low
Town of Warrenton	Medium
Town of Youngsville	Low
Vance County (Unincorporated Area)	Low
Warren County (Unincorporated Area)	Low

5.8.6 Consequence and Impact Analysis

People

Winter storms are considered to be deceptive killers because most deaths are indirectly related to the storm event. The leading cause of death during winter storms is from automobile or other transportation accidents. Exhaustion and heart attacks caused by overexertion are the two most likely causes of winter storm-related deaths.

Power outages during very cold winter storm conditions can result in a potentially dangerous situation. Elderly people account for the largest percentage of hypothermia victims. In addition, if the power is out for an extended period, residents are forced to find alternative means to heat their homes. The danger arises from carbon monoxide released from improperly ventilated heating sources such as space or kerosene heaters, furnaces, and blocked chimneys. House fires also occur more frequently in the winter due to lack of proper safety precautions when using an alternative heating source. Franklin County and the jurisdictions of Bunn and Warrenton appear to be more vulnerable to this impact.

First Responders

Adverse impact expected to be severe for unprotected personnel and moderate to light for trained, equipped, and protected personnel.

Fire suppression during winter storms may present a great danger because water supplies may freeze, and it may be difficult for firefighting equipment to get to the fire.

Clearing ice- or snow-covered roads is also a problem; with limited equipment in North Carolina due to the relative infrequency of events, priority is given to main thoroughfares and secondary roads are largely untouched during the initial hours after a storm has passed.

Continuity of Operations

Winter storm events can result in a loss of power which may impact operations. All jurisdictions are equally vulnerable to loss of power in a winter event. Downed trees, power lines and icy road conditions may prevent access to critical facilities and/or emergency equipment.

Built Environment

Localized impact to facilities and infrastructure in the areas of the incident. Power lines and roads most adversely affected.

Economy

Local economy and finances may be adversely affected, depending on damage. Utility companies will strive to restore power as quickly as possible; however, businesses without power may be forced to close for an extended period, resulting in financial losses for the local economy.

Natural Environment

Winter storm events may include ice or snow accumulation on trees which can cause large limbs, or even whole trees, to snap and potentially fall on residential homes, cars, or power lines. This potential for winter debris creates a dangerous environment to be outside in; significant injury may occur if a large limb snaps while a local resident is out driving or walking underneath it.

Geologic Hazards

5.9 Earthquake

5.9.1 Background

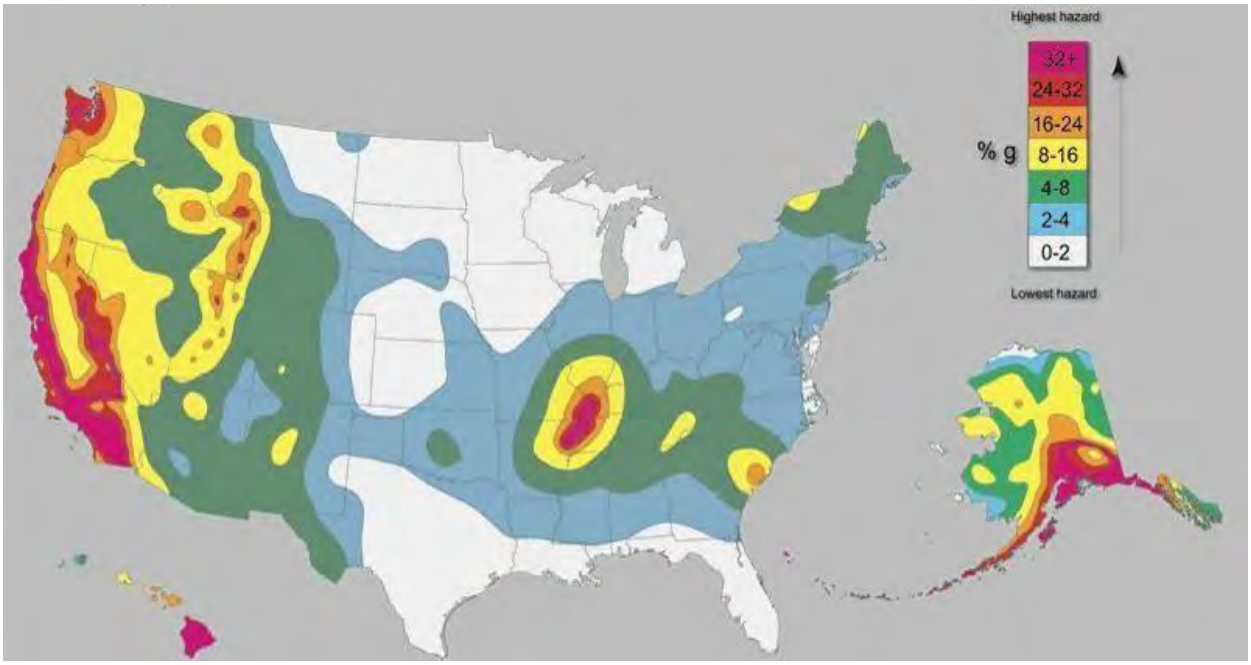

An earthquake is movement or trembling of the ground produced by sudden displacement of rock in the Earth's crust. Earthquakes result from crustal strain, volcanism, landslides, or the collapse of caverns. Earthquakes can affect hundreds of thousands of square miles, cause damage to property measured in the tens of billions of dollars, result in loss of life and injury to hundreds of thousands of persons, and disrupt the social and economic functioning of the affected area.

Most property damage and earthquake-related deaths are caused by the failure and collapse of structures due to ground shaking. The level of damage depends upon the amplitude and duration of the shaking, which are directly related to the earthquake size, distance from the fault, site, and regional geology. Other damaging earthquake effects include landslides, the down-slope movement of soil and rock (mountain regions and along hillsides), and liquefaction, in which ground soil loses the ability to resist shear and flows much like quicksand. In the case of liquefaction, anything relying on the substrata for support can shift, tilt, rupture, or collapse.

Most earthquakes are caused by the release of stresses accumulated as a result of the rupture of rocks along opposing fault planes in the Earth’s outer crust. These fault planes are typically found along borders of the Earth's 10 tectonic plates. The areas of greatest tectonic instability occur at the perimeters of the slowly moving plates, as these locations are subjected to the greatest strains from plates traveling in opposite directions and at different speeds. Deformation along plate boundaries causes strain in the rock and the consequent buildup of stored energy. When the built-up stress exceeds the rocks' strength a rupture occurs. The rock on both sides of the fracture is snapped, releasing the stored energy and producing seismic waves, generating an earthquake.

The greatest earthquake threat in the United States is along tectonic plate boundaries and seismic fault lines located in the central and western states; however, the Eastern United State does face moderate risk to less frequent, less intense earthquake events. **Figure 5-56** shows relative seismic risk for the United States.

Figure 5-56. United States Earthquake Hazard Map

Source: United States Geological Survey

Earthquakes are measured in terms of their magnitude and intensity. Magnitude is measured using the Richter Scale, an open-ended logarithmic scale that describes the energy release of an earthquake through a measure of shock wave amplitude (**Table 5-23**). Each unit increase in magnitude on the Richter Scale corresponds to a 10-fold increase in wave amplitude, or a 32-fold increase in energy. Intensity is most commonly measured using the Modified Mercalli Intensity (MMI) Scale based on direct and indirect measurements of seismic effects. The scale levels are typically described using roman numerals, ranging from "I" corresponding to imperceptible (instrumental) events to "XII" for catastrophic (total destruction). A detailed description of the Modified Mercalli Intensity Scale of earthquake intensity and its correspondence to the Richter Scale is given in **Table 5-24**.

Table 5-23: Richter Scale

RICHTER MAGNITUDES	EARTHQUAKE EFFECTS
< 3.5	Generally, not felt, but recorded.
3.5 - 5.4	Often felt, but rarely causes damage.
5.4 - 6.0	At most slight damage to well-designed buildings. Can cause major damage to poorly constructed buildings over small regions.
6.1 - 6.9	Can be destructive in areas up to about 100 kilometers across where people live.
7.0 - 7.9	Major earthquake. Can cause serious damage over larger areas.
8 or >	Great earthquake. Can cause serious damage in areas several hundred kilometers across.

Source: Federal Emergency Management Agency

Table 5-24: Modified Mercalli Intensity Scale for Earthquakes

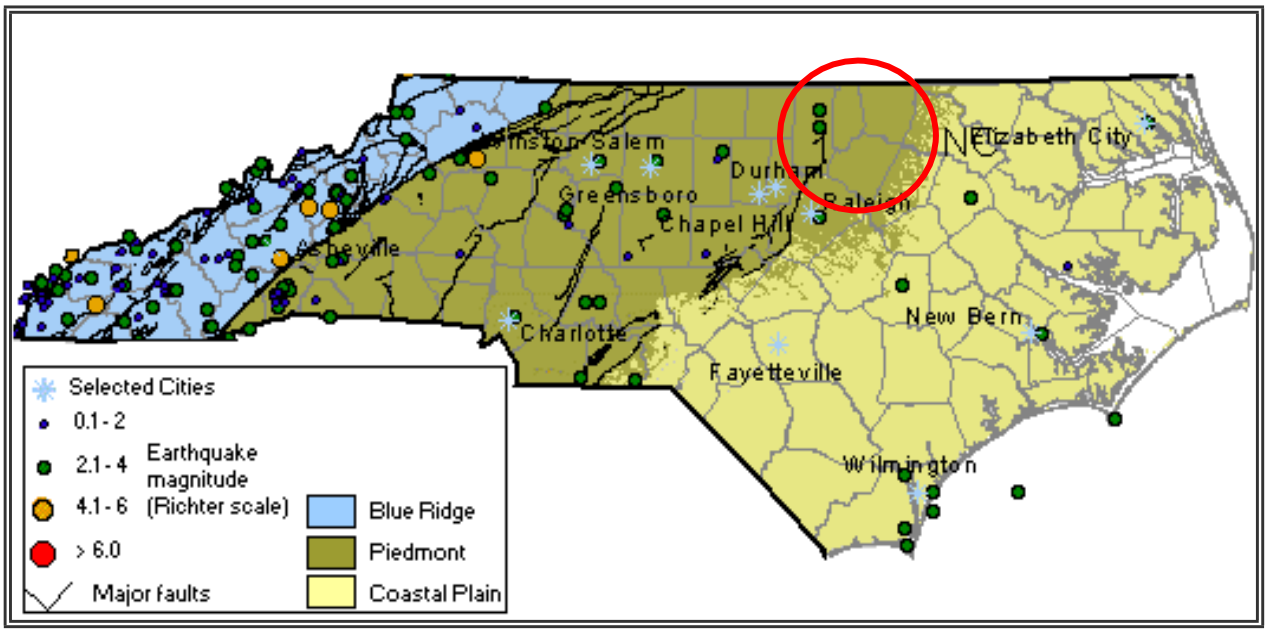

SCALE	INTENSITY	DESCRIPTION OF EFFECTS	CORRESPONDING RICHTER SCALE MAGNITUDE
I	INSTRUMENTAL	Detected only on seismographs.	
II	FEEBLE	Some people feel it.	< 4.2
III	SLIGHT	Felt by people resting; like a truck rumbling by.	
IV	MODERATE	Felt by people walking.	
V	SLIGHTLY STRONG	Sleepers awake; church bells ring.	< 4.8
VI	STRONG	Trees sway; suspended objects swing, objects fall off shelves.	< 5.4
VII	VERY STRONG	Mild alarm; walls crack; plaster falls.	< 6.1
VIII	DESTRUCTIVE	Moving cars uncontrollable; masonry fractures, poorly constructed buildings damaged.	
IX	RUINOUS	Some houses collapse; ground cracks; pipes break open.	< 6.9
X	DISASTROUS	Ground cracks profusely; many buildings destroyed; liquefaction and landslides widespread.	< 7.3
XI	VERY DISASTROUS	Most buildings and bridges collapse; roads, railways, pipes and cables destroyed; general triggering of other hazards.	< 8.1
XII	CATASTROPHIC	Total destruction; trees fall; ground rises and falls in waves.	> 8.1

Source: Federal Emergency Management Agency

5.9.2 Location and Spatial Extent

Approximately two-thirds of North Carolina is subject to earthquakes, with the western and southeast region most vulnerable to a very damaging earthquake. In terms of major faults, the state is primarily affected by the Charleston Fault in South Carolina and New Madrid Fault in Tennessee. Both of these faults have generated earthquakes measuring greater than 8 on the Richter Scale during the last 200 years. In addition, there are several smaller fault lines throughout North Carolina and neighboring states such as the Eastern Tennessee and Virginia seismic zones. These zones have produced smaller earthquakes but are more likely to have an impact on the Tar River Region. **Figure 5-57** is a map showing geological and seismic information for North Carolina including some fault lines and historic event epicenters.

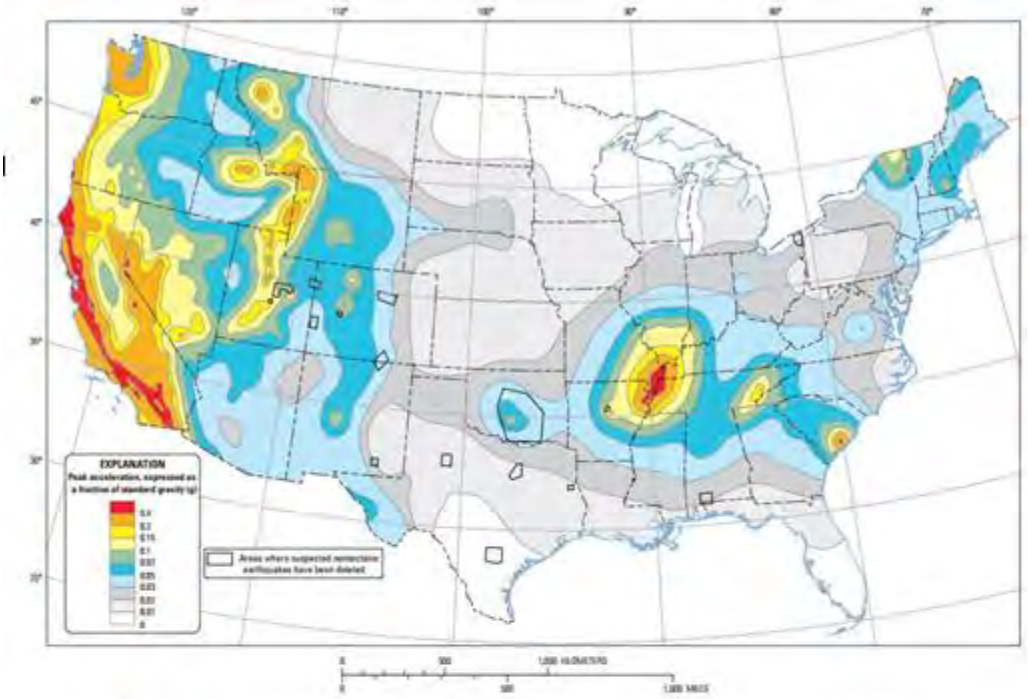

Figure 5-57. Location and Spatial Extent

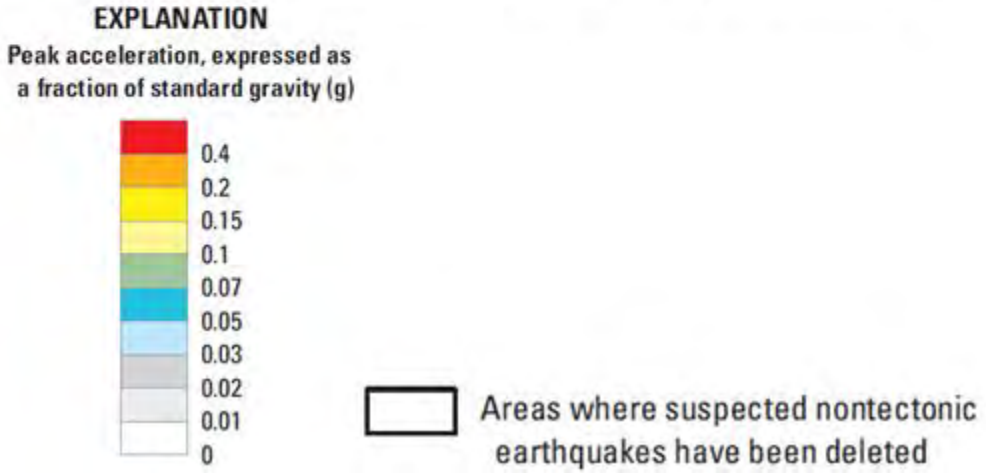

Source: North Carolina Geological Survey

Figure 5-58 shows the intensity level associated with the Tar River Region based on the national USGS map of peak acceleration with 10 percent probability of exceedance in 50 years. It is the probability that ground motion will reach a certain level during an earthquake. The data show peak horizontal ground acceleration (the fastest measured change in speed for a particle at ground level that is moving horizontally due to an earthquake) with a 10 percent probability of exceedance in 50 years. The map was compiled by the U.S. Geological Survey (USGS) Geologic Hazards Team, which conducts global investigations of earthquake, geomagnetic, and landslide hazards. According to this map, all of the Tar River Region lies within an approximate zone of level "2" to "3" ground acceleration. This indicates that the region as a whole exists within an area of low to moderate seismic risk.

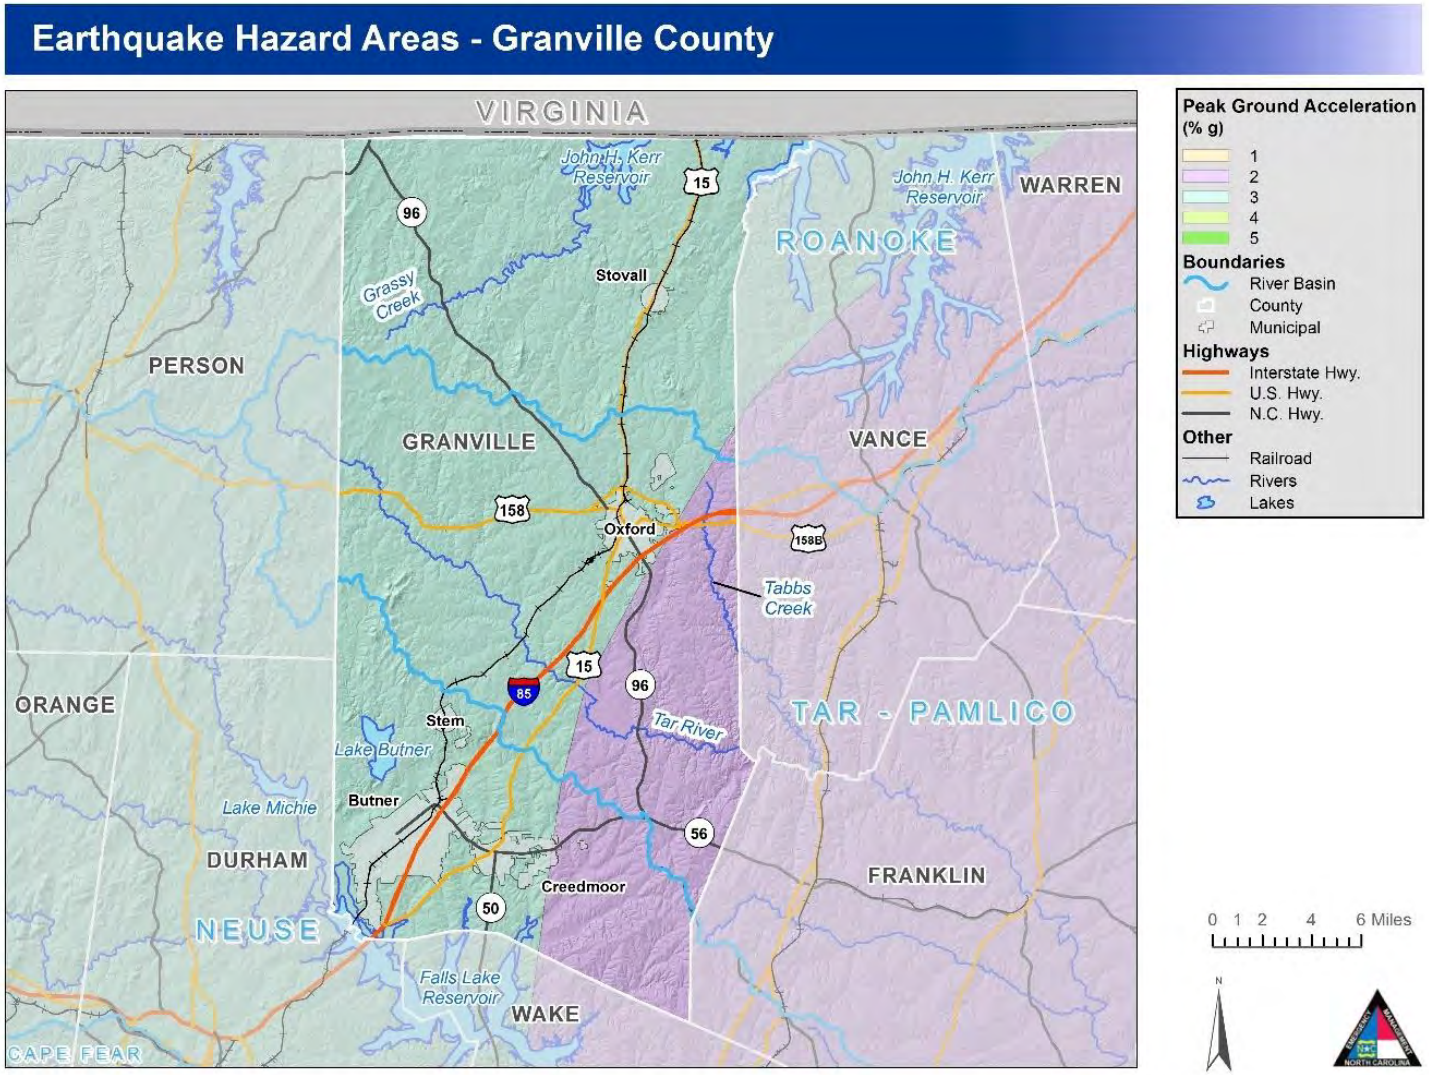

Figure 5-61. Earthquake Hazard Areas – Granville County

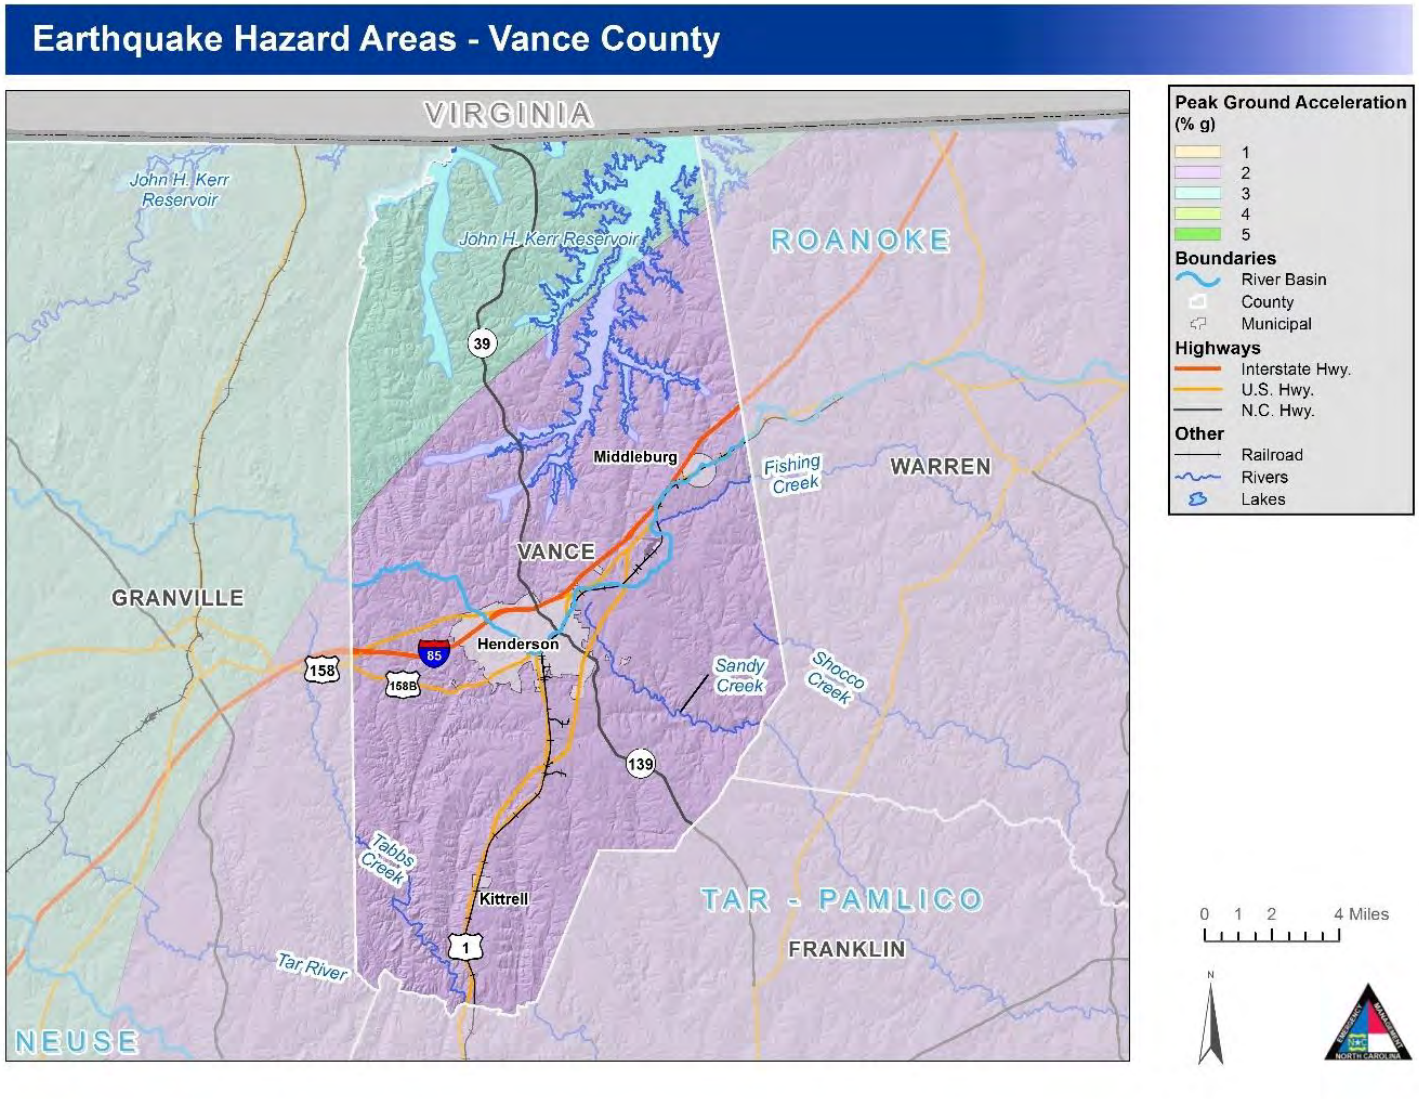

Figure 5-62. Earthquake Hazard Areas – Vance County

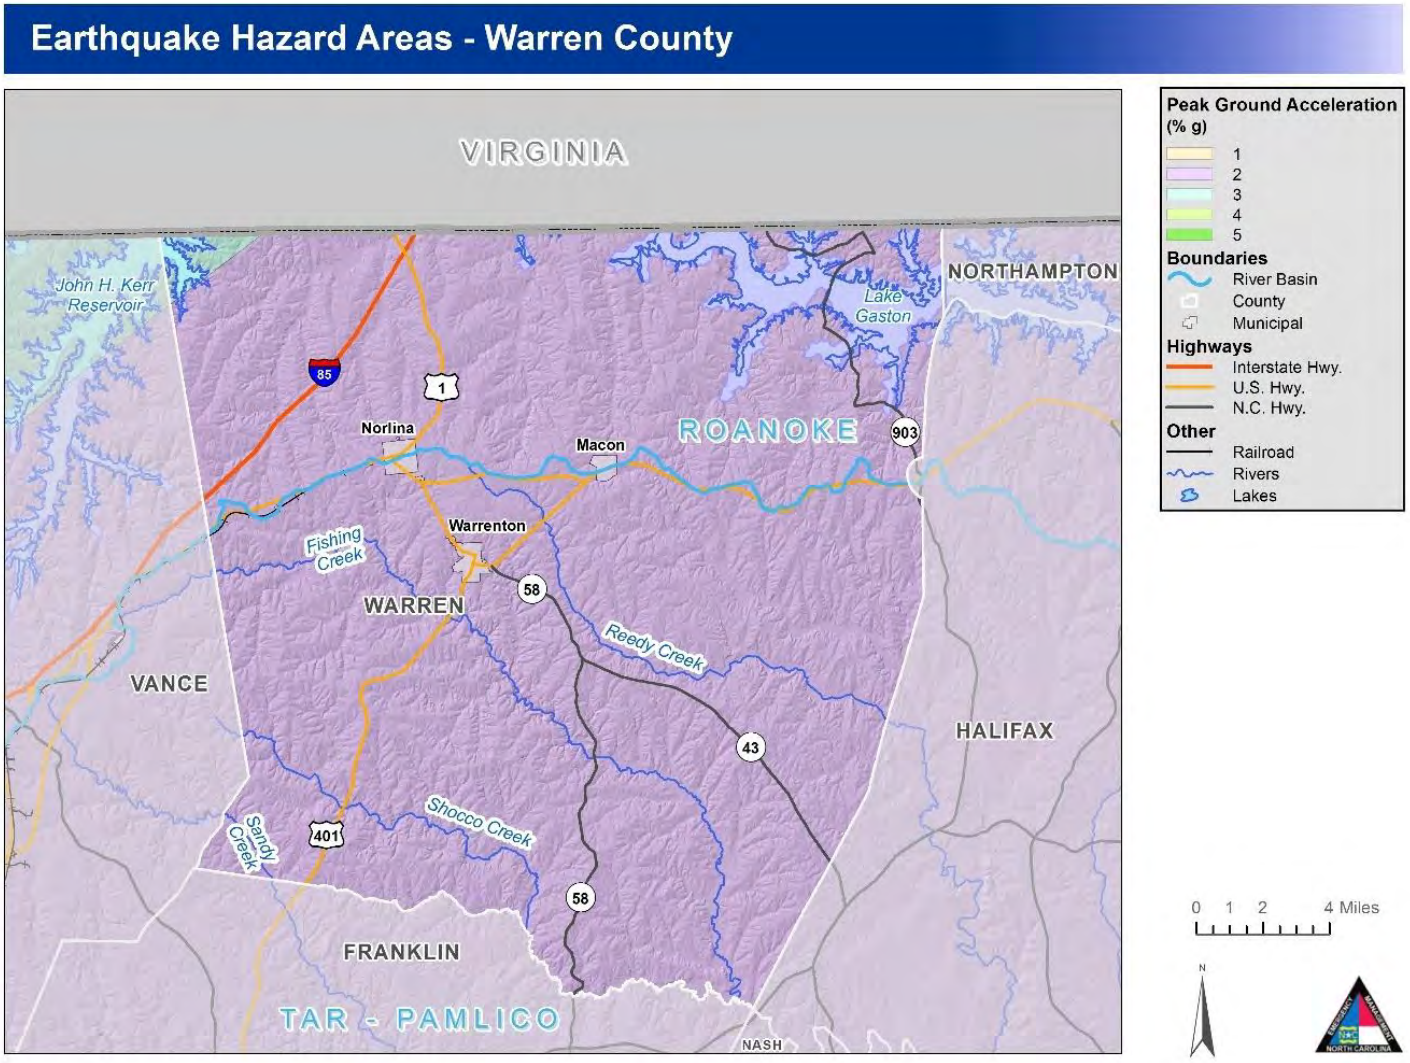

Figure 5-63. Earthquake Hazard Areas – Warren County

5.9.3 Extent

Earthquake extent can be measured by the Richter Scale and the Modified Mercalli Intensity (MMI) scale. The most severe earthquake felt in the Region since the mid-1800s was a five (V) on the Modified Mercalli Intensity Scale. This event occurred in 1886, and the effects of this magnitude earthquake typically include trees swaying, suspended objects swinging, and objects falling off shelves. Extent for the all jurisdictions is depicted below in the table. Earthquakes of greater magnitude may be possible within the Region; however, this is known to be the greatest severity currently on record.

- Franklin County: MMI of III; 4.8 magnitude; 268.0 km to epicenter
- Granville County: MMI of V; unknown magnitude; 400.0 km to epicenter
- Vance County: MMI of IV; unknown magnitude; 18.0 km to epicenter
- Warren County: MMI of V; 4.8 magnitude; 275.0 km to epicenter

5.9.4 Historical Occurrences

At least five earthquakes are known to have affected the Tar River Region since 1886. The strongest of these measured a V on the Modified Mercalli Intensity (MMI) scale. **Table 5-25** provides a summary of earthquake events reported by the National Geophysical Data Center between 1638 and 1985.

*This event is accounted for in the Tar River occurrences.

** Conflicting reports on this event, intensity in North Carolina could have been either V or VI

Source: This information compiled by Dr. Kenneth B. Taylor and provided by Tiawana Ramsey of NCEM. Information was compiled from the National Earthquake Center, Earthquakes of the US by Carl von Hake (1983), and a compilation of newspaper reports in the Eastern Tennessee Seismic Zone compiled by Arch Johnston, CERI, Memphis State University (1983).

5.9.5 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future Earthquake is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 4% Annual Probability of 500-Year Earthquake
- Medium: Between 4% And 20% Annual Probability of 500-Year Earthquake
- High: More Than 20% Annual Probability of 500-Year Earthquake

Jurisdiction	Calculated Probability (IRISK)
City of Creedmoor	Medium
City of Henderson	Medium
City of Oxford	Medium
Franklin County (Unincorporated Area)	Medium
Granville County (Unincorporated Area)	Medium
Town of Bunn	Low

Town of Kittrell	Medium
Town of Louisburg	Low
Town of Macon	Medium
Town of Middleburg	Medium
Town of Norlina	Medium
Town of Stem	Medium
Town of Stovall	Medium
Town of Warrenton	Medium
Town of Youngsville	Low
Vance County (Unincorporated Area)	Medium
Warren County (Unincorporated Area)	Medium

5.9.6 Consequence and Impact Analysis

People

Earthquakes in the region generally are not high impact events that cause injury or death. The public may typically experience some shaking in these events and the greatest threat to health and well-being is often from objects falling from shelves. All jurisdictions in the Region are equally vulnerable to this impact.

First Responders

A moderate earthquake is unlikely to damage infrastructure such as roads, bridges, or gas/power/water lines. Therefore, there would be little impact to first responders in the event of a moderate earthquake in the Region.

Continuity of Operations

There would likely be little disruption to services or operations due to a moderate earthquake.

Built Environment

Buildings can be damaged by the shaking itself or by the ground beneath them settling to a different level than it was before the earthquake (subsidence). Buildings can even sink into the ground if soil liquefaction occurs. If a structure (a building, road, etc.) is built across a fault, the ground displacement during an earthquake could seriously damage that structure. An earthquake can also break dams or levees along a river. The water from the river or the reservoir would then flood the area, damaging buildings and possibly drowning people. Finally, fires can be started by broken gas lines and power lines. Fires can be a serious problem, especially if the water lines that feed the fire hydrants have been damaged as well. Historically, the Region has not been impacted by an earthquake with more than a moderate intensity so damage to the built environment is unlikely.

Economy

Economic losses associated with an earthquake include property damage, business interruption costs, and costs to repair damaged utilities and infrastructure. Historically, there have been no economic losses associated with earthquakes in the Region.

Natural Environment

A moderate earthquake is unlikely to cause substantial impacts to the natural environment in the Region. Impacts to the built environment (e.g. ruptured gas line) could damage the surrounding environment. However, this type damage is unlikely based on historical occurrences.

5.10 Dam Failure

5.10.1 Background

Worldwide interest in dam and levee safety has risen significantly in recent years. Aging infrastructure, new hydrologic information, and population growth in floodplain areas downstream from dams and near levees have resulted in an increased emphasis on safety, operation, and maintenance.

There are approximately 80,000 dams in the United States today, the majority of which are privately owned. Other owners include state and local authorities, public utilities, and federal agencies. The benefits of dams are numerous: they provide water for drinking, navigation, and agricultural irrigation. Dams also provide hydroelectric power, create lakes for fishing and recreation, and save lives by preventing or reducing floods.

Though dams have many benefits, they also can pose a risk to communities if not designed, operated, and maintained properly. In the event of a dam failure, the energy of the water stored behind even a small dam is capable of causing loss of life and great property damage if development exists downstream. If a levee breaks, scores of properties may become submerged in floodwaters and residents may become trapped by rapidly rising water. The failure of dams and levees has the potential to place large numbers of people and great amounts of property in harm's way.

5.10.2 Location and Spatial Extent

The North Carolina Division of Energy, Mineral, and Land Resources provides information on dams, including a hazard potential classification. There are three hazard classifications—high, intermediate, and low—that correspond to qualitative descriptions and quantitative guidelines. **Table 5-27** explains these classifications.

Table 5-27: North Carolina Dam Hazard Classifications

Hazard Classification	Description	Quantitative Guidelines
Low	Interruption of road service, low volume roads	Less than 25 vehicles per day
	Economic damage	Less than $30,000
Intermediate	Damage to highways, Interruption of service	25 to less than 250 vehicles per day
	Economic damage	$30,000 to less than $200,000
High	Loss of human life*	Probable loss of 1 or more human lives
	Economic damage	More than $200,000
	*Probable loss of human life due to breached roadway or bridge on or below the dam.	250 or more vehicles per day

Source: North Carolina Division of Energy, Mineral, and Land Resources

According to the North Carolina Division of Energy, Mineral, and Land Resources, there are 155 dams in the Tar River Region. **Figure 5-64** shows the dam location and the corresponding hazard ranking for each. Of these dams, seven are classified as high hazard potential. These high hazard dams are summarized by county in **Table 5-28**.

Table 5-28: Counts of High Hazard and Intermediate Hazard Dams by Jurisdiction

Jurisdiction	High	Intermediate
Franklin		
Franklin County (Unincorporated Area)	9	10
Bunn	0	0
Franklinton	0	1
Louisburg	0	1

TOTAL PLAN	**11**	**26**

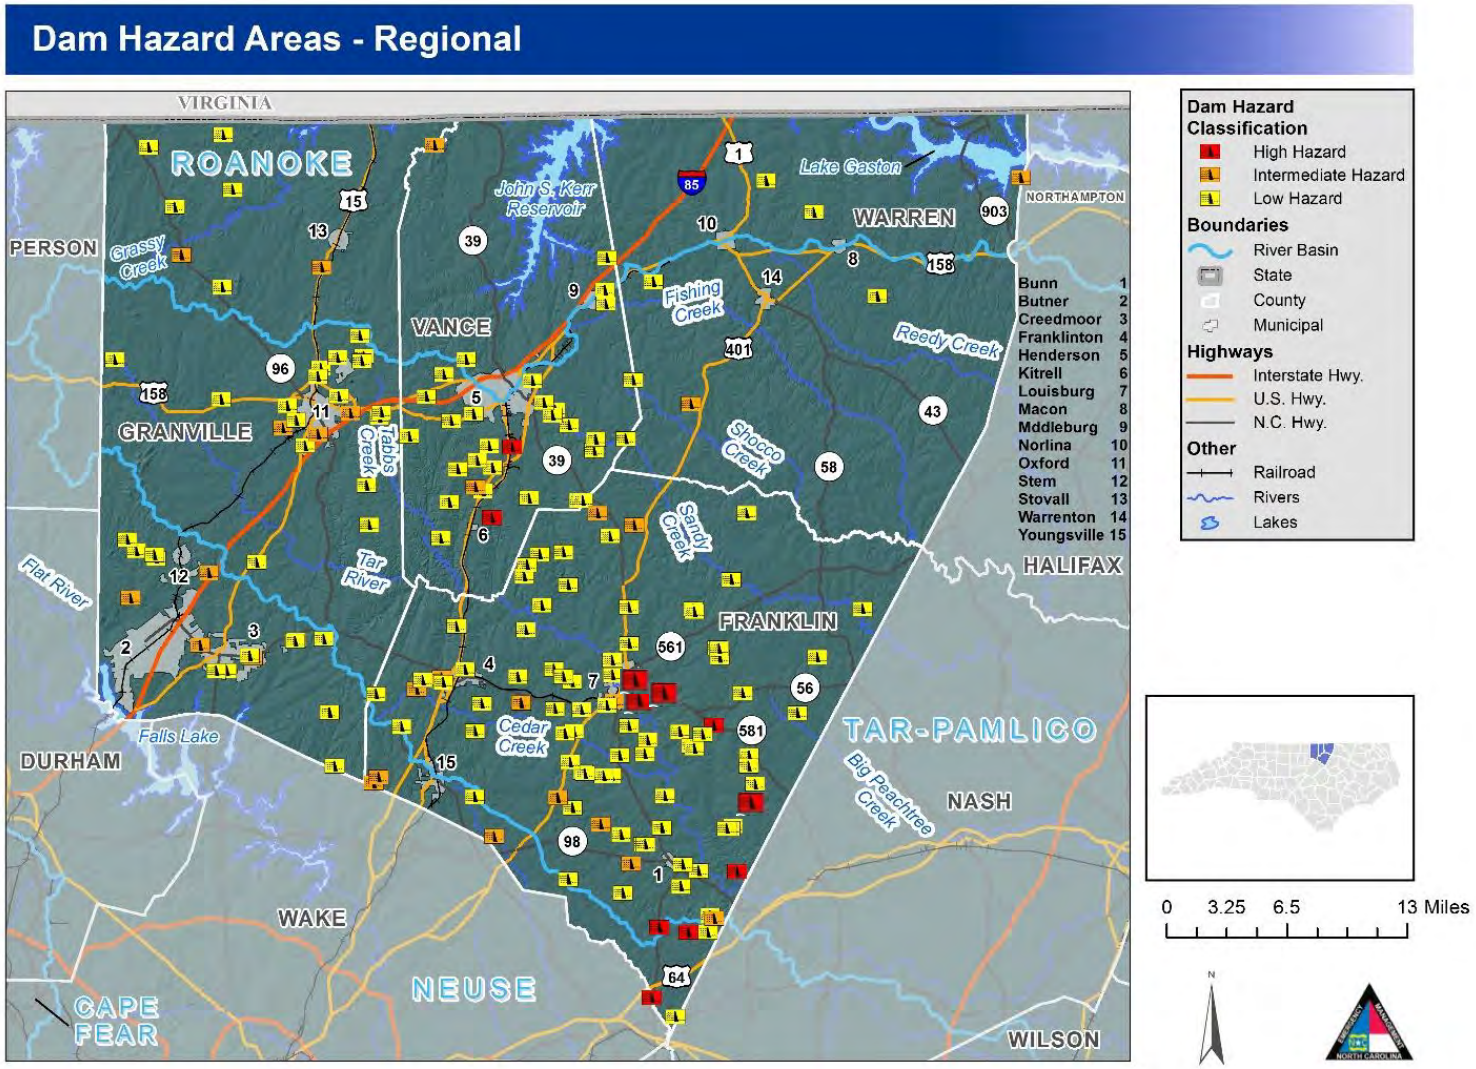

Figure 5-64. Dam Hazard Areas - Regional

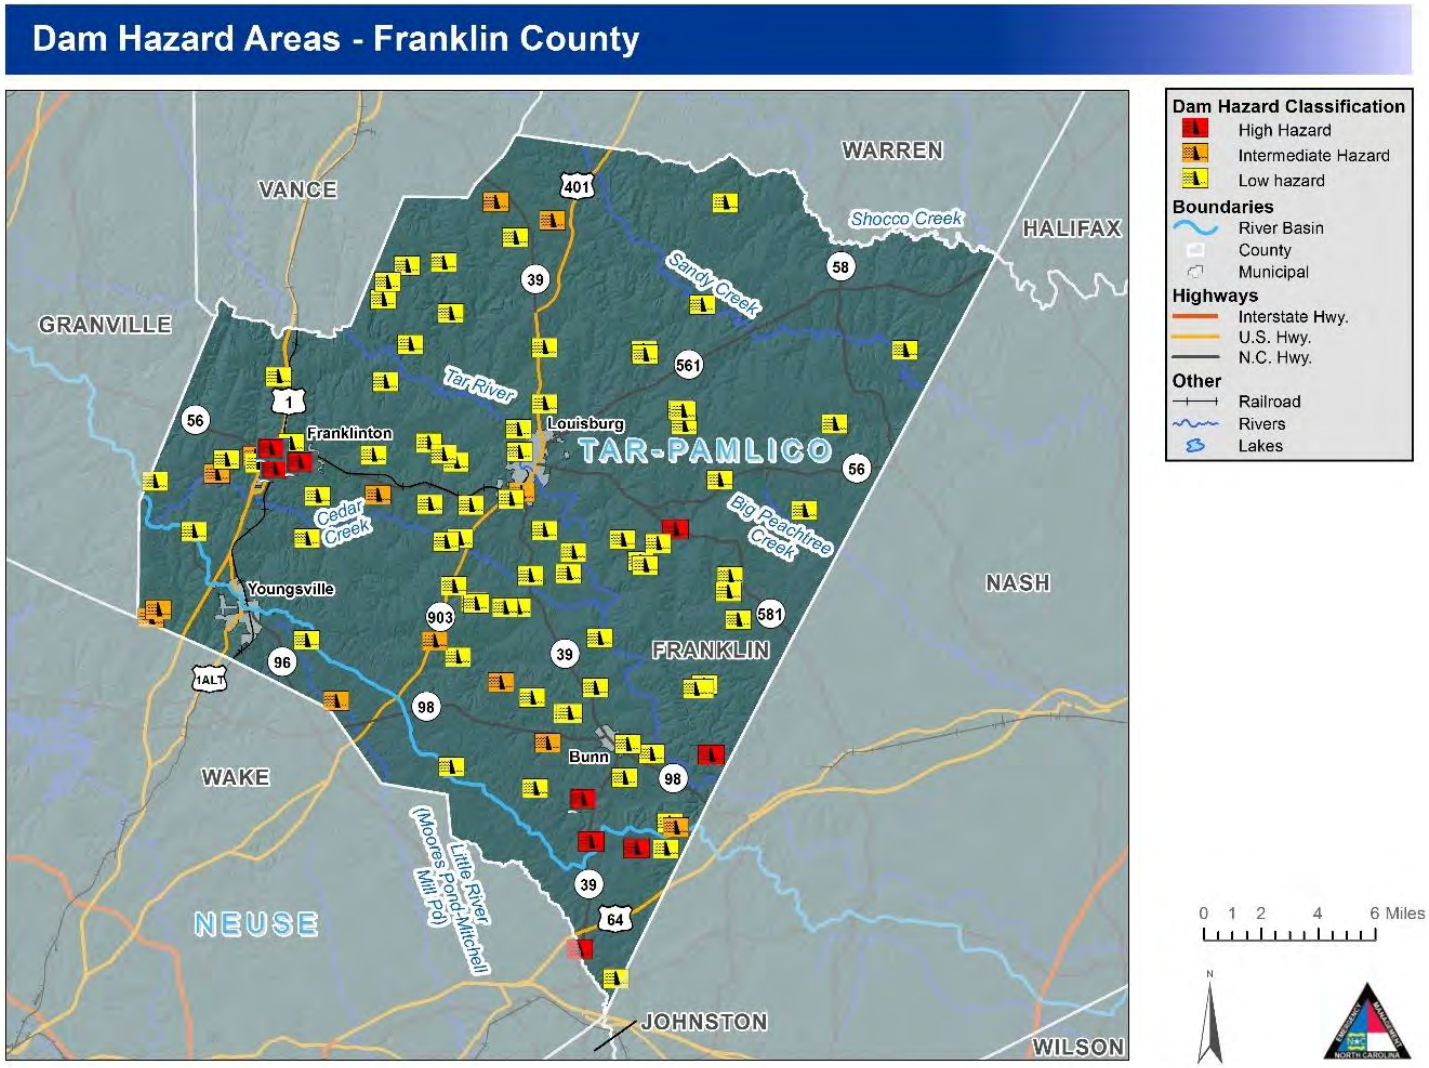

Figure 5-65. Dam Hazard Areas – Franklin County

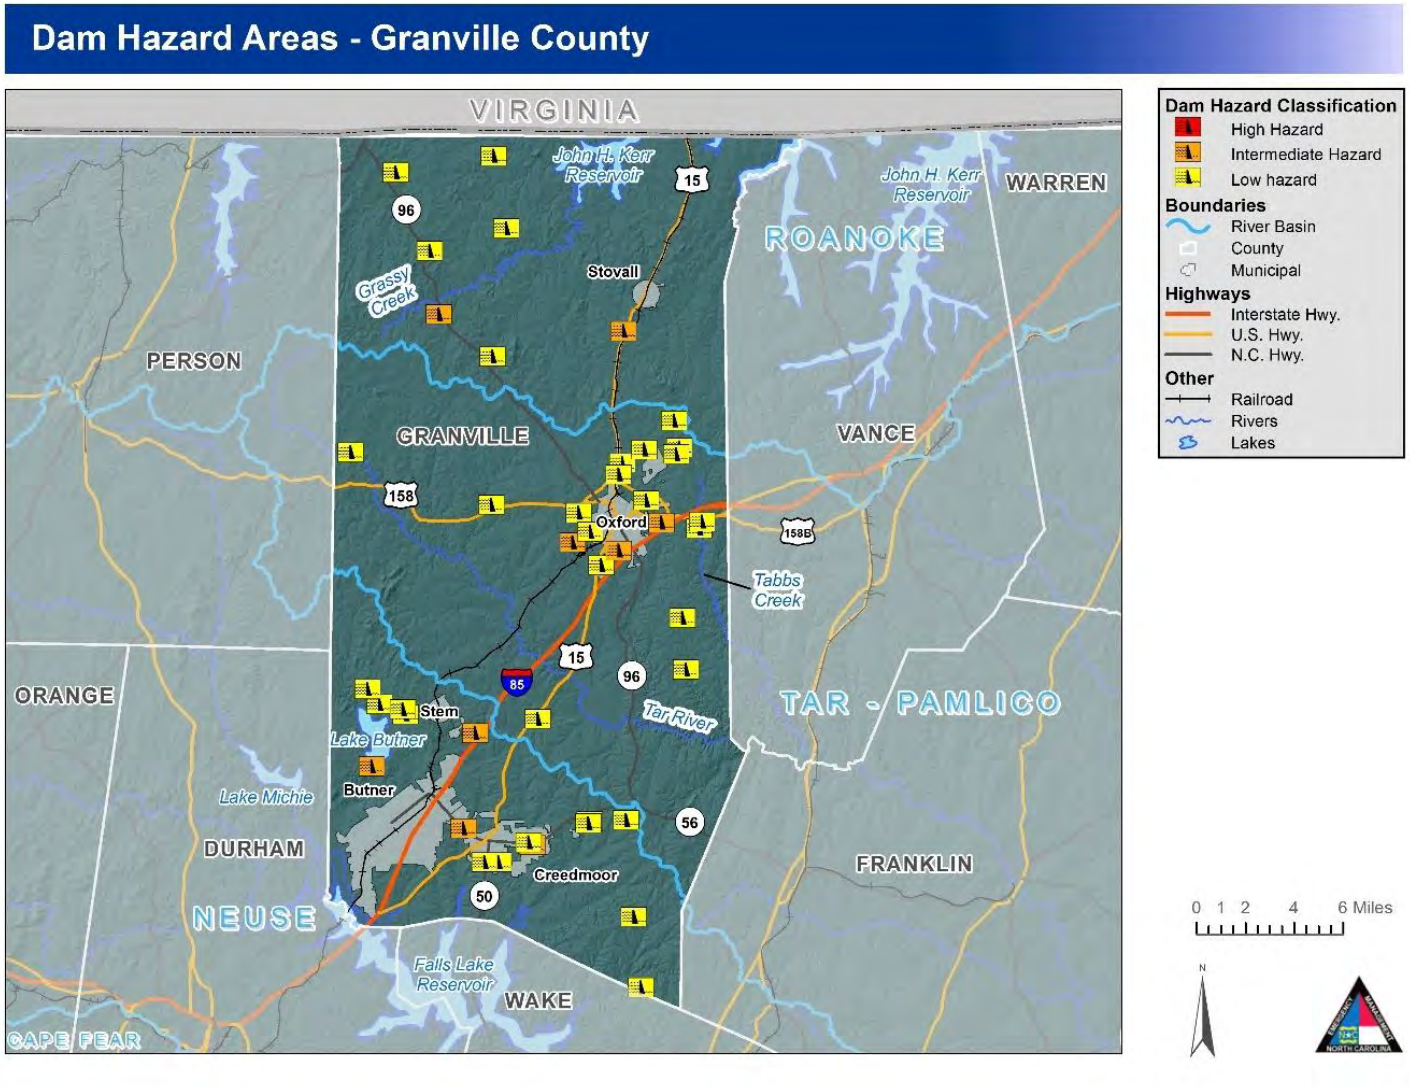

Figure 5-66. Dam Hazard Areas – Granville County

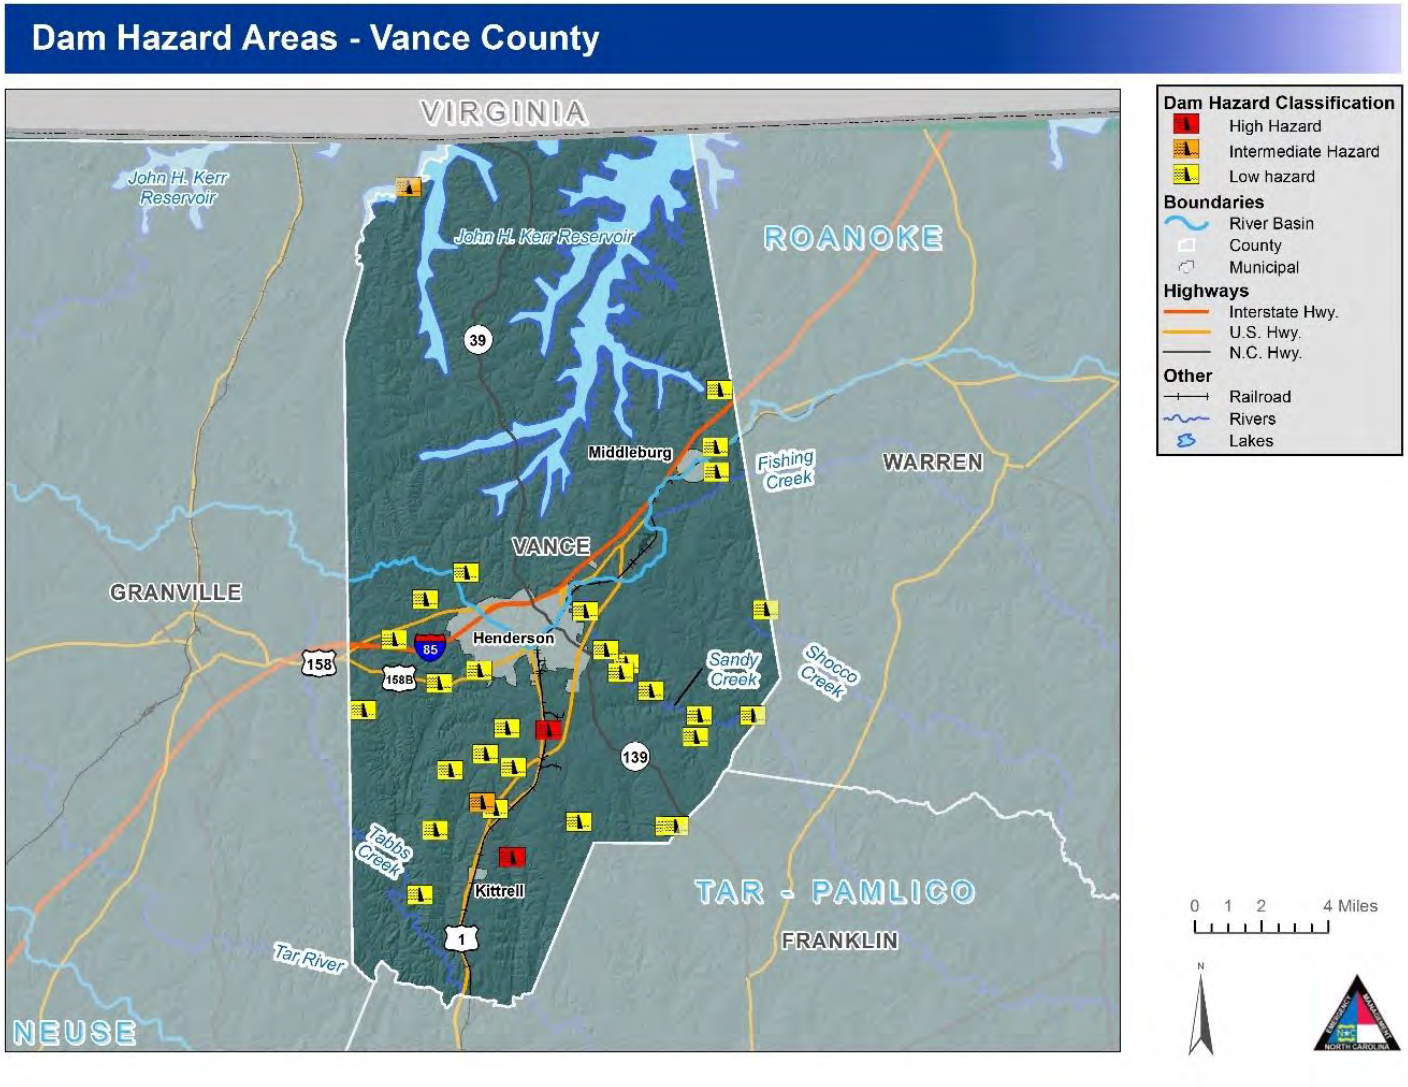

Figure 5-67. Dam Hazard Areas – Vance County

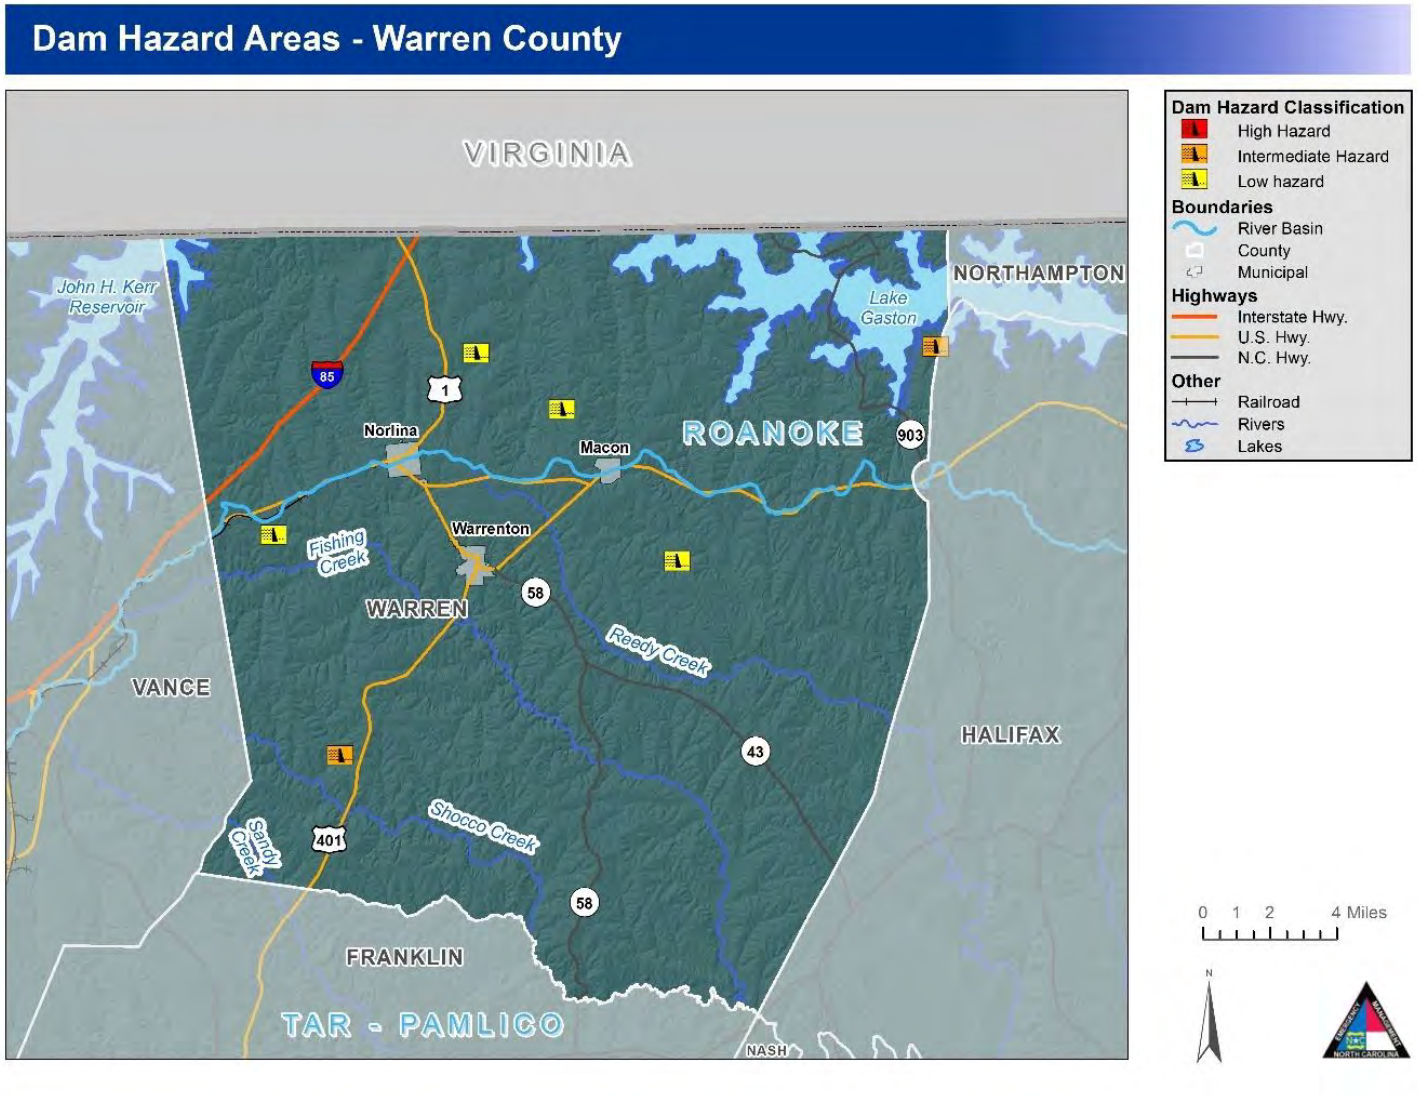

Figure 5-68. Dam Hazard Areas – Warren County

It should be noted that dam regulations for classifying dams was recently changed. As a result, generally more dams are classified as high hazard.

The information below identifies additional information reported in the previous hazard mitigation plans on dam locations.

Franklin County

No additional information was provided by the previous plan.

Granville County

Although dams create Kerr Lake in northern Granville County and Falls Lake in southern Granville County, the vast majority of any damage caused by dam breach or failure would be downstream of Granville County. However, dams at Lake Rogers, the City of Creedmoor's reservoir, and Lake Holt, the Town of Butner's reservoir, protect valuable water resources and would damage homes and infrastructure downstream if they were to fail. Several smaller dams, such as the dam at Golden Pond east of Creedmoor, have unclear ownership and would result in property damage if they failed.

Vance County

John H. Kerr reservoir (referred to as Kerr Lake) is located in Vance County. This 50,000-acre lake extends 39 miles and continues into the State of Virginia. It is the largest reservoir east of the Mississippi River and is created by one of the series of seven dams along the Roanoke River. Base flood elevation for the reservoir is 320 feet (Mean Sea Level). A hydroelectric plant, located on the east end of the reservoir, is owned and operated by the U.S. Army Corp of Engineers. One withdrawal site is located on the reservoir for the Kerr Lake Regional Water System while Lake Gaston is the location of a second withdrawal site for Virginia Beach (bought water storage rights in the Kerr Lake Reservoir). In addition, Clarksville, VA withdraws water from the Kerr Lake Reservoir, as do several local industries. A secondary dam, the Island Creek Dam, is located on the southwest portion of the reservoir. This dam was originally constructed to protect the now closed Tungsten mine, one of the largest tungsten mines in the world. Lands protected by this dam are under a flowage easement up to 290 feet elevation.

Warren County

John H. Kerr Dam is located in Virginia about 10 miles upstream north and west of Warren County. It is rated "high hazard" meaning that if a failure were to occur there is a probable loss of one or more human lives and property damage would probably exceed $200,000. The dam is maintained by the Army Corps of Engineers and would affect the Roanoke River and Lake Gaston, which are located near and along the northern edge of the county.

5.10.3 Extent

Two factors influence the potential severity of a dam failure: the amount of water impounded, and the density, type, and value of development and infrastructure located downstream. The potential extent of dam failure may be classified according to their "hazard potential," meaning the probable damage that would occur if the structure failed, in terms of loss of human life and economic loss or environmental damage. The State of North Carolina classifies dam structures under its regulations according to hazard potential as described in **5-29.** It is important to note that these classifications are not based on the adequacy or structural integrity of existing dam structures. There were no reported dam failures in the Region and all its jurisdictions. Mitigation strategy regarding dam identification and mapping will be considered in future mitigation actions for the Region.

Table 5-29: North Carolina Dam Hazard Classifications

Hazard Classification	Description	Quantitative Guidelines
Low	Interruption of road service, low volume roads	Less than 25 vehicles per day
	Economic damage	Less than $30,000
Intermediate	Damage to highways, Interruption of service	25 to less than 250 vehicles per day
	Economic damage	$30,000 to less than $200,000
High	Loss of human life*	Probable loss of 1 or more human lives
	Economic damage	More than $200,000
	*Probable loss of human life due to breached roadway or bridge on or below the dam.	250 or more vehicles per day

Town of Youngsville	Low
Vance County (Unincorporated Area)	Low
Warren County (Unincorporated Area)	Low

5.10.6 Consequence and Impact Analysis

People

A person's immediate vulnerability to a dam failure is directly associated with the person's distance downstream of the dam as well as proximity to the stream carrying the floodwater from the failure. For dams that have an Emergency Action Plan (EAP), the vulnerability off loss of life for persons in their homes or on their property may be mitigated by following the EAP evacuation procedures; however, the displaced persons may still incur sheltering costs. For persons located on the river (e.g. for recreation) the vulnerability of loss of life is significant.

The dams in the Region do not provide drinking water supply. As a result, the Region is not at risk of major public health threats posed by the disruption of drinking water supply from dam failure. However, the population is vulnerable to minor impacts including the loss of the aesthetic or recreational use of the lakes

upstream of dams following failure. Franklin and Vance County and the jurisdiction of Kittrell are most vulnerable to dam breaches due to past occurrences.

First Responders

For dams that fail slowly, first responders will be impacted similarly to other events that have advance warning. For dams that fail without prior warning, the impact is rapid and severe, requiring rapid response to the impacts. Although the response is generally restricted to the stream below the dam, the location of impact moves rapidly downstream requiring multiple response locations.

Continuity of Operations

Unless critical infrastructure or facilities essential to the operation of government are located in the impact area of the inundation area downstream of the dam, continuity of operations will likely not be disrupted. Emergency response, emergency management and law enforcement officials may have resources stretched or overwhelmed in the failure of a large dam.

Built Environment

Vulnerability to the built environment includes damage to the dam itself and any man-made feature located within the inundation area caused by the dam failure. Downstream of the dam, vulnerability includes potential damage to homes, personal property, commercial buildings and property, and government owned buildings and property; destruction of bridge or culvert crossings; weakening of bridge supports through scour; and damage or destruction of public or private infrastructure that cross the stream such as water and sewer lines, gas lines and power lines. Water dependent structures on the lake upstream of the dam, such as docks/piers, floating structures or water intake structures, may be damaged by the rapid reduction in water level during the failure.

Economy

Economic impact from small dams is generally small and impact is often limited to dam owner and the cost of first responder activities. Large failures can disrupt the economy through displacement of workers, damage to commercial employment centers or destruction of infrastructure that impacts commercial activities or access to other economic drivers.

Natural Environment

Aquatic species within the lake will either be displaced or destroyed. The velocity of the flood wave will likely destroy riparian and instream vegetation and destroy wetland function. The flood wave will like cause erosion within and adjacent to the stream. Deposition of eroded deposits may choke instream habitat or disrupt riparian areas. Sediments within the lake bottom and any low oxygen water from within the lake will be dispersed, potentially causing fish kills or releasing heavy metals found in the lake sediment layers.

5.11 Flood

5.11.1 Background

Flooding is the most frequent and costly natural hazard in the United States and is a hazard that has caused more than 10,000 deaths since 1900. Nearly 90 percent of presidential disaster declarations result from natural events where flooding was a major component.

Floods generally result from excessive precipitation and can be classified under two categories: general floods, precipitation over a given river basin for a long period of time along with storm-induced wave action, and flash floods, the product of heavy localized precipitation in a short time period over a given location. The severity of a flooding event is typically determined by a combination of several major

factors, including stream and river basin topography and physiography, precipitation and weather patterns, recent soil moisture conditions, and the degree of vegetative clearing and impervious surface.

General floods are usually long-term events that may last for several days. The primary types of general flooding include riverine, coastal, and urban flooding. Riverine flooding is a function of excessive precipitation levels and water runoff volumes within the watershed of a stream or river. Coastal flooding is typically a result of storm surge, wind-driven waves, and heavy rainfall produced by hurricanes, tropical storms, and other large coastal storms. Urban flooding occurs where manmade development has obstructed the natural flow of water and decreased the ability of natural groundcover to absorb and retain surface water runoff.

Most flash flooding is caused by slow-moving thunderstorms in a local area or by heavy rains associated with hurricanes and tropical storms. However, flash flooding events may also occur from a dam or levee failure within minutes or hours of heavy amounts of rainfall or from a sudden release of water held by a retention basin or other stormwater control facility. Although flash flooding occurs most often along mountain streams, it is also common in urbanized areas where much of the ground is covered by impervious surfaces.

The periodic flooding of lands adjacent to rivers, streams, and shorelines (land known as a floodplain) is a natural and inevitable occurrence that can be expected to take place based upon established recurrence intervals. The recurrence interval of a flood is defined as the average time interval, in years, expected between a flood event of a particular magnitude and an equal or larger flood. Flood magnitude increases with increasing recurrence interval.

Floodplains are designated by the frequency of the flood that is large enough to cover them. For example, the 10-year floodplain will be covered by the 10-year flood and the 100-year floodplain by the 100-year flood. Flood frequencies, such as the 100-year flood, are determined by plotting a graph of the size of all known floods for an area and determining how often floods of a particular size occur. Another way of expressing the flood frequency is the chance of occurrence in a given year, which is the percentage of the probability of flooding each year. For example, the 100-year flood has a 1 percent chance of occurring in any given year and the 500-year flood has a 0.2 percent chance of occurring in any given year.

5.11.2 Location and Spatial Extent

There are areas in the Tar River Region that are susceptible to flood events. Special flood hazard areas in the Tar River Region were mapped using Geographic Information System (GIS) and FEMA Digital Flood Insurance Rate Maps (DFIRM). This includes Zone A (1-percent annual chance floodplain), Zone AE (1-percent annual chance floodplain with elevation), and Zone X500 (0.2-percent annual chance floodplain). According to GIS analysis, of the 1,745 square miles that make up the Tar River Region, there are 144.2 square miles of land in Zones A and AE (1-percent annual chance floodplain/100-year floodplain) and 2.7 square miles of land in Zone X500 (0.2-percent annual chance floodplain/500-year floodplain). The county totals are presented below in **Table 5-31**.

Table 5-31: Summary of Floodplain Areas in the Tar River Region

Location	100-year area (square miles)	500-year area (square miles)
Franklin County	36.8	1.7
Granville County	34.4	0.7
Vance County	33.5	0.1
Warren County	39.5	0.2
TAR RIVER REGION TOTAL	**144.2**	**2.7**

Source: National Climatic Data Center

These flood zone values account for 8.4 percent of the total land area in the Tar River Region. It is important to note that while FEMA digital flood data is recognized as best available data for planning purposes, it does not always reflect the most accurate and up-to-date flood risk. Flooding and flood-related losses often do occur outside of delineated special flood hazard areas. **Figures 5-69– 5-81** illustrates the location and extent of currently mapped special flood hazard areas for the Tar River Region based on best available FEMA DFIRM data. The towns of Bunn, Stovall, Kittrell, Middleburg, Macon, Norlina and Warrenton do not have a Special Flood Hazard Area (SFHA) and therefore have not been mapped.

5.11.3 Extent

Flood extent can be measured by the amount of land and property in the floodplain as well as flood height and velocity. The amount of land in the floodplain accounts for 8.4 percent of the total land area in the Tar River Region. It should also be noted that local officials recall flooding depths of at least 3-5 feet in some historic events and this is loosely corroborated by NCDC narrative records.

The following table provide peak river stage data according to USGS which shows the highest recorded peak river stage or highest BFE for all jurisdictions.

Table 5-32: Tar River Extent

Community	Flood Extent (Peak streamflow or Highest BFE) & NRI Flood Risk Index	Source (National Risk Index is a source for all)	Anecdotal recollections of first responders and public works engineers
Franklin			
Franklin County	356.6 ft	FIRM Panel 3720184400K	Between 3ft to 4ft of backwater flooding street and local roadways
Bunn	No BFE's	FIRM Panel 370282000K	No Recollections
Franklinton	357.9 ft	FIRM Panel 3720184400K	Between 3ft to 4ft of backwater flooding street and local roadways
Louisburg	No BFE's	FIRM Panel 3720188400K, 3720280500K, 3720281600J	Between 3ft to 4ft of backwater flooding street and local roadways
Youngsville	No BFE's	FIRM Panel 3720184400K, 3720184300K, 3720185300K, 3720184200L, 3720185200J, 3720186200J	No Recollections
Granville			
Granville County	320.1 ft	FIRM Panel 3721101000K	Between 3ft to 5ft of backwater flooding street and local roadways
Butner	265.5 ft	FIRM Panel 3720085500K	Between 3ft to 4ft of backwater flooding street and local roadways

5.11.4 Historical Occurrences

There is a minor discrepancy in the visualization of river flooding data in the river flooding figures because the data was provided by RMT/iRisk and did not use the data in the tables below. The following historical occurrences ranging from 2005 to 2020 have been identified based on the National Climatic Data Center (NCDC) Storm Events database **Table 5-33**. It should be noted that only those historical occurrences listed in the NCDC database are shown here and that other, unrecorded or unreported events may have occurred within the planning area during this timeframe.

Table 5-33: Historical Occurrences of River Flooding (2005 to 2020)

Source: National Climatic Data Center (NCDC) Storm Events Database and or potential user entered data.

According to NCDC 27 recorded instances of River Flooding conditions have affected the planning area since 2005 to 2020 causing an estimated $355,000 in losses to property, $0 in losses to agricultural crops, 0 death(s), and 2 injury(ies).

Table 5-34 provides a summary of this historical information by participating jurisdiction. It is important to note that many of the events attributed to the county are countywide or cover large portions of the county. The individual counts by jurisdiction are for those events that are only attributed to that one jurisdiction.

5.11.5 Historical Summary of Insured Flood Losses

According to FEMA flood insurance policy records, there have been 35 flood losses reported in the Tar River Region through the National Flood Insurance Program (NFIP) since 1978, totaling nearly $1.2 million in claims payments. A summary of these figures for each Tar River jurisdiction is provided in **Table 5-35**. It

should be emphasized that these numbers include only those losses to structures that were insured through the NFIP policies and for losses in which claims were sought and received. It is likely that many additional instances of flood loss in the Tar River Region were either uninsured, denied claims payment, or not reported.

Table 5-35: Summary of Insured Flood Losses in the Tar River Region

5.11.6 Repetitive Loss Properties

FEMA defines a repetitive loss property as any insurable building for which two or more claims of more than $1,000 were paid by the NFIP within any rolling 10-year period since 1978. A repetitive loss property may or may not be currently insured by the NFIP. Currently there are over 140,000 repetitive loss properties nationwide.

As of 2020, there are 6 non-mitigated residential repetitive loss properties located in the Tar River Region, which accounted for 12 losses and nearly $200,000 in claims payments under the NFIP. The average claim amount for these properties is $15,540. All of these properties are single family residential buildings. Table 5-19 lists repetitive loss data by county, according to FEMA records. Types of repetitive loss properties can include residential, commercial, institutional etc. Properties that have suffered repetitive damage due to flooding are currently limited to residential structures. Without mitigation these properties will likely continue to experience flood loses. **Tables 5-36** presents a summary these figures for the Tar River Region.

Table 5-36: Summary of Repetitive Loss Properties in the Tar River Region

Location	Number of Properties	Number of Flood Losses	Total Claims Payments
Franklin County	**4**	**8**	**$107,242**

5.11.7 Probability of Future Occurrences

Based on the analyses performed in IRISK, the probability of future River Flooding is shown in the table below, by jurisdiction.

Definitions for Descriptors Used for Probability of Future Hazard Occurrences

- Low: Less Than 1% Annual Probability
- Medium: Between 1% And 10% Annual Probability
- High: More Than 10% Annual Probability

Jurisdiction	Calculated Probability (IRISK)
City of Creedmoor	Low
City of Henderson	Low
City of Oxford	Low
Franklin County (Unincorporated Area)	Medium
Granville County (Unincorporated Area)	Low
Town of Bunn	Medium
Town of Butner	Low
Town of Franklinton	Low
Town of Kittrell	Low
Town of Louisburg	Medium
Town of Macon	Low
Town of Middleburg	Low
Town of Norlina	Low

Jurisdiction	Calculated Probability (IRISK)
Town of Stem	Low
Town of Stovall	Low
Town of Warrenton	Low
Town of Youngsville	Low
Vance County (Unincorporated Area)	Low
Warren County (Unincorporated Area)	Low

5.11.8 Consequence and Impact Analysis

People

Certain health hazards are common to flood events. While such problems are often not reported, three general types of health hazards accompany floods. The first comes from the water itself. Floodwaters carry anything that was on the ground that the upstream runoff picked up, including dirt, oil, animal waste, and lawn, farm and industrial chemicals. Pastures and areas where farm animals are kept, or their wastes are stored can contribute polluted waters to the receiving streams.

Floodwaters also saturate the ground, which leads to infiltration into sanitary sewer lines. When wastewater treatment plants are flooded, there is nowhere for the sewage to flow. Infiltration and lack of treatment can lead to overloaded sewer lines that can back up into low-lying areas and homes. Even when it is diluted by flood waters, raw sewage can be a breeding ground for bacteria such as E. coli and other disease-causing agents. All jurisdictions in the Region are susceptible to this type of impact.

The second type of health problem arises after most of the water has gone. Stagnant pools can become breeding grounds for mosquitoes, and wet areas of a building that have not been properly cleaned breed mold and mildew. A building that is not thoroughly cleaned becomes a health hazard, especially for small children and the elderly.

Another health hazard occurs when heating ducts in a forced air system are not properly cleaned after inundation. When the furnace or air conditioner is turned on, the sediments left in the ducts are circulated throughout the building and breathed in by the occupants. If the City water system loses pressure, a boil order may be issued to protect people and animals from contaminated water.

The third problem is the long-term psychological impact of having been through a flood and seeing one ‘s home damaged and personal belongings destroyed. The cost and labor needed to repair a flood-damaged home puts a severe strain on people, especially the unprepared and uninsured. There is also a long-term problem for those who know that their homes can be flooded again. The resulting stress on floodplain residents takes its toll in the form of aggravated physical and mental health problems.

First Responders

First responders are at risk when attempting to rescue people from their homes. They are subject to the same health hazards as the public mentioned above. Flood waters may prevent access to areas in need of response or the flood may prevent access to the critical facilities themselves which may prolong response time.

Continuity of Operations

Floods can severely disrupt normal operations, especially when there is a loss of power.

Built Environment

Residential, commercial, and public buildings, as well as critical infrastructure such as transportation, water, energy, and communication systems may be damaged or destroyed by flood waters. Franklin County and the jurisdictions of Bunn and Louisburg appear to be more vulnerable to this impact.

Economy

During floods (especially flash floods), roads, bridges, farms, houses and automobiles are destroyed. Additionally, the local government must deploy firemen, police and other emergency response personnel and equipment to help the affected area. It may take years for the affected communities to be re-built and business to return to normal.

Natural Environment

During a flood event, chemicals and other hazardous substances may end up contaminating local water bodies. Flooding kills animals and in general disrupts the ecosystem. Snakes and insects may also make their way to the flooded areas.

Other Hazards

5.12 Wildfire

5.12.1 Background

A wildfire is any outdoor fire (i.e., grassland, forest, brush land) that is not under control, supervised, or prescribed.[5] Wildfires are part of the natural management of forest ecosystems but may also be caused by human factors.

Nationally, over 80 percent of forest fires are started by negligent human behavior such as smoking in wooded areas or improperly extinguishing campfires. The second most common cause for wildfire is lightning. In North Carolina, a majority of fires are caused by debris burning.

There are three classes of wildland fires: surface fire, ground fire, and crown fire. A surface fire is the most common of these three classes and burns along the floor of a forest, moving slowly and killing or damaging trees. A ground fire (muck fire) is usually started by lightning or human carelessness and burns on or below the forest floor. Crown fires spread rapidly by wind and move quickly by jumping along the tops of trees. Wildfires are usually signaled by dense smoke that fills the area for miles around.

Wildfire probability depends on local weather conditions, outdoor activities such as camping, debris burning, and construction, and the degree of public cooperation with fire prevention measures. Drought conditions and other natural hazards (such as tornadoes, hurricanes, etc.) increase the probability of wildfires by producing fuel in both urban and rural settings.

Many individual homes and cabins, subdivisions, resorts, recreational areas, organizational camps, businesses, and industries are located within high wildfire hazard areas. Furthermore, the increasing demand for outdoor recreation places more people in wildlands during holidays, weekends, and vacation periods. Unfortunately, wildland residents and visitors are rarely educated or prepared for wildfire events that can sweep through the brush and timber and destroy property within minutes.

Wildfires can result in severe economic losses as well. Businesses that depend on timber, such as paper mills and lumber companies, experience losses that are often passed along to consumers through higher prices and sometimes jobs are lost. The high cost of responding to and recovering from wildfires can deplete state resources and increase insurance rates. The economic impact of wildfires can also be felt in the tourism industry if roads and tourist attractions are closed due to health and safety concerns.

State and local governments can impose fire safety regulations on home sites and developments to help curb wildfire. Land treatment measures such as fire access roads, water storage, helipads, safety zones, buffers, firebreaks, fuel breaks, and fuel management can be designed as part of an overall fire defense system to aid in fire control. Fuel management, prescribed burning, and cooperative land management planning can also be encouraged to reduce fire hazards.

5.12.2 Location and Spatial Extent

The entire region is at risk to a wildfire occurrence. However, several factors such as drought conditions or high levels of fuel on the forest floor may make a wildfire more likely. Furthermore, areas in the urban-wildland interface are particularly susceptible to fire hazard as populations abut formerly undeveloped areas. The Wildfire Ignition Density data shown in the figure below give an indication of

[5]Prescription burning, or "controlled burn," undertaken by land management agencies is the process of igniting fires under selected conditions, in accordance with strict parameters.

historic locations impacted in the region. **Figure 5-82** shows the Wildfire Ignition Density in the Region based on data from the Southern Group of State Foresters. This data is based on historical fire ignitions and the likelihood of a wildfire igniting in an area. Occurrence is derived by modeling historic wildfire ignition locations to create an average ignition rate map. This is measured in the number of fires per year per 1,000 acres.

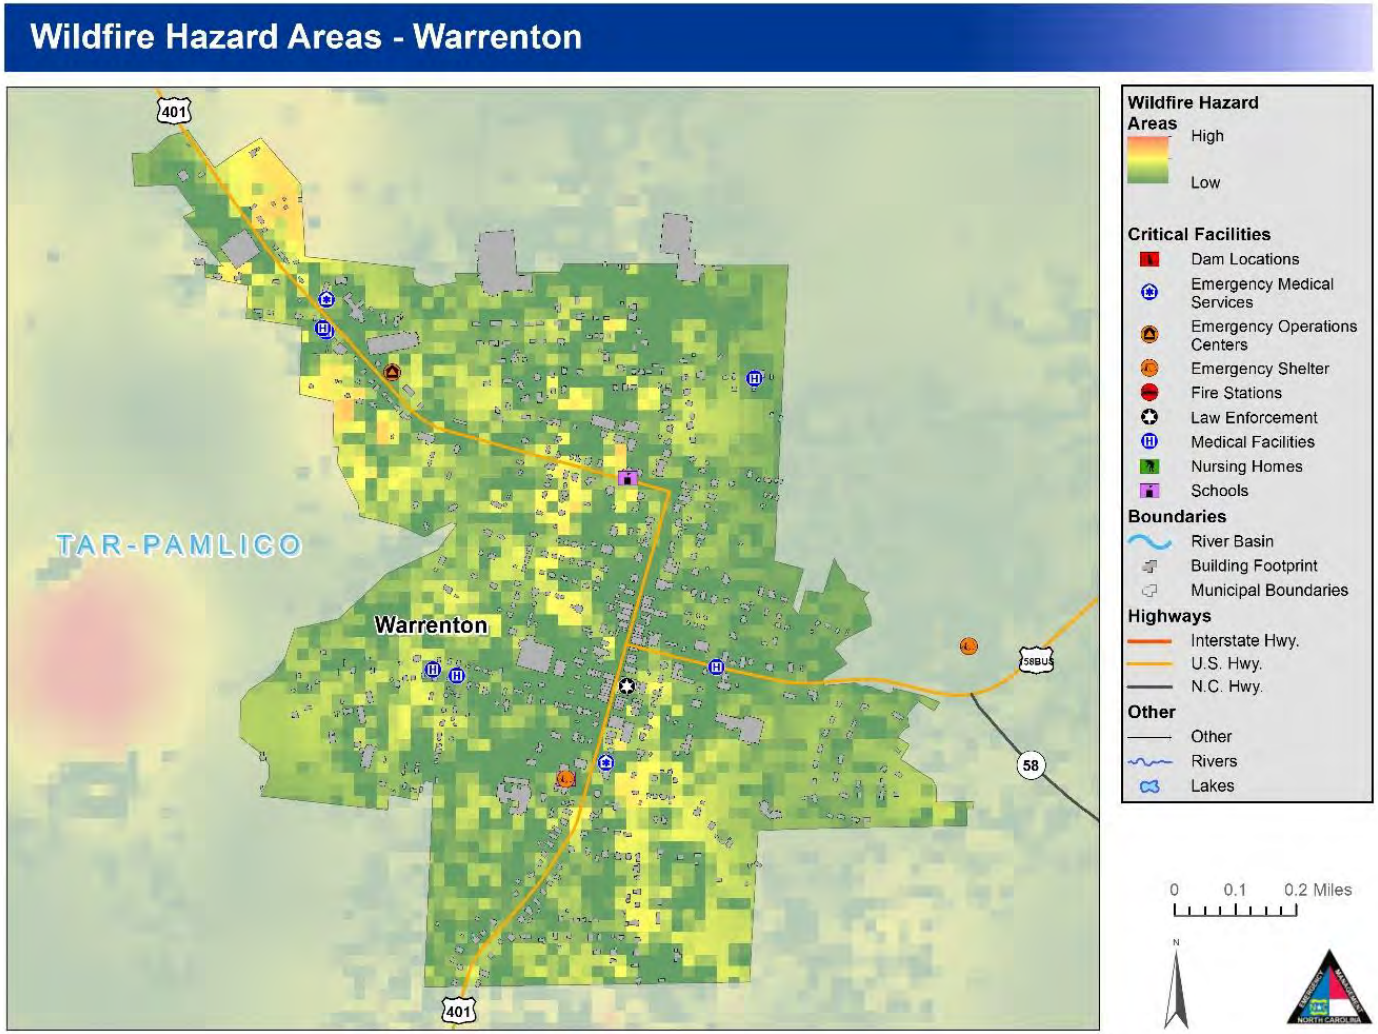

Figure 5-102. Wildfire Hazard Areas – Warrenton

5.12.3 Extent

Wildfire data was provided by the North Carolina Division of Forest Resources and is reported annually by county from 2005-2020. Analyzing the data by county indicates the following wildfire hazard extent for each county. Although this data lists the extent that has occurred, larger and more frequent wildfires are possible throughout the region.

Franklin County

- The greatest number of fires to occur in any year was 99 in 2007.
- The greatest number of acres to burn in a single year occurred in 2008 when 2,378.0 acres were burned.

Granville County

- The greatest number of fires to occur in any year was 68 in 2007.
- The greatest number of acres to burn in a single year occurred in 2008 when 600.3 acres were burned.

Vance County

- The greatest number of fires to occur in any year was 80 in 2001.
- The greatest number of acres to burn in a single year occurred in 2001 when 176.9 acres were burned.

Warren County

- The greatest number of fires to occur in any year was 75 in 2001.
- The greatest number of acres to burn in a single year occurred in 2011 when 2,094.0 acres were burned.

The average size of wildfires in the Region is typically small. Wildfire data was provided by the North Carolina Division of Forest Resources through Community Wildfire Protection Plans (Included in Appendix H) and is reported annually by counties. The table below shows the number of acres burned for each community in the last five years. It should be noted that there may have been multiple acres burned that are not depicted by this table due to the small size of the fire and/or the unavailability of data at the local level.

5.12.4 Historical Occurrences

Figure 5-103 shows the Wildfire Ignition Density in the Tar River Region based on data from the Southern Wildfire Risk Assessment. This data is based on historical fire ignitions and the likelihood of a wildfire igniting in an area. Occurrence is derived by modeling historic wildfire ignition locations to create an average ignition rate map. This is measured in the number of fires per year per 1,000 acres.[6]

[6] Southern Wildfire Risk Assessment, 2015.

Figure 5-103. Wildfire Ignition Density in the Tar River Region

Source: Southern Wildfire Risk Assessment

Based on data from the North Carolina Division of Forest Resources from 2015 to 2020, the Tar River Region experienced an average of 34 wildfires annually which burn a combined 58.79 acres per year. The data indicate that most of these fires are small to moderate in size, averaging around seven acres per fire. **Tables 5-38 – 5-41** provides a summary table for wildfire occurrences in the Tar River Region.

Warren County (Unincorporated Area)	Low

5.12.6 Consequence and Impact Analysis

People

The potential health risk from wildfire events and the resulting diminished air quality is a concern. Exposure to wildfire smoke can cause serious health problems within a community, including asthma attacks and pneumonia, and can worsen chronic heart and lung diseases. Vulnerable populations include people with respiratory problems or with heart disease. Even healthy citizens may experience minor symptoms, such as sore throats and itchy eyes.

First Responders

Public and firefighter safety is the first priority in all wildland fire management activities. Wildfires are a real threat to the health and safety of the emergency services. Most fire-fighters in rural areas are 'retained'. This means that they are part-time and can be called away from their normal work to attend to fires.

Continuity of Operations

Wildfire events can result in a loss of power which may impact operations. Downed trees, power lines and damaged road conditions may prevent access to critical facilities and/or emergency equipment.

Built Environment

Wildfires frequently damage community infrastructure, including roadways, communication networks and facilities, power lines, and water distribution systems. Restoring basic services is critical and a top priority. Efforts to restore roadways include the costs of maintenance and damage assessment teams, field data collection, and replacement or repair costs. Direct impacts to municipal water supply may occur through contamination of ash and debris during the fire, destruction of aboveground distribution lines, and soil erosion or debris deposits into waterways after the fire. Utilities and communications repairs are also necessary for equipment damaged by a fire. This includes power lines, transformers, cell phone towers, and phone lines.

Economy

Wildfires can have significant short-term and long-term effects on the local economy. Wildfires, and extreme fire danger, may reduce recreation and tourism in and near the fires. If aesthetics are impaired, local property values can decline. Extensive fire damage to trees can significantly alter the timber supply, both through a short-term surplus from timber salvage and a longer-term decline while the trees regrow. Water supplies can be degraded by post-fire erosion and stream sedimentation. Franklin County and the jurisdictions of Bunn and Warrenton appear to be more vulnerable to this impact.

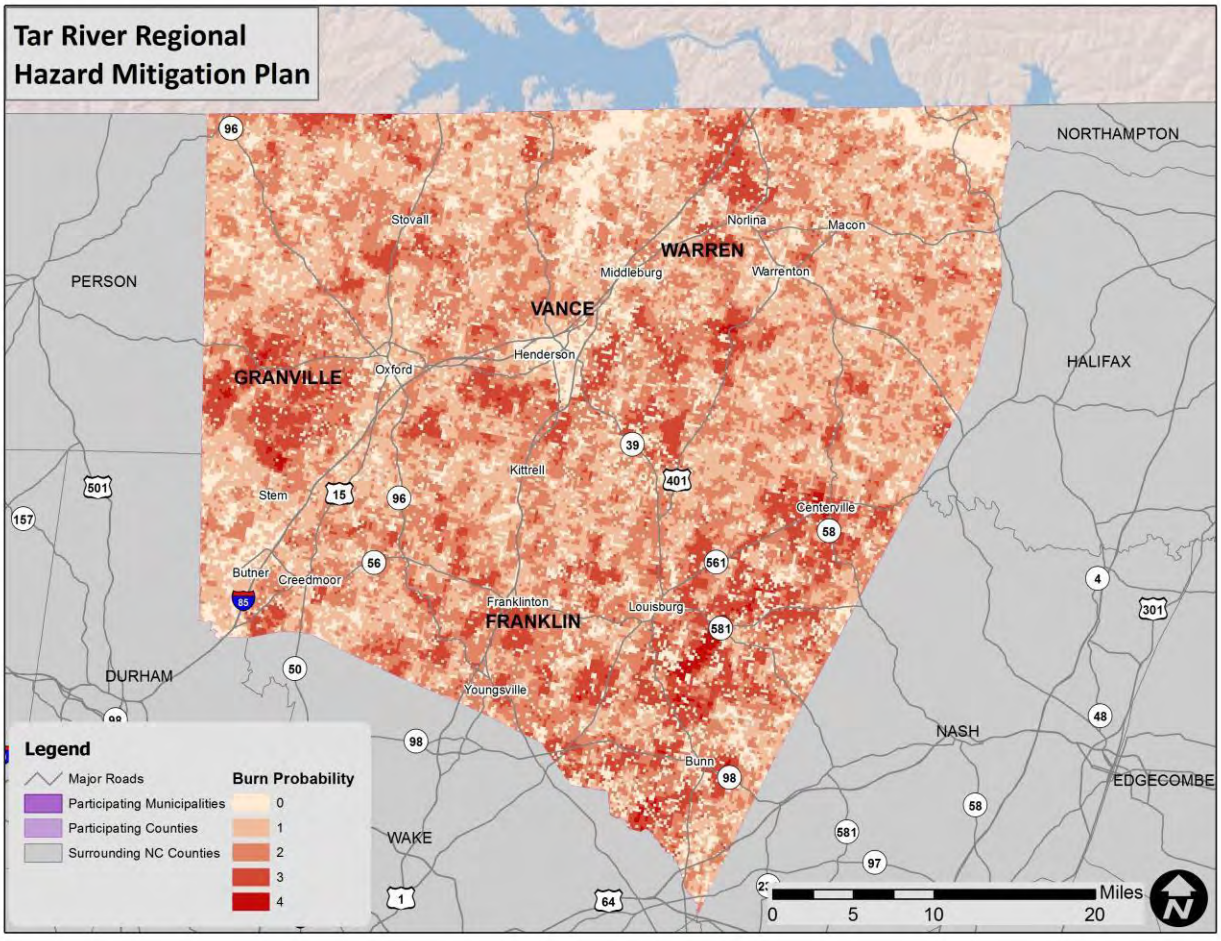

Wildfires can also have positive effects on local economies. Positive effects come from economic activity generated in the community during fire suppression and post-fire rebuilding. These may include forestry support work, such as building fire lines and performing other defenses, or providing firefighting teams with food, ice, and amenities such as temporary shelters and washing machines.

Natural Environment

Wildfires cause damage to the natural environment, killing vegetation and occasionally animals. The risk of floods and debris flows increases due to the exposure of bare ground and the loss of vegetation. In addition, the secondary effects of wildfires, including erosion, landslides, introduction of invasive species, and changes in water quality, are often more disastrous than the fire itself.

Wildfire events will be an ongoing occurrence in the Tar River Region. **Figure 5-104** shows that there is some probability a wildfire will occur throughout the region. However, the likelihood of wildfires increases during drought cycles and abnormally dry conditions. Fires are likely to stay small in size but could increase due local climate and ground conditions. Dry, windy conditions with an accumulation of forest floor fuel (potentially due to ice storms or lack of fire) could create conditions for a large fire that spreads quickly. It should also be noted that some areas do vary somewhat in risk. For example, highly developed areas are less susceptible unless they are located near the urban-wildland boundary. The risk will also vary due to assets. Areas in the urban-wildland interface will have much more property at risk, resulting in increased vulnerability and need to mitigate compared to rural, mainly forested areas. The probability assigned to the Tar River Region for future wildfire events is highly likely (100 percent annual probability).

Figure 5-104. Burn Probability in the Tar River Region

Source: Southern Wildfire Risk Assessment

5.12.7 Conclusions on Hazard Risk

The hazard profiles presented in this section were developed using best available data and result in what may be considered principally a qualitative assessment as recommended by FEMA in its "How-to" guidance document titled Understanding Your Risks: Identifying Hazards and Estimating Losses (FEMA Publication 386-2). It relies heavily on historical and anecdotal data, stakeholder input, and professional and experienced judgment regarding observed and/or anticipated hazard impacts. It also carefully considers the findings in other relevant plans, studies, and technical reports.

5.12.8 Priority Risk Index

In order to draw some meaningful planning conclusions on hazard risk for the Tar River Region, the results of the hazard profiling process were used to generate countywide hazard classifications according to a "Priority Risk Index" (PRI). The purpose of the PRI is to categorize and prioritize all potential hazards for the Tar River Region as high, moderate, or low risk. Combined with the asset inventory and quantitative vulnerability assessment provided in the next section, the summary hazard classifications generated through the use of the PRI allows for the prioritization of those high hazard risks for mitigation planning purposes and, more specifically, the identification of hazard mitigation opportunities for the jurisdictions in the Tar River Region to consider as part of their proposed mitigation strategy.

The prioritization and categorization of identified hazards for the Tar River Region is based principally on the PRI, a tool used to measure the degree of risk for identified hazards in a particular planning area. The PRI is used to assist the Tar River Regional Hazard Mitigation Planning Team in gaining consensus on the determination of those hazards that pose the most significant threat to the Tar River counties based on a variety of factors. The PRI is not scientifically based but is rather meant to be utilized as an objective planning tool for classifying and prioritizing hazard risks in the Tar River Region based on standardized criteria.

The application of the PRI results in numerical values that allow identified hazards to be ranked against one another (the higher the PRI value, the greater the hazard risk). PRI values are obtained by assigning varying degrees of risk to five categories for each hazard (probability, impact, spatial extent, warning time, and duration). Each degree of risk has been assigned a value (1 to 4) and an agreed upon weighting factor,27 as summarized in **Table 5-42**. To calculate the PRI value for a given hazard, the assigned risk value for each category is multiplied by the weighting factor. The sum of all five categories equals the final PRI value as demonstrated in the example equation below:

PRI VALUE = [(PROBABILITY x .30) + (IMPACT x .30) + (SPATIAL EXTENT x .20) + (WARNING TIME x .10) + (DURATION x .10)]

According to the weighting scheme and point system applied, the highest possible value for any hazard is 4.0. When the scheme is applied for the Tar River Region, the highest PRI value is 3.1 (severe thunderstorm/high wind). Prior to being finalized, PRI values for each identified hazard were reviewed and accepted by the members of the Regional Hazard Mitigation Planning Team.

Table 5-42. Priority Risk Index for the Tar River Region

PRI Category	Degree of Risk			Assigned Weighting Factor
	Level	Criteria	Index Value	
Probability	Unlikely	Less than 1% annual probability	1	30%
	Possible	Between 1 and 10% annual probability	2	
	Likely	Between 10 and 100% annual probability	3	
	Highly Likely	100% annual probability	4	
Impact	Minor	Very few injuries, if any. Only minor property damage and minimal disruption on quality of life. Temporary shutdown of critical facilities.	1	30%
	Limited	Minor injuries only. More than 10% of property in affected area damaged or destroyed. Complete shutdown of critical facilities for more than one day.	2	
	Critical	Multiple deaths/injuries possible. More than 25% of property in affected area damaged or destroyed. Complete shutdown of critical facilities for more than one week.	3	
	Catastrophic	High number of deaths/injuries possible. More than 50% of property in affected area damaged or destroyed. Complete shutdown of critical facilities for 30 days or more.	4	
Spatial Extent	Negligible	Less than 1% of area affected	1	20%
	Small	Between 1 and 10% of area affected	2	
	Moderate	Between 10 and 50% of area affected	3	
	Large	Between 50 and 100% of area affected	4	
Warning Time	More than 24 hours	Self-explanatory	1	10%
	12 to 24 hours	Self-explanatory	2	
	6 to 12 hours	Self-explanatory	3	
	Less than 6 hours	Self-explanatory	4	
Duration	Less than 6 hours	Self-explanatory	1	10%
	Less than 24 hours	Self-explanatory	2	
	Less than one week	Self-explanatory	3	
	More than one week	Self-explanatory	4	

5.12.9 Priority Risk Index Results

Table 5-43 summarizes the degree of risk assigned to each category for all initially identified hazards based on the application of the PRI. Assigned risk levels were based on the detailed hazard profiles developed for this section as well as input from the Regional Hazard Mitigation Planning Team. The results were then used in calculating PRI values and making final determinations for the risk assessment.

Table 5-43. Summary of PRI Results for the Tar River Region

Hazard	Category/Degree of Risk					
	Probability	Impact	Spatial Extent	Warning Time	Duration	PRI Score
Atmospheric Hazards						
Drought	Likely	Minor	Large	More than 24 hours	More than 1 week	**2.5**
Extreme Heat	Possible	Minor	Large	More than 24 hours	Less than 1 week	**2.1**
Hurricane and Tropical Storm	Likely	Critical	Large	More than 24 hours	Less than 24 hours	**2.9**
Severe Weather	Highly Likely	Critical	Moderate	6 to 12 hours	Less than 6 hours	**3.1**
Tornado	Likely	Critical	Small	Less than 6 hours	Less than 6 hours	**2.7**
Winter Storm	Highly Likely	Limited	Moderate	More than 24 hours	Less than 1 week	**2.8**
Geologic Hazards						
Earthquake	Possible	Minor	Moderate	Less than 6 hours	Less than 6 hours	**2.0**
Hydrologic Hazards						
Dam Failure	Unlikely	Critical	Small	Less than 6 hours	Less than 6 hours	**2.1**
Flood	Highly Likely	Limited	Small	6 to 12 hours	Less than 1 week	**2.8**
Other Hazards						
Wildfire	Highly Likely	Minor	Moderate	Less than 6 hours	Less than 1 week	**2.8**

5.13 Final Determinations

The conclusions drawn from the hazard profiling process for the Tar River Region, including the PRI results and input from the Regional Hazard Mitigation Planning Team, resulted in the classification of risk for each identified hazard according to three categories: High Risk, Moderate Risk, and Low Risk (**Table 5-44**). For purposes of these classifications, risk is expressed in relative terms according to the estimated impact that a hazard will have on human life and property throughout all of the Tar River Region. A more quantitative analysis to estimate potential dollar losses for each hazard has been performed separately and is described in Section 6: *Vulnerability Assessment*. It should be noted that although some hazards are classified below as posing low risk, their occurrence of varying or unprecedented magnitudes is still possible in some cases and their assigned classification will continue to be evaluated during future plan updates.

Table 5-44. Conclusions on Hazard Risk for the Tar River Region

HIGH RISK	Severe Weather Hurricane and Tropical Storm Winter Storm Wildfire Flood Tornado
MODERATE RISK	Drought
LOW RISK	Extreme Heat Dam Failure Earthquake

SECTION 6: VULNERABILITY ASSESSMENT

This section identifies and quantifies the vulnerability of the jurisdictions within the Tar River Region to the significant hazards identified in the previous sections (*Hazard Identification and Profiles*). It consists of the following subsections:

- 6.1 Overview
- 6.2 Methodology
- 6-4 Explanation of Data Sources
- 6.4 Asset Inventory
- 6.5 Vulnerability Assessment Results
- 6.6 Conclusions on Hazard Vulnerability

44 CFR Requirement
44 CFR Part 201.6(c)(2)(ii): The risk assessment shall include a description of the jurisdiction's vulnerability to the hazards described in paragraph (c)(2)(i) of this section. The description shall include an overall summary of each hazard and its impact on the community. The plan should describe vulnerability in terms of: (A) The types and numbers of existing and future buildings, infrastructure, and critical facilities located in the identified hazard areas; (B) An estimate of the potential losses to vulnerable structures identified in paragraph (c)(2)(ii)(A) of this section and a description of the methodology used to prepare the estimate; (C) Providing a general description of land uses and development trends within the community so that mitigation options can be considered in future land use decisions.

6.1 Overview

This section builds upon the information provided in Section 4: *Hazard Identification and* Section 5*: Hazard Profiles* by identifying and characterizing an inventory of assets in the Tar River Region. In addition, the potential impact and expected amount of damages caused to these assets by each identified hazard event is assessed. The primary objective of the vulnerability assessment is to quantify exposure and the potential loss estimates for each hazard. In doing so, the Tar River Region counties and their participating jurisdictions may better understand their unique risks to identified hazards and be better prepared to evaluate and prioritize specific hazard mitigation actions.

This section begins with an explanation of the methodology applied to complete the vulnerability assessment, followed by a summary description of the asset inventory as compiled for jurisdictions in the Tar River Region. The remainder of this section focuses on the results of the assessment conducted.

6.2 Methodology

This vulnerability assessment was conducted using three distinct methodologies: (1) A stochastic risk assessment; (2) a geographic information system (GIS)-based analysis; and (3) a risk modeling software analysis. Each approach provides estimates for the potential impact of hazards by using a common, systematic framework for evaluation, including historical occurrence information provided in the *Hazard Identification* and *Hazard Profiles* sections. A brief description of the three different approaches is provided on the following pages.

6.2.1 Stochastic Risk Assessment

The stochastic risk assessment methodology was applied to analyze hazards of concern that were outside the scope of hazard risk models and the GIS-based risk assessment. This involves the consideration of annualized loss estimates and impacts of current and future buildings and populations. Annualized loss is the estimated long-term weighted average value of losses to property in any single year in a specified geographic area (i.e., municipal jurisdiction or county). This methodology is applied primarily to hazards that do not have geographically definable boundaries and are therefore excluded from spatial analysis through GIS. A stochastic risk methodology was used for the following hazards:

- Dam Failure
- Drought
- Extreme Heat
- Winter Storm

With the exception of dam and levee failure, the hazards listed above are considered atmospheric and have the potential to affect all current and future buildings and all populations. For all hazards annualized loss estimates were determined using the best available data on historical losses from sources including NOAA's National Climatic Data Center records, Tar River county-level hazard mitigation plans, and local knowledge. Annualized loss estimates were generated by totaling the amount of property damage over the period of time for which records were available and calculating the average annual loss. Given the standard weighting analysis, losses can be readily compared across hazards providing an objective approach for evaluating mitigation alternatives.

For the dam failure[1] hazard, no data with historical property damages was available. Therefore, a detailed vulnerability assessment could not be completed for this hazard at this time.

The results for these hazards are found near the end of this section in **Table 6-244**.

6.2.2 GIS-Based Analysis

The Other hazards have specified geographic boundaries that permit additional analysis using Geographic Information Systems (GIS). These hazards include:

- Flood
- Wildfire

The objective of the GIS-based analysis was to determine the estimated vulnerability of critical facilities and populations for the identified hazards in the Tar River Region using best available geospatial data. Digital data was collected from local, regional, state, and national sources for hazards and buildings. This included local tax assessor records for individual parcels and buildings and geo-referenced point locations for identified assets (critical facilities and infrastructure, special populations, etc.) when available.

Using these data layers, hazard vulnerability can be quantified by estimating the assessed building value for parcels and/or buildings determined to be located in identified hazard areas. To estimate vulnerable populations in hazard areas, digital Census 2010 data by census tract was obtained. This was intersected with hazard areas to determine exposed population counts. The results of the

[1] As noted in Section 5: *Hazard Profiles*, dam failure could be catastrophic to structures and populations in the inundation area. However, due to lack of data, no additional analysis was performed. Further, local USACE and NCDENR also complete separate dam failure plans to identify risk and response measures.

analysis provided an estimate of the number of people and critical facilities as well as the assessed value of parcels and improvements determined to be potentially at risk to those hazards with delineable geographic hazard boundaries.

6.2.3 Risk Modeling Software Analysis

Integrated Hazard Risk Management Tool/I-Risk Data[2]

A risk modeling software was used for the following hazards:

- Earthquake
- Flood
- Hurricane and Tropical Storm
- Severe Thunderstorm/High Wind Weather
- Tornado
- Wildfire

There are several models that exist to model hazards. Each of the aforementioned hazards was analyzed using the I-Risk tool and Integrated Hazard Risk Management (IHRM) program data.

IHRM/I-Risk

The I-Risk tool and data developed by the North Carolina Division of Emergency Management as part of the IHRM program provide valuable risk information. This data represents the most up-to-date estimates of potential damage from 15 natural hazards. IHRM focuses on collecting information on specific buildings and other critical infrastructure such as public utilities so that losses from damages could be calculated for each building or piece of infrastructure. The results factor in overall risk and its components of probability, consequence, and vulnerability.

The I-Risk tool and IHRM data were used to estimate potential losses in the planning area under different return periods, or events of varying intensities, for the earthquake, flood, hurricane and tropical storm, severe thunderstorm, tornado, and wildfire hazards. It should be noted that at the time this analysis was completed, some of the data was not available for every county in the Tar River Region.

Loss estimates provided in this vulnerability assessment are based on best available data and methodologies. The results are an approximation of risk. These estimates should be used to understand relative risk from hazards and potential losses. Uncertainties are inherent in any loss estimation methodology, arising in part from incomplete scientific knowledge concerning natural hazards and their effects on the built environment. Uncertainties also result from approximations and simplifications that are necessary for a comprehensive analysis (e.g., incomplete inventories, non-specific locations, demographics, or economic parameters).

All conclusions are presented in “Conclusions on Hazard Vulnerability” at the end of this section.

[2] North Carolina Division of Emergency Management. Integrated Hazard Risk Management Tool. https://irisk.ncem.org/irisk/Methods.aspx#

6.3 Explanation of Data Sources

Integrated Hazard Risk Management Tool/I-Risk Data2 The North Carolina Geospatial and Technology Management Office (GTMO) researched and developed methods for calculating the potential consequences to people and assets from the impact of many natural hazards. These impacts may cause:

- Direct physical damage to buildings, contents, infrastructure, agriculture/aquaculture products, and land
- Direct economic losses associated with the physical damage (e.g., loss of utility service or disruption of employment)
- Indirect economic losses to the upstream and downstream supply-chain businesses and industries that, while not physically damaged themselves, are associated with the assets that were directly damaged

Through this process, all buildings – residential and nonresidential – with a building footprint of 800 square feet or greater were digitized from recent aerial imagery if they were not readily available from state or county sources. This data was utilized to help calculate potential dollar losses.

The types of consequences vary based on the spatial scale of the analysis (parcel-level analysis versus county-level analysis) and the available methodologies used in the risk management practice for each hazard. For instance, physical damage to buildings at a parcel level can be calculated when building footprints and building characteristics (e.g., number of stories) are available.

This data from the IHRM tool was utilized to estimate losses for a number of hazards in this section including earthquake, flood, hurricane and tropical storm, severe thunderstorm weather, tornado, and wildfire.

Earthquake

A level 1, probabilistic scenario to estimate annualized loss was utilized. In this scenario, several return periods (events of varying intensities) are run to determine annualized loss. Default earthquake damage functions and methodology were used to determine the probability of damage for 100-, 250- 500-, 750-, 1,000-, 1,500-, and 2,500-year frequency events (also known as a return period). Results are calculated at the 2010 U.S. Census tract and presented at the county level.

Flood

FEMA Digital Flood Insurance Rate Maps (DFIRMs) were used to determine flood vulnerability. DFIRM data can be used in ArcGIS for mapping purposes and they identify several features including floodplain boundaries and base flood elevations. Identified areas on the DFIRM represent some features of a Flood Insurance Rate Maps including the 100-year flood areas (1.0-percent annual chance flood) and the 500-year flood areas (0.2-percent annual chance flood). For the vulnerability assessment, local parcel data and critical facilities were overlaid on the 100-year floodplain areas. It should be noted that such an analysis does not account for building elevation.

Hurricane and Tropical Storm Wind

For the hurricane wind analysis, a probabilistic scenario was created to estimate the annualized loss damage and probable peak wind speeds in the Tar River Region. Default wind speed data, damage functions, and methodology were used in to determine the probability of damage for 100-, 500-, and 1,000-year frequency events (also known as return periods) in the scenario. Results are calculated at the 2010 U.S. Census tract level and presented at the county level.

Wildfire

The data used to determine vulnerability to wildfire in the Tar River Region is based on GIS data called the Southern Wildfire Risk Assessment (SWRA). This data is available on the Southern Wildfire Risk Assessment website and can be downloaded and imported into ArcGIS. A specific layer known as "Wildland Urban Interface Risk Index" (WUIRI) was used to determine vulnerability of people and property. The WUIRI is presented on a scale of 0 to -9. It combines data on housing density with the data on the impact and likelihood of a wildfire occurring in a specific area. The primary purpose of the data is to highlight areas of concern that may be conducive to mitigation actions. Due to the assumptions made, it is not a true probability. However, it does provide a comparison of risk throughout the region.

6.4 Asset Inventory

Each participating jurisdiction assisted in the identification of assets to be used for analysis to determine what assets may be potentially at risk to the hazards covered in the Plan. These assets are defined broadly as anything that is important to the function and character of the community. For the purposes of this Risk Assessment, the individual types of assets include:

- Population
- Parcels and Buildings
- Critical Facilities
- Infrastructure
- High Potential Loss Properties
- Historic Properties

Although all assets may be affected by certain hazards (such as hail or tornadoes), some assets are more vulnerable because of their location (e.g., the floodplain), certain physical characteristics (e.g., slab-on-grade construction), or socioeconomic uses (e.g., major employers). The following subsections document the numbers and values used for the

6.4.1 Population

The population counts shown in **Table 6-1** are derived from 2010 census data and include a breakdown of two subpopulations assumed to be at greater risk to natural hazards than the "general" population: elderly (ages 65 and older) and children (under the age of 5).

Table 6-1: Population Counts with Vulnerable Population Breakdown

Jurisdiction	2010 Census Population	Elderly (Age 65 and Over)	Children (Age 5 and Under)

6.4.2 Parcels and Buildings

The parcel counts, building counts, and building values shown in **Table 6-2** represent the built environment inventories used for the analyses included in the Risk Assessment. In order to provide a more accurate reflection of buildings that contain livable space and/or commercial, industrial, or other uses, all building footprints less than 500 square feet have been eliminated from the counts and analysis.

6.5 Vulnerability Assessment Results

As noted earlier, only hazards with a specific geographic boundary, modeling tool, or sufficient historical data allow for further analysis. Those results are presented here. All other hazards are assumed to impact the entire planning region (drought, extreme heat, hailstorm, lightning, nor'easter, and winter storm/freeze) or, due to lack of data, analysis would not lead to credible results (dam and levee failure). The total region exposure, and thus risk.

The annualized loss estimate for all hazards is presented near the end of this section in **Table 6-244.**

The hazards presented in this subsection include drought, extreme heat, winter storm, dam failure, earthquake, flood, hurricane and tropical storm winds, severe weather, tornado, and wildfire.

6.5.1 Drought

Agricultural crops are most directly affected and vulnerable to drought, and their loss can result in a significant economic burden on the local economy. The local economy is semi-dependent upon agriculture. Within the community, it is common knowledge that the past two decades of drought conditions have contributed to a reduction in the number of local farmers. It is estimated that annualized losses to the drought hazard will decrease over time due to the continued trend of decreasing agricultural production within the Region (for all jurisdictions in the planning area), much of which has to do with decreases in the number of farms and land available for farming. While future agricultural losses may decrease other sectors of the Region that are dependent on water supply will likely continue to experience future economic impacts during periods of severe to extreme drought conditions.

6.5.2 Extreme Heat

It is estimated that annualized losses to the extreme heat hazard will decrease over time due to the continued trend of decreasing agricultural production within the Region and all its jurisdictions, much of which has to do with decreases in the number of farms and land available for farming. In addition to the physical danger, periods of extreme heat put pressure on the Region's infrastructure. Heat waves cause people to increase their usage of air conditioning, which can strain the power grid and trigger power outages; power outages in turn, can lead to adverse health impacts.

6.5.3 Winter Storm

All the inventoried assets in the Region are exposed to potential winter weather. Any specific vulnerabilities of individual assets would depend greatly on individual design, building characteristics (such as a flat roof), and any existing mitigation measures currently in place. Such site-specific vulnerability determinations are outside the scope of this risk assessment but may be considered during future plan updates. A qualitative factor in terms of vulnerability is a general lack of awareness on the part of county residents in preparing for and responding to winter storm conditions, such as snow in a manner that will minimize the danger to themselves and others. This lack of awareness is especially apparent when driving/roadway conditions catch motorists off-guard.

Potential losses associated with winter storms, such as snow include the cost of the removal of snow from roadways, debris clean-up, and some indirect losses from power outages, etc. All future structures and infrastructure in the region will be vulnerable to winter storms.

6.5.4 Dam Failure

There is a fundamental limitation in the data available for vulnerability assessment for the dam failure hazard in the planning area. The dam structures that are of concern are smaller, privately owned, and unregulated dams for which no GIS data or inventories are currently available. These are the facilities that could and likely would cause the most damage and disruption should a more likely failure occur.

It has been determined that any rudimentary calculations based on the point locations for the dams mapped by NCDENR would also be potentially misleading if any type of buffer or proximity analysis was performed to estimate surrounding impacts should a failure occur.

Any mitigation actions developed for this hazard therefore should be based on addressing data limitations, education and awareness programs, and/or any jurisdiction-specific concerns that may be addressable through an appropriate mitigation project.

6.5.5 Earthquake

The following tables provide counts and values by jurisdiction relevant to Earthquake hazard vulnerability in the Tar River Regional HMP Area.

Table 6-8: Population Impacted by the 250 Year Earthquake

The following tables provide counts and estimated damages for CIKR buildings by jurisdiction in the plan. Because there is a large number of sectors and events, the table is sorted by sector and then by event. Totals across all sectors are shown at the bottom of each table.

Table 6-22: Critical Facilities Exposed to the Earthquake - Franklin County (Unincorporated Area)

Sector	Event	Number of Buildings At Risk	Estimated Damages

The following tables provide counts and estimated damages for CIKR buildings by jurisdiction in the plan. Because there is a large number of sectors and events, the table is sorted by sector and then by event. Totals across all sectors are shown at the bottom of each table.

Table 6-174: Critical Facilities Exposed to the Tornado - Franklin County (Unincorporated Area)

Sector	Event	Number of Buildings At Risk	Estimated Damages
Banking and Finance	EF0	2	$18,186
	EF1	2	$107,435
	EF2	2	$260,870

6.6 Conclusions on Hazard Vulnerability

The results of this vulnerability assessment are useful in at least three ways:

- Improving our understanding of the risk associated with the natural hazards in the Tar River

Region through better understanding of the complexities and dynamics of risk, how levels of risk can be measured and compared, and the myriad of factors that influence risk. An understanding of these relationships is critical in making balanced and informed decisions on managing the risk.

- Providing a baseline for policy development and comparison of mitigation alternatives. The data used for this analysis presents a current picture of risk in the Tar River Region. Updating this risk "snapshot" with future data will enable comparison of the changes in risk with time. Baselines of this type can support the objective analysis of policy and program options for risk reduction in the region.
- Comparing the risk among the natural hazards addressed. The ability to quantify the risk to all these hazards relative to one another helps in a balanced, multi-hazard approach to risk management at each level of governing authority. This ranking provides a systematic framework to compare and prioritize the very disparate natural hazards that are present in the Tar River Region. This final step in the risk assessment provides the necessary information for local officials to craft a mitigation strategy to focus resources on only those hazards that pose the most threat to the Tar River counties.

Exposure to hazards can be an indicator of vulnerability. Economic exposure can be identified through locally assessed values for improvements (buildings), and social exposure can be identified by estimating the population exposed to each hazard. This information is especially important for decision makers to use in planning for evacuation or other public safety related needs.

With minimal population growth since 2010, the Tar River Region should not anticipate population shifts nor any increased impacts to vulnerability at this time. The planning team also considered other conditions such as climate variability, infrastructure expansion as well as economic shifts and decided that those changes did not affect the region's overall vulnerability to the identified hazards at this time.

The types of assets included in these analyses include all building types in the participating jurisdictions. Specific information about the types of assets that are vulnerable to the identified hazards is included in each hazard subsection (for example, all building types are considered at risk to the winter storm hazard and only residential structures are at risk to repetitive flooding, etc.).

Table 6-238 presents a summary of annualized loss for each hazard in the Tar River Region. Due to the reporting of hazard damages primarily at the county level, it was difficult to determine an accurate annualized loss estimate for each municipality. Therefore, an annualized loss was determined through the damage reported through historical occurrences at the county level. These values should be used as an additional planning tool or measure risk for determining hazard mitigation strategies throughout the region.

Table 6-238. Annualized Loss for the Tar River Region

Jurisdiction	Franklin County	Granville County	Vance County	Warren County	Tar River Region Total
Drought	Negligible	Negligible	Negligible	Negligible	Negligible
Extreme Heat/ Heat Wave	Negligible	Negligible	Negligible	Negligible	Negligible
Hurricane and Tropical Storm†	$890,000	$517,000	$341,000	$189,000	$1,937,000
Severe Thunderstorm/ High Wind	$145,089	$12,129	$10,013	$12,423	$179,654
Tornado	$862,405	$130,271	$792,592	$70,835	$1,856,104
Winter Storm and Freeze	$27,221	$41,868	$41,346	$40,139	$150,574
Geologic					
Earthquake†	$3,000	$3,000	$2,000	$1,000	$9,000
Hydrologic					
Dam and Levee failure	Negligible	Negligible	Negligible	Negligible	Negligible
Flood††	$3,252	$4,027	$9,230	$1,127	$17,637
Other					
Wildfire	Negligible	Negligible	Negligible	Negligible	Negligible

*In this table, the term "Negligible" is used to indicate that no records of dollar losses for the particular hazard were recorded. This could be the case either because there were no events that caused dollar damage or because documentation of that particular type of event is not well kept.
†Annualized loss estimate for buildings only from IRISK
†† Estimated using the IHRM Tool data for the 100-year return period event.

As noted previously, all existing and future buildings and populations (including critical facilities) are vulnerable to atmospheric hazards including drought, extreme heat/heat wave, hailstorm, hurricane and tropical storm, lightning, nor'easter, severe thunderstorm/high wind, tornado, and winter storm and freeze. Some buildings may be more vulnerable to these hazards based on locations, construction, and building type, and additional data is provided where available from the iRISK Tool. **Table 6-244** shows the critical facilities vulnerable to additional hazards analyzed in this section. The table lists those assets that are determined to be exposed to each of the identified hazards (marked with an "X").

Table 6-239: At-Risk Critical Facilities in the Tar River Region

Facility Name	Facility Type	Atmospheric						Geo.	Hydrologic			Other
		Drought	Extreme Heat	Hurricane and Tropical	Severe Thunderstorm	Tornado	Winter Storm	Earthquake	Dam Failure	Flood – 100 yr	Flood – 500 yr	Wildfire

SECTION 7: CAPABILITY ASSESSMENT

This section of the Plan discusses the capability of the communities in the Tar River Region to implement hazard mitigation activities. It consists of the following four subsections:

- 7.1 What is a Capability Assessment?
- 7.2 Conducting the Capability Assessment
- 7.3 Capability Assessment Findings

7.1.1 7.3.7 Political Capability

One of the most difficult capabilities to evaluate involves the political will of a jurisdiction to enact meaningful policies and projects designed to reduce the impact of future hazard events. Hazard mitigation may not be a local priority or may conflict with or be an impediment to other goals of the community, such as growth and economic development. Therefore, the local political climate must be considered in designing mitigation strategies as it could be the most difficult hurdle to overcome in accomplishing their adoption and implementation.

The Capability Assessment Survey was used to capture information on political capability of the Tar River Region. Previous county-level hazard mitigation plans were reviewed for general examples of local political capability, such as guiding development away from identified hazard areas, restricting public investments or capital improvements within hazard areas, or enforcing local development standards that go beyond minimum state or federal requirements (i.e., building codes, floodplain management, etc.).

In addition to the inventory and analysis of specific local capabilities, the *Local Capability Assessment Survey* asked counties and local jurisdictions within the Plan Area to conduct a self-assessment of their perceived capability to implement hazard mitigation activities. As part of this process, local officials were encouraged to consider the barriers to implementing proposed mitigation strategies in addition to the mechanisms that could enhance or further such strategies. In response to the survey questionnaire, county officials classified each of the aforementioned capabilities as either "limited," "moderate," or "high."

Table 7-7 summarizes the results of the self-assessment for the Plan Area.

- Conclusions on Local Capability

7.2 What is a Capability Assessment?

The purpose of conducting a capability assessment is to determine the ability of a local jurisdiction to implement a comprehensive mitigation strategy and to identify potential opportunities for establishing or enhancing specific mitigation policies, programs, or projects[1]. As in any planning process, it is important to try to establish which goals, objectives, and/or actions are feasible based on an understanding of the organizational capacity of those agencies or departments tasked with their implementation. A capability assessment helps to determine which mitigation actions are practical, and likely to be implemented over time, given a local government's planning and regulatory framework, level of administrative and technical support, amount of fiscal resources, and current political climate.

A capability assessment has two primary components: 1) an inventory of a local jurisdiction's relevant plans, ordinances, or programs already in place and 2) an analysis of its capacity to carry them out. Careful examination of local capabilities will detect any existing gaps, shortfalls, or weaknesses with ongoing government activities that could hinder proposed mitigation activities and possibly exacerbate community hazard vulnerability. A capability assessment also highlights the positive mitigation measures already in place or being implemented at the local government level, which should continue to be supported and enhanced through future mitigation efforts.

[1] While the Final Rule for implementing the Disaster Mitigation Act of 2000 does not require a local capability assessment to be completed for local hazard mitigation plans, it is a critical step in developing a mitigation strategy that meets the needs of the region while considering their own unique abilities. The Rule does state that a community's mitigation strategy should be "based on existing authorities, policies, programs and resources, and its ability to expand on and improve these existing tools" (44 CFR, Part 201.6(c)(3)).

The capability assessment completed for the Tar River Region serves as a critical planning step and an integral part of the foundation for designing an effective hazard mitigation strategy. Coupled with the Risk Assessment, the Capability Assessment helps identify and target meaningful mitigation actions for incorporation in the Mitigation Strategy portion of the Plan. It not only helps establish the goals and objectives for the region to pursue under this Plan, but it also ensures that those goals and objectives are realistically achievable under given local conditions.

7.3 Conducting the Capability Assessment

In order to facilitate the inventory and analysis of local government capabilities within the Tar River counties, a detailed Capability Assessment Survey was completed for each of the participating jurisdictions based on the information found in existing hazard mitigation plans and local government websites. The survey questionnaire compiled information on a variety of "capability indicators" such as existing local plans, policies, programs, or ordinances that contribute to and/or hinder the region's ability to implement hazard mitigation actions. Other indicators included information related to the communities' fiscal, administrative, and technical capabilities, such as access to local budgetary and personnel resources for mitigation purposes. The current political climate, an important consideration for any local planning or decision-making process, was also evaluated with respect to hazard mitigation.

At a minimum, survey results provide an extensive inventory of existing local plans, ordinances, programs, and resources that are in place or under development in addition to their overall effect on hazard loss reduction. However, the survey instrument can also serve to identify gaps, weaknesses, or conflicts that counties and local jurisdictions can recast as opportunities for specific actions to be proposed as part of the hazard mitigation strategy.

The information collected in the survey questionnaire was incorporated into a database for further analysis. A general scoring methodology was then applied to quantify each jurisdiction's overall capability.[2] According to the scoring system, each capability indicator was assigned a point value based on its relevance to hazard mitigation.

Using this scoring methodology, a total score and an overall capability rating of "high," "moderate," or "limited" could be determined according to the total number of points received. These classifications are designed to provide nothing more than a general assessment of local government capability. The results of this capability assessment provide critical information for developing an effective and meaningful mitigation strategy.

7.4 Capability Assessment Findings

The findings of the capability assessment are summarized in this Plan to provide insight into the relevant capacity of the jurisdictions in the Tar River Region to implement hazard mitigation activities. All information is based upon the review of existing hazard mitigation plans and local government websites through the Capability Assessment Survey and input provided by local government officials during meetings of the Tar River Regional Hazard Mitigation Planning Team.

7.4.1 Planning and Regulatory Capability

Planning and regulatory capability is based on the implementation of plans, ordinances, and programs that demonstrate a local jurisdiction's commitment to guiding and managing growth, development, and redevelopment in a responsible manner while maintaining the general welfare of the community. It includes emergency response and mitigation planning, comprehensive land use planning, and

[2] The scoring methodology used to quantify and rank the region's capability can be found at the end of this section.

transportation planning; the enforcement of zoning or subdivision ordinances and building codes that regulate how land is developed and structures are built; as well as protecting environmental, historic, and cultural resources in the community. Although some conflicts can arise, these planning initiatives generally present significant opportunities to integrate hazard mitigation principles and practices into the local decision-making process.

This assessment is designed to provide a general overview of the key planning and regulatory tools and programs that are in place or under development for the jurisdictions in the Tar River Region along with their potential effect on loss reduction. This information will help identify opportunities to address existing gaps, weaknesses, or conflicts with other initiatives in addition to integrating the implementation of this Plan with existing planning mechanisms where appropriate.

Table 7-1 provides a summary of the relevant local plans, ordinances, and programs already in place or under development for the jurisdictions in the Tar River Region. An arrow (➳) indicates that the given item is currently in place and being implemented. An asterisk (*) indicates that the given item is currently being developed for future implementation. A blank column indicates that the given item does not currently exists in the jurisdiction. Each of these local plans, ordinances, and programs should be considered available mechanisms for review and incorporating the existing plans, studies, reports and technical information into the Tar River Regional Hazard Mitigation Plan in order to identify existing data and capabilities that will help implement the mitigation strategy.

7.4.2 Emergency Management

Hazard mitigation is widely recognized as one of the four primary phases of emergency management. The three other phases include preparedness, response, and recovery. Each phase is interconnected with hazard mitigation, as **Figure 7-1** suggests. Opportunities to reduce potential losses through mitigation practices are most often implemented before disaster strikes, such as the elevation of flood prone structures or the continuous enforcement of policies that prevent and regulate development that is vulnerable to hazards due to its location, design, or other characteristics. Mitigation opportunities will also be presented during immediate preparedness or response activities, such as installing storm shutters in advance of a hurricane, and certainly during the long-term recovery and redevelopment process following a hazard event.

Figure 7-1: The Four Phases of Emergency Management

Planning for each phase is a critical part of a comprehensive emergency management program and a key to the successful implementation of hazard mitigation actions. As a result, the Capability Assessment Survey asked several questions across a range of emergency management plans in order to assess the Tar River Region's willingness to plan and their level of technical planning proficiency.

A description of applicable plans, ordinances and programs follows to provide more detail on the relevance of each regulatory tool in examining the capabilities for each community.

Comprehensive Plan

A Comprehensive Plan, in broad terms, is a policy statement to guide the future placement and development of community facilities. It is the basis for a community 's zoning, subdivision and design regulations and a community 's official maps and amendments to the zoning, subdivision and design ordinances. The Comprehensive Plan identifies a future vision, values, principals and goals for the community, determines the projected growth for the community and identifies policies to plan, direct and accommodate anticipated growth.

Zoning Ordinance

Zoning typically consists of both a zoning map and a written ordinance that divides the jurisdiction into zoning districts, including various residential, commercial, mixed-use and industrial districts. The zoning regulations describe what type of land use and specific activities are permitted in each district, and also

regulate how buildings, signs, parking, and other construction may be placed on a lot. The zoning regulations also provide procedures for rezoning and other planning applications.

Subdivision Ordinance

A subdivision ordinance is intended to regulate the development of residential, commercial, industrial, or other uses, including associated public infrastructure, as land is subdivided into lots for future development. Subdivision design that accounts for natural hazards can reduce the exposure of future development to hazards.

Flood Insurance Study/Floodplain Ordinance

A Flood Insurance Study (FIS) provides information on the existence and severity of flood hazards within a community based on the 100-year flood event. The FIS also includes revised digital Flood Insurance Rate Maps (FIRMs) which reflect updated Special Flood Hazard Areas (SFHAs) and flood zones for the community.

A floodplain ordinance is perhaps a community's most important flood mitigation tool. In order for a county or municipality to participate in the NFIP, they must adopt a local flood damage prevention ordinance that requires jurisdictions to follow established minimum building standards in the floodplain. These standards require that all new buildings and substantial improvements to existing buildings will be protected from damage by a 100-year flood event and that new development in the floodplain will not exacerbate existing flood problems or increase damage to other properties.

Stormwater Management Program/Stormwater Ordinance

Stormwater runoff is increased when natural ground cover is replaced by urban development. Development in the watershed that drains to a river can aggravate downstream flooding, overload the community's drainage system, cause erosion, and impair water quality. A Stormwater Management Program can prevent flooding problems caused by stormwater runoff by 1) Regulating development in the floodplain to ensure that it will be protected from flooding and that it won't divert floodwaters onto other properties; 2) Regulating all development to ensure that the post-development peak runoff will not be greater than it was under pre-development conditions; and 3) Setting construction standards so buildings are protected from shallow water. A stormwater ordinance provides the community with the regulatory authority to implement its stormwater management standards.

Erosion, Sedimentation, and Pollution Control Ordinance

Surface water runoff can erode soil from development sites, sending sediment into downstream waterways. This can clog storm drains, drain tiles, culverts and ditches and reduce the water transport and storage capacity of river and stream channels, lakes and wetlands. The purpose of an erosion, sedimentation and pollution control ordinance is to minimize soil erosion and prevent off-site sedimentation by using soil erosion and sediment control practices designed in accordance with certain standards and specifications.

Site Plan Review

The purpose of the Site Plan Review Process is to review site plans for specific types of development to ensure compliance with all appropriate land development regulations and consistency with the Comprehensive Plan.

Building Code/Elevation Certificates

Building codes provide one of the best methods for addressing natural hazards. When properly designed and constructed according to code, the average building can withstand many of the impacts of natural hazards. Hazard protection standards for all new and improved or repaired buildings can be incorporated into the local building code. Building codes can ensure that the first floors of new buildings are constructed to be higher than the elevation of the 100-year flood (the flood that is expected to have a one percent chance of occurring in any given year).

Just as important as having code standards is the enforcement of the code. Adequate inspections are needed during the course of construction to ensure that the builder understands the requirements and is following them. Making sure a structure is properly elevated and anchored requires site inspections at each step. An Elevation Certificates serves as the official record that shows new buildings and substantial improvements in all identified SFHAs are properly elevated. This elevation information is needed to show compliance with the floodplain ordinance. Communities participating in the CRS are required to use the FEMA Elevation Certificate.

Capital Improvement Program

A Capital Improvement Plan (CIP) is a planning document that typically provides a five-year outlook for anticipated capital projects designed to facilitate decision makers in the replacement of capital assets. The projects are primarily related to improvement in public service, parks and recreation, public utilities and facilities. A community's mitigation strategy may include structural projects that could potentially be included in a CIP and funded through a Capital Improvement Program.

Emergency Operations Plan

An emergency operations plan outlines responsibility and the means by which resources are deployed during and following an emergency or disaster.

Repetitive Loss Plan

A repetitive loss property is defined as any insurable building for which two or more claims of more than $1,000 were paid by the NFIP within any rolling 10-year period, since 1978. Two of the claims paid must be more than 10 days apart but, within 10 years of each other. A Repetitive Loss Plan examines the cause of repetitive flooding and identifies mitigation measures to reduce or eliminate the flooding to repetitive loss properties.

7.4.3 Floodplain Management

Flooding represents the greatest natural hazard facing the nation. At the same time, the tools available to reduce the impacts associated with flooding are among the most developed when compared to other hazard-specific mitigation techniques. In addition to approaches that cut across hazards such as education, outreach, and the training of local officials, the *National Flood Insurance Program* (NFIP) contains specific regulatory measures that enable government officials to determine where and how growth occurs relative to flood hazards. Participation in the NFIP is voluntary for local governments; however, program participation is strongly encouraged by FEMA as a first step for implementing and

sustaining an effective hazard mitigation program. It is therefore used as part of this assessment as a key indicator for measuring local capability.

In order for a county or municipality to participate in the NFIP, they must adopt a local flood damage prevention ordinance that requires jurisdictions to follow established minimum building standards in the floodplain. These standards require that all new buildings and substantial improvements to existing buildings will be protected from damage by a 100-year flood event and that new development in the floodplain will not exacerbate existing flood problems or increase damage to other properties.

A key service provided by the NFIP is the mapping of identified flood hazard areas. Once completed, the Flood Insurance Rate Maps (FIRMs) are used to assess flood hazard risk, regulate construction practices, and set flood insurance rates. FIRMs are an important source of information to educate residents, government officials, and the private sector about the likelihood of flooding in their community.

Table 7-2 provides NFIP policy and claim information for each participating jurisdiction in the Tar River Region.

Table 7-2: NFIP Policy and Claim Information

Source: FEMA NFIP Policy Statistics.
**not currently participating in NFIP*

Community Rating System: An additional indicator of floodplain management capability is the active participation of local jurisdictions in the Community Rating System (CRS). The CRS is an incentive-based program that encourages counties and municipalities to undertake defined flood mitigation activities that go beyond the minimum requirements of the NFIP by adding extra local measures to provide protection from flooding. All the 18 creditable CRS mitigation activities are assigned a range of point values. As points are accumulated and reach identified thresholds, communities can apply for an improved CRS class rating. Class ratings, which range from 10 to 1, are tied to flood insurance premium reductions as shown in **Table 7-3**. As class rating improves (the lower the number the better), the percent reduction in flood insurance premiums for NFIP policyholders in that community increases.

Table 7-3: CRS Premium Discounts, By Class

CRS Class	Premium Reduction
1	45%
2	40%
3	35%
4	30%
5	25%
6	20%
7	15%
8	10%
9	5%
10	0

Source: *FEMA*

Community participation in the CRS is voluntary. Any community that is in full compliance with the rules and regulations of the NFIP may apply to FEMA for a CRS classification better than class 10. The CRS application process has been greatly simplified over the past several years based on community comments. Changes were made with the intent to make the CRS more user-friendly and make extensive technical assistance available for communities who request it.

Flood Damage Prevention Ordinance: A flood damage prevention ordinance establishes minimum building standards in the floodplain with the intent to minimize public and private losses due to flood conditions.

- All communities participating in the NFIP are required to adopt a local flood damage prevention ordinance. All counties and municipalities participating in this hazard mitigation plan, with the exception of Bunn, Macon, Middleburg, Norlina, also participate in the NFIP and they all have adopted flood damage prevention regulations.

Floodplain Management Plan: A floodplain management plan (or a flood mitigation plan) provides a framework for action regarding corrective and preventative measures to reduce flood-related impacts.

- 15 of 19 participating jurisdictions have adopted floodplain management plans.

Open Space Management Plan*:* An open space management plan is designed to preserve, protect, and restore largely undeveloped lands in their natural state and to expand or connect areas in the public domain such as parks, greenways, and other outdoor recreation areas. In many instances, open space management practices are consistent with the goals of reducing hazard losses, such as the preservation of wetlands or other flood-prone areas in their natural state in perpetuity.

Stormwater Management Plan: A stormwater management plan is designed to address flooding associated with stormwater runoff. The stormwater management plan is typically focused on design and construction measures that are intended to reduce the impact of more frequently occurring minor urban flooding.

7.4.4 Administrative and Technical Capability

The ability of a local government to develop and implement mitigation projects, policies, and programs is directly tied to its ability to direct staff time and resources for that purpose. Administrative capability can be evaluated by determining how mitigation-related activities are assigned to local departments and if there are adequate personnel resources to complete these activities. The degree of intergovernmental coordination among departments will also affect administrative capability for the implementation and success of proposed mitigation activities.

Technical capability can generally be evaluated by assessing the level of knowledge and technical expertise of local government employees, such as personnel skilled in using Geographic Information Systems (GIS) to analyze and assess community hazard vulnerability. The Capability Assessment Survey was used to capture information on administrative and technical capability through the identification of available staff and personnel resources.

Table 7-4 provides a summary of the capability assessment results for the Tar River Region with regard to relevant staff and personnel resources. An arrow (➳) indicates the presence of a staff member(s) in that jurisdiction with the specified knowledge or skill. A blank in the column indicates that the given resource does not currently exists in the jurisdiction.

Table 7-4: Relevant Staff / Personnel Resources

Credit for having a floodplain manager was given to those jurisdictions that have a flood damage prevention ordinance, and therefore an appointed floodplain administrator, regardless of whether the appointee was dedicated solely to floodplain management. Credit was given for having a scientist familiar with the hazards of the community if a jurisdiction has a Cooperative Extension Service or Soil and Water Conservation Department. Credit was also given for having staff with education or expertise to assess the community's vulnerability to hazards if a staff member from the jurisdiction was a participant on the existing hazard mitigation plan's planning committee.

7.4.5 Fiscal Capability

The ability of a local government to act is often closely associated with the amount of money available to implement policies and projects. This may take the form of outside grant funding awards or locally based revenue and financing. The costs associated with mitigation policy and project implementation vary widely. In some cases, policies are tied primarily to staff time or administrative costs associated with the creation and monitoring of a given program. In other cases, direct expenses are linked to an actual project, such as the acquisition of flood-prone homes, which can require a substantial commitment from local, state, and federal funding sources.

The Capability Assessment Survey was used to capture information on the region's fiscal capability through the identification of locally available financial resources.

Table 7-5 provides a summary of the results for the Tar River Region with regard to relevant fiscal resources. An arrow (➳) indicates that the given fiscal resource is locally available for hazard mitigation purposes (including match funds for state and federal mitigation grant funds) according to the previous county hazard mitigation plans.

Table 7-5: Relevant Fiscal Resources

7.4.6 Education and Outreach Capability

This type of local capability refers to education and outreach programs and methods already in place that could be used to implement mitigation activities and communicate hazard-related information. Examples include natural disaster or safety related school programs; participation in community programs such as Firewise or StormReady; and activities conducted as part of hazard awareness campaigns such as a Tornado Awareness Month.

Table 7-6 provides a summary of the results for the Plan Area with regard to relevant education and outreach resources. A checkmark indicates that the given resource is locally available for hazard mitigation purposes.

Table 7-6. Education and Outreach Resources

Other: _____																			

7.4.7 Political Capability

One of the most difficult capabilities to evaluate involves the political will of a jurisdiction to enact meaningful policies and projects designed to reduce the impact of future hazard events. Hazard mitigation may not be a local priority or may conflict with or be an impediment to other goals of the community, such as growth and economic development. Therefore, the local political climate must be considered in designing mitigation strategies as it could be the most difficult hurdle to overcome in accomplishing their adoption and implementation.

The Capability Assessment Survey was used to capture information on political capability of the Tar River Region. Previous county-level hazard mitigation plans were reviewed for general examples of local political capability, such as guiding development away from identified hazard areas, restricting public investments or capital improvements within hazard areas, or enforcing local development standards that go beyond minimum state or federal requirements (i.e., building codes, floodplain management, etc.).

In addition to the inventory and analysis of specific local capabilities, the *Local Capability Assessment Survey* asked counties and local jurisdictions within the Plan Area to conduct a self-assessment of their perceived capability to implement hazard mitigation activities. As part of this process, local officials were encouraged to consider the barriers to implementing proposed mitigation strategies in addition to the mechanisms that could enhance or further such strategies. In response to the survey questionnaire, county officials classified each of the aforementioned capabilities as either "limited," "moderate," or "high."

Table 7-7 summarizes the results of the self-assessment for the Plan Area.

Table 7-7. Self-Assessment of Capability

Education and Outreach	FRANKLIN COUNTY	Bunn	Franklinton	Louisburg	Youngsville	GRANVILLE COUNTY	Butner	Creedmoor	Oxford	Stem	Stovall	VANCE COUNTY	Henderson	Kittrell	Middleburg	WARREN COUNTY	Macon	Norlina	Warrenton

7.5 Conclusions on Local Capability

In order to form meaningful conclusions on the assessment of local capability, a quantitative scoring methodology was designed and applied to results of the Capability Assessment Survey.

The overall capability to implement hazard mitigation actions varies among the participating jurisdictions. For planning and regulatory capability, many of the jurisdictions are in the moderate to high range. There is also variation in the administrative and technical capability among the jurisdictions with larger jurisdictions generally having greater staff and technical resources. Most of jurisdictions are in the moderate range for fiscal capability.

Table 7-8 shows the results of the capability assessment using the designed scoring methodology. The capability score is based solely on the information found in existing hazard mitigation plans and readily available on the jurisdictions' government websites. The scoring methods ranking is presented as follows:

- Limited: 0-29
- Moderate: 30-59
- High: 60-100

According to the assessment, the average local capability score for all jurisdictions is 49.5, which falls into the moderate capability ranking.

Table 7-8: Capability Assessment Results

Jurisdiction	Overall Capability Score	Overall Capability Rating
FRANKLIN COUNTY	**69**	**High**
Bunn	48	Moderate
Franklinton	47	Moderate
Louisburg	58	Moderate
Youngsville	50	Moderate
GRANVILLE COUNTY	**70**	**High**
Butner	60	High
Creedmoor	55	Moderate
Oxford	42	Moderate

Jurisdiction	Overall Capability Score	Overall Capability Rating
Stem	39	Moderate
Stovall	38	Moderate
VANCE COUNTY	**55**	**Moderate**
Henderson	45	Moderate
Kittrell	41	Moderate
Middleburg	44	Moderate
WARREN COUNTY	**53**	**Moderate**
Macon	39	Moderate
Norlina	41	Moderate
Warrenton	48	Moderate

As previously discussed, one of the reasons for conducting a Capability Assessment is to examine local capabilities to detect any existing gaps or weaknesses within ongoing government activities that could hinder proposed mitigation activities and possibly exacerbate community hazard vulnerability. These gaps or weaknesses have been identified for each jurisdiction in the tables found throughout this section. The participating jurisdictions used the Capability Assessment as part of the basis for the Mitigation Actions that are identified in Section 9; therefore, each jurisdiction addresses their ability to expand on and improve their existing capabilities through the identification of their Mitigation Actions.

7.5.1 Linking the Capability Assessment with the Risk Assessment and the Mitigation Strategy

The conclusions of the Risk Assessment and Capability Assessment serve as the foundation for the development of a meaningful hazard mitigation strategy. During the process of identifying specific mitigation actions to pursue, the Planning Team considered not only each jurisdiction's level of hazard risk, but also their existing capability to minimize or eliminate that risk.

SECTION 8: MITIGATION STRATEGY

This section of the Plan provides the blueprint for the participating jurisdictions in the Tar River Region to follow in order to become less vulnerable to its identified hazards. It is based on general consensus of the Tar River Regional Hazard Mitigation Planning Team and the findings and conclusions of the *Capability Assessment* and *Risk Assessment*. It consists of the following five subsections:

- 8.1 Introduction
- 8.2 Mitigation Goals
- 8.3 Identification and Analysis of Mitigation Techniques
- 8.4 Selection of Mitigation Techniques for the Tar River Region
- 8.5 Plan Update Requirement

8.1 Introduction

The intent of the Mitigation Strategy is to provide the Tar River Region communities with the goals that will serve as guiding principles for future mitigation policy and project administration, along with an analysis of mitigation techniques available to meet those goals and reduce the impact of identified hazards. It is designed to be comprehensive, strategic, and functional in nature:

- In being *comprehensive*, the development of the strategy includes a thorough review of all hazards and identifies extensive mitigation measures intended to not only reduce the future impacts of high-risk hazards, but also to help the region achieve compatible economic, environmental, and social goals.
- In being *strategic*, the development of the strategy ensures that all policies and projects proposed for implementation are consistent with pre-identified, long-term planning goals.
- In being *functional,* each proposed mitigation action is linked to established priorities and assigned to specific departments or individuals responsible for their implementation with target completion deadlines. When necessary, funding sources are identified that can be used to assist in project implementation.

The first step in designing the Mitigation Strategy includes the identification of mitigation goals. Mitigation goals represent broad statements that are achieved through the implementation of more specific mitigation actions. These actions include both hazard mitigation policies (such as the regulation of land in known hazard areas through a local ordinance) and hazard mitigation projects that seek to address specifically targeted hazard risks (such as the acquisition and relocation of a repetitive loss structure).

The second step involves the identification, consideration, and analysis of available mitigation measures to help achieve the identified mitigation goals. This is a long-term, continuous process sustained through the development and maintenance of this Plan. Alternative mitigation measures will continue to be considered as future mitigation opportunities are identified, as data and technology improve, as mitigation funding becomes available, and as this Plan is maintained over time.

The third and last step in designing the Mitigation Strategy is the selection and prioritization of specific mitigation actions for the Tar River Region (provided separately in Section 9: *Mitigation Action Plan*). Each county and participating municipality has its own Mitigation Action Plan (MAP) that reflects the needs and concerns of that jurisdiction. The MAP represents an unambiguous and functional plan for action and is considered to be the most essential outcome of the mitigation planning process.

The MAP includes a prioritized listing of proposed hazard mitigation actions (policies and projects) for the Tar River counties and their municipal jurisdictions to complete. Each action has accompanying information, such as those departments or individuals assigned responsibility for implementation, potential funding sources, and an estimated target date for completion. The MAP provides those departments or individuals responsible for implementing mitigation actions with a clear roadmap that also serves as an important tool for monitoring success or progress over time. The cohesive collection of actions listed in the MAP can also serve as an easily understood menu of mitigation policies and projects for those local decision makers who want to quickly review the recommendations and proposed actions of the Regional Hazard Mitigation Plan.

In preparing each Mitigation Action Plan for the Tar River Region, officials considered the overall hazard risk and capability to mitigate the effects of hazards as recorded through the risk and capability assessment process in addition to meeting the adopted mitigation goals and unique needs of the community.

8.1.1 Mitigation Action Prioritization

Prioritization of the proposed mitigation actions was based on the following six factors:

- Effect on overall risk to life and property
- Ease of implementation
- Political and community support
- A general economic cost/benefit review[1]
- Funding availability
- Continued compliance with the NFIP

The point of contact for each county helped coordinate the prioritization process by reviewing each action and working with the lead agency/department responsible to determine a priority for each action using the six factors listed above.

Using these criteria, actions were classified as high, moderate, or low priority by the participating jurisdiction officials.

No changes in priorities are necessary at this time. The planning team and participating jurisdictions will continue to ensure that the plan reflects current conditions, including financial, legal and political realities as well as post disaster conditions.

[1] Only a general economic cost/benefit review was considered by the Regional Hazard Mitigation Planning Committee through the process of selecting and prioritizing mitigation actions. Mitigation actions with “high” priority were determined to be the most cost effective and most compatible with the participating jurisdictions’ unique needs. Actions with a “moderate” priority were determined to be cost-effective and compatible with jurisdictional needs but may be more challenging to complete administratively or fiscally than “high” priority actions. Actions with a “low” priority were determined to be important community needs, but the community likely identified several potential challenges in terms of implementation (e.g. lack of funding, technical obstacles). A more detailed cost/benefit analysis will be applied to particular projects prior to the application for or obligation of funding, as appropriate.

8.2 Mitigation Goals

44 CFR Requirement
44 CFR Part 201.6(c)(3)(i): The mitigation strategy shall include a description of mitigation goals to reduce or avoid long-term vulnerabilities to the identified hazards.

The primary goal of all local governments is to promote the public health, safety, and welfare of its citizens. In keeping with this standard, Tar River counties and the participating municipalities have developed nine goal statements for local hazard mitigation planning in the region.

The Tar River Regional Mitigation Goals are presented in **Table 8-1**. Consistent implementation of actions over time will ensure that community goals are achieved.

Table 8-1: Tar River Regional Mitigation Goals

	Goal
Goal #1	Reduce the risk of loss of life and personal injury from natural hazards.
Goal #2	Reduce the risk and impact of future natural disasters by regulating development in known high hazard areas and enhancing existing or creating new policies and ordinances that will help reduce the damaging effects of natural hazards and prevent vulnerability from increasing.
Goal #3	Pursue funds to reduce the risk of natural hazards to existing developments where such hazards are clearly identified, and the mitigation efforts are cost effective.
Goal #4	Ensure that hazard mitigation is considered when redevelopment occurs after a natural disaster and expedite post-disaster reconstruction.
Goal #5	Protect the public health, safety, and welfare by increasing public awareness of hazards, providing education on protection from hazards and encouraging collective and individual responsibility for mitigating hazard risks.
Goal #6	Protect the fragile natural and scenic areas of the region, particularly those areas that protect drinking water supplies.
Goal #7	Protect the most vulnerable populations, buildings, infrastructure, and critical facilities through the implementation of cost-effective and technically feasible mitigation actions.
Goal #8	Enhance emergency response during times of disaster.
Goal #9	Improve technical capability to respond to hazards and to improve the effectiveness of hazard mitigation actions.

8.3 Identification and Analysis of Mitigation Techniques

44 CFR Requirement
44 CFR Part 201.6(c)(3)(ii): The mitigation strategy shall include a section that identifies and analyzes a comprehensive range of specific mitigation actions and projects being considered to reduce the effect of each hazard, with particular emphasis on new and existing buildings and infrastructure.

In formulating the Mitigation Strategy for the Tar River Region, a wide range of activities were considered in order to help achieve the established mitigation goals in addition to addressing any specific hazard concerns. These activities were discussed during the Tar River Regional Hazard Mitigation Planning Team meetings. In general, all activities considered by the Regional Hazard Mitigation Planning Team can be classified under one of the following six broad categories of mitigation techniques: Prevention, Property Protection, Natural Resource Protection, Structural Projects, Emergency Services, and Public Awareness and Education. These are discussed in detail below.

8.3.1 Prevention

Preventative activities are intended to keep hazard problems from getting worse and are typically administered through government programs or regulatory actions that influence the way land is developed and buildings are built. They are particularly effective in reducing a community's future vulnerability, especially in areas where development has not occurred, or capital improvements have not been substantial. Examples of preventative activities include:

- Planning and zoning
- Building codes
- Open space preservation
- Floodplain regulations
- Stormwater management regulations
- Drainage system maintenance
- Capital improvements programming
- Riverine/fault zone setbacks

8.3.2 Property Protection

Property protection measures involve the modification and/or retrofitting of existing buildings and structures to help them better withstand the forces of a hazard or removal of the structures from hazardous locations. Examples include:

- Acquisition
- Relocation
- Building elevation
- Critical facilities protection/generators, back-up power, etc.)
- Retrofitting (e.g., wind proofing, floodproofing, seismic design techniques, etc.)
- Safe rooms, shutters, shatter-resistant glass
- Insurance

8.3.3 Natural Resource Protection

Natural resource protection activities reduce the impact of natural hazards by preserving or restoring natural areas and their protective functions. Such areas include floodplains, wetlands, steep slopes, and sand dunes. Parks, recreation, or conservation agencies and organizations often implement these protective measures. Examples include:

- Floodplain protection
- Watershed management
- Riparian buffers
- Forest and vegetation management (e.g., fire resistant landscaping, fuel breaks, etc.)
- Erosion and sediment control
- Wetland preservation and restoration
- Habitat preservation
- Slope stabilization

8.3.4 Structural Projects

Structural mitigation projects are intended to lessen the impact of a hazard by modifying the environmental natural progression of the hazard event through construction (including dams/levees; diversion/detention/retention; channel modification). They are usually designed by engineers and managed or maintained by public works staff. Examples include:

- Reservoirs
- Dams/levees/dikes/floodwalls
- Diversions/detention/retention
- Channel modification
- Storm sewers

8.3.5 Emergency Services

Although not typically considered a “mitigation” technique, emergency service measures do minimize the impact of a hazard event on people and property. These commonly are actions taken immediately prior to, during, or in response to a hazard event. Examples include:

- Warning systems
- Evacuation planning and management
- Emergency response training and exercises
- Sandbagging for flood protection
- Installing temporary shutters for wind protection

8.3.6 Public Education and Awareness

Public education and awareness activities are used to advise residents, elected officials, business owners, potential property buyers, and visitors about hazards, hazardous areas, and mitigation techniques they can use to protect themselves and their property. Examples of measures to educate and inform the public include:

- Outreach projects
- Speaker series/demonstration events
- Hazard map information
- Real estate disclosure
- Library materials

- School children educational programs
- Hazard expositions

8.4 Selection of Mitigation Techniques for the Tar River Region

In order to determine the most appropriate mitigation techniques for the communities in the Tar River Region, the Regional Hazard Mitigation Planning Team members thoroughly reviewed and considered the findings of the *Capability Assessment* and *Risk Assessment* to determine the best activities for their respective communities. Other considerations included the effect of each mitigation action on overall risk to life and property, its ease of implementation, its degree of political and community support, its general cost-effectiveness, and funding availability (if necessary).

8.5 Plan Update Requirement

In keeping with FEMA requirements for plan development, updates on the implementation status of each action are provided. The mitigation actions provided in Section 9: *Mitigation Action Plan* include the mitigation actions from the previous plan as well as any new mitigation actions proposed through the plan update process.

SECTION 9: Mitigation Action Plan

This section includes the listing of the mitigation actions proposed by the participating jurisdictions in the Tar River Region. It consists of the following two subsections:

- 9.1 Overview
- 9.2 Mitigation Action Plans

44 CFR Requirement
44 CFR Part 201.6(c)(3)(iii): The mitigation strategy shall include an action plan describing how the actions identified in paragraph (c)(2)(ii) of this section will be prioritized, implemented, and administered by the local jurisdiction.

9.1 Overview

As described in the previous section, the Mitigation Action Plan, or MAP, provides a functional plan of action for each jurisdiction. It is designed to achieve the mitigation goals established in Section 8: *Mitigation Strategy* and will be maintained on a regular basis according to the plan maintenance procedures established in Section 10: *Plan Maintenance*.

Each proposed mitigation action has been identified as an effective measure (policy or project) to reduce hazard risk for the Tar River Region. Each action is listed in the MAP in conjunction with background information such as hazard(s) addressed and relative priority. Other information provided in the MAP includes potential funding sources to implement the action should funding be required (not all proposed actions are contingent upon funding). Most importantly, implementation mechanisms are provided for each action, including the designation of a lead agency or department responsible for carrying the action out as well as a timeframe for its completion. These implementation mechanisms ensure that the Tar River Regional Hazard Mitigation Plan remains a functional document that can be monitored for progress over time. Each proposed action also describes the status of hazard mitigation actions in the previous plan by identifying those that have been completed or not completed. For actions that have not been completed, the plan describes whether the actions no longer relevant or it's included as an "in progress" or "to be continued" action.

The proposed actions are not listed in priority order; though, each has been assigned a priority level of "high," "moderate," or "low" as described below and in Section 8. The Mitigation Action Plan is organized by mitigation strategy category (Prevention, Property Protection, Natural Resource Protection, Structural Projects, Emergency Services, or Public Education and Awareness). The following are the key elements described in the Mitigation Action Plan:

- Hazard(s) Addressed—Hazard which the action addresses.
- Relative Priority—High, moderate, or low priority as assigned by the jurisdiction.
- Lead Agency/Department—Department responsible for undertaking the action.
- Potential Funding Sources—Local, State, or Federal sources of funds are noted here, where applicable.
- Cost Estimate – High (greater than $100k) Medium (between $100kto 50k) Low (less than $50k)
- Implementation Schedule—Date by which the action the action should be completed. More information is provided when possible.

- Implementation Status —Indication of completion, progress, deferment, or no change since the previous plan. If the action is new, that will be noted here.

9.2 Mitigation Action Plans

The mitigation actions proposed by each of the participating jurisdictions are listed in the individual MAPs on the following pages.

Table 9-1: Franklin County Mitigation Action Plan

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
Prevention								
P-1	Consideration of adoption and/or refinement of a Capital Improvements Program (CIP).	All	Moderate	Franklin County Manager	NC Rural Economic Development Center	Medium	2026	The county has a Capital Improvements Program in place and will revise as necessary.
P-2	Work with the State Office of Dam Safety (ODS) to: 1) ensure that all dams in Franklin County for which the ODS has jurisdiction are inspected on a regular basis; 2) ensure that ODS notifies the Franklin County Emergency Management (EM) office of all ODF jurisdictional dams classified as "high hazard" or "distressed" dams; c) attempt to ensure that all high hazard or distressed dams in the county have an updated and implemented operations and maintenance plan and emergency action plans; and d) provide the County EM office with an inventory of all ODS jurisdictional dams in the county.	Dam Failure, Flood	Low	Franklin County Emergency Management Director	NC Dam Safety Program, NC Rural Center	Medium	2026	To be continued: Although there have been some efforts to coordinate this inspection process, there is still a great deal of coordination that needs to be worked out to ensure inspections of all high hazard dams are taking place and that the county is involved in the process.
P-3	Review "Firewise" zoning and subdivision standards and report on their appropriateness for incorporation into existing (or new) zoning and subdivision ordinances.	Wildfire	Low	Franklin County Planning Director, Local Fire Chief Officials, Franklin County Fire Marshall	Local	Medium	2026	To be continued: The county has incorporated some standards of Firewise into new standards for zoning/subdivisions, but there are still additional requirements that could be incorporated to better protect against wildfire.
P-4	Convene a working group with electric service providers in the county and produce a report, with specific recommendations and detailed implementation timelines, that address the issues of 1) disaster preparedness techniques (e.g., tree trimming, pole replacement) and 2) communication with county officials during and immediately after a natural hazard event that results in loss of electrical power.	Severe Weather, Winter Storms	Moderate	Franklin County Emergency Management Director	Local	Medium	2026	To be continued: Although some coordination with service providers has taken place on an ad hoc basis, the county/town has not established an ongoing working group due to lack of staff time. The town will continue to work with the county to pursue this action going forward.
P-5	The responsible party will coordinate with each department head in the local government and produce a report on ways in which hazard mitigation goals, objectives, and tasks can be incorporated into existing policies and implemented through existing programs and personnel.	All	High	Franklin County Planning Director	Local	Medium	2026	To be continued: The county planning department has worked on including mitigation goals/tasks into existing policies/programs, but there is still a good deal of effort that needs to be made to fully incorporate hazard mitigation into other areas of local governance.
P-6	Each local government participating in this HMP will: 1) continue to monitor the types and numbers of structures (including infrastructure and critical facilities) that might be located in known hazard areas based on their best available current projections and 2) calculate aggregate projected dollar losses for each type of development and for each hazard risk.	All	High	Franklin County Planning Director	Local	Medium	2026	To be continued: Local governments have worked to monitor their structures that might be located in known hazard areas and continue to do so through this planning effort. However, all jurisdictions need to make a stronger effort to assess potential solutions going forward, so this action will remain in place.
Property Protection								
PP-1	Work with the North Carolina Department of Transportation (NCDOT) Division Five Highway Operations unit and convene a working group (county-wide or local) to develop solutions to localized drainage issues caused (in part or in whole) by NCDOT maintained drainage facilities.	Flood	Low	Franklin County Planning Director	NCDOT Division Maintenance Division	Medium	2026	To be continued: Local drainage issues have been addressed in some of the recent NCDOT projects, but there remain many drainage issues throughout the county that will need to be resolved before this action can be considered complete.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
PP-2	Apply for funding from the Hazard Mitigation Grant Program (HMGP) and other Hazard Mitigation Assistance Programs for hazard mitigation projects.	All	High	Franklin County Planning Director	Federal, State	Medium	2026	To be continued: There has generally not been successful funding of brick and mortar type projects. Therefore, the jurisdiction will continue to pursue this action.
PP-3	Apply for funding through the FEMA High Hazard Dam Repair Program for mitigation measures associated with high hazard dams to include: 1. Geotechnical investigation to establish data for risk analysis and development of engineering designs/solutions 2. Build upstream dam to reduce load on existing dam 3. Property Acquisition in inundation areas below dam 4. Raise crest of dam to increase storage capacity 5. Add additional spillways, widen or lower existing spillways to increase discharge capacity 6. Warning systems to alert downstream areas of potential dam failure 7. Improve flow path below dam to increase conveyance capacity 8. Encourage conservation or re-forestation of upstream land to reduce runoff 9. Development of community Stormwater Management Plans for upstream communities 10. Complete an Emergency Action Plan in conjunction with NCDEQ for all High Hazard Dams in the county	Dam Failure, Flood, Hurricane	High	Franklin County Emergency Management Director	Federal, State	High	2026	New Action
PP-4	NCDEQ Dam Safety developed a risk-based selection and prioritization process for addressing high hazard dams as funding becomes available. This process will be employed by NCEM and by communities that wish to participate in the HHDR program. The analysis complies with the latest practices in dam safety risk management and are compliant with FEMA's Federal Guidelines for Dam Safety Risk Management, FEMA publication P-1025. Initial screening steps include securing buy-in and support from the local government/dam owner(s) and assurance that cost-matching requirements can be met by the local government. The second level of screening involves confirming that a particular dam is identified as a High Hazard Dam and has of updated Emergency Action Plan.	Dam Failure, Flood, Hurricane	High	Franklin County Emergency Management Director	Federal, State	High	2026	New Action

SP-1								
Emergency Services								
ES-1								

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
Public Education and Awareness								
PEA-1	Implement public education efforts designed to help inform the public of their exposure to all natural hazards and to inform them of actions they can take to mitigate the damages to their health and property from natural hazards.	All	Moderate	Franklin County Planning Director; Franklin County Emergency Services Emergency Management	FEMA, American Red Cross	Medium	2026	To be continued: The county has worked with the Red Cross to try to improve efforts by the public to mitigate damage, but there is still significant work that needs to be done to educate the public on these matters. This action will remain in the plan.
PEA-2	Ensure that the local library maintains documents about flood insurance, flood protection, floodplain management, and natural and beneficial functions of floodplains. Many documents are available free of charge from the Federal Emergency Management Agency (FEMA).	Flood	Moderate	Franklin County Planning Director; Franklin County Emergency Services Emergency Management	FEMA, American Red Cross	Medium	2026	To be continued: Local libraries have maintained information about flood insurance and protection, but the materials have not been evaluated recently and may need to be replaced to ensure they reflect the most up to date information.
PEA-3	Encourage builders, developers, and architects to become familiar with the NFIP land use and building standards by attending annual workshops presented by the NC Division of Emergency Management (DEM). This can be accomplished by creating a mailing list and providing it to DEM to use for its announcements. This task can be further supported by distributing copies of DEM's announcement from the city and county inspections departments when builders and developers apply for permits.	Flood	Moderate	Franklin County Planning Director	FEMA, American Red Cross	Medium	2026	To be continued: Builders/developers/etc. are always able to attend these workshops, but there has not been much effort made to encourage these groups to attend these kinds of sessions. The county will need to re-evaluate its process for implementing this action.
PEA-4	Send a flood protection flyer to all properties in the county through a community newsletter, utility bill, telephone book, or other document that is distributed to all residences. The flyer should include the following information: the name and location of the closest, county-approved shelter, a general identification of the local flood hazard, flood safety, flood insurance, property protection, floodplain development permit requirements, and drainage system maintenance.	Flood	Moderate	Franklin County Planning Director	FEMA, American Red Cross	Medium	2026	To be continued: The county and city have pushed out information to some residents via flyers, but they have not been able to reach all residents so there will need to be additional efforts to evaluate the best techniques for getting this information out to the public. The county and city will evaluate this action and try to improve it going forward.
PEA-5	Provide local real estate agents with handouts that will advise potential buyers to investigate the flood hazard for the property they are considering purchasing.	Flood	Moderate	Franklin County Planning Director	FEMA, American Red Cross	Medium	2026	In progress: Some handouts have been developed by the county and passed along to real estate agents, but not every agent has been reached and it is likely that the information needs to be updated, so the county will keep this action in place.
PEA-6	Create outreach website for public designed to display risk information developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Franklin County	Local	Medium	2026	In progress: no measurable progress due to lack of funding and staff.

Table 9-2: Town of Bunn Mitigation Action Plan

P-2	Consideration of adoption or refinement of a Capital Improvements Program (CIP).	All	Moderate	Franklinton Town Manager/ Administrator	NC Rural Economic Development Center	Medium	2026	To be continued: The county has a CIP in place, but the town has not developed this program yet. It will continue to work on developing a CIP going forward.
P-3	Convene a working group with electric service providers in the county and produce a report, with specific recommendations and detailed implementation timelines, that address the issues of 1) disaster preparedness techniques (e.g., tree trimming, pole replacement) and 2) communication with county officials during and immediately after a natural hazard event that results in loss of electrical power.	Tornado, Hurricane, Severe Weather, Winter Storm	Moderate	Franklinton Town Administrator/ Manager (Franklin County is the lead)	Local	Medium	2026	To be continued: Although some coordination with service providers has taken place on an ad hoc basis, the county/town has not established an ongoing working group due to lack of staff time. The town will continue to work with the county to pursue this action going forward.
P-4	The responsible party will coordinate with each department head in the local government and produce a report on ways in which hazard mitigation goals, objectives, and tasks can be incorporated into existing policies and implemented through existing programs and personnel.	All	High	Franklinton Town Administrator/ Manager	Local	Medium	2026	To be continued: The town manager has worked on including mitigation goals/tasks into existing policies/programs, but there is still a good deal of effort that needs to be made to fully incorporate hazard mitigation into other areas of local governance.
P-5	Each local government participating in this HMP will: 1) continue to monitor the types and numbers of structures (including infrastructure and critical facilities) that might be located in known hazard areas based on their best available current projections and 2) calculate aggregate projected dollar losses for each type of development and for each hazard risk.	All	High	Franklinton Town Administrator/ Manager	Local	Medium	2026	To be continued: The town has worked to monitor its structures that might be located in known hazard areas and has continued to do so through this planning effort. However, the town needs to make a stronger effort to assess potential solutions going forward, so this action will remain in place.
Property Protection								
PP-1	Work with the North Carolina Department of Transportation (NCDOT) Division Five Highway Operations unit and convene a working group (county-wide or local) to develop solutions to localized drainage issues caused (in part or in whole) by NCDOT maintained drainage facilities.	Flood	Low	Franklinton Public Works Director/Water System Operator	NCDOT Division Maintenance Division	Medium	2026	To be continued: Local drainage issues have been addressed in some of the recent NCDOT projects, but there remain many drainage issues throughout the county that will need to be resolved before this action can be considered complete. The town will work with county officials and NCDOT on this issue.
PP-2	Apply for funding from the Hazard Mitigation Grant Program (HMGP) for mitigation related projects.	All	High	Franklinton Town Administrator/ Manager	Federal, State	Medium	2026	To be continued: There has generally not been successful funding of brick and mortar type projects. Therefore, the jurisdiction will continue to pursue this action.
PP-3	Working on completion of an Emergency Action Plan for the Franklinton Reservoir Dam. Completion of the plan will coincide with the development of an application for assistance with repairs on the Franklinton Reservoir Dam. Following initial screening, a relative risk evaluation will be conducted to compare dam-specific conditions and risks. Where failure modes are driven by hydrologic concerns (under-sized spillways, poor design or other features/factors that might suggest a higher risk of catastrophic failure) are ranked ahead of	Dam Failure	High	Franklin County, the Town of Franklinton, Franklin Emergency Management and the NC Department of Environmental Quality	Federal, State, Local	Medium	2026	New Action

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	dams that exhibit more static problems such as seepage or scouring. Although such conditions are cause for concern, they do not necessarily suggest that a catastrophic failure could be imminent. To complete the assessment, subject dams are plotted on a matrix comparing approximate/relative likelihood of failure to approximate/relative consequence of failure.

Public Education and Awareness								
PEA-1	Implement public education efforts designed to help inform the public of their exposure to natural hazards and to inform them of actions they can take to mitigate the damages to their health and property from natural hazards.	All	Moderate	Franklinton Town Clerk	FEMA, American Red Cross	Medium	2026	To be continued: The county and town have worked with the Red Cross to try to improve efforts by the public to mitigate damage, but there is still significant work that needs to be done to educate the public on these matters. This action will remain in the plan.
PEA-2	Ensure that the local library maintains documents about flood insurance, flood protection, floodplain management, and natural and beneficial functions of floodplains. Many documents are available free of charge from the Federal Emergency Management Agency (FEMA).	Flood	Moderate	Franklinton Town Clerk	FEMA, American Red Cross	Medium	2026	To be continued: Local libraries have maintained information about flood insurance and protection, but the materials have not been evaluated recently and may need to be replaced to ensure they reflect the most up to date information.
PEA-3	Encourage builders, developers, and architects to become failure with the NFIP land use and building standards by attending annual workshops presented by the NC Division of Emergency Management (DEM). This can be accomplished by creating a mailing list and providing it to DEM to use for its announcements. This task can be further supported by distributing copies of DEM's announcement from the city and county inspections departments when builders and developers apply for permits.	Flood	Moderate	Franklinton Town Clerk	FEMA, American Red Cross	Medium	2026	To be continued: Builders/developers/etc. are always able to attend these workshops, but there has not been much effort made to encourage these groups to attend these kinds of sessions. The county will need to re-evaluate its process for implementing this action.
PEA-4	Send a flood protection flyer to all properties in the county through a community newsletter, utility bill, telephone book, or other document that is distributed to all residences. The flyer should include the following information: the name and location of the closest, county-approved shelter, a general identification of the local flood hazard, flood safety, flood insurance, property protection, floodplain development permit requirements, and drainage system maintenance.	Flood	Moderate	Franklinton Town Clerk	FEMA, American Red Cross	Medium	2026	To be continued: The county and city have pushed out information to some residents via flyers, but they have not been able to reach all residents so there will need to be additional efforts to evaluate the best techniques for getting this information out to the public. The county and city will evaluate this action and try to improve it going forward.
PEA-5	Provide local real estate agents with handouts that will advise potential buyers to investigate the flood hazard for the property they are considering purchasing.	Flood	Moderate	Franklinton Town Clerk	FEMA, American Red Cross	Medium	2026	In progress: Some handouts have been developed by the county and passed along to real estate agents, but not every agent has been reached and it is likely that the information needs to be updated, so the county will keep this action in place.

Prevention								
P-1	Refinement of a Capital Improvements Program (CIP).	All	Moderate	Granville County Planning Director	NC Rural Economic Development Center	Medium	2026	In progress: Although the county currently has a Capital Improvements Program, it would like to keep this action in place as further refinements to the program will likely be needed in the next 5 years to improve the program and ensure county goals are met.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
P-2	Work with the State Office of Dam Safety (ODS) to: a) ensure that all dams in Granville County for which the ODS has jurisdiction are inspected on a regular basis; b) ensure that ODS notifies the Granville County Emergency Management (EM) office of all ODS jurisdictional dams classified as "high hazard" or "distressed" dams; c) attempt to ensure that all high hazard or distressed dams in the county have an updated and implemented operations and maintenance plan and emergency action plans; and d) provide the county EM office with an inventory of all ODS jurisdictional dams in the county.	Dam Failure, Flood	Low	Granville County Emergency Management Director	NC Dam Safety Program	Medium	2026	To be continued: The county has worked to identify dams located within the county, including through this mitigation planning effort. Dam Safety Action Plans have been completed and reviewed by Cities of Oxford and Creedmoor. However, further efforts are needed to ensure that all high hazard dams have sufficient plans in place and that coordination with state dam safety officials is maintained to keep dam information up to date at the county level.
P-3	Review "Firewise" zoning and subdivision standards and report on their appropriateness for incorporation into existing (or new) zoning and subdivision ordinances.	Wildfire	Low	Granville County Senior Planner	Local	Medium	2026	To be continued: The county has not reviewed Firewise zoning and subdivision standards, but county planning officials have requested further clarification on the standards and will work to determine the appropriateness of these standards going forward.
P-4	Convene a working group with electric service providers in the county and produce a report, with specific recommendations and detailed implementation timelines that addresses the issues of 1) disaster preparedness and 2) communication with county officials during and immediately after a natural hazard event that results in loss of electrical power.	Severe Weather, Tornado, Hurricane, Winter Storm	Moderate	Granville County Emergency Management Director	Local	Medium	2026	To be continued: The county has worked with electric service providers in the past, but a formal working group has not been convened. The county will work towards developing a stronger working relationship with electric service providers going forward.
P-5	Adopt flood maps as they are updated by FEMA and/or the state.	Flood	High	Granville County Planning	Local	Low	2026	In progress: Last update in December 2019. Maps are updated periodically as directed by FEMA and the State of NC.
Property Protection								
PP-1	Work with the North Carolina Department of Transportation (NCDOT) Division Five Highway Operations unit and convene a working group to develop solutions to localized drainage issues caused (in part or in whole) by NCDOT maintained drainage facilities.	Flood	Low	Granville County Planning Director	NCDOT Division Maintenance	Low	2021	Deleted: The county has determined that this action may not be necessary as the NCDOT generally addressed drainage issues through its programs without the need to convene a working group.
PP-2	Apply for funding from the Hazard Mitigation Grant Program (HMGP) and other Hazard Mitigation Assistance (HMA) grants.	All	High	Granville County Emergency Management Director	Federal, State	Medium	2026	To be continued: In general, the county has not received grant funding for brick and mortar projects under the HMGP, but this is still an action the county would like to have in place going forward as it pursues these types of projects. Eligible projects have not been identified.
PP-3	Provide backup power for critical facilities.	All	High	Granville County Emergency Services	Federal, State	Medium	2026	In progress: New action
PP-4	Work with NC State Highway Patrol to replace existing metal communications equipment sheds with a NC FHP concrete structure.	Flood, Tornado, Hurricane, Severe Weather	Medium	Granville County Emergency Services	NC Highway Patrol	Medium	2026	In progress: New Action

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
ES-1	Work with local American Red Cross (ARC) officials to develop a plan and implementation goals for ensuring that all county-sponsored shelters meet ARC shelter operations standards for mitigation from all hazards, most especially wind and flood hazards.	All	Moderate	Granville County Emergency Management Director	American Red Cross Central NC Chapter	Medium	2026	To be continued: The county has worked with ARC officials to ensure that identified shelters are protected as effectively as possible.
Public Education and Awareness								
PEA-1	Implement public education efforts designed to help inform the public of their exposure to natural hazards and to inform them of actions they can take to mitigate the damages to their health and property from all natural hazards.	All	Moderate	Granville County Emergency Management Director	FEMA, Red Cross	Medium	2026	To be continued: The county has implemented several types of public education efforts in the past such as GranvilleAlert.com and the new county website, but as the most effective techniques are constantly evolving, the county will need to evaluate its outreach program in the future and ensure it is communicating effectively with the public.
PEA-2	Ensure that the local library maintains documents about flood insurance, flood protection, floodplain management, and natural and beneficial functions of floodplains. Many documents are available free of charge from the Federal Emergency Management Agency (FEMA).	Flood	Moderate	Granville County Emergency Management Director	FEMA, Red Cross	Medium	2026	To be continued: Several libraries in the county have kept information on the flood hazard on hand over the past 5 years, however, this information is likely outdated and should be evaluated and replaced as needed. Therefore, this action will remain in place. Much of this information is available online.
PEA-3	Encourage buildings, developers, and architects to become familiar with the NFIP land use and building standards by attending annual workshops presented by the NC Division of Emergency Management (DEM). This can be accomplished by creating a mailing list and providing it to DEM to use for its announcements. This task can be further supported by distributing copies of DEM's announcement from the county's inspections department when builders and developers apply for permits.	Flood	Moderate	Granville County Emergency Management Director	FEMA, Red Cross	Medium	2026	To be continued: The development community has been made aware of programs from NCDEM to some degree, but the county would like to implement a bigger push to let this community know about potential programs/workshops that are available and to encourage attendance. EM and zoning officials attend annual conferences and have input on plans for sites with floodplains.
PEA-4	Provide information to residents via various communication methods: the name and location of the closest, county-approved shelter, a general identification of the local flood hazard, flood safety, flood insurance, property protection, floodplain development permit requirements, and drainage system maintenance.	Flood	Moderate	Granville County Emergency Management Director	FEMA, Red Cross	Medium	2026	To be continued: The county has pushed out information to some residents via social media and the county website, but the county has not been able to reach all residents so there will need to be additional efforts to evaluate the best techniques for getting this information out to the public. The county will evaluate this action and try to improve it going forward via online management.
PEA-5	Provide local real estate agency with handouts that will advise potential buyers to investigate the flood hazard for the property they are considering purchasing.	Flood	Moderate	Granville County Emergency Management Director	FEMA, Red Cross	Medium	2021	Delete: Only a small portion of the county is in floodplain. Action PEA-4 more effectively addresses this mitigation opportunity.
PEA-6	Create outreach website for public designed to display risk information for all hazards developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Granville County	Local	Medium	2026	To be continued: A website will continue to be updated and available with information for the community.

Flood	Moderate	Butner Town Planner	FEMA, Red Cross	Medium	2026	In progress: The development community has been made aware of programs from NCDEM to some degree, but the town would like to implement a bigger push to let this community know about potential programs/workshops that are available and to encourage attendance.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	This can be accomplished by creating a mailing list and providing it to DEM to use for its announcements. This task can be further supported by distributing copies of DEM's announcement from the county's inspections department when builders and developers apply for permits.							
PEA-4	Send a flood protection flyer to all properties in the county through a community newsletter, utility bill, telephone book, or other document that is distributed to all residences. The flyer should include the following information: the name and location of the closest, county-approved shelter, a general identification of the local flood hazard, flood safety, flood insurance, property protection, floodplain development permit requirements, and drainage system maintenance.	Flood	Moderate	Butner Town Planner	FEMA, Red Cross	Medium	2026	To be continued: The county and city have pushed out information to some residents via flyers, but they have not been able to reach all residents so there will need to be additional efforts to evaluate the best techniques for getting this information out to the public. The county and city will evaluate this action and try to improve it going forward.
PEA-5	Provide local real estate agency with handouts that will advise potential buyers to investigate the flood hazard for the property they are considering purchasing.	Flood	Moderate	Butner Town Planner	FEMA, Red Cross	Medium	2026	In progress: Local real estate agents have been given some information that can be passed along to potential home buyers, but the county and town will need to determine if this strategy has been effective and if the information needs to be updated. This action will remain in the plan.
PEA-4	Create outreach website for public designed to display risk information regarding all hazards developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Granville County, Town of Butner	Local	Medium	2026	In progress: no measurable progress due to lack of funding.

Table 9-8: City of Creedmoor Mitigation Action Plan

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
Prevention								
P-1	Adoption or Refinement of a Capital Improvements Program (CIP).	All	Moderate	Creedmoor Manager	NC Rural Economic Development Center	Medium	2026	In progress: Although the city currently has a Capital Improvements Program, it would like to keep this action in place as further refinements to the program will likely be needed in the next 5 years to improve the program and ensure county goals are met.
P-2	Review "Firewise" zoning and subdivision standards and report on their appropriateness for incorporation into existing (or new) zoning and subdivision ordinances.	Wildfire	Low	Creedmoor Manager	Local	Low	2026	In progress: The county and city have not reviewed Firewise zoning and subdivision standards, but county planning officials have requested further clarification on the standards and will work in conjunction with the town to determine the appropriateness of these standards going forward.
P-3	Continue pursuit of grants and alternative funding sources in order to increase staff and resources to address current and future hazard mitigation needs.	All	Moderate	City of Creedmoor Administration	Local, NCEM, FEMA	Medium	2026	In progress: The city has worked to pursue some grants and mitigation funding in the past, but there are still many projects that have not been completed that the city would like to pursue, so this action will remain in place.
P-4	As part of the continuing process to review and revise city Zoning and Subdivision Ordinances, primary hazard areas for the city	Flood	Moderate	City of Creedmoor Administration	Local	Medium	Completed	The city has adopted both of the requirements identified in this action so this action is completed.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	to consider are the floodplains bordering the east and west areas of the city's ETJ. The city should ultimately direct development away from the floodplains but the following recommendations should be considered: 1) increase the minimum vegetative buffer requirements associate with development near perennial and intermittent water sources (streams, creeks, surface waters- as identified on USGS maps)— ***NOTE: As of the October 22, 2002 City of Creedmoor Board of Commissioners meeting, the City adopted the Division of Water Quality (NC) minimum requirements of 50' each side (total of 100') buffer for intermittent streams and 100' each side (total of 200') for perennial streams;*** and 2) incorporate a minimum 200' vegetative buffer surrounding Lake Rogers, measured at normal lake elevation. ***NOTE: As of the November 26, 2002 City of Creedmoor Board of Commissioners meeting, the City adopted an amendment to their City Zoning Ordinance and Subdivision Ordinance to incorporate a minimum 200' vegetative buffer surrounding Lake Rogers, measured at normal lake elevation.***							
P-5	Continued coordination with property owners/business owners to obtain flood insurance (under Community Rating System-CRS of NFIP).	Flood	Moderate	City of Creedmoor Administration	Local	Staff Time	2026	To be continued: The city has not joined the CRS program of the NFIP, but it will continue to work on further developing its program so that it is able to qualify for reduced flood insurance rates under the program.
P-6	Continued enforcement of state minimum requirements for building codes.	All	Moderate	City of Creedmoor Administration, State of North Carolina	Local	Medium	2026	To be continued: The city has implemented the state's building codes and will continue to enforce them.
P-7	Maintain/provide current information, services, procedures, and code revisions in relation to all current/future natural and man-made hazards within Granville County, the City of Creedmoor area, and State of North Carolina for public consumption.	All	Moderate	NCEM, Granville County, City of Creedmoor Administration	Local	Medium	2026	In progress: The city has worked in conjunction with the county and the state to provide the necessary services and procedures to reduce risk to hazards, but there is still significant work that can be done to try to prevent damage from these hazards via regulatory means and the city would like to keep this action in place going forward.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
P-8	Obtain computer and paper copy of current FEMA flood maps for the Neuse River Basin	Flood, Hurricane, Severe Weather, Winter Storm, Dam Failure	Moderate	NCEM	Local		Completed	Through this planning process flood maps are now available to the city and will continue to be available in the future through NC Floodplain Mapping Program's website.
P-9	As part of the continuing process to review and revise city Zoning and Subdivision Ordinances, primary hazard areas for the city to consider are the floodplain that border the east and west areas of the city's ETJ. The city should ultimately direct development away from floodplains, but should development be allowed to occur, the following recommendations should be considered: limit development within these areas, enforce more strict guidelines when development does occur; prohibit future development of city critical facilities and structures within identified 100 year/500 year floodplains (per current/updated FEMA flood maps); increase the minimum vegetative buffer requirements associated with development near perennial and intermittent water sources (streams, creeks, surface water-as identified on USGS maps; and under consideration of the January 28, 2003 Board of Commissioners meeting is incorporation of a 10/70-development rule for Class IV Watershed in Creedmoor and ETJ (Special Intensity Bonus Development Allocation-SIBDA).	Flood, Hurricane, Severe Weather, Winter Storm, Dam Failure	Moderate	City of Creedmoor Administration	Local		Deleted	(Short-range Strategy #2 from 2012 plan) Same as P-4. Combine with that action and delete.
P-10	Consider revisions to the city's Flood Ordinance for the following (more stringent than the state minimum requirements): raise finished flood elevation requirements for new structures where the Base Flood Elevation (BFE) has been determined per updated Floodplain Zones (FEMA 2003-established by the National Flood Insurance Rate Maps); structures located within zones where BFE are identified, are required to elevate two (2) feet above base flood elevation (state minimum-allows for ductwork and wiring to be below this elevation);	Flood, Hurricane, Severe Weather, Winter Storm, Dam Failure	Moderate	City of Creedmoor Administration	Local	Medium	2026	To be continued: The city has introduced revisions to the Flood Ordinance to address some of the regulatory standards identified in this action, however, the city would like to integrate additional updates to its ordinance as well, so it will keep this action in the plan.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	and to increase the opportunity for ductwork and wiring to be out of range for damage in the event of potential future flood event, the following medication is recommended: increase BFE by one (1) foot, total of three (3) feet.							
P-11	Ensure manufactured housing (single- wide, double-wide, modular) units meet the minimum state requirements for proper installation.	All	Moderate	City of Creedmoor Administration	Local	Medium	2026	In progress: The city has taken some action to ensure that new and existing manufactured housing installation meets minimum state requirements, but additional effort is needed to ensure proper enforcement so this action will remain in place.
P-12	Review and update the City's Comprehensive Development Plan to ensure that development is occurring in a pattern that best suits the needs of the changing population for the city, with consideration to areas prone to hazard (such as floodplains).	All	Moderate	City of Creedmoor Administration	Local	Medium	2026	To be continued: Although the city has developed a Comprehensive Development Plan that considers areas prone to hazards, the city will need to update this plan to ensure that it continues to address this area of concern by limiting development in high hazard areas.
P-13	Expand Capital Improvement Plan to include all city facilities/services (current plan includes water treatment facility and water/sewer infrastructure).	All	Moderate	City of Creedmoor Administration	Local	Medium	2026	To be continued: the city has been expanding its Capital Improvement Plan to include all city facilities and services, but this plan will need to be reviewed and worked on to ensure that all facilities are covered.
P-14	Consider revising local ordinances to require new manufactured housing units (after adoption of this ordinance) to have permanent foundations.	Flood, Tornado, Hurricane, Dam Failure, Sever Weather	Moderate	City of Creedmoor Administration	Local	Medium	2026	To be continued: The city has not revised its local ordinance to require new manufacture housing units have permanent foundations. This action will remain in the plan as the city continues to consider this requirement.
P-15	Consider developing ordinances to protect natural hazard resources and use them as natural greenways, limiting the opportunity for damage from hazards (floodplains, large open areas prone to wind damage). Use of floodplains as green space and greenways preserved for these uses and not developed, through development of a Natural Resources Protection Ordinance. Used to protect the natural resources of Creedmoor and incorporate practices that will still allow of managed development. Include sections in this ordinance for best management practices (control runoff), erosion/sediment controls ordinance, and floodplain regulations. Included in this	Flood	Moderate	City of Creedmoor Administration	Local		Deleted	Same as NRP-1. Combine with that action and delete.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	process would be incorporation of a greenway system.							
P-16	Review and update the city's Comprehensive Development Plan to ensure that development is occurring in a pattern that best suits the needs of the changing population for the City, with consideration to areas prone to hazard (such as floodplains).	All	Moderate	City of Creedmoor Administration	Local		Deleted	Same as P-12. Combine with that action and delete.
Property Protection								
PP-1	Work with the North Carolina Department of Transportation (NCDOT) Division Five Highway Operations unit and convene a working group to develop solutions to localized drainage issues caused (in part or in whole) by NCDOT maintained drainage facilities.	Flood	Low	Creedmoor Manager	NCDOT Division Maintenance		Deleted	The county and city have determined that this action may not be necessary as the NCDOT generally addressed drainage issues through its programs without the need to convene a working group.
PP-2	Apply for funding from the Hazard Mitigation Grant Program (HMGP) and Hazard Mitigation Assistance (HMA) for mitigation projects.	All	High	Creedmoor Manager	Federal, State	Medium	2026	In progress: In general, the city has not received grant funding for brick and mortar projects under the HMGP, but this is still an action the city would like to have in place going forward as it pursues these types of projects.
Natural Resource Protection								
NRP-1	Consider developing ordinances to protect natural resources and use them as natural greenways, limiting the opportunity for damage from hazards (floodplains, large open areas prone to wind damage). Use of floodplains as green space and greenways preserved for these uses and not developed through development of a Natural Resources Protection Ordinance. Used to protect the natural resources of Creedmoor and incorporate practices that will still allow of managed development. Include sections in this ordinance for best management practices (control runoff), erosion/sediment controls ordinance, and floodplain regulations. Included in this process would be incorporation of a greenway system.	Flood, Hurricane, Severe Weather, Winter Storm, Dam Failure	Moderate	City of Creedmoor Administration	Local	Medium	2026	In progress: The city has developed some ordinances that protect natural resources and thus mitigate hazards such as flooding. However, the city would like to keep this action in place as it continues to pursue ordinances that can preserve natural areas.
Structural Projects								

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
SP-1								
Emergency Services								
ES-1	For snow/ice removal the city should coordinate with NCDOT to ensure adequate capacity for snow/ice removal in the event of major storms (adequate defined as all major thoroughfares are cleared/remain clear within 12 hours of the last event).	Winter Storm	High	City of Creedmoor Administration, NCDOT	Local, NCDOT	Medium	2026	To be continued: In the past, the city has coordinated with NCDOT to clear roads during and after winter storm events. The city will continue to work with the state on this and try to improve its pre- event planning to ensure roads are cleared quickly.
ES-2	Review and update emergency management plans/operations on a yearly basis or as circumstances dictate with regards to natural and man-made hazards.	All	High	City of Creedmoor Administration	Local	Medium	2026, Annual updates	To be continued: The city has updated its EOP on an annual basis and will work to enact its next update of the plan within one year to incorporate improvements to the plan and ensure it addresses any new issues.
ES-3	To provide local services for snow and/or ice removal in the event of a storm event and as a method to assist NCDOT, the city should consider: establishing a local program with local/private contractors for snow and ice removal; and purchasing a motor grader for use by City of Creedmoor Public Works Department.	Severe Winter Storm	Moderate	City of Creedmoor	Local		Completed	The city has contracts in place for snow and ice removal and is adept at using working to ensure quick and efficient removal of ice and snow when these events occur.
ES-4	Review and update emergency management plans/operations on a yearly basis or as circumstances dictate with regards to natural and man-made hazards.	All	High	City of Creedmoor	Local		Deleted	Same as ES-2. Combine with that action and delete.
Public Education and Awareness								
PEA-1	Implement public education efforts designed to help inform the public of their exposure to natural hazards and to inform them of actions they can take to mitigate the damages to their health and property from all natural hazards.	All	Moderate	Creedmoor Manager	FEMA, Red Cross	Medium	2026	To be continued: The county and city have implemented several types of public education efforts in the past, but as the most effective techniques are constantly evolving, the county and city will need to evaluate their outreach programs in the future and ensure they are communicating effectively with the public.
PEA-2	Ensure that the local library maintains documents about flood insurance, flood protection, floodplain management, and natural and beneficial functions of floodplains. Many documents are available free of charge from the Federal Emergency Management Agency (FEMA).	Flood	Moderate	Creedmoor Manager	FEMA, Red Cross	Medium	2026	To be continued: Several libraries in the county have kept information on the flood hazard on hand over the past 5 years, however, this information is likely outdated and should be evaluated and replaced as needed. Therefore, this action will remain in place.
PEA-3	Encourage buildings, developers, and architects to become familiar with the NFIP land use and	Flood	Moderate	Creedmoor Manager	FEMA, Red Cross	Medium	2026	In progress: The development community has been made aware of programs from NCDEM to some degree, but the city would like to implement a bigger push to let this community know about potential programs/workshops that are available and to encourage attendance.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	building standards by attending annual workshops presented by the NC Division of Emergency Management (DEM). This can be accomplished by creating a mailing list and providing it to DEM to use for its announcements. This task can be further supported by distributing copies of DEM's announcement from the county's inspections department when builders and developers apply for permits.							
PEA-4	Send a flood protection flyer to all properties in the county through a community newsletter, utility bill, telephone book, or other document that is distributed to all residences. The flyer should include the following information: the name and location of the closest, county-approved shelter, a general identification of the local flood hazard, flood safety, flood insurance, property protection, floodplain development permit requirements, and drainage system maintenance.	Flood	Moderate	Creedmoor Manager	FEMA, Red Cross	Medium	2026	To be continued: The county and city have pushed out information to some residents via flyers, but they have not been able to reach all residents so there will need to be additional efforts to evaluate the best techniques for getting this information out to the public. The county and city will evaluate this action and try to improve it going forward.
PEA-5	Provide local real estate agency with handouts that will advise potential buyers to investigate the flood hazard for the property they are considering purchasing.	Flood	Moderate	Creedmoor Manager	FEMA, Red Cross	Medium	2026	To be continued: Local real estate agents have been given some information that can be passed along to potential home buyers, but the county and city will need to determine if this strategy has been effective and if the information needs to be updated. This action will remain in the plan.
PEA-6	Provide public education forums, workshops, and related meetings in regard to required methods and materials for hazard mitigation for all hazards.	All	Moderate	City of Creedmoor, Granville County, NCEM	FEMA, Red Cross	Medium	2026	To be continued: The city has held some public education forums on how to mitigate and has passed out materials to citizens on this subject. However, there is still significant public outreach work that needs to be carried out through workshops and meetings so this action will remain in the plan.
PEA-7	Create and update outreach website for public designed to display risk information for all hazards developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Granville County, City of Creedmoor	Local	High	2026	In progress: No measurable progress due to lack of staff and funding.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
PEA-3	Encourage buildings, developers, and architects to become familiar with the NFIP land use and building standards by attending annual workshops presented by the NC Division of Emergency Management (DEM). This can be accomplished by creating a mailing list and providing it to DEM to use for its announcements. This task can be further supported by distributing copies of DEM's announcement from the county's inspections department when builders and developers apply for permits.	Flood	Moderate	Stovall Mayor	FEMA, Red Cross	Medium	2026	In progress: The development community has been made aware of programs from NCDEM to some degree, but the city would like to implement a bigger push to let this community know about potential programs/workshops that are available and to encourage attendance.
PEA-4	Send a flood protection flyer to all properties in the county through a community newsletter, utility bill, telephone book, or other document that is distributed to all residences. The flyer should include the following information: the name and location of the closest, county-approved shelter, a general identification of the local flood hazard, flood safety, flood insurance, property protection, floodplain development permit requirements, and drainage system maintenance.	Flood	Moderate	Stovall Mayor	FEMA, Red Cross	Medium	2026	To be continued: The county and city have pushed out information to some residents via flyers, but they have not been able to reach all residents so there will need to be additional efforts to evaluate the best techniques for getting this information out to the public. The county and city will evaluate this action and try to improve it going forward.
PEA-5	Provide local real estate agency with handouts that will advise potential buyers to investigate the flood hazard for the property they are considering purchasing.	Flood	Moderate	Stovall Mayor	FEMA, Red Cross	Medium	2026	In progress: Local real estate agents have been given some information that can be passed along to potential home buyers, but the county and town will need to determine if this strategy has been effective and if the information needs to be updated. This action will remain in the plan.
PEA-6	Create outreach website for public designed to display risk information developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Granville County, Town of Stovall	Local	Medium	2026	In progress: no measurable progress due to lack of funding and staff.

Table 9-12: Vance County Mitigation Action Plan

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
Property Protection								
P-1	Research/obtain (as feasible with resources), grants/alternative funding sources to increase staff/resources for hazard mitigation planning.	All	High	Vance County Planning Department, VCEM	NCEM, FEMA, Local	High	2026	In Progress: Grant funds have not been obtained to-date, however, the county will continue to pursue funding opportunities that can improve its overall mitigation program.
P-2	Continued enforcement of state minimum requirements for building codes.	All	High	Vance County Planning Department, State of North Carolina	Local	High	2026	In Progress: The county has implemented and enforced the state building code over the past several years. Since the county handles this task for City of Henderson, and Towns of Kittrell and Middleburg, the county will look for ways to improve its enforcement in the next 5 years.
P-3	State of North Carolina Department of Insurance has responsibility of notifying county officials of all revisions to state codes in timely manner.	All	Moderate	Vance County Planning Department, State of North Carolina	NC DOI, Local	Medium	2026	In Progress: The NC DOI periodically updates the state codes and the County receives updated state codes as they become effective. The county has enforced new codes when they are updated and will work on improving its efforts to enforce and implement the codes going forward.
P-4	Support the current Land Use Plan policies encouraging preservation of 100-year floodplain areas for conservation; consideration of revisions to ordinances that direct development away from the floodplains (limit development in these areas; enforce more strict guidelines when development does occur).	Flood	High	Vance County Planning Department	Local	High	2026	In Progress: The County enforces its Flood Damage Prevention Ordinance which directs development away from 100-year floodplain and requires elevating structures 3 feet above base flood elevation. The county will review and evaluate this aspect of the FDPO in future years to ensure it is carrying out its intended purpose.
P-5	Prohibit future development of county critical facilities and structures in identified 100-year floodplains (per current/updated FEMA flood maps).	Flood	High	Vance County Planning Department	Local	High	2026	In Progress: Recent county developments (animal shelter and farmers market) have not been developed in 100-year floodplain area and the county will ensure that in any updates to ordinances or plans that this standard is maintained.
P-6	Continue expanding its geographic information system (GIS) capabilities including updates to the county GIS website.	All	High	Vance County Planning Department	Local	High	2026	In Progress: The county has been updating its GIS system monthly. The county will look for ways to improve and expand its GIS capabilities going forward to promote mitigation.
P-7	Identify/apply for funding to address all hazard concerns.	All	High	VCEM	NCEM, FEMA, Local	High	2026	In Progress: The county has attempted to identify funding sources in the past to address top hazards but has only had minor successes. The county will try to identify funding sources to implement mitigation going forward.
P-8	Continue working toward becoming a participating member of the Community Rating System (CRS) of the National Flood Insurance Program (NFIP).	Flood	Moderate	Vance County Planning Department	Local	Medium	2026	In Progress: The county has not made large-scale progress towards joining the CRS program due to lack of available staff time, but it will continue to pursue membership.
P-9	Consider developing specific regulations that prohibit dumping in the county's drainage system (regulations must specifically address keeping channels clear of materials such as brush, fill, and items not covered in the county's Littering Ordinance). The ordinance must designate an office/official responsible for receiving complaints/monitor compliance, as well as enforcement and abatement provisions (regulatory requirements of ordinance should be publicized).	Flood	Moderate	Vance County Planning Department	Local	Medium	2024	In Progress: County has enforcement officer who handles litter ordinance. County has not implemented drainage or storm water ordinances to date due to lack of staff time, but it will attempt to implement those ordinances going forward.
P-10	Consider revising the county subdivision regulations to enhance existing policies prohibiting development of critical public facilities in the 100-year floodplain (where viable alternatives exist), encourage alternatives to placing lots in flood-prone area; minimize impervious surface coverings.	Flood	High	Vance County Planning Department	Local	High	2026	In Progress: County zoning ordinance recognizes and encourages cluster development and incentivizes smaller lots for clustering away from wetland and flood prone areas. There are still some improvements that the county would like to implement in this regard so the action will remain in the plan.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
P-11	Consider directing each county office/agency to incorporate hazard mitigation goals into planning/implementation duties.	All	Moderate	VCEM	Local	Medium	2026	To Be Continued: Vance County already does this to some degree but will continue to emphasize the importance of incorporating mitigation goals into planning/implementation.
P-12	Coordinate with the ODS to ensure that all dams in Vance County for which the ODS has jurisdiction are inspected on a regular basis, ensure that ODS notifies the Vance County Emergency Operations (EM) office of all ODS jurisdictional dams classified as “high hazard” or “distressed” dams, ensure that all high hazard or distressed dams in the county have an updated and implemented operations and maintenance plan and disaster contingency plan.	Dam Failure	Moderate	VCEM	ODS, Local	Medium	2023	In Progress: The county has some older information on dams but will obtain current data showing the locations of all dams in Vance County as well as their current condition.
P-13	Ensure that Vance County EM office has an inventory of all ODS jurisdictional dams in the county and coordinate efforts to produce a coordinated draw down plan prior to potential hurricane/nor’easter landfall and seasonally.	Dam Failure	Moderate	VCEM	ODS, Local	Medium	2023	In Progress: The county has some older information on dams but will obtain current data showing the locations of all dams in Vance County as well as their current condition.
P-14	Consider developing ordinances to protect natural resources and use them as natural greenways, limiting the opportunity for damage from hazards (floodplains, large open areas prone to wind damage).	Flood	Moderate	Vance County Planning Department	Local	Medium	2026	In Progress: There has not been much progress towards this action due to lack of staff time. Staff will research how other jurisdictions have covered this & decide at later date on the viability of continuing to pursue the action.
P-15	Use of floodplains as green space and greenways preserved for these uses and not developed, through development of a Natural Resources Protection Ordinance. Used to protect the county natural resources and incorporate practices that will still allow of managed development. Include sections for best management practices, erosion/sediment controls ordinance, and floodplain regulations. Included would be incorporation of greenways.	Flood	Moderate	Vance County Planning Department	Local	Medium	2026	In Progress: There has not been much progress towards this action due to lack of staff time. Staff will research how other jurisdictions have covered this & decide at later date on the viability of continuing to pursue the action.
P-16	Ensure manufactured housing meet the minimum state requirements for proper installation.	All	High	Vance County Planning Department	Local	High	2026	To Be Continued; The County has enforced state building code for manufactured homes and will continue to work towards ensuring that manufactured homes are properly installed as per state standards.
P-17	Consider revising ordinance to require new manufactured housing units to have permanent foundations.	All	High	Vance County Planning Department	Local	High	2024	In Progress: Has not been complete to date; County working to improve enforcement of skirting for manufactured homes
P-18	Consider developing and incorporating a future land use category for conservation round the tributaries of the Tar River and Kerr Lake (Open Space), use as greenways, hiker/biker trails, natural areas; to include floodplains, wetlands, natural habitats (preserve resources, reduce flood damage). Established for areas focused on preservation of natural resources with limited residential development allowed. This development is to promote the economic use and conservation of land for natural resources use, managed residential development, non-intensive recreational use, and limited (low intensity) commercial development that will serve the recreational use of the natural resources. Certain non-residential uses are allowed, either as a matter of right or on a conditional basis. Requirements include minimum lot size of 1 acre (public recreational uses: no minimum area required), maximum dwelling units/net acre: 1.00	Flood	Moderate	Vance County Planning Department	Local, Federal	Medium	Complete	Complete: Zoning implemented in 2011 includes Open Space zoning category which surrounds Kerr Lake. Majority of Open Space zoned area is Corps. of Engineer land.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
P-19	Review and update the county Land Use Plan to ensure that development is occurring in a pattern that best suits the needs of the changing population of the county (with consideration given to areas prone to hazards). Plan should be reviewed and updated every 5 years.	All	High	Vance County Planning Department	Local	High	2025	To be continued: Last plan update in 2010; anticipate next update prior to 2020 subject to funding being available. Therefore, this action will remain in the plan.
P-20	Review and update the county HMGP document to ensure that the goals, objectives, and strategies are being followed.	All	Moderate	VCEM	Local	Medium	2022	In progress: The county has not reviewed this document recently but will review it to ensure it is current and make and necessary corrections.
P-21	Review and expand, as needed, the county Capital Improvements Plan for all facilities/services.	All	Moderate	Vance County Admin/Finance	Local	Medium	2026	In progress: County in process of creating/implementing CIP with FY 2017 Budget.
P-22	Maintain/provide current information, services, procedures, code revisions in relation to current/future natural and man-made hazards within Vance County, includes the incorporated and un-incorporated areas of the county.	All	High	VCEM	Local	High	2026	In progress: There have not been major efforts to provide current information to unincorporated and incorporated areas of the county on services available through the county, but staff will research ways to do this and push to get the information out.
P-23	Consider revisions to the county Flood Ordinance for the following: a) raise finished flood elevation requirements for new structures where the Base Flood Elevation (BFE) has been determined from the updated Floodplain Zones (FEMA January/February 2003) as established by the National Flood Insurance Rate Maps; b) structures located within zones (as of 2003) where BFE are identified, are required to elevate two (2) feet above base flood elevation (state minimum-allows for ductwork/wiring to be below this elevation); c) to increase the opportunity for ductwork and wiring to be out of range for damage in the event of potential flooding, the following modification is recommended—increase BFE by one (1) foot, total of three (3) feet.	Flood	High	Vance County Planning Department	Local		2026	To be continued: This action was marked completed during the last update as Finish flood elevation is required to be 3 feet above BFE as per Vance County Ordinance. However, Vance County Planning updates the ordinance periodically – Flood Damage Prevention Ordinance amended 4/2007, 4/2013- and is currently in the process of amending again in 2016 – 2017. So, this action has been added back into the plan.
Property Protection								
PP-1	Coordinate work to address localized drainage issues caused (in part or in whole) by NCDOT maintained drainage facilities.	Flood	High	Vance County Planning Department, NCDOT	Local, State	High	2026	In progress: NCDOT recently implemented CARS (Citizen Action Request System) on 1/1/2016. 15 days to respond to complaints as per NC General Statutes. The county will work with NCDOT as they implement this new system.
PP-2	Review methods of school construction to ensure that all new schools are constructed to the maximum cost feasible standards of wind resistance, flood resistance, and access so that they can be used as shelters for evacuees during and after natural hazard events.	All	High	Vance County Planning Department, VCEM	Local	High	2026	To be continued: VCEM maintains list of schools available as shelters. Last school built – Clarke Elementary included this type of review. As more schools are built or renovated, the county will work to help ensure that mitigation measures are incorporated.
PP-3	For any interested homeowners located in floodplain areas, the county will consider applying for mitigation grant funding to acquire or elevate the homes on a strictly voluntary basis for the homeowner.	Flood	Moderate	VCEM	FEMA, NCEM	Medium	2026	To be continued: New Action that county will consider applying for mitigation grant funding to acquire or elevates homes on voluntary basis of homeowner
Natural Resource Protection								
NRP-1	Maintain/utilize state agencies in enforcing minimum vegetative buffer requirements associated with development near perennial-intermittent water sources (surface waters identified on USGS maps), applicable for the Tar-Pamlico River Basin Guidelines, NC Division of	Flood	Moderate	Vance County Planning Department	NC DWQ, Local	Medium	Complete	Complete: Local and State regulations require 50’ buffer in Tar Pamlico Basin and local subdivision regulations require 30-foot buffers in Roanoke basin.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	Water Quality: minimum requirements of 50' buffer each side (total of 100').							
Structural Projects								
SP-1								
Emergency Services								
ES-1	Support participation in city/county Emergency Operations Plan (EOP), for evacuation procedures/response not stated in the operational structure (HAZMAT, petroleum products, hazardous waste, nuclear threat/attack, and civil disorder).	All	Moderate	VCEM	Local	Medium	2022	To be continued: Plan is currently being updated. Plan already contains this information but will be updated to reflect any changes.
ES-2	Continued coordination with NCDOT to ensure adequate capacity for snow/ice removal in the event of major snowstorms (adequate – all major thoroughfares are cleared/remain clear within 12 hours of last snowfall).	Winter Storm	Moderate	NCDOT, Vance County	State, Local	Medium	2026	To be continued: The county has worked with NCDOT to ensure capacity for snow/ice removal. NCDOT uses the following in prioritizing response: Tier 1 – Interstates and primary roads Tier 2 – Major Thoroughfares Tier 3 – Secondary Roads The county will continue to help the NCDOT with road clearances going forward.
ES-3	Review all fire district coverage areas to ensure adequate quantities of fire hydrants for fire safety purposes and that all hydrants are maintained on a regular basis where water lines currently exist.	Wildfire	High	Vance County Planning Department, VCEM	Local	High	2026	To be continued: The county has periodically done these checks, but will recommend a regular flow testing schedule for City and County hydrants going forward.
ES-4	Coordinate with Duke-Progress Energy Carolinas, Inc. to ensure quick restoration of electrical power to county residents.	All	High	VCEM	Local, Duke- Progress Energy	High	2026	To be continued: Duke-Progress Energy has a defined method for power restorations and the county supports these efforts whenever possible. The county will continue to ensure that any communication that needs to take place with power suppliers takes place.
ES-5	Continued coordination with NCDOT, Vance County Sheriff's Office, and City of Henderson Police Department to ensure that traffic is diverted from high hazard roadways during flooding events.	Flood	Moderate	NCDOT, VCEM	State, Local	Medium	2026	To be continued: Working relationship with NCDOT exists currently; detours have been set up successfully as needed. The county will work to improve this relationship and ensure that road closures are put in place when required.
ES-6	Review and update emergency management plans/operations on a regular basis or as circumstances dictate with regards to natural and man-made hazards and available resources (should be updated at every year).	All	Moderate	VCEM	Local	Medium	2026	To be continued: Currently plans are reviewed on an annual basis. The county intends to continue this process and will update plans when reviews dictate, therefore this action will remain in the plan.
Public Education and Awareness								
PEA-1	Coordinate with local libraries to provide documents on flood insurance, flood protection, floodplain management, and floodplain functions.	Flood	High	Vance County Planning Department, VCEM	Local	High	2022	In progress: Completed in past; new documentation will be designed and placed at libraries.
PEA-2	Encourage builders, developers, and architects to be familiar with NFIP land use/building standards (NCEM workshops-mailing list for announcements and distributing information form the county inspections department when builders/developers apply for permits).	Flood	Moderate	Vance County Planning Department, NCEM	Local	Medium	2024	To be continued: The county is in close contact with current members of local builders' association and hold monthly meetings and conversation with association. The county intends to create/distribute brochure that will help further inform these members of the development industry.
PEA-3	Provide handouts to real estate agents to advise potential buyers researching flood hazard information when considering property purchases.	Flood	Moderate	Vance County Planning Department	Local	Medium	2023	To be continued: The county has met with Kerr-Lake Realtors association to provide education for online GIS system inclusive of floodplain, wetland data. The county would like to improve its overall outreach to real estate community so it will work on developing more information and improving means of communication.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
PEA-4	Consider mailing flood protection flyer to all county properties through community newsletter, utility bill, or other document to residences (general identification of local flood hazard area, safety/insurance, property protection, floodplain development requirements, drainage system maintenance).	Flood	Moderate	Vance County Planning Department	Local	Medium	2023	In progress: The county has not completed this action in the past but will consider sending these mailings to Vance County and City of Henderson water customers through billing.
PEA-5	Develop a program to provide public education forums, workshops, and related meetings in regard to required methods and materials for hazard mitigation.	All	Moderate	Vance County Planning Department	Local	Medium	2025	To be continued: The county held a public meeting with property owners on 8/4/2015 to review changes in floodplains, so this has been done to some degree in the past. However, the county would like to continue its efforts to improve public information output and will keep this action in the plan.
PEA-6	Create outreach website for public designed to display risk information developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Vance County	Local	Medium	2026	In progress: no measurable progress due to lack of funding and staff.

Table 9-13: City of Henderson Mitigation Action Plan

Action#	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
Prevention								
P-1	Implementation of tree- trimming along interstate 85 and near exits.	All	High	NCDOT, Vance Henderson - Vance Economic Development	Local	High	2026	To be continued: As part of I-85 restoration, trees hanging over signs and roadway are being trimmed back to right-of- way fence. The city and NCDOT will continue this program in the future and evaluate ways to improve its implementation to ensure safer travel.
P-2	Continued removal/trimming of tree branches and limbs near overhead power lines.	All	High	City of Henderson, Duke Energy Progress	Duke Progress Energy, Local	High	2026	To be continued: Trimming being done on regular schedule by Duke Energy Progress. The city and Duke Progress Energy will continue this program in the future and evaluate ways to improve its implementation to ensure safer travel.
Property Protection								
PP-1	Coordinate work to address localized drainage issues caused (in part or in whole) by NCDOT maintained drainage facilities.	Flood	High	City of Henderson, NCDOT	Local, State	High	2026	In Progress: NCDOT recently implemented CARS (Citizen Action Request System) on 1/1/2016. 15 days to respond to complaints as per NC General Statutes. The city will work with NCDOT as they implement this new system.
PP-2	For any interested homeowners located in floodplain areas, the county will consider applying for mitigation grant funding to acquire or elevate the homes on a strictly voluntary basis for the homeowner.	Flood	Moderate	VCEM, City of Henderson	FEMA, NCEM	Medium	2026	To be continued: New Action that county will consider applying for mitigation grant funding to acquire or elevates homes on voluntary basis of homeowner
PP-3	Provide backup power for critical facilities.	All	High	VCEM, City of Henderson	FEMA, NCEM	High	2026	New Action

Action#	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
ES-1	Continued coordination with NCDOT to ensure adequate capacity for snow/ice removal in the event of major snowstorms (adequate – all major thoroughfares are cleared/remain clear within 12 hours of last snowfall).	Winter Storm	Moderate	City of Henderson, NCDOT	State, Local	Medium	2026	To be continued: The city has worked with NCDOT to ensure capacity for snow/ice removal. NCDOT uses the following in prioritizing response: 1. Tier 1 – Interstates and primary roads 2. Tier 2 – Major Thoroughfares 3. Tier 3 – Secondary Roads The city will continue to help the NCDOT with road clearances going forward.
ES-2	Continued coordination with NCDOT, Vance County Sheriff's Office, and City of Henderson Police Department to ensure that traffic is diverted from high hazard roadways during flooding events.	Flood	Moderate	City of Henderson, NCDOT	State, Local	Medium	2026	To be continued: Working relationship with NCDOT exists currently; detours have been set up successfully as needed. The city will work to improve this relationship and ensure that road closures are put in place when required.
Public Education and Awareness								
PEA-1	Provide awareness/education to citizens in advance of winter storms	Winter Storm	Moderate	City of Henderson, VCEM, NCDOT, Duke Energy Progress	Duke Progress Energy, Local	Moderate	2026	To be continued: The city holds pre-event meetings to discuss impacts; coordinated effort through Code Red system, paper and radio station informing citizens to remove vehicles from streets. The city will maintain this action as it looks to improve its public education and awareness outreach.
PEA-2	Create outreach website for public designed to display risk information developed during the Hazard Mitigation Plan process.	All	High	Tar River Region, Vance County, City of Henderson	Local	Medium	2026	In progress: no measurable progress due to lack of funding and staff.

Table 9-14: Town of Kittrell Mitigation Action Plan

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
Prevention								
P-1	Continued enforcement of state minimum requirements for building codes.	All	High	Vance County Planning Department, State of North Carolina, Town of Kittrell	Local	High	2026	To be continued: The county has implemented and enforced the state building code over the past several years. Since the county handles this task for City of Henderson, and Towns of Kittrell and Middleburg, the county will look for ways to improve its enforcement in the next 5 years.
P-2	Continue working toward becoming a participating member of the Community Rating System (CRS) of the National Flood Insurance Program (NFIP).	Flood	Moderate	Vance County Planning Department, Town of Kittrell	Local	Medium	2026	To be continued: Vance County Planning handles flood damage prevention ordinance duties; lack of staffing currently to take on additional CRS member duties but the town will maintain this as a future potential action.
P-3	Consider directing each county office/agency to incorporate hazard mitigation goals into planning/implementation duties.	All	Moderate	Vance County Planning Department, Town of Kittrell	Local	Medium	2026	To be continued: Vance County and the Town of Kittrell already do this to some degree but will continue to emphasize the importance of incorporating mitigation goals into planning/implementation.
P-4	Review and update the county HMGP document to ensure that the goals, objectives, and strategies are being followed.	All	Moderate	VCEM, Town of Kittrell	Local	Medium	2026	In progress: The county has not reviewed this document recently but will review it to ensure it is current and make and necessary corrections. The town will contribute to the review where required.
P-5	Consider revisions to the county Flood Ordinance for the following: a) raise finished flood elevation requirements for new	Flood	High	Vance County Planning	Local	High	2023	To be continued: This action was marked completed during the last update as Finish flood elevation is required to be 3 feet above BFE as per Vance County Ordinance.

Action #	Description	Hazard(s) Addressed	Relative Priority	Lead Agency/ Department	Potential Funding Sources	Cost Estimate	Implementation Schedule	2020 Status
	structures where the Base Flood Elevation (BFE) has been determined from the updated Floodplain Zones (FEMA January/February 2003) as established by the National Flood Insurance Rate Maps; b) structures located within zones (as of 2003) where BFE are identified, are required to elevate two (2) feet above base flood elevation (state minimum- allows for ductwork/wiring to be below this elevation); c) to increase the opportunity for ductwork and wiring to be out of range for damage in the event of potential flooding, the following modification is recommended—increase BFE by one (1) foot, total of three (3) feet.			Department, Town of Kittrell				However, Vance County Planning updates the ordinance periodically – Flood Damage Prevention Ordinance amended 4/2007, 4/2013- and is currently in the process of amending again in 2016 – 2017. So, this action has been added back into the plan. The county also coordinates with the town when needed on this issue.
Property Protection

SECTION 10: PLAN MAINTENANCE

This section discusses how the Tar River Region Mitigation Strategy and Mitigation Action Plan will be implemented and how the Regional Hazard Mitigation Plan will be evaluated, monitored, updated and enhanced over time. This section also discusses how the public will continue to be involved in a sustained hazard mitigation planning process. It consists of the following four subsections:

- 10.1 Monitoring and Evaluating the Previous Plan
- 10.2 Implementation and Integration
- 10.3 Monitoring, Evaluation, Update and Enhancement
- 10.4 Continued Public Involvement

44 CFR Requirement
44 CFR Part201.6(c)(4)(i):   The plan shall include a plan maintenance process that includes a section describing the method and schedule of monitoring, evaluating and updating the mitigation plan within a five-year cycle.   ***44 CFR Part 201.6(c)(4)(ii):***   The plan maintenance process shall include a process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms such as comprehensive or capital improvement plans, when appropriate.

10.1 Monitoring and Evaluating the Previous Plan

Since the previous plan was each county has worked to ensure that mitigation was integrated into local activities and that the mitigation plan was appropriately implemented.

Each county was ultimately successful in implementing the monitoring and evaluation processes that were outlined in previous plan as all four counties held annual meetings to discuss the mitigation plan and the priorities that were outlined in it. Each county's specific process is outlined below with an explanation of how the monitoring and evaluating process was carried out as well as any changes that were identified by the county or its jurisdictions that would be useful to implement during the next update.

Moreover, the Emergency Management Director presented to the County Board of Commissioners on the implementation status of the plan, which included a review of mitigation goals and actions in the plan and progress that had been made towards completing those actions. These reviews were also held as "post-mortem" meetings after major disaster events.

Although there were some minor revisions made to the plan during interim update period, there were few major revisions identified during these annual reviews, and the Tar River Regional Hazard Mitigation Planning Team (TRRHMPT) generally agreed that the plan was on course and that the monitoring and evaluating process itself was sufficient to ensure implementation of the plan.

10.2 Implementation and Integration

Each agency, department, or other partner participating under the Tar River Regional Hazard Mitigation Plan is responsible for implementing specific mitigation actions as prescribed in the Mitigation Action Plan. Every proposed action listed in the Mitigation Action Plan is assigned to a specific "lead" agency or

department in order to assign responsibility and accountability and increase the likelihood of subsequent implementation.

In addition to the assignment of a local lead department or agency, an implementation time period or a specific implementation date has been assigned in order to assess whether actions are being implemented in a timely fashion. The counties in the Tar River Region will seek outside funding sources to implement mitigation projects in both the pre-disaster and post-disaster environments. When applicable, potential funding sources have been identified for proposed actions listed in the Mitigation Action Plan.

The participating jurisdictions will integrate this Hazard Mitigation Plan into relevant city and county government decision-making processes or mechanisms where feasible. This includes integrating the requirements of the Hazard Mitigation Plan into other local planning documents, processes, or mechanisms, such as comprehensive or capital improvement plans, when appropriate. The members of the Tar River Regional Hazard Mitigation Planning Team (TRRHMPT) will remain charged with ensuring that the goals and mitigation actions of new and updated local planning documents for their agencies or departments are consistent with, or do not conflict with, the goals and actions of the Hazard Mitigation Plan and will not contribute to increased hazard vulnerability in the Tar River Region.

Since the previous plan was adopted each county and participating jurisdiction has worked to integrate the hazard mitigation plan into other planning mechanisms where applicable/feasible. Examples of how this integration has occurred have been documented in the Implementation Status discussion provided for each of the mitigation actions found in Section 9. Specific examples of how integration has occurred include:

- Integrating the mitigation plan into reviews and updates of floodplain management ordinances;
- Integrating the mitigation plan into reviews and updates of County emergency operations plans;
- Integrating the mitigation plan into review and updates of building codes; and
- Integrating the mitigation plan into the capital improvements plan through identification of mitigation actions that require local funding

Opportunities to further integrate the requirements of this Plan into other local planning mechanisms shall continue to be identified through future meetings of the Regional Hazard Mitigation Planning Team, individual county meetings, and the annual review process described herein. Although it is recognized that there are many possible benefits to integrating components of this Plan into other local planning mechanisms, the development and maintenance of this stand-alone Regional Hazard Mitigation Plan is deemed by the Tar River Regional Hazard Mitigation Planning Team to be the most effective and appropriate method to implement local hazard mitigation actions at this time.

10.3 Monitoring, Evaluation, Update and Enhancement

Periodic revisions and updates of the Regional Hazard Mitigation Plan are required to ensure that the goals of the Plan are kept current, considering potential changes in hazard vulnerability and mitigation priorities. In addition, revisions may be necessary to ensure that the Plan is in full compliance with applicable federal and state regulations. Periodic evaluation of the Plan will also ensure that specific mitigation actions are being reviewed and carried out according to the Mitigation Action Plan.

The Tar River Regional Hazard Mitigation Planning Team shall meet in March of every year to evaluate the progress attained and to revise, where needed, the activities set forth in the Plan. The findings and recommendations of the Regional Hazard Mitigation Planning Team shall be documented in the form of a report that can be shared with interested City, Town, and County Council/Board members. The Regional Hazard Mitigation Planning Team will also meet following any disaster events warranting a

reexamination of the mitigation actions being implemented or proposed for future implementation. This will ensure that the Plan is continuously updated to reflect changing conditions and needs within the Tar River Region. The Franklin County Emergency Management Director, in conjunction with each of the other county Emergency Management Coordinators, will be responsible for reconvening the Regional Hazard Mitigation Planning Team for these reviews.[1]

10.3.1 Five Year Plan Review and Update

The Plan will be thoroughly reviewed by the Regional Hazard Mitigation Planning Team every five years to determine whether there have been any significant changes in the Tar River Region that may, in turn, necessitate changes in the types of mitigation actions proposed. New development in identified hazard areas, an increased exposure to hazards, an increase or decrease in capability to address hazards, and changes to federal or state legislation are examples of factors that may affect the necessary content of the Plan.

The plan review provides Tar River county officials with an opportunity to evaluate those actions that have been successful and to explore the possibility of documenting potential losses avoided due to the implementation of specific mitigation measures. The plan review also provides the opportunity to address mitigation actions that may not have been successfully implemented as assigned. The Franklin County Emergency Management Coordinator, in conjunction with each of the other county Emergency

- Do the goals address current and expected conditions?
- Has the nature or magnitude of risks changed?
- Are the current resources appropriate for implementing the Plan?
- Are there implementation problems, such as technical, political, legal or coordination issues with other agencies?
- Have the outcomes occurred as expected?
- Did County departments participate in the plan implementation process as assigned?

Following the five-year review, any revisions deemed necessary will be summarized and implemented according to the reporting procedures and plan amendment process outlined herein. Upon completion of the review and update/amendment process, the Tar River Regional Hazard Mitigation Plan will be submitted to the State Hazard Mitigation Officer at the North Carolina Division of Emergency Management (NCDEM) for final review and approval in coordination with the Federal Emergency Management Agency (FEMA).

Because the plan update process can take several months to complete, and because Federal funding may be needed to update the plan, it is recommended that the five-year review process begin at the beginning of the third year after the plan was last approved. This will allow the participants in the Tar River Regional Hazard Mitigation Plan to organize in order to seek Federal funding if necessary and complete required plan update documentation before the plan expires at the end of the fifth year.

10.3.2 Disaster Declaration

Following a disaster declaration, the Tar River Regional Hazard Mitigation Plan will be revised as necessary to reflect lessons learned or to address specific issues and circumstances arising from the event. It will be the responsibility of the Franklin County Emergency Management Coordinator, in conjunction with each of the other county Emergency Management Coordinators, to reconvene the

[1] A sample Mitigation Action Progress Form and Plan Update Evaluation Worksheet (from FEMA's *Local Mitigation Planning Handbook*) are included in Appendix G. These documents can be used to guide the evaluation of mitigation actions and future plan updates.

Regional Hazard Mitigation Planning Team and ensure the appropriate stakeholders are invited to participate in the plan revision and update process following declared disaster events.

10.3.3 Reporting Procedures

The results of the five-year review will be summarized by the Regional Hazard Mitigation Planning Team in a report that will include an evaluation of the effectiveness of the Plan and any required or recommended changes or amendments. The report will also include an evaluation of implementation progress for each of the proposed mitigation actions, identifying reasons for delays or obstacles to their completion along with recommended strategies to overcome them.

10.3.4 Plan Amendment Process

Upon the initiation of the amendment process, representatives from the Tar River counties will forward information on the proposed change(s) to all interested parties including, but not limited to, all directly affected County departments, residents, and businesses. Information will also be forwarded to the North Carolina Division of Emergency Management. This information will be disseminated in order to seek input on the proposed amendment(s) for no less than a 45-day review and comment period.

At the end of the 45-day review and comment period, the proposed amendment(s) and all comments will be forwarded to the Regional Hazard Mitigation Planning Team for final consideration. The Planning Team will review the proposed amendment along with the comments received from other parties, and if acceptable, the team will submit a recommendation for the approval and adoption of changes to the Plan.

In determining whether to recommend approval or denial of a Plan amendment request, the following factors will be considered by the Regional Hazard Mitigation Planning Team:

- There are errors, inaccuracies, or omissions made in the identification of issues or needs in the Plan.
- New issues or needs have been identified which are not adequately addressed in the Plan.
- There has been a change in information, data, or assumptions from those on which the Plan is based.

Upon receiving the recommendation from the Regional Hazard Mitigation Planning Team, and prior to adoption of the Plan, the participating jurisdictions will hold a public hearing if deemed necessary. The governing bodies of each participating jurisdiction will review the recommendation from the Regional Hazard Mitigation Planning Team (including the factors listed above) and any oral or written comments received at the public hearing. Following that review, the governing bodies will take one of the following actions:

- Adopt the proposed amendments as presented;
- Adopt the proposed amendments with modifications;
- Refer the amendments request back to the Planning Team for further revision; or
- Defer the amendment request back to the Planning Team for further consideration and/or additional hearings.

10.4 Continued Public Involvement

44 CFR Requirement
44 CFR Part201.6(c)(4)(iii): The plan maintenance process shall include a discussion on how the community will continue public participation in the plan maintenance process.

Public participation is an integral component to the mitigation planning process and will continue to be essential as this Plan evolves over time. As described above, significant changes or amendments to the Plan shall require a public hearing prior to any adoption procedures.

Other efforts to involve the public in the maintenance, evaluation, and revision process will be made as necessary. These efforts may include:

- Advertising meetings of the Regional Hazard Mitigation Planning Team in local newspapers, public bulletin boards, and/or county office buildings;
- Designating willing and voluntary citizens and private sector representatives as official members of the Regional Hazard Mitigation Planning Team;
- Utilizing local media to update the public on any maintenance and/or periodic review activities taking place;
- Utilizing the websites of participating jurisdictions to advertise any maintenance and/or periodic review activities taking place;
- Developing an outreach website to use to provide information on hazard risks to the public and potential dollar losses;
- Utilizing social media to update the public on any maintenance and/or periodic review activities taking place; and
- Keeping copies of the Plan in public locations

Appendix A: Plan Adoption

Town of Bunn

601 Main Street • P.O. Box 398
Bunn, North Carolina 27508
919-496-2992 • Fax 919-496-2044

RESOLUTION ADOPTING TAR RIVER REGIONAL HAZARD MITIGATION PLAN

WHEREAS, the citizens and property within Bunn are subject to the effects of natural hazards that pose threats to lives and cause damage to property, and with the knowledge and experience that certain areas of the county are particularly vulnerable to drought, extreme heat, hailstorm, hurricane and tropical storm, lightning, thunderstorm wind/high wind, tornado, winter storm and freeze, flood, hazardous material incident, and wildfire; and

WHEREAS, the County desires to seek ways to mitigate the impact of identified hazard risks; and

WHEREAS, the Legislature of the State of North Carolina has in Part 6, Article 21 of Chapter 143; Parts 3, 5, and 8 of Article 19 of Chapter 160A; and Article 8 of Chapter 160A of the North Carolina General Statutes, delegated to local governmental units the responsibility to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, the Legislature of the State of North Carolina has enacted General Statute Section 166A-19.41 (*State emergency assistance funds*) which provides that for a state of emergency declared pursuant to G.S. 166A-19.20(a) after the deadline established by the Federal Emergency Management Agency pursuant to the Disaster Mitigation Act of 2002, P.L. 106-390, the eligible entity shall have a hazard mitigation plan approved pursuant to the Stafford Act; and.

WHEREAS, Section 322 of the Federal Disaster Mitigation Act of 2000 states that local governments must develop an All-Hazards Mitigation Plan in order to be eligible to receive future Hazard Mitigation Grant Program Funds and other disaster-related assistance funding and that said Plan must be updated and adopted within a five year cycle; and

WHEREAS, the Town of Bunn has performed a comprehensive review and evaluation of each section of the previously approved Hazard Mitigation Plan and has updated the said plan as required under regulations at 44 CFR Part 201 and according to guidance issued by the Federal Emergency Management Agency and the North Carolina Division of Emergency Management.

WHEREAS, it is the intent of the Board of Commissioners of Bunn to fulfill this obligation in order that the County will be eligible for federal and state assistance in the event that a state of disaster is declared for a hazard event affecting the County;

NOW, THEREFORE, be it resolved that the Board of Commissioners of Bunn hereby:

1. Adopts the Tar River Regional Hazard Mitigation Plan.

2. Vests Bunn Emergency Management with the responsibility, authority, and the means to:

(a) Inform all concerned parties of this action.
(b) Cooperate with Federal, State and local agencies and private firms which undertake to study, survey, map and identify floodplain areas, and cooperate with neighboring communities with respect to management of adjoining floodplain areas in order to prevent exacerbation of existing hazard impacts.

3. Appoints Bunn Emergency Management to assure that the Hazard Mitigation Plan is reviewed annually and every five years as specified in the Plan to assure that the Plan is in compliance with all State and Federal regulations and that any needed revisions or amendments to the Plan are developed and presented to the Franklin County Board of Commissioners for consideration.

4. Agrees to take such other official action as may be reasonably necessary to carry out the objectives of the Hazard Mitigation Plan.

Adopted this the 28th day of June 2021.

RESOLUTION
ADOPTING TAR RIVER REGIONAL
HAZARD MITIGATION PLAN

WHEREAS, the citizens and property within Franklinton are subject to the effects of natural hazards that pose threats to lives and cause damage to property, and with the knowledge and experience that certain areas of the county are particularly vulnerable to drought, extreme heat, hailstorm, hurricane and tropical storm, lightning, thunderstorm wind/high wind, tornado, winter storm and freeze, flood, hazardous material incident, and wildfire; and

WHEREAS, the County desires to seek ways to mitigate the impact of identified hazard risks; and

WHEREAS, the Legislature of the State of North Carolina has in Part 6, Article 21 of Chapter 143; Parts 3, 5, and 8 of Article 19 of Chapter 160A; and Article 8 of Chapter 160A of the North Carolina General Statutes, delegated to local governmental units the responsibility to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, the Legislature of the State of North Carolina has enacted General Statute Section 166A-19.41 (*State emergency assistance funds*) which provides that for a state of emergency declared pursuant to G.S. 166A-19.20(a) after the deadline established by the Federal Emergency Management Agency pursuant to the Disaster Mitigation Act of 2002, P.L. 106-390, the eligible entity shall have a hazard mitigation plan approved pursuant to the Stafford Act; and.

WHEREAS, Section 322 of the Federal Disaster Mitigation Act of 2000 states that local governments must develop an All-Hazards Mitigation Plan in order to be eligible to receive future Hazard Mitigation Grant Program Funds and other disaster-related assistance funding and that said Plan must be updated and adopted within a five year cycle; and

WHEREAS, the Town of Franklinton has performed a comprehensive review and evaluation of each section of the previously approved Hazard Mitigation Plan and has updated the said plan as required under regulations at 44 CFR Part 201 and according to guidance issued by the Federal Emergency Management Agency and the North Carolina Division of Emergency Management.

WHEREAS, it is the intent of the Board of Commissioners of Franklinton to fulfill this obligation in order that the County will be eligible for federal and state assistance in the event that a state of disaster is declared for a hazard event affecting the County;

NOW, THEREFORE, be it resolved that the Board of Commissioners of Franklinton hereby:

1. Adopts the Tar River Regional Hazard Mitigation Plan.

2. Vests County/Town Agency Emergency Management with the responsibility, authority, and the means to:

(a) Inform all concerned parties of this action.
(b) Cooperate with Federal, State and local agencies and private firms which undertake to study, survey, map and identify floodplain areas, and cooperate with neighboring communities with respect to management of adjoining floodplain areas in order to prevent exacerbation of existing hazard impacts.

3. Appoints County/Town Emergency Management to assure that the Hazard Mitigation Plan is reviewed annually and every five years as specified in the Plan to assure that the Plan is in compliance with all State and Federal regulations and that any needed revisions or amendments to the Plan are developed and presented to the XXXXX County Board of Commissioners for consideration.

4. Agrees to take such other official action as may be reasonably necessary to carry out the objectives of the Hazard Mitigation Plan.

Adopted this the 13th day of October 2020.

RESOLUTION
ADOPTING TAR RIVER REGIONAL
HAZARD MITIGATION PLAN

WHEREAS, the citizens and property with the Town of Louisburg are subject to the effects of natural hazards that pose threats to lives and cause damage to property, and with the knowledge and experience that certain areas of the Town are particularly vulnerable to drought, extreme heat, hailstorm, hurricane and tropical storm, lightning, thunderstorm wind/high wind, tornado, winter storm and freeze, flood, hazardous material incident, and wildfire; and

WHEREAS, the Town desires to seek ways to mitigate the impact of identified hazard risks; and

WHEREAS, the Legislature of the State of North Carolina has in Part 6, Article 21 of Chapter 143; Parts 3, 5, and 8 of Article 19 of Chapter 160A; and Article 8 of Chapter 160A of the North Carolina General Statutes, delegated to local governmental units the responsibility to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, the Legislature of the State of North Carolina has enacted General Statute Section 166A-19.41 (State emergency assistance funds) which provides that for a state of emergency declared pursuant to G.S. 166A-19.20(a) after the deadline established by the Federal Emergency Management Agency pursuant to the Disaster Mitigation Act of 2002, P.L. 106-390, the eligible entity shall have a hazard mitigation plan approved pursuant to the Stafford Act; and

WHEREAS, Section 322 of the Federal Disaster Mitigation Act of 2000 states that local governments must develop an All-Hazards Mitigation Plan in order to be eligible to receive future Hazard Mitigation Grant Program Funds and other disaster-related assistance funding and that said Plan must be updated and adopted within a five year cycle; and

WHEREAS, the Town of Louisburg has performed a comprehensive review and evaluation of each section of the previously approved Hazard Mitigation Plan and has updated the said plan as required under regulations at 44 CFR Part 201 and according to guidance issued by the Federal Emergency Management Agency and the North Carolina Division of Emergency Management.

WHEREAS, it is the intent of the Town Council of the Town of Louisburg to fulfill this obligation in order that the Town will be eligible for federal and state assistance in the event that a state of disaster is declared for a hazard event affecting the Town;

NOW, THEREFORE, BE IT RESOLVED that the Town Council of the Town of Louisburg hereby:

1. Adopts the Tar River Regional Hazard Mitigation Plan.

2. Vests the Town of Louisburg Emergency Management with the responsibility, authority, and the means to:

   (A) Inform all concerned parties of this action.
   (B) Cooperate with Federal, State and local agencies and private firms which undertake to study, survey, map and identify floodplain areas, and cooperate with neighboring communities with respect to management of adjoining floodplain areas in order to prevent exacerbation of existing hazard impacts.

3. Appoints the Town of Louisburg Emergency Management to assure that the Hazard Mitigation Plan is reviewed annually and every five years as specified in the Plan to assure that the Plan is in compliance with all State and Federal regulations and that any needed revisions or amendments to the plan are developed and presented to the Louisburg Town Council for consideration.

4. Agrees to take such other official action as may be reasonably necessary to carry out the objectives of the Hazard Mitigation Plan.

Adopted this the 21st day of June, 2021.

WHEREAS, the Legislature of the State of North Carolina has in Part 6, Article 21 of Chapter 143; Parts 3, 5, and 8 of Article 19 of Chapter 160A; and Article 8 of Chapter 160A of the North Carolina General Statutes, delegated to local governmental units the responsibility to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, the Legislature of the State of North Carolina has enacted General Statute Section 166A-19.41 (*State emergency assistance funds*) which provides that for a state of emergency declared pursuant to G.S. 166A-19.20(a) after the deadline established by the Federal Emergency Management Agency pursuant to the Disaster Mitigation Act of 2002, P.L. 106-390, the eligible entity shall have a hazard mitigation plan approved pursuant to the Stafford Act; and

WHEREAS, Section 322 of the Federal Disaster Mitigation Act of 2000 states that local governments must develop an All-Hazards Mitigation Plan in order to be eligible to receive future Hazard Mitigation Grant Program Funds and other disaster-related assistance funding and that said Plan must be updated and adopted within a five year cycle; and

WHEREAS, the City of Creedmoor has performed a comprehensive review and evaluation of each section of the previously approved Hazard Mitigation Plan and has updated the said plan as required under regulations at 44 CFR Part 201 and according to guidance issued by the Federal Emergency Management Agency and the North Carolina Division of Emergency Management; and

WHEREAS, it is the intent of the Board of Commissioners of the City of Creedmoor to fulfill this obligation in order that the County will be eligible for federal and state assistance in the event that a state of disaster is declared for a hazard event affecting the County.

NOW THEREFORE BE IT RESOLVED BY THE BOARD OF COMMISSIONERS OF THE CITY OF CREEDMOOR THE FOLLOWING:

Section 1. Adopts the Tar River Regional Hazard Mitigation Plan.

Section 2. Vests its City Manager in partnership with Granville County Emergency Management with the responsibility, authority, and the means to:

(a) Inform all concerned parties of this action.

(b) Cooperate with Federal, State and local agencies and private firms which undertake to study, survey, map and identify floodplain areas, and cooperate with neighboring communities with respect to management of adjoining floodplain areas in order to prevent exacerbation of existing hazard impacts.

Section 3. Appoints its City Manager in partnership with Granville County Emergency Management to assure that the Hazard Mitigation Plan is reviewed annually and every five years as specified in the Plan to assure that the Plan is in compliance with all State and Federal regulations and that any needed revisions or amendments to the Plan are developed and presented to the Granville County Board of Commissioners for consideration.

Section 4. Agrees to take such other official action as may be reasonably necessary to carry out the objectives of the Hazard Mitigation Plan.

ADOPTED by vote of the Board of Commissioners of the City of Creedmoor this, the 4th day of May, 2021 upon motion from Commissioner Kicinski.

RESOLUTION
by the
Vance County Board of Commissioners
Adopting the Tar River Regional Hazard Mitigation Plan

WHEREAS, the citizens and property within Vance County are subject to the effects of natural hazards that pose threats to lives and cause damage to property, and with the knowledge and experience that certain areas of the county are particularly vulnerable to drought, extreme heat, hailstorm, hurricane and tropical storm, lightning, thunderstorm wind/high wind, tornado, winter storm and freeze, flood, hazardous material incident, and wildfire; and

WHEREAS, the County desires to seek ways to mitigate the impact of identified hazard risks; and

WHEREAS, the Legislature of the State of North Carolina has in Part 6, Article 21 of Chapter 143; Parts 3, 5, and 8 of Article 19 of Chapter 160A; and Article 8 of Chapter 160A of the North Carolina General Statutes, delegated to local governmental units the responsibility to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, the Legislature of the State of North Carolina has enacted General Statute Section 166A-19.41 (*State emergency assistance funds*) which provides that for a state of emergency declared pursuant to G.S. 166A-19.20(a) after the deadline established by the Federal Emergency Management Agency pursuant to the Disaster Mitigation Act of 2002, P.L. 106-390, the eligible entity shall have a hazard mitigation plan approved pursuant to the Stafford Act; and

WHEREAS, Section 322 of the Federal Disaster Mitigation Act of 2000 states that local governments must develop an All-Hazards Mitigation Plan in order to be eligible to receive future Hazard Mitigation Grant Program Funds and other disaster-related assistance funding and that said Plan must be updated and adopted within a five year cycle; and

WHEREAS, Vance County has performed a comprehensive review and evaluation of each section of the previously approved Hazard Mitigation Plan and has updated the said plan as required under regulations at 44 CFR Part 201 and according to guidance issued by the Federal Emergency Management Agency and the North Carolina Division of Emergency Management; and

WHEREAS, it is the intent of the Board of Commissioners of Vance County to fulfill this obligation in order that the County will be eligible for federal and state assistance in the event that a state of disaster is declared for a hazard event affecting the County.

NOW, THEREFORE, BE IT RESOLVED that the Board of Commissioners of Vance County hereby:

1. Adopts the Tar River Regional Hazard Mitigation Plan.

2. Vests Vance County Emergency Management with the responsibility, authority, and the means to:

   (a) Inform all concerned parties of this action.
   (b) Cooperate with Federal, State and local agencies and private firms which undertake to study, survey, map and identify floodplain areas, and cooperate with neighboring communities with respect to management of adjoining floodplain areas in order to prevent exacerbation of existing hazard impacts.

3. Appoints Vance County Emergency Management to assure that the Hazard Mitigation Plan is reviewed annually and every five years as specified in the Plan to assure that the Plan is in compliance with all State and Federal regulations and that any needed revisions or amendments to the Plan are developed and presented to the Vance County Board of Commissioners for consideration.

4. Agrees to take such other official action as may be reasonably necessary to carry out the objectives of the Hazard Mitigation Plan.

Appendix B: Regulation Checklist

This appendix to the Tar River Regional Hazard Mitigation Plan contains a copy of a completed Regulation Checklist from FEMA's *Local Mitigation Plan Review Tool*. This checklist provides page numbers indicating where in the Plan each element required by FEMA is met. This serves as a final internal review to confirm that the Plan meets Federal requirements.

LOCAL MITIGATION PLAN REVIEW TOOL

The *Local Mitigation Plan Review Tool* demonstrates how the Local Mitigation Plan meets the regulation in 44 CFR §201.6 and offers States and FEMA Mitigation Planners an opportunity to provide feedback to the community.

- The Regulation Checklist provides a summary of FEMA's evaluation of whether the Plan has addressed all requirements.
- The Plan Assessment identifies the plan's strengths as well as documents areas for future improvement.
- The Multi-jurisdiction Summary Sheet is an optional worksheet that can be used to document how each jurisdiction met the requirements of the each Element of the Plan (Planning Process; Hazard Identification and Risk Assessment; Mitigation Strategy; Plan Review, Evaluation, and Implementation; and Plan Adoption).

The FEMA Mitigation Planner must reference this *Local Mitigation Plan Review Guide* when completing the *Local Mitigation Plan Review Tool*.

SECTION 1:
REGULATION CHECKLIST

INSTRUCTIONS: The Regulation Checklist must be completed by FEMA. The purpose of the Checklist is to identify the location of relevant or applicable content in the Plan by Element/sub-element and to determine if each requirement has been 'Met' or 'Not Met.' The 'Required Revisions' summary at the bottom of each Element must be completed by FEMA to provide a clear explanation of the revisions that are required for plan approval. Required revisions must be explained for each plan sub-element that is 'Not Met.' Sub-elements should be referenced in each summary by using the appropriate numbers (A1, B3, etc.), where applicable. Requirements for each Element and sub-element are described in detail in this *Plan Review Guide* in Section 4, Regulation Checklist.

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	**Location in Plan** (section and/or page number)	**Met**	**Not Met**
ELEMENT A. PLANNING PROCESS			
A1. Does the Plan document the planning process, including how it was prepared and who was involved in the process for each jurisdiction? (Requirement §201.6(c)(1)) **QC concurs**	a. Sec. 1: Introduction, Pg. 2 b. Sec. 2: Planning Process, Pg. 2-10, Sec 1, Pg. 3; Sec c. Sec. 2: Planning Process, Pg. 2-5, Sec 2, Pg. 4-7 d. Sec 2: Planning Process, Pg. 1-2 e. Sec. 2: Planning Process, Pg. 1-10, ✓	X	
A2. Does the Plan document an opportunity for neighboring communities, local and regional agencies involved in hazard mitigation activities, agencies that have the authority to regulate development as well as other interests to be involved in the planning process? (Requirement §201.6(b)(2)) **QC concurs**	a. Sec. 2: Planning Process, Pg. 2-10 b. Sec. 2: Planning Process, Pg. 2-5 c. Sec. 2: Planning Process, Pg. 2, 9, 12, 13✓	X	
A3. Does the Plan document how the public was involved in the planning process during the drafting stage? (Requirement §201.6(b)(1))	a. Sec. 2: Planning Process, Pg. 7-10 b. Sec. 2: Planning Process, Pg. 7-10✓	X	
A4. Does the Plan describe the review and incorporation of existing plans, studies, reports, and technical information? (Requirement §201.6(b)(3))	a. Sec. 2: Planning Process, Pg. 9; Sec. 7: Capability Assessment, Pg. 1, 7-25; Sec. 8: Mitigation Strategy, Pg. 2 b. Sec. 2 Planning Process, Pg. 9; Sec. 7: Capability Assessment, Pg. 1, Sec. 8: Mitigation Strategy, Pg. 2✓	X	
A5. Is there discussion of how the community (ies) will continue public participation in the plan maintenance process? (Requirement §201.6(c)(4)(iii))	a. Sec. 10: Plan Maintenance, Pg. 4 b. Sec. 10: Plan Maintenance, Pg. 4, 5✓	X	

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
A6. Is there a description of the method and schedule for keeping the plan current (monitoring, evaluating and updating the mitigation plan within a 5-year cycle)? (Requirement §201.6(c)(4)(i))	a. Sec. 10: Plan Maintenance, Pg. 3-4, 1-3 b. Sec. 10: Plan Maintenance, Pg. 4, 1-4 c. Sec. 10: Plan Maintenance, Pg. 4, 1-3 d. Sec. 10: Plan Maintenance, Pg. 3-4✓	X	

ELEMENT A: REQUIRED REVISIONS

A1. NCEM 1st Review: "Jurisdictions are" repeated in first sentence of Section 2.3 {page 2-2, pdf 10} revisions identified. AECOM Revised. The number '1' randomly appears after first sentence of *Planning Process* paragraph {top of 2-3, pdf 11}. AECOM deleted footnote reference deleted. Bottom paragraph of Page 2-5 {pdf 13} appears to begin mid-sentence; presumably describing and referencing individuals listed in the proceeding table {2-2}, which is also unlabeled. AECOM relabeled table and header. The paragraph then repeats at the top of the next page {Page 2-6, pdf 14}. AECOM rectified PDF conversion issue. Robin Edwards, Granville County EM is listed as the proxy for the Towns of Bunn, Franklinton and Louisburg which are all in Franklin County, is that intentional? Yes, Hendrix added to show assistance from Robin during a changing of the guards.

Table 2-2. Point of Contacts for Participating Municipalities

NAME	POSITION/TITLE	DEPARTMENT/AGENCY/ TITLE	Proxy
Ray Bullock	Mayor	Town of Middleburg	Brian Short, Emergency Operations
Jerry Joyner	Mayor	Town of Kittrell	Brian Short, Emergency Operations
Michael Ross	Director of Public Services	City of Henderson	Brian Short, Emergency Operations
Walter Gardner Jr.	Mayor	Town of Warrenton	Dennis Paschall, Emergency Manager
Carroll Harris	Mayor	Town of Macon	Dennis Paschall Emergency Manager
Blaine Reese	Director of Public Works	Town of Norlina	Dennis Paschall Emergency Manager
Lonnie Cole	Commissioner	Town of Stem	Robin Edwards, Emergency Management Coordinator
Janet Parrott	Mayor	Town of Stovall	Robin Edwards, Emergency Management Coordinator
Tammy Ray	Town Manager	Town of Franklinton	Hendrix Valenzuela/Robin Edwards, Emergency Management Coordinator
Judy Jeffreys	Town Administrator	Town of Bunn	Hendrix Valenzuela/Robin Edwards, Emergency Management Coordinator
Tommy King	Assistant Town Administrator	Town of Louisburg	Hendrix Valenzuela/Robin Edwards, Emergency Management Coordinator

A2. NCEM 1st Review: Only Durham, Nash and Person County appear to be represented as '*neighboring communities, local and regional agencies*…' involved in the planning process. Where any other local or regional organizations invited to participate, if so is that documentation available? Robin Edwards emailed neighboring communities via email.

-----Original Appointment-----
From: Robin Edwards **On Behalf Of** Houston, McKenzie
Sent: Wednesday, August 26, 2020 1:03 PM
To: Doug Young; jgroves@dconc.gov; joshua.creighton@wakegov.com; Buddy Wrenn; Ronnie P. Storey; Brent Fisher (brent.fisher@nashcountync.gov)
Subject: FW: TAR RIVER: HMP Kick-Off Meeting
When: Thursday, August 27, 2020 9:00 AM-11:00 AM (UTC-05:00) Eastern Time (US & Canada).
Where: Microsoft Teams (see body of email)

Good afternoon,

The counties of Franklin, Granville, Vance and Warren are beginning the process to update the existing Tar River Regional Hazard Mitigation Plan. The planning kick-off meeting is scheduled tomorrow **Thursday, August 27th at 9am to 11am** via Microsoft Teams. As part of this process and per FEMA regulations to include counties surrounding the planning area, we are we are extending an invitation to you to participate in the process. Please see the message below for information to join the virtual kick-off meeting via Microsoft Teams.

Thank you,
Robin
Robin H. Edwards
EM Coordinator
Granville County Emergency Services
Post Office Box 598
5662 Cornwall Road
Oxford, NC 27565

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
5/14 Did not see the response to the required revision in the plan. Emailed NCEM, Carl advised will look into, advised NCEM any revisions as a result of a required revision from the state review need to be included in the plan submitted to FEMA for official review. **A3. NCEM 1st Review:** no revisions identified **A4. NCEM 1st Review:** no revisions identified **A5. NCEM 1st Review:** no revisions identified **A6. NCEM 1st Review:** no revisions identified			

ELEMENT B. HAZARD IDENTIFICATION AND RISK ASSESSMENT

B1. Does the Plan include a description of the type, location, and extent of all natural hazards that can affect each jurisdiction(s)? (Requirement §201.6(c)(2)(i))

a. Sec. 4: Hazard Identification, Pg. 6-14; Sec. 5: Hazard Profiles, Pg. 1-205✓

Hazard Type	Description
Drought	5-7
Extreme Heat	14-15
Hurricane	23-25
Severe Weather	37-38
Tornado	73-76
Winter Storm	88-89
Earthquake	120-122
Dam Failure	134
Flood	145-146
Wildfire	171

b. Sec. 4: Hazard Identification, Pg. 6-13✓

c. Sec. 5 Hazard Profiles, Pg. 1-205✓

Hazard Type	Location	Extent
Drought	7	9-11
Extreme Heat	15-20	21
Hurricane	25-30	31
Severe Weather	38-53	54
Tornado	76-81	82
Winter Storm	89-109	110
Earthquake	122-129	130
Dam Failure	134-142	142-143
Flood	146-159	161-162
Wildfire	171-192	193-194

d. Sec. 5 (all spatial maps count towards this), Pg. 5-1 – 5-205✓

Note: Extent may also be found in some instances in historical occurrences and maps for each hazard as noted in B2.

Met	Not Met

QC concurs</td><td>Sec. 5: Hazard Profiles, Pg. 167 - 168✓</td><td>X</td><td></td></tr>
</table>

ELEMENT B: REQUIRED REVISIONS

B1. NCEM 1st Review: First sentence of Section 5.2 *Study Area* {page 5-2; PDF 42} incorrectly identifies the number of participating counties as 5 vs 4. AECOM revised. Same section also references 'Figure 2.1' rather than 5.1. AECOM rectified PDF conversion issue.

- The word 'Error!' (presumably a formatting notification) appears in Section 5.3.1 {bottom of page 5-4; PDF 44}. AECOM rectified PDF conversion issue.
- The phrase 'Error! Reference source not found.' (presumably a formatting notification) appears twice in Section 5.7.1 {bottom of page 5-73; PDF 113}. AECOM rectified PDF conversion issue.
- According to the Granville County Tornado Hazard map {page 5-78; PDF 118} it appears Butner and Creedmoor have both experienced tornadoes, though Table 5-18 {page 5-81; PDF 121} suggests both communities have not. In contrast, both Creedmoor and Butner have historical occurrences listed on Table 5-19 {pages 5-82 and 5-83; PDF 122 and 123 respectively}. AECOM revised the 1959 and 1989 tornadoes events for those jurisdictions.

Table 5-18: Tornado Hazard Events

Location	Date	Magnitude
Franklin County (Unincorporated Area)	11/28/1988	F4
Town of Bunn	5/14/2006	EF0
Town of Franklinton	N/A	N/A
Town of Louisburg	3/20/1998	F1
Town of Youngsville	N/A	N/A
Granville County (Unincorporated Area)	11/19/1952	F2
Town of Butner	9/29/1959	F1
City of Creedmoor	5/05/1989	F1
Town of Oxford	N/A	N/A
Town of Stem	N/A	N/A
Town of Stovall	N/A	N/A
Vance County (Unincorporated Area)	2/24/2016	EF2
Town of Henderson	10/27/1995	F2
Town of Kittrell	N/A	N/A
Town of Middleburg	5/19/2001	F0
Warren County (Unincorporated Area)	11/2/1966	F2
Town of Macon	N/A	N/A
Town of Norlina	N/A	N/A
Town of Warrenton	N/A	N/A

Source: National Climatic Data Center

- The Franklin County Severe Winter Storm map includes greatest one-day snowfall scale of 0-25, but the regional map has a scale of 0-15 {pages 5-90 and 5-89, PDF 130 and 129 respectively}. AECOM revised scale to reflect 15.

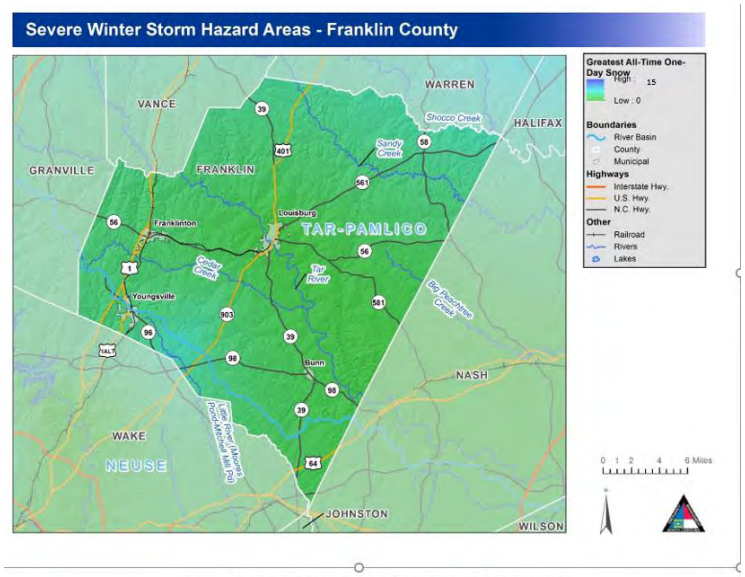

Figure 5-37. Severe Winter Storm Hazard Areas – Franklin County

- Table 5-28 has 'Subtotal Vance' under the Warren County dam subtotals {page 5-135; PDF 175}. The Dam Hazard Area map for Franklin County appears to depict 5 high hazard dams, including one that borders Wake County, but the preceding table suggests the county has 9. AECOM revised to reflect 9 dams on map, waiting for community verified.

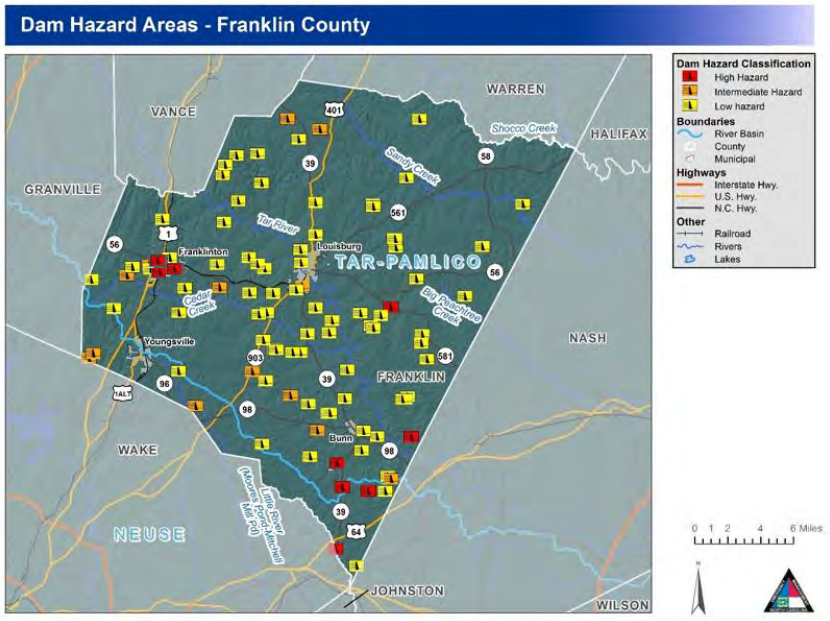

Figure 5-65. Dam Hazard Areas – Franklin County

- Statewide NC Wildfire Ignition Density map {page 5-171; PDF 211} doesn't have a caption or figure number; the proceeding maps in Section 5 are likely off in the numbering sequence. AECOM added caption and revised numbering sequence.

B2. NCEM 1st Review: The same paragraph regarding drought extent is repeated verbatim in the section regarding historical occurrences {ref 5.3.3 and 5.3.4; PDF pages 48 and 51 respectively}, was this repetition intentional? AECOM concurs repetition was intentional to clearly meet requirements.

- The bullet points detailing the probability of future occurrence for extreme heat include annual percentage rates but not the correlating category name – low, medium or high {ref: 5-21; PDF 61}. The same pattern is also found for hurricanes and tropical storms {page 5-34; PDF 74}, severe weather events {page 5-70; PDF 110}, tornadoes {page 5-85; PDF 125}, winter storms {5-117; PDF 157}, earthquakes {5-130, PDF 170}, dam failure {5-142; PDF 182}, flooding {5-167; PDF 207}, wildfire {5-197 and 198; PDF 237 and 238}. AECOM repeated Low, Medium, High probability delineations for each hazard.
- Footnote at the bottom of 5-33 references '*Section 4: Hazard Profiles*' rather than Section 4: Hazard Identification. AECOM revised.
- There's no reference to or explanation of the data presented in Tables 5-13 {page 5-53; PDF 93} and 5-14 {pages 5-54–5-68; PDF 94-108}. It appears Table 5-13 represents the *strongest* wind magnitude events recorded in the participating jurisdictions, while 5-14 provides historical occurrences of 2005-2020 recorded thunderstorm events in all communities – participating or not – within the Tar Heel Region. AECOM added clarifying references.
- Historical Occurrences of river flooding tables 5-33 and 5-34 appear to conflict. Particularly the reported property damage figures for Granville and Warren Counties {ref 5-162–5-163 and 5-164; PDF 202-203 and 204, respectively}. AECOM pulled those data tables from RMT/iRisk. AECOM will need state's assistance to clarify conflicting data within that system. Inserted new statement: "There is a minor discrepancy in the visualization of river flooding data in the river flooding figures because the data was provided by RMT/iRisk and did not use the data in the tables below."

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
B3. NCEM 1st Review: no revisions identified **B4. NCEM 1st Review:** no revisions identified			
ELEMENT C. MITIGATION STRATEGY			
C1. Does the plan document each jurisdiction's existing authorities, policies, programs and resources and its ability to expand on and improve these existing policies and programs? (Requirement §201.6(c)(3))	a. Sec.7: Capability Assessment, Pg.1-21 and Sec. 9: Mitigation Action Plan, Pg.2-42✓	X	
C2. Does the Plan address each jurisdiction's participation in the NFIP and continued compliance with NFIP requirements, as appropriate? (Requirement §201.6(c)(3)(ii))	a. Sec. 5: Hazard Profiles, 5.11.5, Pg.162-165 and Sec. 7: Capability Assessment, Pg.4-18 Sec. 5, P166-67, Sec 9. P38-39 The towns of Bunn, Stovall, Kittrell, Middleburg, Macon, Norlina and Warrenton do not have a Special Flood Hazard Area (SFHA) and therefore have not been mapped. P 5-147 PDF 190.	X	
C3. Does the Plan include goals to reduce/avoid long-term vulnerabilities to the identified hazards? (Requirement §201.6(c)(3)(i)) **QC concurs**	a. Sec. 8: Mitigation Strategy, Pg. 3 b. Sec. 8: Mitigation Strategy, Pg. 3✓	X	
C4. Does the Plan identify and analyze a comprehensive range of specific mitigation actions and projects for each jurisdiction being considered to reduce the effects of hazards, with emphasis on new and existing buildings and infrastructure? (Requirement §201.6(c)(3)(ii)) **QC concurs**	a. Sec. 8: Mitigation Strategy, Pg. 4-5 and Sec. 9.2: Mitigation Action Plan, Pg.2-42 b. Sec. 9.2: Mitigation Action Plan, Pg.2-42 c. Sec. 8: Mitigation Strategy, Pg. 4-5 and Sec. 9.2: Mitigation Action Plan, Pg.2-42✓	X	
C5. Does the Plan contain an action plan that describes how the actions identified will be prioritized (including cost benefit review), implemented, and administered by each jurisdiction? (Requirement §201.6(c)(3)(iv)); (Requirement §201.6(c)(3)(iii))	a. Sec. 8: Mitigation Strategy, Pg.2, Sec. 9.2: Mitigation Action Plan, Pg.2-42 and Sec. 10: Plan Maintenance, Pg.1-2, Sec 9.1, Pg. 1-2 b. Sec. 8: Mitigation Strategy, Footnote 1, Pg.2 and Sec. 9.2: Mitigation Action Plan, Pg.2-42 c. Sec. 9.2: Mitigation Action Plan, Pg.2-42 ✓	X	

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
C6. Does the Plan describe a process by which local governments will integrate the requirements of the mitigation plan into other planning mechanisms, such as comprehensive or capital improvement plans, when appropriate? (Requirement §201.6(c)(4)(ii))	a. Sec. 10: Plan Maintenance, Pg.1-2 b. Sec. 2: Planning Process, Pg.1-2 and Sec. 7: Capability Assessment, Pg. 2-4 c. Sec. 9: Mitigation Action Plan, Pg.2-42 and Sec. 10: Plan Maintenance, Pg.1-2 d. Sec. 10: Plan Maintenance, Pg.1-2 e. Sec. 10: Plan Maintenance, Pg.1-4 ✓	x	

ELEMENT C: REQUIRED REVISIONS

C1. NCEM 1st Review: no revisions identified

C2. NCEM 1st Review: Table 5-35 {beginning on page 5-165, 205 of PDF} includes caption identifying those communities that do not participate in the NFIP with an asterisk, but none of the communities in the table appear to include an asterisk after the respective name. Also, for those communities that do not participate please provide some brief explanation as to why they're opting out (i.e. the lack of SFA within community boundaries). AECOM revised table. AECOM added explanation for non-participation.

Jurisdiction	Date Joined NFIP	Current Effective Map Date	NFIP Policies In Force	Insurance In Force	Written Premium In Force	Closed Losses	Total Payments

ELEMENT D. PLAN REVIEW, EVALUATION, AND IMPLEMENTATION (applicable to plan updates only)			
D1. Was the plan revised to reflect changes in development? (Requirement §201.6(d)(3)) **QC concurs**	a. Sec. 6: Vulnerability Assessment, Pg. 479; Sec. 3: Community Profile, Pg. **7**	X	
D2. Was the plan revised to reflect progress in local mitigation efforts? (Requirement §201.6(d)(3)) **QC concurs**	a. Sec. 9: Mitigation Action Plan, Pg. 1-42; Sec. 8 Mitigation Strategy Pg. 6,✓ Sec 2 Pg. 13	X	

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met
D3. Was the plan revised to reflect changes in priorities? (Requirement §201.6(d)(3))	a. Sec. 8: Mitigation Strategy, Pg. 2✓	X	
ELEMENT D: REQUIRED REVISIONS **D1. NCEM 1st Review:** no revisions identified **D2. NCEM 1st Review:** no revisions identified **D3. NCEM 1st Review:** no revisions identified			
ELEMENT E. PLAN ADOPTION			
E1. Does the Plan include documentation that the plan has been formally adopted by the governing body of the jurisdiction requesting approval? (Requirement §201.6(c)(5)) **QC concurs**	Appendix A	X	
E2. For multi-jurisdictional plans, has each jurisdiction requesting approval of the plan documented formal plan adoption? (Requirement §201.6(c)(5)) **QC concurs**	Appendix A		X

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met

ELEMENT E: REQUIRED REVISIONS

Prior to review completion adoption documentation was provided by:
Counties: Franklin, Granville.
Cities: Creedmoor, Oxford.
Towns: Butner, Stem, Stovall, Youngsville.

FEMA REQUIRED REVISIONS:

Adoption documentation has not been provided by all participating jurisdictions.

E2: Each jurisdiction that is included in the plan must have its governing body adopt the plan prior to FEMA approval, even when a regional agency has the authority to prepare such plans.

FEMA recommends that all participating jurisdictions coordinate the adoption process as soon as the plan has received APA status to ensure that all participants are covered by a plan for the full five years.

For additional information, please see Element E, Plan Adoption, in the "Local Mitigation Plan Review Guide", October 1, 2011, Pages 28-29 and Task 8 of the Local Mitigation Planning Handbook, March 2013.

Please submit adoption resolutions for the remaining plan participants.

6-28-21 The following jurisdictions provided adoption documentation:

- Vance Co, Unincorporated
- City of Henderson
- Town of Kittrell
- Town of Middleburg

7-8-21 The following jurisdictions provided adoption documentation:

- Warren Co, Unincorporated
- Town of Bunn

7-16-21 The following jurisdictions provided adoption documentation:

- Town of Franklinton
- Town of Louisburg

9-15-21 The Town of Warrenton provided adoption documentation.

10-12-21 Town of Norlina and Macon provided adoption documentation.

ELEMENT F. ADDITIONAL STATE REQUIREMENTS (OPTIONAL FOR STATE REVIEWERS ONLY; NOT TO BE COMPLETED BY FEMA)

1. REGULATION CHECKLIST **Regulation** (44 CFR 201.6 Local Mitigation Plans)	Location in Plan (section and/or page number)	Met	Not Met

ELEMENT F: REQUIRED REVISIONS

Page/Section references to plan locations seem to be off by a page or two (i.e. referring reviewer to pages 164-165 regarding Repetitive Loss structures, when the correlating information is actually found through page 167). Please confirm or double check any referenced page numbers. AECOM revised page numbers in FEMA PRT in order to reflect PDF conversion space breaks.

Please include brief statement with any chart or table explaining blank cells indicate 'no data is available' or a participating jurisdiction 'doesn't have a plan in place at this time'.

AECOM revised text to include: Table provides a summary of the capability assessment results for the Tar River Region with regard to relevant staff and personnel resources. An arrow indicates the presence of a staff member(s) in that jurisdiction with the specified knowledge or skill. A blank in the column indicates that the given resource does not currently exists in the jurisdiction.

Table provides a summary of the relevant local plans, ordinances, and programs already in place or under development for the jurisdictions in the Tar River Region. An arrow (➳) indicates that the given item is currently in place and being implemented. An asterisk (*) indicates that the given item is currently being developed for future implementation. A blank column indicates that the given item does not currently exists in the jurisdiction. Each of these local plans, ordinances, and programs should be considered available mechanisms for review and incorporating the existing plans, studies, reports and technical information into the Tar River Regional Hazard Mitigation Plan in order to identify existing data and capabilities that will help implement the mitigation strategy.

SECTION 2:
PLAN ASSESSMENT

INSTRUCTIONS: The purpose of the Plan Assessment is to offer the local community more comprehensive feedback to the community on the quality and utility of the plan in a narrative format. The audience for the Plan Assessment is not only the plan developer/local community planner, but also elected officials, local departments and agencies, and others involved in implementing the Local Mitigation Plan. The Plan Assessment must be completed by FEMA. The Assessment is an opportunity for FEMA to provide feedback and information to the community on: 1) suggested improvements to the Plan; 2) specific sections in the Plan where the community has gone above and beyond minimum requirements; 3) recommendations for plan implementation; and 4) ongoing partnership(s) and information on other FEMA programs, specifically RiskMAP and Hazard Mitigation Assistance programs. The Plan Assessment is divided into two sections:

1. Plan Strengths and Opportunities for Improvement
2. Resources for Implementing Your Approved Plan

Plan Strengths and Opportunities for Improvement is organized according to the plan Elements listed in the Regulation Checklist. Each Element includes a series of italicized bulleted items that are suggested topics for consideration while evaluating plans, but it is not intended to be a comprehensive list. FEMA Mitigation Planners are not required to answer each bullet item, and should use them as a guide to paraphrase their own written assessment (2-3 sentences) of each Element.

The Plan Assessment must not reiterate the required revisions from the Regulation Checklist or be regulatory in nature, and should be open-ended and to provide the community with suggestions for improvements or recommended revisions. The recommended revisions are suggestions for improvement and are not required to be made for the Plan to meet Federal regulatory requirements. The italicized text should be deleted once FEMA has added comments regarding strengths of the plan and potential improvements for future plan revisions. It is recommended that the Plan Assessment be a short synopsis of the overall strengths and weaknesses of the Plan (no longer than two pages), rather than a complete recap section by section.

Resources for Implementing Your Approved Plan provides a place for FEMA to offer information, data sources and general suggestions on the overall plan implementation and maintenance process. Information on other possible sources of assistance including, but not limited to, existing publications, grant funding or training opportunities, can be provided. States may add state and local resources, if available.

A. Plan Strengths and Opportunities for Improvement

This section provides a discussion of the strengths of the plan document and identifies areas where these could be improved beyond minimum requirements.

Element A: Planning Process

Plan Strengths

A comprehensive planning process was documented in which the information was written so that the reader can understand the approach taken by the Tar River Regional Hazard Mitigation Planning Team. The Summary of Plan Contents sub-section provided the layout of the plan by briefly stating what is included in each Section. The Planning Team had specific assigned tasks to preform for the plan update review and documentation. The Hazard Mitigation Planning Team members included representatives from participating jurisdictions, various county and city offices such as the Emergency Management, Fire Department, Emergency Services, County Health Department, Community Planning, and Community Development. Along with various stakeholders from neighboring counties. The Planning Process demonstrated an active attempt to include a diverse group to represent the communities. This process ensures that appropriate participants will be aware of their Mitigation efforts and supports community outreach.

Subsequent plan updates considering these efforts will ensure continued development of a community focused hazard mitigation plan with the intent of decreasing vulnerability and increasing resiliency and sustainability for the participating jurisdictions.

Opportunities for Improvement

The HMP Committee needs to review the document for correctness and completeness prior to submission for formal review by NCEMA and FEMA. ****Note*Louisburg in some cases is spelled wrong as Lewisburg, please correct in the final plan document.***

Element B: Hazard Identification and Risk Assessment

Plan Strengths

The Priority Risk Index documents the Probability, Impact, Spatial Extent, Warning Time, and Duration. This provides a good snapshot identifying which hazards have a greater impact in the planning area. This tool, along with the Vulnerability Assessment, will assist with determining where mitigation funding is most needed and spent.

Element C: Mitigation Strategy

Plan Strengths

- Having a documented structure for developing new actions and reporting on the status of existing actions will provide the living document a path for continued efforts towards maintaining and building a resilient community.
- The proposed mitigation projects are very specific, actionable, and it is clear that actions, including those carried over from the previous plan, were evaluated and re-prioritized.

Element D: Plan Update, Evaluation, and Implementation (*Plan Updates Only*)

Plan Strengths

A process to monitor and evaluate mitigation implementation was documented. Mitigation strategies progress is documented along with any changes to the strategies that will move forward.

Opportunities for Improvement

The description of the changes in development that have occurred in hazard prone areas relative to increase or decrease in vulnerability can be improved. For example, completed acquisition mitigation projects that decreased vulnerability may be included in the description. How has the development impacted risk to the identified hazards? Has it remained the same because of strong land use planning mechanisms? Suggest this information be added to the Consequence and Impact Analysis subjection under Built Environment. Check Sec. 6: Vulnerability Assessment, Pg. 479

B. Resources for Implementing Your Approved Plan

- **Local Mitigation Planning Handbook**
  This Handbook provides guidance to local governments on developing or updating hazard mitigation plans to meet the requirements under the Code of Federal Regulations (CFR) Title 44 – Emergency Management and Assistance §201.6.
  Use the Local Plan Guide and Handbook in tandem to understand technical requirements
  http://www.fema.gov/library/viewRecord.do?fromSearch=fromsearch&id=7209
- **Integrating Mitigation Strategies with Local Planning**
  This resource provides practical guidance on how to incorporate risk reduction strategies into existing local plans, policies, codes, and programs that guide community development or redevelopment patterns.
  http://www.fema.gov/library/viewRecord.do?id=7130
- **Mitigation Ideas**
  Communities can use this resource to identify and evaluate a range of potential mitigation actions for reducing risk to natural hazards and disasters.
  http://www.fema.gov/media-library/assets/documents/30627?id=6938

- **Risk MAP Program:**
  This resource provides an introduction to Risk MAP and information about the products Risk MAP offers to better understand flood risk. This information can help planning to reduce flood risk and communicate with residents.
  https://www.fema.gov/risk-map-program-information-community-officials

SECTION 3:
MULTI-JURISDICTION SUMMARY SHEET (OPTIONAL)

INSTRUCTIONS: For multi-jurisdictional plans, a Multi-jurisdiction Summary Spreadsheet may be completed by listing each participating jurisdiction, which required Elements for each jurisdiction were 'Met' or 'Not Met,' and when the adoption resolutions were received. This Summary Sheet does not imply that a mini-plan be developed for each jurisdiction; it should be used as an optional worksheet to ensure that each jurisdiction participating in the Plan has been documented and has met the requirements for those Elements (A through E).

October 13, 2021

Mr. Steve McGugan
State Hazard Mitigation Officer
Assistant Director / Mitigation Section Chief
Division of Emergency Management
NC Department of Public Safety
200 Park Offices Drive
Durham, NC 27713

Reference: Multi-Jurisdictional Hazard Mitigation Plan: Tar River Regional

Dear Mr. McGugan:

This is a follow-up to our previous correspondence of June 8, 2021, in which we approved the Tar River Regional Hazard Mitigation Plan and all the participating communities that submitted their resolutions at the time of plan approval. We have recently received from your office the following resolutions for inclusion within this plan and subsequently have approved the communities under the approved Tar River Regional Hazard Mitigation Plan, effective October 12, 2021:

- Town of Norlina
- Town of Macon

The approved participating communities are hereby eligible applicants through the State for the following mitigation grant programs administered by the Federal Emergency Management Agency (FEMA):

- Hazard Mitigation Grant Program (HMGP)
- Flood Mitigation Assistance (FMA)
- Building Resilient Infrastructure and Communities (BRIC)

National Flood Insurance Program (NFIP) participation is required for some programs.

We commend the participants in Tar River Regional Hazard Mitigation Plan for the development of a solid, workable plan that will guide hazard mitigation activities over the coming years. Please note that all requests for funding will be evaluated individually according to the specific eligibility and other requirements of the program under which the application is submitted. For example, a specific mitigation activity or project identified in the plan may not meet the eligibility requirements for FEMA funding, and even eligible mitigation activities are not automatically approved for FEMA funding under any of the programs.

We strongly encourage each community to perform an annual review and assessment of the effectiveness of their hazard mitigation plan; however, a formal plan update is required at least every five (5) years. We also encourage each community to conduct a plan update process within one (1) year of being included within a Presidential Disaster Declaration or of the adoption of major modifications to their local Comprehensive Land Use Plan or other plans that affect hazard mitigation or land use and development. When the Plan is amended or revised, the amendments and revisions should be incorporated into the next plan update. If the Plan is not updated prior to the required five (5) year update, please ensure that the Draft update is submitted at least six (6) months prior to expiration of this plan approval.

If you or the participants in Tar River Hazard Mitigation Plan have any further questions or need any additional information, please do not hesitate to contact Celicia Davis, of the Hazard Mitigation Assistance Branch, at (202) 997-7490, Hailey Peterson, of the Hazard Mitigation Assistance Branch, at (202) 655-8757, or Edwardine S. Marrone, of my staff, at (404) 433-3968.

Reference: Multi-Jurisdictional Hazard Mitigation Plan: Tar River Regional

Dear Mr. McGugan:

We are pleased to inform you that the Tar River Regional Multi-Jurisdictional Hazard Mitigation Plan Update is in compliance with the Federal hazard mitigation planning requirements resulting from the Disaster Mitigation Act of 2000, as contained in 44 CFR 201.6. The plan is approved for a period of five (5) years effective June 8, 2021 to June 7, 2026.

This plan approval extends to the following participating jurisdictions that provided a copy of their resolutions adopting the plan:

- Franklin County, Unincorporated
- Granville County, Unincorporated
- Town of Butner
- City of Creedmoor
- City of Oxford
- Town of Stem
- Town of Stovall
- Town of Youngsville

The approved participating jurisdictions are hereby eligible applicants through the State for the following mitigation grant programs administered by the Federal Emergency Management Agency (FEMA):

- Hazard Mitigation Grant Program (HMGP)
- Flood Mitigation Assistance (FMA)
- Building Resilient Infrastructure and Communities (BRIC)

National Flood Insurance Program (NFIP) participation is required for some programs.

We commend the participants in the Tar River Regional Multi-Jurisdictional Hazard Mitigation Plan for development of a solid, workable plan that will guide hazard mitigation activities over the coming years. Please note, all requests for funding will be evaluated individually according to the specific eligibility and other requirements of the particular program under which the application is submitted. For example, a specific mitigation activity or project identified in the plan may not meet the eligibility requirements for FEMA funding, and even eligible mitigation activities are not automatically approved for FEMA funding under any of the aforementioned programs.

We strongly encourage each community to perform an annual review and assessment of the effectiveness of their hazard mitigation plan; however, a formal plan update is required at least every five (5) years. We also encourage each community to conduct a plan update process within one (1) year of being included within a Presidential Disaster Declaration or of the adoption of major modifications to their local Comprehensive Land Use Plan or other plans that affect hazard mitigation or land use and development. When you prepare a comprehensive plan update, it must be resubmitted through the State as a "plan update" and is subject to a formal review and approval process by our office. If the plan is not updated prior to the required five (5) year update, please ensure that the Draft update is submitted at least six (6) months prior to expiration of this plan approval.

The State and the participants in the Tar River Regional Multi-Jurisdictional Hazard Mitigation Plan should be commended for their close coordination and communications with our office in the review and subsequent approval of the plan. If you or the participants in the Tar River Regional Multi-Jurisdictional Hazard Mitigation Plan have any questions or need any additional information, please do not hesitate to contact Celicia Davis, of the Hazard Mitigation Assistance Branch, at (202) 997-7490, Carol Maldonado, of the Hazard Mitigation Assistance Branch, at (470) 307-6294, Hailey Peterson, of the Hazard Mitigation Assistance Branch, at (202) 655-8757 or Edwardine S. Appendix D: Public Outreach Strategy

This appendix to the Tar River Regional Hazard Mitigation Plan contains a copy of the Public Outreach Strategy to guide the public outreach element of the mitigation planning process.

Public Outreach Strategy

Project Summary

The counties of Franklin, Granville, Vance and Warren, in coordination with their participating municipal jurisdictions, are updating their regional hazard mitigation plan that covers the four-county area. The Tar River Regional Hazard Mitigation Plan will identify local policies and actions for reducing risk and future losses from natural hazards such as floods, severe storms, wildfires, and winter weather.

The plan will also serve to meet key federal planning regulations which require local governments to develop a hazard mitigation plan as a condition for receiving certain types of non-emergency disaster assistance, including funding for hazard mitigation projects. These mitigation planning requirements stem from the Disaster Mitigation Act of 2000, which was passed by the U.S. Congress in October of 2000. This Act amended federal law to require that all states and local governments must have hazard mitigation plans in place in order to be eligible to apply for funding under such programs as the Hazard Mitigation Grant Program (HMGP) and the Pre-Disaster Mitigation (PDM) program.

Public Outreach

A key element in the mitigation planning process is the discussion it promotes among community members about creating a safer, more disaster-resilient community. A plan that accurately reflects the community's values and priorities is likely to have greater legitimacy and "buy-in" and greater success in implementing mitigation actions and projects to reduce risk.[1] Therefore, the purpose of the Tar River Regional Hazard Mitigation Plan Public Outreach Strategy is to:

- Generate public interest;
- Solicit citizen input; and
- Engage additional partners in the planning process.

The following specific public outreach opportunities and methods have been identified for citizens and targeted stakeholders to participate at various points in the mitigation planning process, and are presented in more detail on the following pages:

1. In-person public meetings (2)
2. Public information website (including social media integration)
3. Project information fact sheet
4. Planning resources
5. Public participation survey

[1] FEMA, *Local Mitigation Planning Handbook*, March 2013.

OUTREACH METHOD 1
In-Person Public Meetings (2)
AVAILABILITY
January 28, 2021 and at each jurisdiction council meeting for adoption.
BRIEF DESCRIPTION
two public meetings will be scheduled at key points in the project timeline, one following the kick-off meeting with the Regional Hazard Mitigation Planning Committee, one following completion of the draft risk and capability assessments and one following completion of the draft plan (and prior to the plan's local adoption). These meetings will be coordinated and arranged by Johnston County with facilitation support from AECOM.
DETAILS
For all public meetings: • The purpose will be to inform the public on the process and current status of the regional planning process, as well as gain input to the process during the drafting stage and prior to plan completion and approval • AECOM will prepare presentation and handout materials as needed to help facilitate two-way communication with public meeting attendees
LEAD AGENCY
Granville County/AECOM

OUTREACH METHOD 2
Public Information Website (including Social Media Integration)
AVAILABILITY
August 2020
BRIEF DESCRIPTION
A project information website will be hosted by North Carolina Emergency Management and will be available to the general public and to members of the Hazard Mitigation Planning Committee for the duration of the project at the following web address: https://gis.aecomonline.net/IRISK2/NCHMP.aspx?region=30. The primary purpose of this site will be to share information relevant to the 2020 Cape Fear Regional Hazard Mitigation Plan planning process.
DETAILS
Specific resources to be included on this site include: • Project information fact sheet • Drafts of Regional Hazard Mitigation Plan sections • List of Local Jurisdiction Leads • List of project tasks and subtasks with schedule • PowerPoint files from Hazard Mitigation Planning Committee meetings • PDFs of existing county-level hazard mitigation plans for reference during the plan update process • Links to planning resources, including recently published FEMA hazard mitigation planning guidance • Social media integration including, but not limited to, Facebook, Twitter, Tumblr, and Pinterest
LEAD AGENCY
Granville County/NCEM/AECOM

OUTREACH METHOD 3

Project Information Fact Sheet

AVAILABILITY

August 2020

BRIEF DESCRIPTION

A 1-page (double-sided) project information fact sheet will be available online in PDF format for the duration of the project. The primary purpose of this document will be to provide information on the regional planning process and to provide project contact information and links for interested parties to engage in the planning effort. This resource will be available on the project information website described above in Outreach Method 2. Printed copies may be made available on an as-needed basis.

DETAILS

Specific information to be provided in this fact sheet includes:

- Project overview
- Overview of the regional hazard mitigation planning process, including:
    - Public outreach
    - Risk assessment
    - Capability assessment
    - Mitigation strategy development
    - Plan maintenance
    - Plan adoption
- Explanation of project leadership
- Project schedule
- Contact information and links to project information website
- Project graphics/illustrations

LEAD AGENCY

Granville County/AECOM

OUTREACH METHOD 4

Planning Resources

AVAILABILITY

August 2020

BRIEF DESCRIPTION

Mitigation planning resources will be made available for Hazard Mitigation Planning Committee members and other interested parties in order to promote education and participation in the mitigation planning process.

DETAILS

Specific planning resources will include:

- FEMA mitigation planning guidance
    - *Local Mitigation Planning Handbook*
    - *Mitigation Ideas*
    - *Integrating Hazard Mitigation Into Local Planning*
- Other appropriate planning resources as identified throughout the duration of the planning process

LEAD AGENCY

Granville County/AECOM

OUTREACH METHOD 5

Public Participation Survey

AVAILABILITY

August 2020 to March 2021

BRIEF DESCRIPTION

An online public participation survey will be hosted by AECOM using the SurveyMonkey web hosting service and will be open to the public for a duration of approximately four months. The primary purpose of this survey will be to solicit input from any interested parties in the planning area and will be used so that individuals throughout the planning area have the opportunity to provide valuable information and feedback to the project team. The online survey will give individuals that are unable to attend the in-person meetings the opportunity to participate in the plan update process. Information from the online survey will allow the project team to better understand the types of hazards that most concern the public and the mitigation actions that are of particular interest. The survey will be made accessible through hyperlinks posted on the project information website and can be circulated via email, Facebook, etc. Additionally, hard copies of the survey will be distributed at the in-person public meetings. The feedback received will be evaluated and incorporated into the Hazard Mitigation Planning Committee's decision making process and the final plan.

DETAILS

Types of specific questions to be asked as part of this survey may include:

- Personal history with natural hazards
- Natural hazard concerns
- Perception of vulnerable community assets
- Importance of community assets
- Priorities concerning natural hazard preparedness
- Steps local government can take to reduce natural hazard risk
- Types of mitigation activities deemed important
- Personal interest in natural hazard mitigation
- Effective ways to communicate with residents
- Location in the floodplain
- Questions regarding flood insurance
- Personal actions to mitigate property
- Mitigation activities planned for the respondent's household
- Location within the planning area
- Age (optional)*
- Gender (optional)
- Highest level of education (optional)
- Length of time living in the planning area
- Ownership of property versus rental status
- Type of dwelling
- Open comments**

** All information will be kept strictly confidential*

*** Information will be processed and summarized by AECOM in order to produce summary statistics and summary responses*

LEAD AGENCY

Granville County/AECOM

Appendix E: Project Information Fact Sheet

This appendix to the Tar River Regional Hazard Mitigation Plan contains a copy of the project information fact sheet that was developed to communicate information about the project to the general public and stakeholders, and to provide talking points for Hazard Mitigation Planning Committee members.

Fact Sheet

Tar River Regional Hazard Mitigation Plan

Natural hazards have the potential to cause property damage, loss of life, economic hardship, and threats to public health and safety. Hazard mitigation measures are the things we do today to be more protected in the future. They are actions taken before a disaster happens to reduce the impact of future hazard events on people and property in the community. Mitigation reduces the risk of loss and creates a more resilient and sustainable community.

Project Overview

The counties of Franklin, Granville, Vance and Warren, in coordination with their participating municipal jurisdictions, are preparing a **regional hazard mitigation plan** that will cover the four-county area. The Tar River Regional Hazard Mitigation Plan will identify local policies and actions for reducing risk and future losses from natural hazards such as floods, severe storms, wildfires, and winter weather.

The plan will also serve to meet key federal planning regulations which require local governments to develop a hazard mitigation plan as a condition for receiving certain types of non-emergency disaster assistance, including funding for hazard mitigation projects.

These requirements stem from the Disaster Mitigation Act of 2000 which was passed by the President in October of 2000. This Act mandates that all states and local governments must have hazard mitigation plans in place in order to be eligible to apply for funding under such programs as the Hazard Mitigation Grant Program (HMGP) and the Pre-Disaster Mitigation (PDM) program.

The Planning Process

The planning process for the Tar River Regional Hazard Mitigation Plan will consist of six main phases described in detail in the following sections: **public outreach, risk assessment, capability assessment, mitigation strategy development, plan maintenance, and plan adoption.**

Public Outreach

The goals of the public outreach strategy for this planning effort are to: generate public interest, solicit citizen input, and engage additional partners in the planning process.

Public outreach will include two open public meetings, a project information website (the Tar River Hazard Mitigation Planning website located at https://gis.aecomonline.net/IRISK2/NCHMP.aspx?region=30), a web-based public participation survey (https://www.surveymonkey.com/r/https://www.surveymonkey.com/r/MPWRNC2), and updates and information shared through social media, such as on Facebook.

Risk Assessment

The desired outcomes of a risk assessment are an evaluation of each identified hazard's potential impacts on the people, economy, and built and natural environments in the planning area plus an understanding of each participating jurisdiction's overall vulnerability and most significant risks. These potential impacts and a thorough understanding of the overall vulnerability can be used to create problem statements and identify mitigation actions to reduce risk.

Capability Assessment

Each participating jurisdiction has a unique set of capabilities, including authorities, policies, programs, staff, funding, and other resources available to accomplish mitigation and reduce long-term vulnerability. By reviewing the existing capabilities in each jurisdiction, the planning team can identify capabilities that currently reduce disaster losses or could be used to reduce losses in the future.

Mitigation Strategy Development

The primary purpose of mitigation planning is to systematically identify policies, actions, and activities to reduce the impact that future natural hazard occurrences will have on people and property in the planning area. Mitigation strategy development includes long-range mitigation goals common to the planning area and short-term mitigation actions specific to each participating jurisdiction.

Plan Maintenance

Plan maintenance is the process established to track the plan's implementation and to aid in updating the plan every five years. These procedures help to ensure that the mitigation strategy is implemented according to the plan. They also provide the foundation for an ongoing mitigation program, standardize long-term monitoring of hazard-related activities, integrate mitigation principles into local officials' daily job responsibilities, and maintain momentum through continued engagement and accountability in the plan's progress.

Plan Adoption

Each participating jurisdiction seeking plan approval must adopt the plan. Adoption by the local governing body demonstrates the community's commitment to implementing the mitigation strategy and authorizes responsible agencies to execute their actions. The final plan is not approved until the community adopts the plan and FEMA receives documentation of formal adoption by the governing body of the jurisdictions requesting approval.

Project Leadership

This regional planning effort is being led by the Granville County Emergency Management, with technical assistance from AECOM. A local Hazard Mitigation Planning Committee made up of local officials, representatives, and stakeholders has been established to guide this process. In addition, local points of contact have been established for each of the four counties as well as all of the participating municipal jurisdictions. Planning committee meetings and open public meetings will be scheduled to occur at key points throughout the project timeline.

Schedule

The planning process began in August 2020 and a fully updated plan is expected to be ready for review by the North Carolina Division of Emergency Management and the Federal Emergency Management Agency by March 2021. Draft documents will be available on the project information website at various stages in the planning process.

For More Information

To learn more about this project, or to find out how you can be involved, please contact Robin Edwards, Granville County Emergency Management Planner, at robin.edwards@granvillecounty.org. Additional information and regular updates throughout the duration of this project can be found on the Tar River Hazard Mitigation Planning website at https://gis.aecomonline.net/IRISK2/NCHMP.aspx?region=30.

Appendix F: Public Participation Survey

This appendix to the Tar River Regional Hazard Mitigation Plan contains a summary of the results obtained through the public participation survey offered from August 2020 to March 2021. The survey was conducted online through SurveyMonkey, an online survey software provider, and was also made available in print form at public meetings and at other locations throughout the planning area. These written responses were added to the online database and are reflected in the summary report provided in this appendix.

There was a total of 80 surveys completed by the public. Of those 60 surveys, here are some key facts:

- 84% of residents have experienced or been impacted by a disaster.
    - Hurricane and Winter Weather were the most common at 86% with Dam/Levee Failure at the least common at only 7%

- 55% of the residents stated they were very concerned about their community being impacted by Hurricane and 67% stated they were not concerned about Earthquake.

- 55% of the residents ranked *People: Loss of life and/or injuries* as the most vulnerable to being susceptible to natural hazards and 44% ranked *Cultural/Historic: Damage or loss of libraries, museums, historic properties, etc.* as the least vulnerable.

- When asked which assets are most important 89% said *Fire, Police and EMS stations*, and *Hospitals and Medical Facilities.*

- 97% stated that *protecting critical facilities (hospitals, police stations, fire stations, etc.)* is most important for planning against natural hazards.

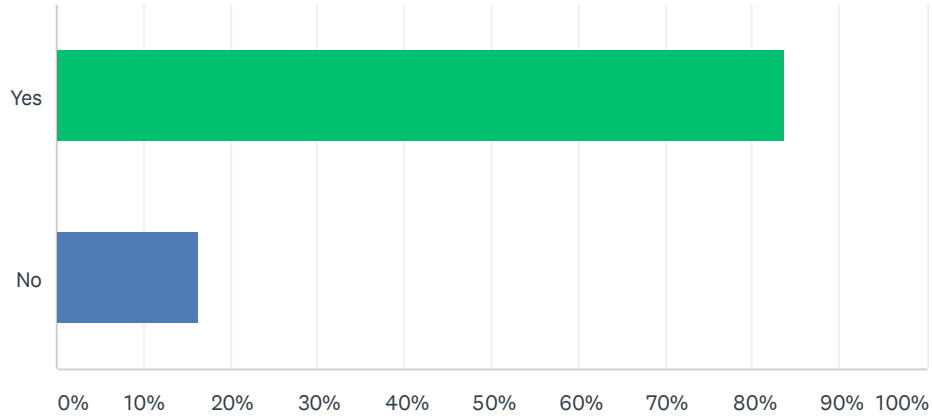

- 71% of the residents stated that the *internet (social media)* is the best way for them to receive information about natural hazards. 61-66% also stated *internet (web pages), mobile messages/alerts and mail* were the best ways.

- Only 5% of the residents live in a floodplain.

- 56% of the residents have lived in the Tar River area for 20 years or more.

Q1 Have you ever experienced or been impacted by a natural disaster?

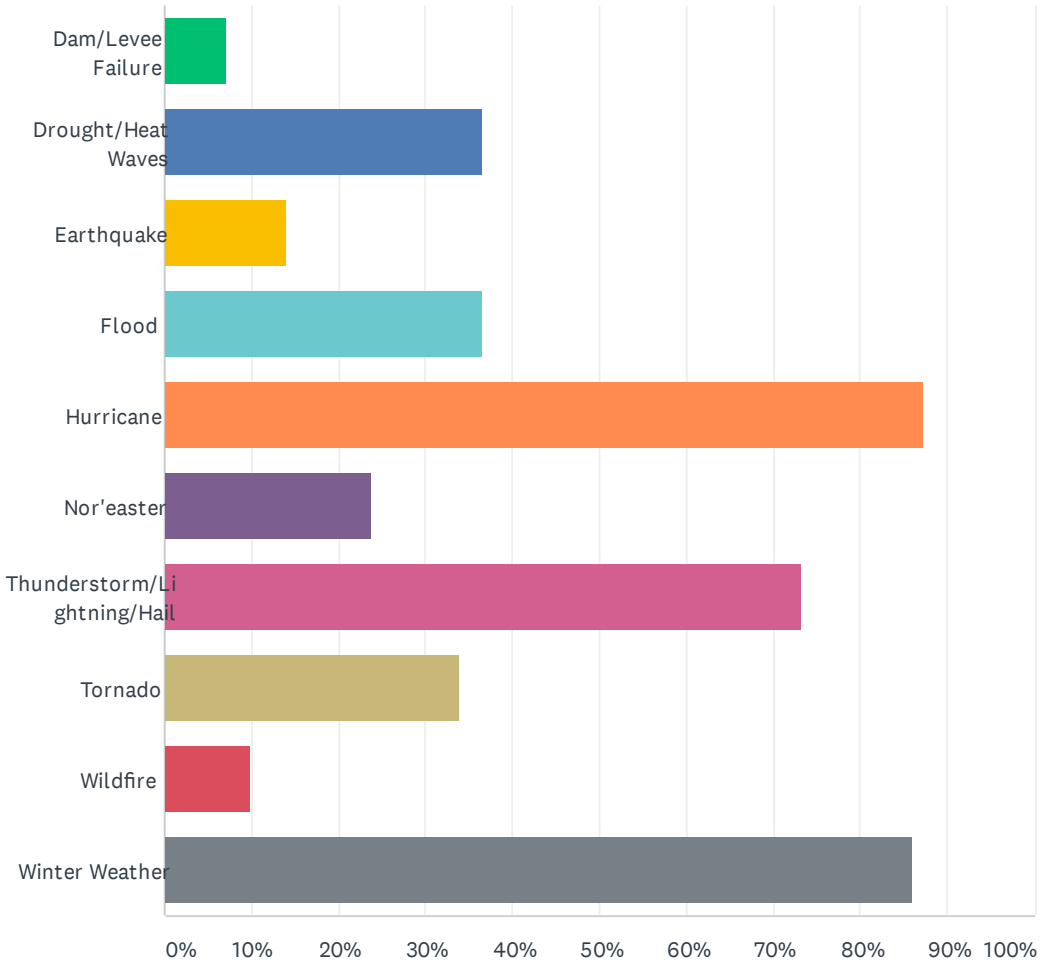

Answered: 80 Skipped: 0

ANSWER CHOICES	RESPONSES	
Yes	83.75%	67
No	16.25%	13

Tar River Regional Hazard Mitigation Plan

Public Meeting

January 28, 2021

AECOM

What is a Hazard Mitigation Plan

– Comprehensive hazard mitigation planning prepares a community to:

  – Protect lives and property
  – Avoid damages and save dollars
  – Reduce or eliminate future damages by guiding new development
  – Speed post-disaster recovery
  – Avoid interruptions caused by hazards

AECOM

Main Parts of a Hazard Mitigation Plan

- Planning Process
  - Information and descriptions of meetings
  - Planning team layout
  - Public meeting information and notes
- Risk Assessment
  - A detailed analysis of all hazards, selected by the planning committee, with information including:
    - Location (Maps)
    - Historical occurrences
    - Extent
    - Probability of future occurrences
    - Vulnerability and impact

AECOM

Main Parts of a Hazard Mitigation Plan

- Capability Assessment
  - Description of what capabilities your community have in place
- Mitigation Action Plans
  - These are the projects and activities your community are in the process of completing to mitigate for future events

AECOM

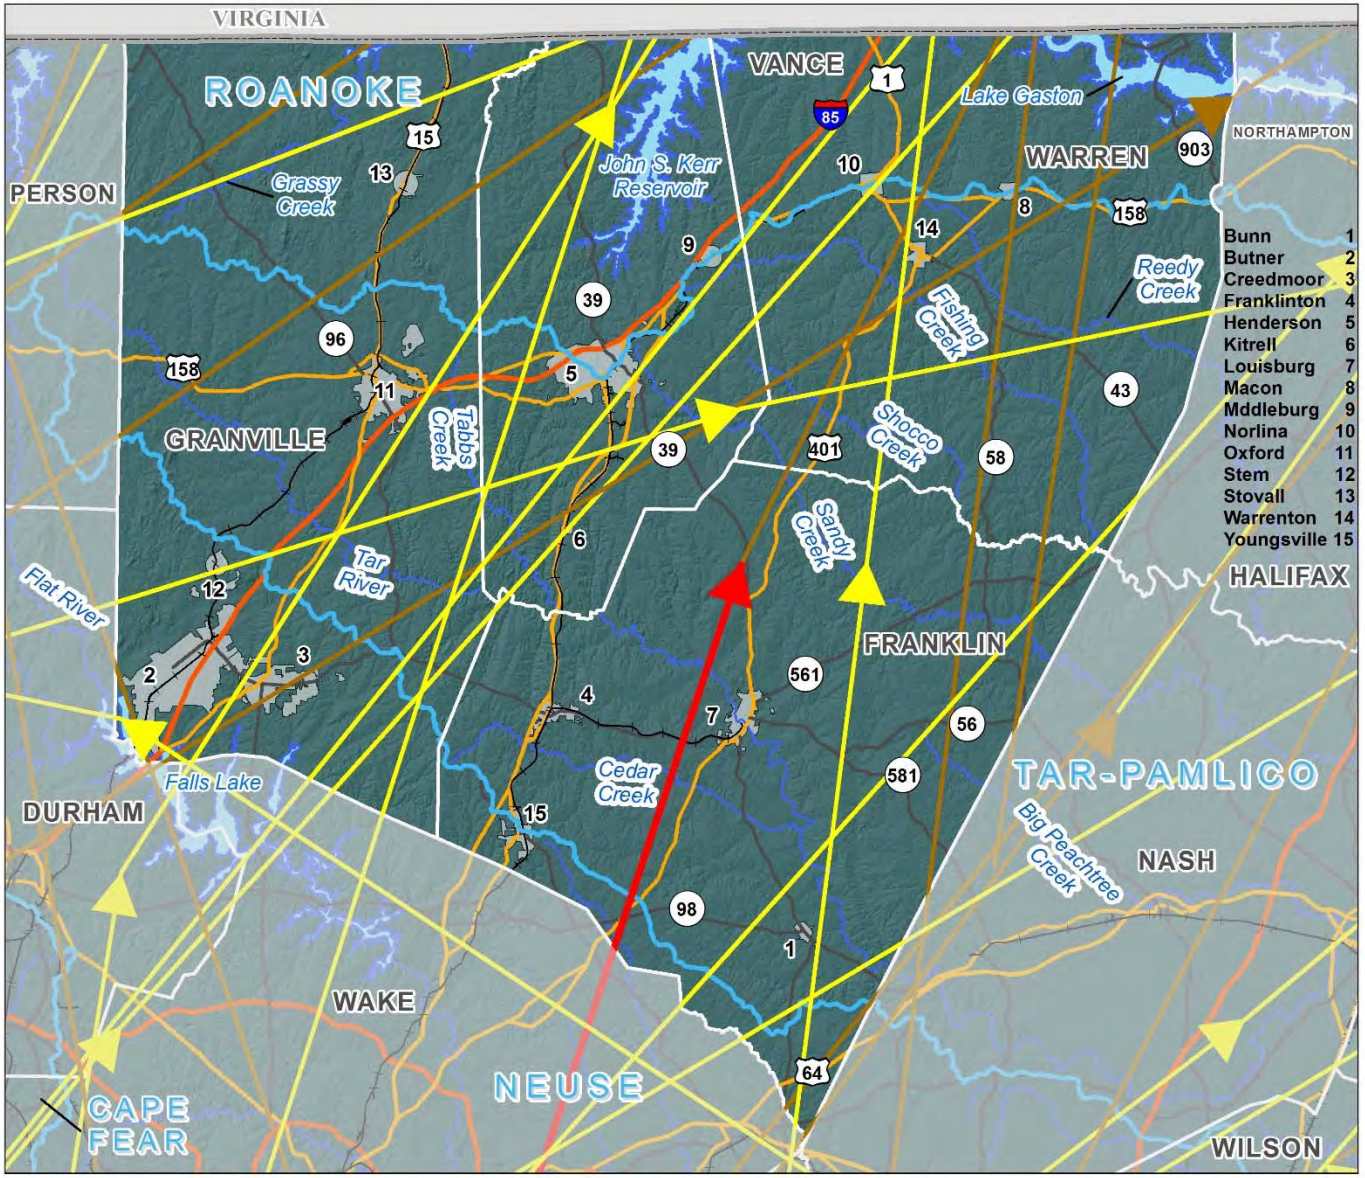

Mitigation Planning Cycle

Tar River Regional Hazard Mitigation Plan

Kickoff Meeting

Thursday, August 27th, 2020
9:00 a.m. – 11:00 a.m.
141 Williamsboro Street, Oxford, NC 27565
Granville County Expo Center Auditorium

AGENDA

1. Welcome and Introductions

2. Project Overview
    - Purpose, scope and schedule
    - Roles and responsibilities

3. Plan Update Process
    - Planning team organization, including official adoption
    - Leveraging existing resources
    - Communication, including websites, social media, etc.

4. Review and Discussion of Existing Plan

5. Capability Assessment Surveys

6. Public Participation Survey
    - Public outreach and stakeholder engagement strategy
    - Discussion of questions to ask the public

7. Mitigation Goals
    - Review existing mitigation goals

8. "Mayor for a Day"
    - Hazard identification and assessment exercise
    - Includes discussion of existing and new hazards

9. Break

10. Exercise Results and Discussion

11. Mitigation Action Plans
    - Creation of new actions
    - Update of existing actions

12. Maintaining Momentum and Implementing the Plan
    - Keeping the public and stakeholders involved
    - Plan Maintenance Procedures

13. Reviewing the Final Draft
    - Status on plan sections
    - Review/comment process
    - Suggested areas of focus

14. Questions and Open Discussion
    - Potential opportunities for this plan update
    - Potential obstacles or barriers
    - Other local issues, concerns or ideas

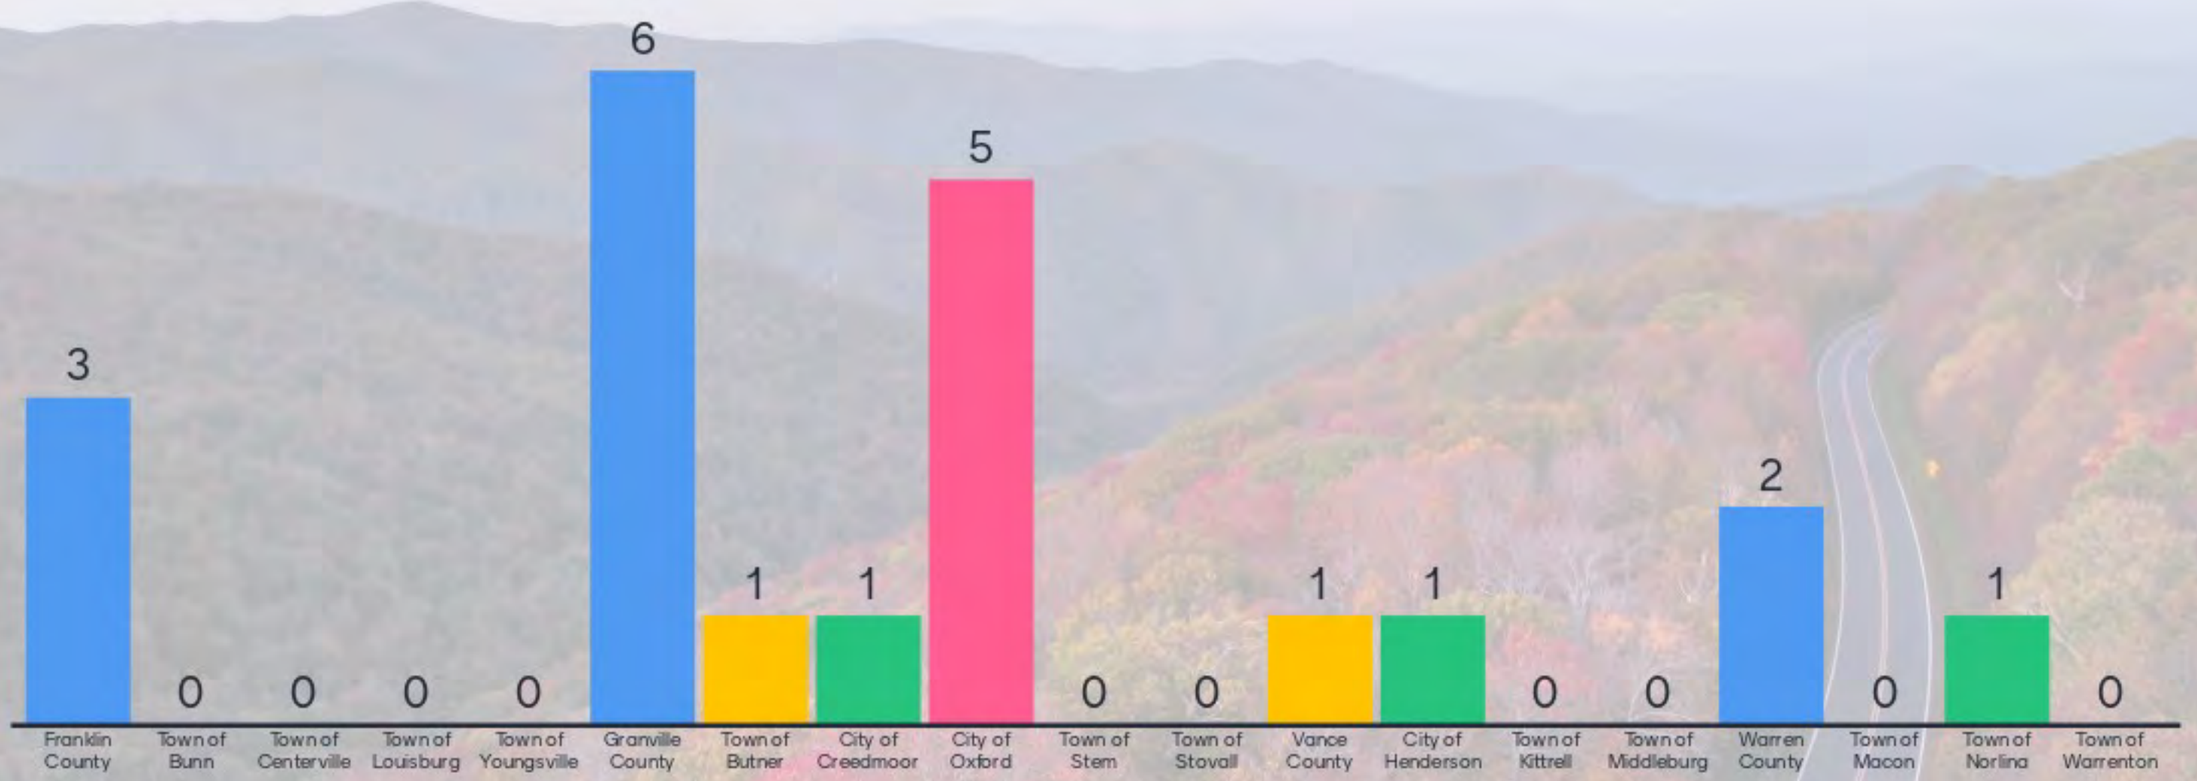

15. Next Steps
    - Discuss time/date for Hazard Mitigation Planning Team Meeting #2

21

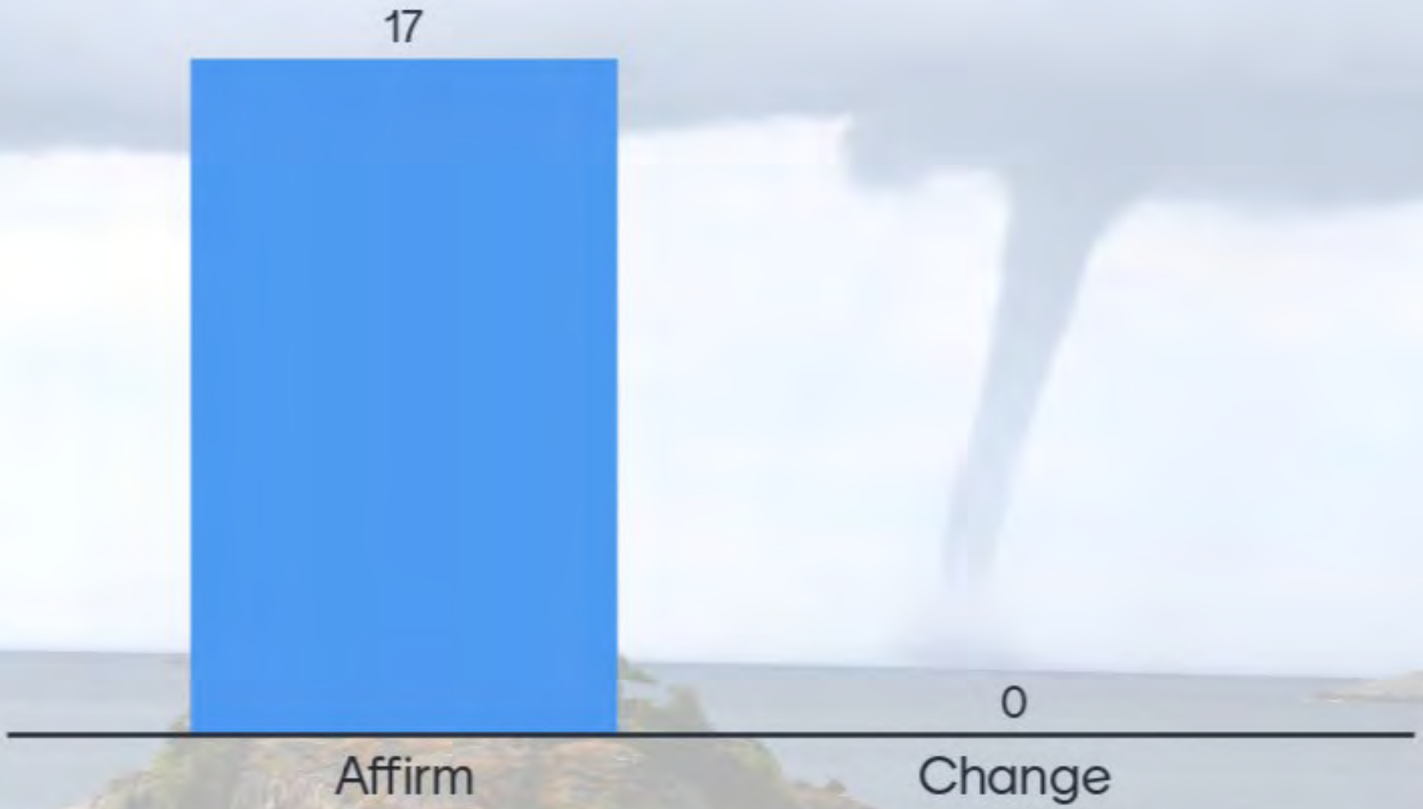

If you were Mayor for a Day, which hazard(s) would you invest your money in mitigation projects to reduce your risk from said hazards?

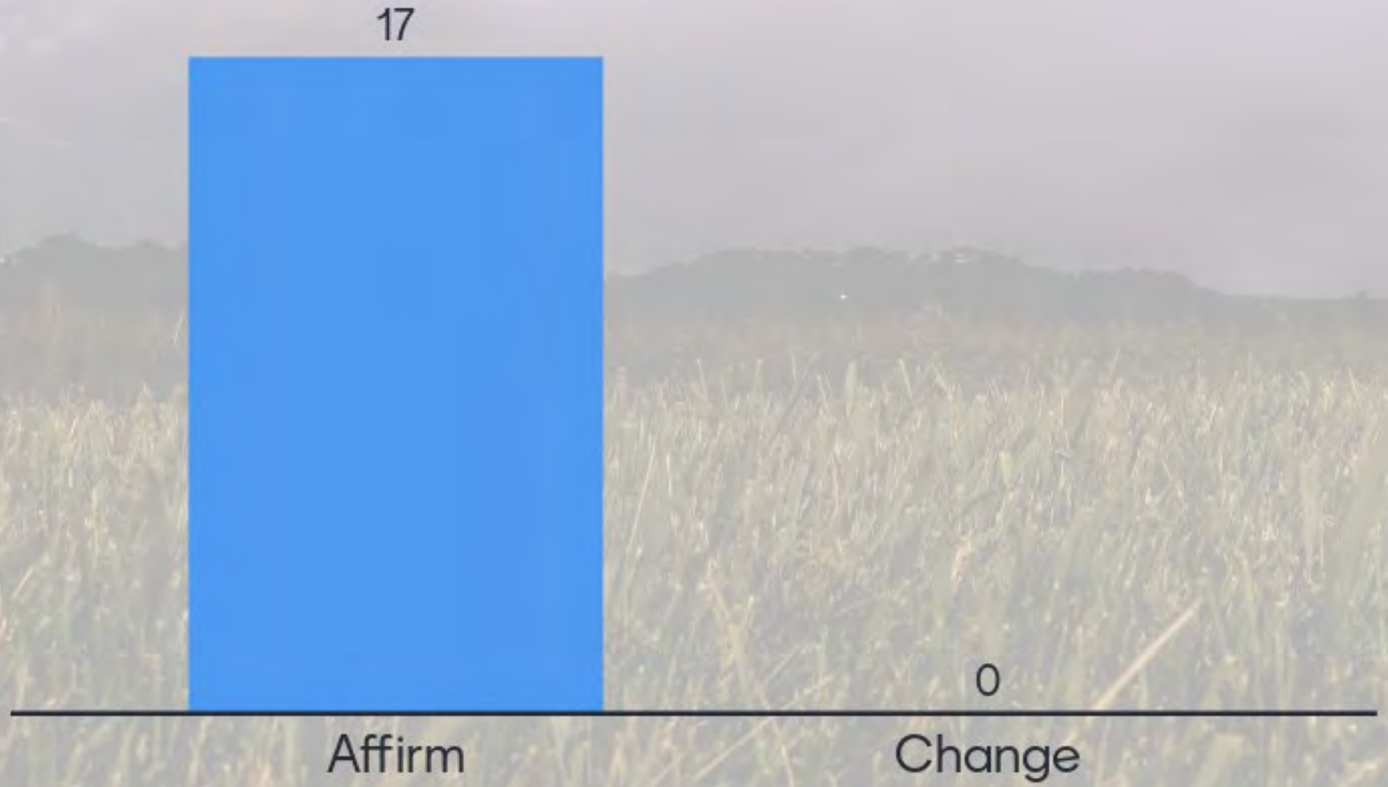

Goal 1: Reduce the risk of loss of life and personal injury from natural hazards.

Goal 2: Reduce the risk and impact of future natural disasters by

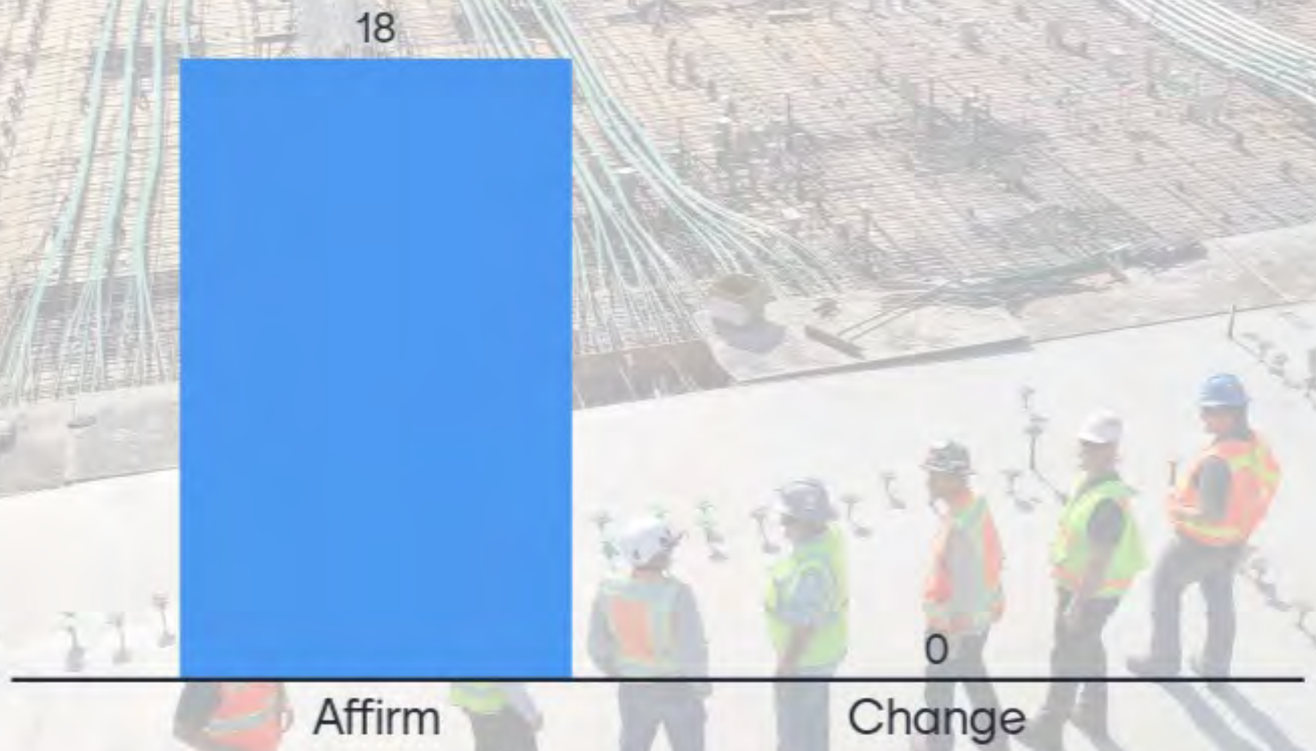

Goal 3: Pursue funds to reduce the risk of natural hazards

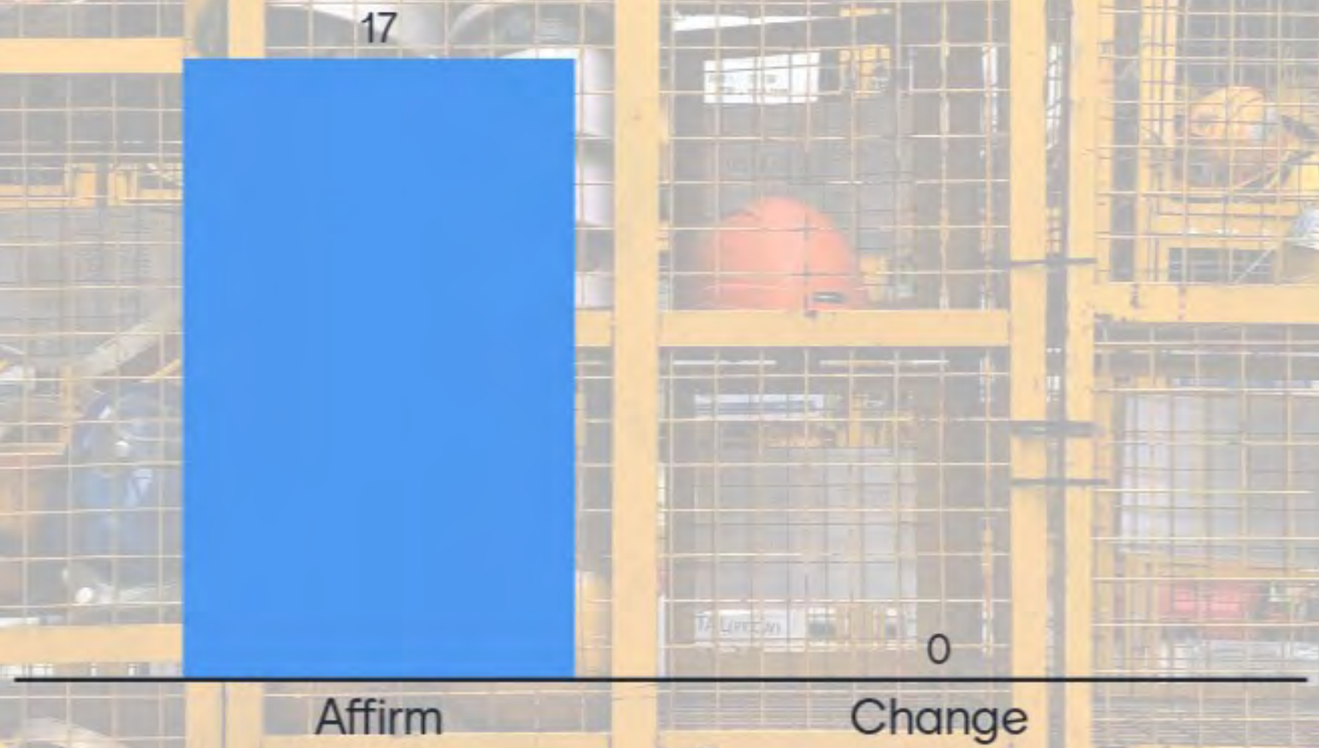

17

Goal 4: Ensure that hazard mitigation is considered when redevelopment occurs after a natural disaster and expedite post-disaster reconstruction.

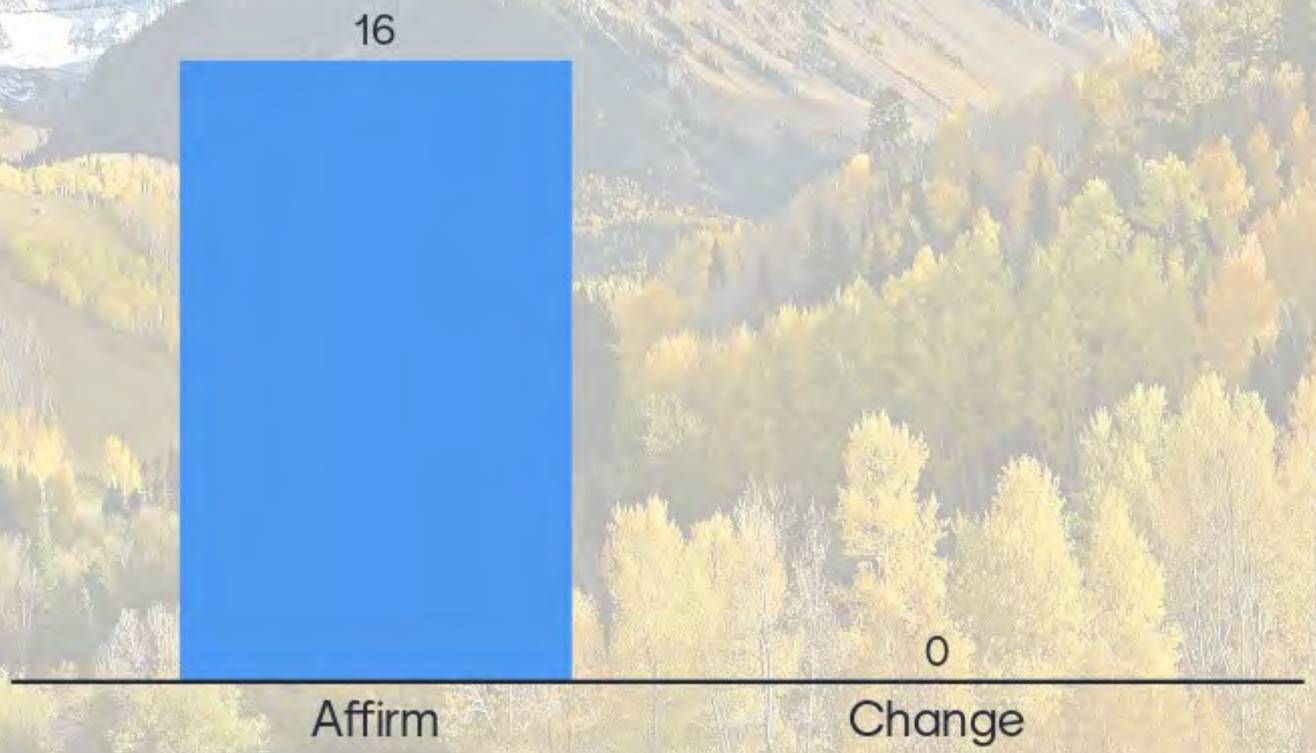

18

Goal 5: Protect the public health, safety, and welfare by increasing public awareness of hazards, providing education on

17

Goal 6: Protect the fragile natural and scenic areas of the region, particularly those areas that protect drinking water supplies.

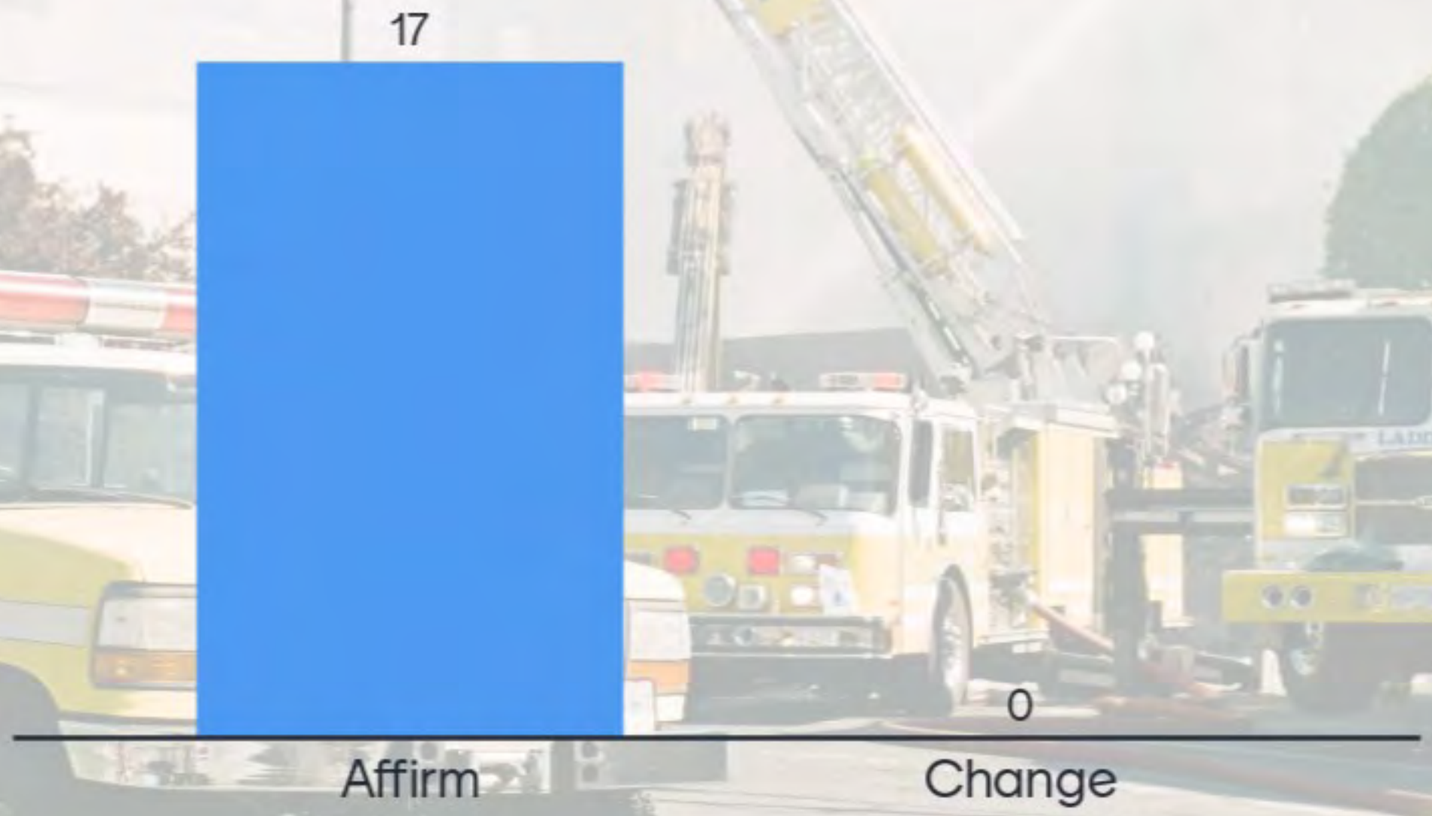

16

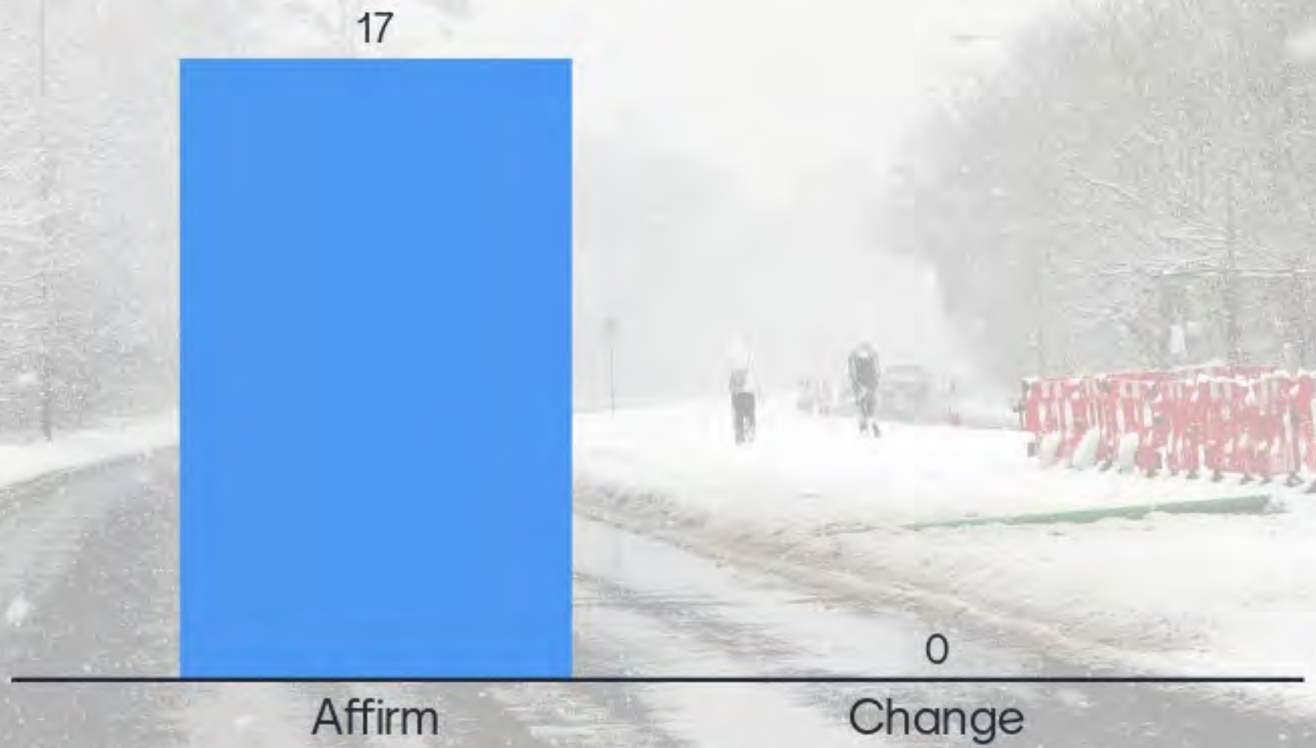

Goal 7: Protect the most vulnerable populations, buildings, infrastructure, and critical facilities through

Goal 8: Enhance emergency response during times of disaster.

Goal 9: Improve technical capability to respond to hazards and to improve the effectiveness of hazard mitigation actions.

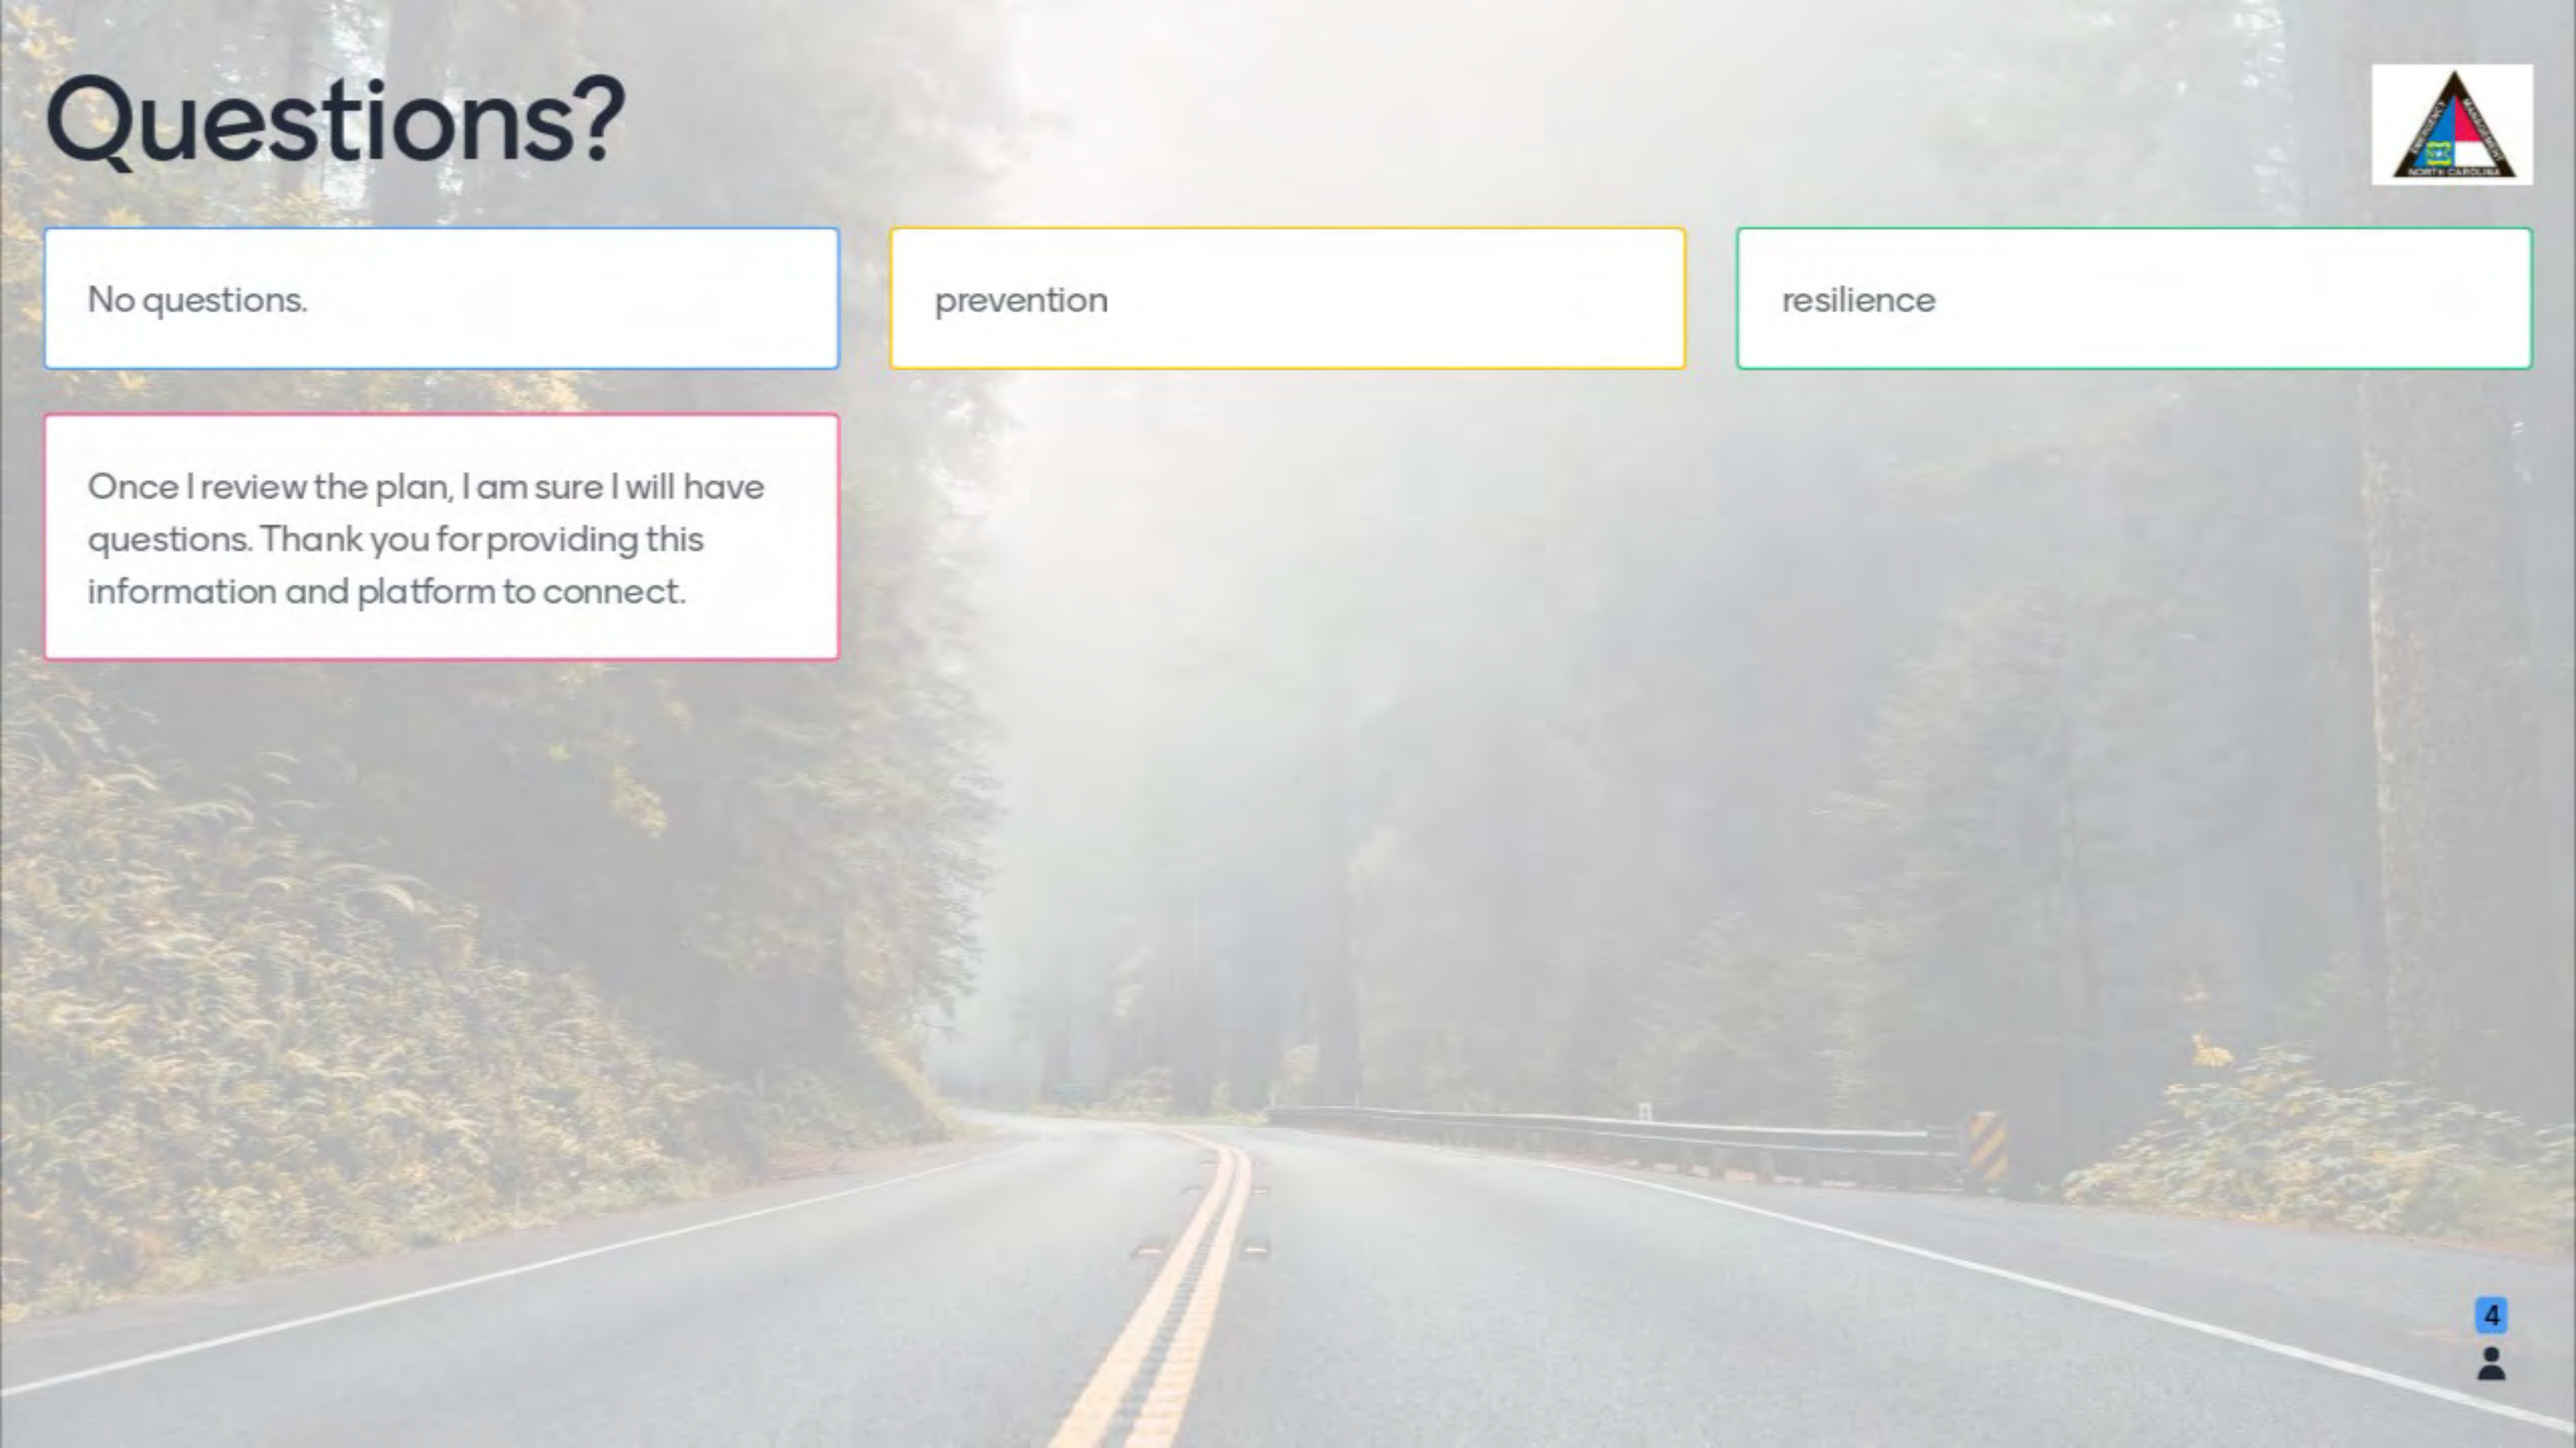

Questions?

No questions.

prevention

resilience

Once I review the plan, I am sure I will have questions. Thank you for providing this information and platform to connect.

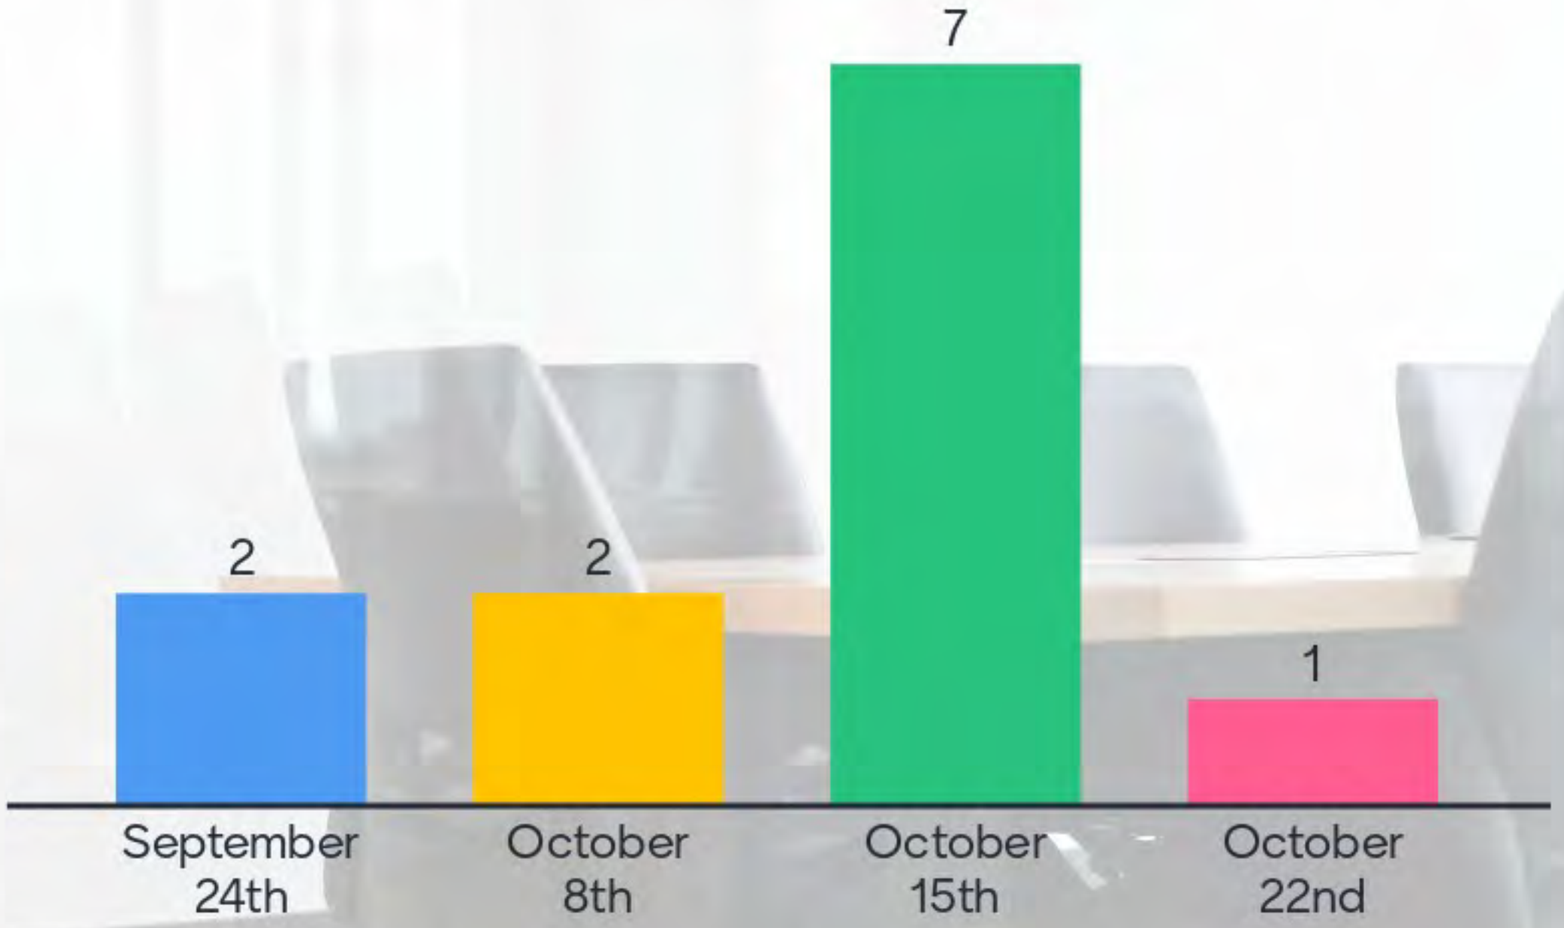

4

Please enter a word or phrase on what Hazard Mitigation means to you.

Which meeting date works best for you?

Tar River Regional Hazard Mitigation Plan Kickoff Meeting

Kelly Keefe – Lead Planner

Brent Edwards – Planner

McKenzie Houston – Coordinator

August 27, 2020

AECOM

Agenda

- Project Overview
- Capability Assessments
- Public Participation Survey
- Mitigation Goals
- Hazard Exercise
- Mitigation Actions
- Review of Final Draft
- Adoption Process
- Next Steps
- Open Discussion

Vision and Purpose

– Comprehensive hazard mitigation planning prepares a community to:

  – Protect lives and property
  – Avoid damages and save dollars
  – Reduce or eliminate future damages by guiding new development
  – Speed post-disaster recovery
  – Avoid interruptions caused by hazards

Mitigation Planning Cycle

AECOM

Where are we in Process?

- Initiated Kickoff Meeting
- Identified Planning Team
- Create initial DRAFT plan

➢Review Goals

➢Review Hazards

➢Discuss Actions

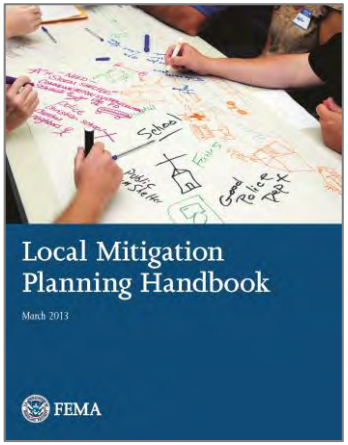

➢Discuss Capabilities

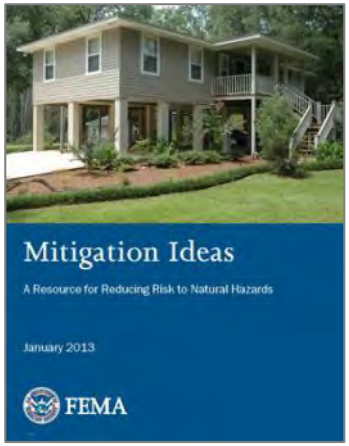

❖Provide Specific Comments

AECOM

Planning Resources

- FEMA planning guidance
  - *Local Mitigation Planning Handbook*
  - *Mitigation Ideas*
  - *Integrating Hazard Mitigation Into Local Planning*

AECOM

Project Overview

- Roles and responsibilities
  - AECOM
    - Oversee, manage and document the completion of all key project tasks
  - Lead County (Franklin County)
    - Serving as lead coordinating agency
    - Designation of local project manager
    - Assistance with the collection of documents, data and other information
    - Logistics for project meetings
    - Responding to general questions or inquiries from the public or stakeholders
    - Coordinating with participating jurisdictions

Project Overview

- Roles and responsibilities
  - All participating jurisdictions
    - Designate local jurisdiction lead
    - Attend Hazard Mitigation Planning Committee meetings
    - Coordination between counties, municipalities and local stakeholders
    - Data collection and information sharing
    - Mitigation strategy development (Mitigation Action Plans)
    - Assist with public outreach
    - Review and comment on draft plan materials
- Project website
- Responsiveness in light of aggressive schedule
- Participation is crucial!

AECOM

Capability Assessment

Capability Assessment Survey

- Planning and regulatory capability
- Administrative and technical capability
- Fiscal capability
- Education and outreach capability
- Political capability
- Self assessment

Local Capability Assessment Survey Methodology

- Point system for capability ranking
  - 0-29 points = Limited overall capability
  - 30-59 points = Moderate overall capability
  - 60-100 points = High overall capability

Public Outreach Strategy

Public Outreach Strategy

- Goals
  - Generate public interest
  - Solicit citizen input
  - Engage additional partners in the planning process
- Identification of specific opportunities for participation
  - In-person meetings
  - Project information website
  - Web-based survey(s)

Hazard Identification Exercise

Hazards Addressed

Go to www.menti.com and use code: 3189503

- Dam/Levee Failure
- Drought
- Earthquake
- Flood
- Extreme Heat
- Hurricane and Tropical Storm
- Nor'easter
- Thunderstorm, Lightning and Hail
- Tornado
- Wildfire
- Winter Weather

Hazard Identification Exercise Results

AECOM

Mitigation Strategy

Mitigation Strategy

- Strategies
- Goals
- Objectives
- Actions

Vision Statement

- Captures the overall purpose of the planning process
- Expresses the outcome that the participating jurisdictions seek to accomplish as the plan is implemented
- Helps drive the planning process
- Unites the planning team around a common purpose
- Provides a foundation for the rest of the planning process
- Communicates the reason for the plan to stakeholders, elected officials and the public

AECOM

Vision Statement

"Through a coordinated regional planning effort, create and implement an effective hazard mitigation plan that will identify and prioritize risk reduction measures for natural hazards in order to protect the health, safety, quality of life, environment, and economy of the Tar River area."

Goals

Go to www.menti.com and use code: 3189503

- Reduce the risk of loss of life and personal injury from natural hazards.
- Reduce the risk and impact of future natural disasters by regulating development in known high hazard areas and enhancing existing or creating new policies and ordinances that will help reduce the damaging effects of natural hazards and prevent vulnerability from increasing.
- Pursue funds to reduce the risk of natural hazards to existing developments where such hazards are clearly identified and the mitigation efforts are cost effective.
- Ensure that hazard mitigation is considered when redevelopment occurs after a natural disaster and expedite post-disaster reconstruction.
- Protect the public health, safety, and welfare by increasing public awareness of hazards, providing education on protection from hazards, and encouraging collective and individual responsibility for mitigating hazard risks.
- Protect the fragile natural and scenic areas of the region, particularly those areas that protect drinking water supplies.
- Protect the most vulnerable populations, buildings, infrastructure, and critical facilities through the implementation of cost-effective and technically feasible mitigation actions.
- Enhance emergency response during times of disaster.
- Improve technical capability to respond to hazards and to improve the effectiveness of hazard mitigation actions.

Mitigation Action Plans

Actions

- Discuss Actions
  - ? What is the status of completion?
  - ? Are there new actions to be added? (generators)
  - ? What is each action's priority? (High/Medium/Low)
  - ? What is action's funding source? (grants?)
  - ? What is each actions cost estimate?
  - ? What is each actions timeframe?
  - ? What is needed to complete the action? (funding/resources)

AECOM

Plan Maintenance Procedures

Plan Maintenance Questions

- What will be the schedule for any ongoing meetings of the HMPC, prior to the next 5-year plan update?
  - Annual meetings, bi-annual meetings, “as-needed” meetings, etc.
- To what extent will you seek to integrate the regional plan with other local plans, policies and programs?
  - Comprehensive plans, land use plans, emergency operations plans, etc.
- What other implementation strategies can you use?

AECOM

Draft Review

Adoption Process

Next Steps

- AECOM to receive information discussed to incorporate
- Create draft plan
- Discussion on next meeting and public meeting (in-person or virtual)

Questions?

Thank You!

When: Thursday, August 27, 2020 9:00 AM-11:00 AM (UTC-05:00) Eastern Time (US & Canada).

Where: Microsoft Teams (see body of email)

Good afternoon,

The counties of Franklin, Granville, Vance and Warren are beginning the process to update the existing Tar River Regional Hazard Mitigation Plan. The planning kick-off meeting is scheduled tomorrow Thursday, August

27th at 9am to 11am via Microsoft Teams. As part of this process and per FEMA regulations to include counties surrounding the planning area, we are we are extending an invitation to you to participate in the process.

Please see the message below for information to join the virtual kick-off meeting via Microsoft Teams.

Thank you,

Robin

You are receiving this invite because you have been identified as a local city/town official or key partner/stakeholder in the required 5 year update mitigation planning process.

The overall goal of this meeting is to:

* Reduce risk of people, property, and the critical infrastructure

* Increase public awareness and education about the plan and the planning process

* Maintain grant eligibility for participating, jurisdictions

* Maintain compliance with state and federal legislative requirements for local hazard mitigation plans

Each jurisdiction in the Tar River Region must be involved in the mitigation planning process and the plan has to be updated and approved by each jurisdiction every 5 years in order to receive some types of federal disaster funding.

Please consider participating (or delegate to someone in your agency to participate) in the meeting. If you would like to invite a subordinate or someone else in your agency, please let us know and we will add them to our future communications.

The agenda and PowerPoint draft are attached. We are looking forward to working with you!

If you have any questions, please feel free to reach out.

Thank you,

Brent, Kelly, & Mckenzie

Appendix H: CWPP's

The
Bunn Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/15/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: BUNN FD

DOI Number: NC10095047

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 52,412 **Number of Lots:** 9,574
Number of Structures: 5,228 **Percentage Residential:** 30%
Estimated Population Growth (next 30 Years): Low
Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: approximately 44 wildland fires per year
Common Causes: debris burning
Area of Future Concern:
Additional Comments: N/A
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: wood frame with asphalt shingles
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Lake Royale **Hazard Rating:** High

Latitude: 35.97220 **Longitude:** -78.20010 **Number of Homes:** 1,300 **Number of Lots:** 3,500

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** Property Owners Association

Address: 101 Cheyenne Drive

City: Louisburg **State:** NC **Zip Code:** 27549

Dominant Community Risk: one way in and one way out to this area
gated community with a security center
252-478-4121 is the phone number to the property owners association

Notes: has some available wet hydrants on the east side only. Has 2 dry hydrants located on the east and west side

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 52,412 **Number of Lots:** 9,574
Number of Structures: 5,228 **Percentage Residential:** 30%
Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: approximately 44 wildland fires per year
Common Causes: debris burning
Area of Future Concern:
Additional Comments: N/A
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: wood frame with asphalt shingles
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Lake Royale **Hazard Rating:** High

Latitude: 35.97220 **Longitude:** -78.20010 **Number of Homes:** 1,300 **Number of Lots:** 3,500

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** Property Owners Association

Address: 101 Cheyenne Drive

City: Louisburg **State:** NC **Zip Code:** 27549

Dominant Community Risk: one way in and one way out to this area
gated community with a security center
252-478-4121 is the phone number to the property owners association

Notes: has some available wet hydrants on the east side only. Has 2 dry hydrants located on the east and west side

Centerville Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/21/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: CENTERVILLE FD

DOI Number: NC10095100

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres:	25,935	**Number of Lots:**	125
Number of Structures:	6,800	**Percentage Residential:**	10%

Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency:	approximately 12 wildland fires per year
Common Causes:	debris burning
Area of Future Concern:	n/a
Additional Comments:	The district will remain very rural
Dominant Vegetation(Fuel Type):	10. Timber
Dominant Building Construction Type:	wood construction with asphalt shingles
Wildfire History or Fuel Type Notes:	wildland fire occurrence is fairly low

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** Twin Oaks **Hazard Rating:** Moderate

Latitude: 36.22373 **Longitude:** -78.27798 **Number of Homes:** 40 **Number of Lots:** 80

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: has 2 entrances/exits to this community
area is surrounded by forests and trailers
no contact information for this area of concern due to no homeowners association

Notes: this area has approximately 40 home with 40 undeveloped lots

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	10	Roof Composition	3	Placement of Utilities	5
Road Width	4	Fuel Clearance Zone	3	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	5	Total Number of Scoresheets Completed	1
Fire Service Access	0	Slope	1	Building Setback	3	Total Points	64
Fire Service Turnaround	0	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	0	Water Source Avail.	10		
				Organized Response	5		
				Fixed Fire Protection	5		

Action Items

Action	Category: Infrastructure Improvement	Planned Date	Completed Date	Activity to be Completed by
Add turn around places for equipment and apparatus at the end of each deadend road.		12/31/2016		private contractors or NCDOT

Notes:

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
provide public education program on wildland fire safety and prevention		12/31/2012		Epsom Fire Department and NCDFR

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Fireman's Day

Population Reached: all ages

Project Description: competition between departments, equipment on display, meals together, fire prevention brochures given out

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
continue to provide annual fire prevention programs during the fireman's day.	9/24/2011		Epsom Fire Department	Epsom Fire Department

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: PPE

Planning Office: Epsom Fire Department

Preparedness Need: Purchase pants, shirts, boots, hard hats, and gloves for all 30 responding members of the fire department.

Preparedness Action

Category Equipment Purchase

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Purchase personal protective equipment for use by the members of the department to respond to wildland fires.	12/31/2016		to be determined by the fire chief at a later date.	Epsom Fire Department

The
Epsom Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/15/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: EPSOM FD

DOI Number: NC10095329

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

Franklinton Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/21/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: FRANKLINTON

DOI Number: NC10095383

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 23,104 **Number of Lots:** 2,180
Number of Structures: 826 **Percentage Residential:** 20%
Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: approximately 15 wildland fires per year
Common Causes: debris burning
Area of Future Concern: N/A
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber

Dominant Building Construction Type: wood frame with asphalt shingles

Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Jordan School Road **Hazard Rating:** High

Latitude: 36.23475 **Longitude:** -78.23618 **Number of Homes:** 30 **Number of Lots:** 430

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: this area is a huge wooded area that has a very long road undeveloped lots is approximately 400

Notes: big woods owned by Butler Lumber Company

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3

All-Season Road Cond.	0	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	0	Total Points	96
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	5	Water Source Avail.	10		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
This area has a long road associated with it. In the event of an emergency make sure that the residents and the emergency responders are aware of this and can plan their attack strategy accordingly.	Other			Gold Sand Fire Department

Notes:

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
This area has a history for wildfires. Make the community aware of this risk and provide education on the prevention of wildfires during the annual firemans day.	Awareness	10/15/2011		Gold Sand Fire Department and NCDFR

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Fire Prevention Week **Population Reached:** school aged children

Project Description: During Fire Prevention Week the fire department goes to the elementary school and presents a program on fire safety and awareness, what to do in an emergency, and demonstrates some of the equipment that is used by the fire

departments

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	No	No	No	No	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
continue to provide this education on a yearly basis to the children as this is a valuable tool in fire prevention	10/15/2011		Gold Sand Fire Department	Gold Sand Fire Department

Notes:

---

2 Project Name: Open House

Population Reached: all ages

Project Description: the fire department hosts an open house with tours of the fire department, refreshments, handouts on fire prevention and tours of the equipment.

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
continue to host this annual day as this is an effective way to reach a diverse population and provide an informal way of fire safety education at a date to be determined by Gold Sand fire chief.			Gold Sand Fire Department	Gold Sand Fire Department

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: Building Improvement

Planning Office:

Preparedness Need: this fire department would benefit from an upgrade to its facilities by adding a service bay to house the type 6 engine that this department hopes to acquire in the near future.

Preparedness Action

Category Infrastructure Improvement

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
obtain funding to improve the fire station currently in use to serve the members and equipment more efficiently.	12/31/2016		to be determined at a later date by the fire chief.	Gold Sand Fire Department

Notes:

---

2 Preparedness Item: Equipment Purchase

Planning Office:

Preparedness Need: this fire department would benefit from the purchase of a type 6 engine to aid in the response to wildfires.

Preparedness Action

Category Equipment Purchase

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
purchase a type 6 engine.	12/31/2016		to be determined at later date by the fire chief.	Gold Sand Fire Department

Notes:

---

3 Preparedness Item: PPE

Planning Office:

Preparedness Need: Purchase pants, shirts, boots, hard hats and gloves for all 42 responding members of the fire department.

Preparedness Action

Category Equipment Purchase

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Purchase personal protective equipment for use by the mebers of the department to respond to wildland fires.	12/31/2016		to be determined at later date by the fire chief.	Gold Sand Fire Department

Comments: available 24 hours a day

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres:	31,783	**Number of Lots:**	2,500
Number of Structures:	900	**Percentage Residential:**	30%
Estimated Population Growth (next 30 Years):	Low		

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency:	approximately 9 wildland fires per year
Common Causes:	Debris burning
Area of Future Concern:	N/A
Additional Comments:	This fire district will remain very rural
Dominant Vegetation(Fuel Type):	10. Timber
Dominant Building Construction Type:	Wood frame with asphalt shingles
Wildfire History or Fuel Type Notes:	Wildland fire occurrence is very low

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Lake Royale **Hazard Rating:** High

Latitude: 35.97220 **Longitude:** -78.20010 **Number of Homes:** 1,300 **Number of Lots:** 3,500

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** Property Owners Association

Address: 101 Cheyenne Drive

City: Louisburg **State:** NC **Zip Code:** 27549

Dominant Community Risk: one way in and one way out to this area
gated community with a security center
252-478-4121 is the phone number to the property owners association

Notes: has some available wet hydrants on the east side only. Has 2 dry hydrants located on the east and west.

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3
Road Width	2	Fuel Clearance Zone	10	**Building Construction**		**Total**	
All-Season Road Cond.	2	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	2	Slope	4	Building Setback	3	Total Points	99
Fire Service Turnaround	1	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	9	Water Source Avail.	3		
				Organized Response	3		
				Fixed Fire Protection	5		

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
Create an emergency exit to this property for residents and responders.	Infrastructure Improvement	12/31/2016		property owners association

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Fire Prevention Week **Population Reached:** Elementary school children and Boy Scouts

Project Description: Justice Fire Department and White Level Fire Department present a program on fire safety education to the students at Edward Best Elementary school on fire prevention and safety.

Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/15/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: JUSTICE FD

DOI Number: NC10095570

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 40,896 **Number of Lots:** 13,632
Number of Structures: 4,346 **Percentage Residential:** 50%
Estimated Population Growth (next 30 Years): Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: approximately 13 wildland fires per year
Common Causes: debris burning
Area of Future Concern: N/A
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: wood frame with asphalt shingles
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Southwood **Hazard Rating:** High

Latitude: 36.06680 **Longitude:** -78.31100 **Number of Homes:** 25 **Number of Lots:** 35

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: access to this area is a risk due to narrow roads, and limited turn around areas. 2 buildings have already been burned.

The
Mitchiners Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/21/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: MITCHINERS CROSSROADS FD

DOI Number: NC10095730

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
provide public education program on wildland fire prevention and fire safety	Awareness	12/31/2011		Pilot Fire Department and NCDFR

Notes:

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
improve access to this area by creating turn arounds, having clearly marked and visible entrance/exit signs	Infrastructure Improvement	12/31/2016		private contractors or NCDOT

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Fireman's Day — Population Reached: all ages

Project Description: the fire department hosts an annual day for the community to come out and visit the fire station, tour the equipment, enjoy refreshments with the members of the department and receive educational materials on fire prevention and awareness

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
continue to host the annual fireman's day as this is a way for the department to reach out to the community in an informal way and teach fire safety.	10/1/2011		Pilot Fire Department	Pilot Fire Department

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: PPE

Planning Office:

Preparedness Need: Purchase pants, shirts, boots, hard hats, and gloves for all 40 responding members of the department.

Preparedness Action

Category Equipment Purchase

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Purchase personal protective equipment for use by the members of the department to respond to wildland fires.	12/31/2016		to be determined at a later date by the fire chief.	Pilot Fire Department

Pilot Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 10/21/2010

Prepared By: Morgan, Hagan, Bowyer and Williams

Organization: Woods Work, Inc.

Contact Information:

Address: 4213 Laurel Ridge Drive
Raleigh, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: PILOT FD

DOI Number: NC10095902

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 21,184 **Number of Lots:** 3,062
Number of Structures: 1,092 **Percentage Residential:** 20%
Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: approximatley 12 wildland fires per year
Common Causes: debris burning
Area of Future Concern: N/A

Additional Comments:

Dominant Vegetation(Fuel Type): 10. Timber

Dominant Building Construction Type: wood frame with asphalt shingles

Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Griffin Park **Hazard Rating:** High

Latitude: 36.15237 **Longitude:** -78.15554 **Number of Homes:** 4 **Number of Lots:** 20

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: this area has a lot of fire history. There are lots of young pine plantations surrounding this area.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	3	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	0	Total Points	88
Fire Service Turnaround	0	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	1	Water Source Avail.	10		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
widen the roads to this area to allow for the reponse of emergency equipment safely	Infrastructure Improvement	12/31/2016		property owners

Notes:

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
provide public education program on wildland fire prevention and safety and make the residents aware of the history of fire occurrence in this area.	Awareness	12/31/2011		White Level Fire Department and NCDFR

Notes:

2 Area Name: Carebridge **Hazard Rating:** High

Latitude: 36.15705 **Longitude:** -78.16030 **Number of Homes:** 10 **Number of Lots:** 20

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: number of undeveloped lots is 10
this is smoke sensitive area due to a rest home. It will take time to get the residents out.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

PLAN CONTENTS

1) Fire District, History and Pre-Attack Information

2) Fire District Base Map and Other Visual Aids

3) Recommendations and Action Items

4) Additional Comments

5) Attachments

All Longitude (-78.23456) and Latitude (35.23456) entries in this plan must be in decimal degrees with five degree points after the decimal.

Bullock Volunteer Fire Dept.

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Granville **County ID Number:** 039
PFD Name: Bullock Volunteer FD
PFD Latitude: 36.49072 **PFD Longitude:** -78.54475
PFD Street: 8677 Hwy 15 North
City: Bullock **State:** NC **Zip Code:** 27507
PFD Mailing Address (if different than Street Address): P.O. Box 366
City: Bullock **State:** NC **Zip Code:** 27507
PFD Phone Number: 919-690-1906 **PFD Fax Number:**
PFD Email Address: wnsievert@netscape.net
Ground Directions: From the intersection of NC 158 and Hwy 15, go North 11.4 miles on Hwy 15. Fire department is on the left just before Herbert Faucette Rd.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	20
Number Trained in Wildland Fire:	10	**Number Trained in Fire Prevention:**	0
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 1	Unit 151; pumper	1
Engine Type 1	Unit 150; pumper	1
Water Tender Type 3	Unit 153; tanker	1
Engine Type 6	Unit 156; brush	1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Bullock Volunteer Fire Department
ICP Latitude: 36.49072 **ICP Longitude:** -78.54475
ICP Street Address: 8677 Hwy 15 North
City: Bullock **State:** NC **Zip Code:** 27507
Paved Parking Acres: 0 **Unpaved Parking Acres:** 0 **Entrances:** 2
 # Buildings: 1 **Indoor Square Footage:** 2500
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From the intersection of NC 158 and Hwy 15, go North 11.4 miles on Hwy 15. Fire department is on the left just before Herbert Faucette Rd.
Comments: Meeting: 2nd Mondays @ 7pm

---

1 **Staging Area (SA):** Bullock: Grassy Creek Community Center
SA Latitude: 36.51213 **SA Longitude:** -78.62064
SA Street Address: 9100 Grassy Creek Rd

City: Bullock **State:** NC **Zip Code:** 27507
Paved Parking Acres: 0 **Unpaved Parking Acres:** 3 **Entrances:** 1
 # Buildings: 1 **Indoor Square Footage:** 2500
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From Herbert Faucette Rd, head North on Grassy Creek Rd (SR 1430) 0.5 miles. Community center drive is on the left just before bridge over Grassy Creek.

Comments:

---

1 **Nearest Medical Facility (NMF):** Granville Health System
NMF Latitude: 36.32653 **NMF Longitude:** -78.59361 **Phone Number:** (919) 690-3000
NMF Street Address: 1010 College St
City: Oxford **State:** NC **Zip Code:** 27565
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Heading North on Hwy 15 (SR 1500) from Oxford, go past Roxboro Rd. Hospital entrance is 0.25 miles on the right.

---

2 **Nearest Medical Facility (NMF):** UNC Hospital
NMF Latitude: 35.90458 **NMF Longitude:** -79.04869 **Phone Number:** (919) 966-4131
NMF Street Address: 101 Manning Drive
City: Chapel Hill **State:** NC **Zip Code:** 27514
Trauma Center Level: I ✔ **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton St. Take a left on Erwin Rd. Then turn right into the Emergency Department.

---

4 **Nearest Medical Facility (NMF):** Maria Parham Medical Center
NMF Latitude: 36.33143 **NMF Longitude:** -78.44926 **Phone Number:** (252) 438-4143
NMF Street Address: 566 Ruin Creek Road
City: Henderson **State:** NC **Zip Code:** 27536
Trauma Center Level: NA **Facility Has Burn Unit** **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Located at exit 212-Ruin Creek Road (SR 1128) off of interstate 85 in Henderson, NC.

Facility does have a helipad available.

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%
Average Road Grade: 0 - 9%
Maximum Road Grade: 10 - 19%
Maximum time to provide fire services to community: < 10 Minutes

AVIATION

Airport	Three Letter Designation	Degrees From ICP	Miles From ICP

Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No
Type: Dry Hydrant **Water Source Acess:** Private
Latitude: 36.51072 **Longitude:** -78.63673
Ground Directions: From Grassy Creek-Virgilina Rd (SR 1430), head South on Charlie Winston Rd. Pond access is 0.25 miles on right.
Located at 9157 Charlie Winston Rd.

Comments:

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 24,020 **Number of Lots:** 1,210
Number of Structures: 872 **Percentage Residential:** 60%
Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency:	8/yr.
Common Causes:	Debris burning, incendiary devices, and miscellaneous
Area of Future Concern:	NA
Additional Comments:	NA
Dominant Vegetation(Fuel Type):	9. Hardwood Litter
Dominant Building Construction Type:	NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes:	NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: George Ruff **Hazard Rating:** High

Latitude: 36.52859 **Longitude:** -78.59621 **Number of Homes:** 25 **Number of Lots:** 40

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Structure density is high with difficult access due to lack of turnarounds and narrow roads.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	8	Roof Composition	12	Placement of Utilities	3
Road Width	2	Fuel Clearance Zone	10	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	4	Slope	3	Building Setback	0	Total Points	80
Fire Service Turnaround	4	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	3	Miscellaneous	5	Water Source Avail.	3		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
Schedule a community meeting with residents at Bullock FD to make specific recommendations on road improvements.	Awareness	3/19/2014		NCFS & Bullock FD

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Annual fundraiser **Population Reached:** Bullock fire district residents

Project Description:

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Incorporate fire prevention literature in presentations via displays during the event.	7/4/2013			Bullock FD

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: Equipment Purchase

Planning Office: Bullock Fire Department

Preparedness Need: Outdated wildland gear and hose.

Preparedness Action

Category Equipment Purchase

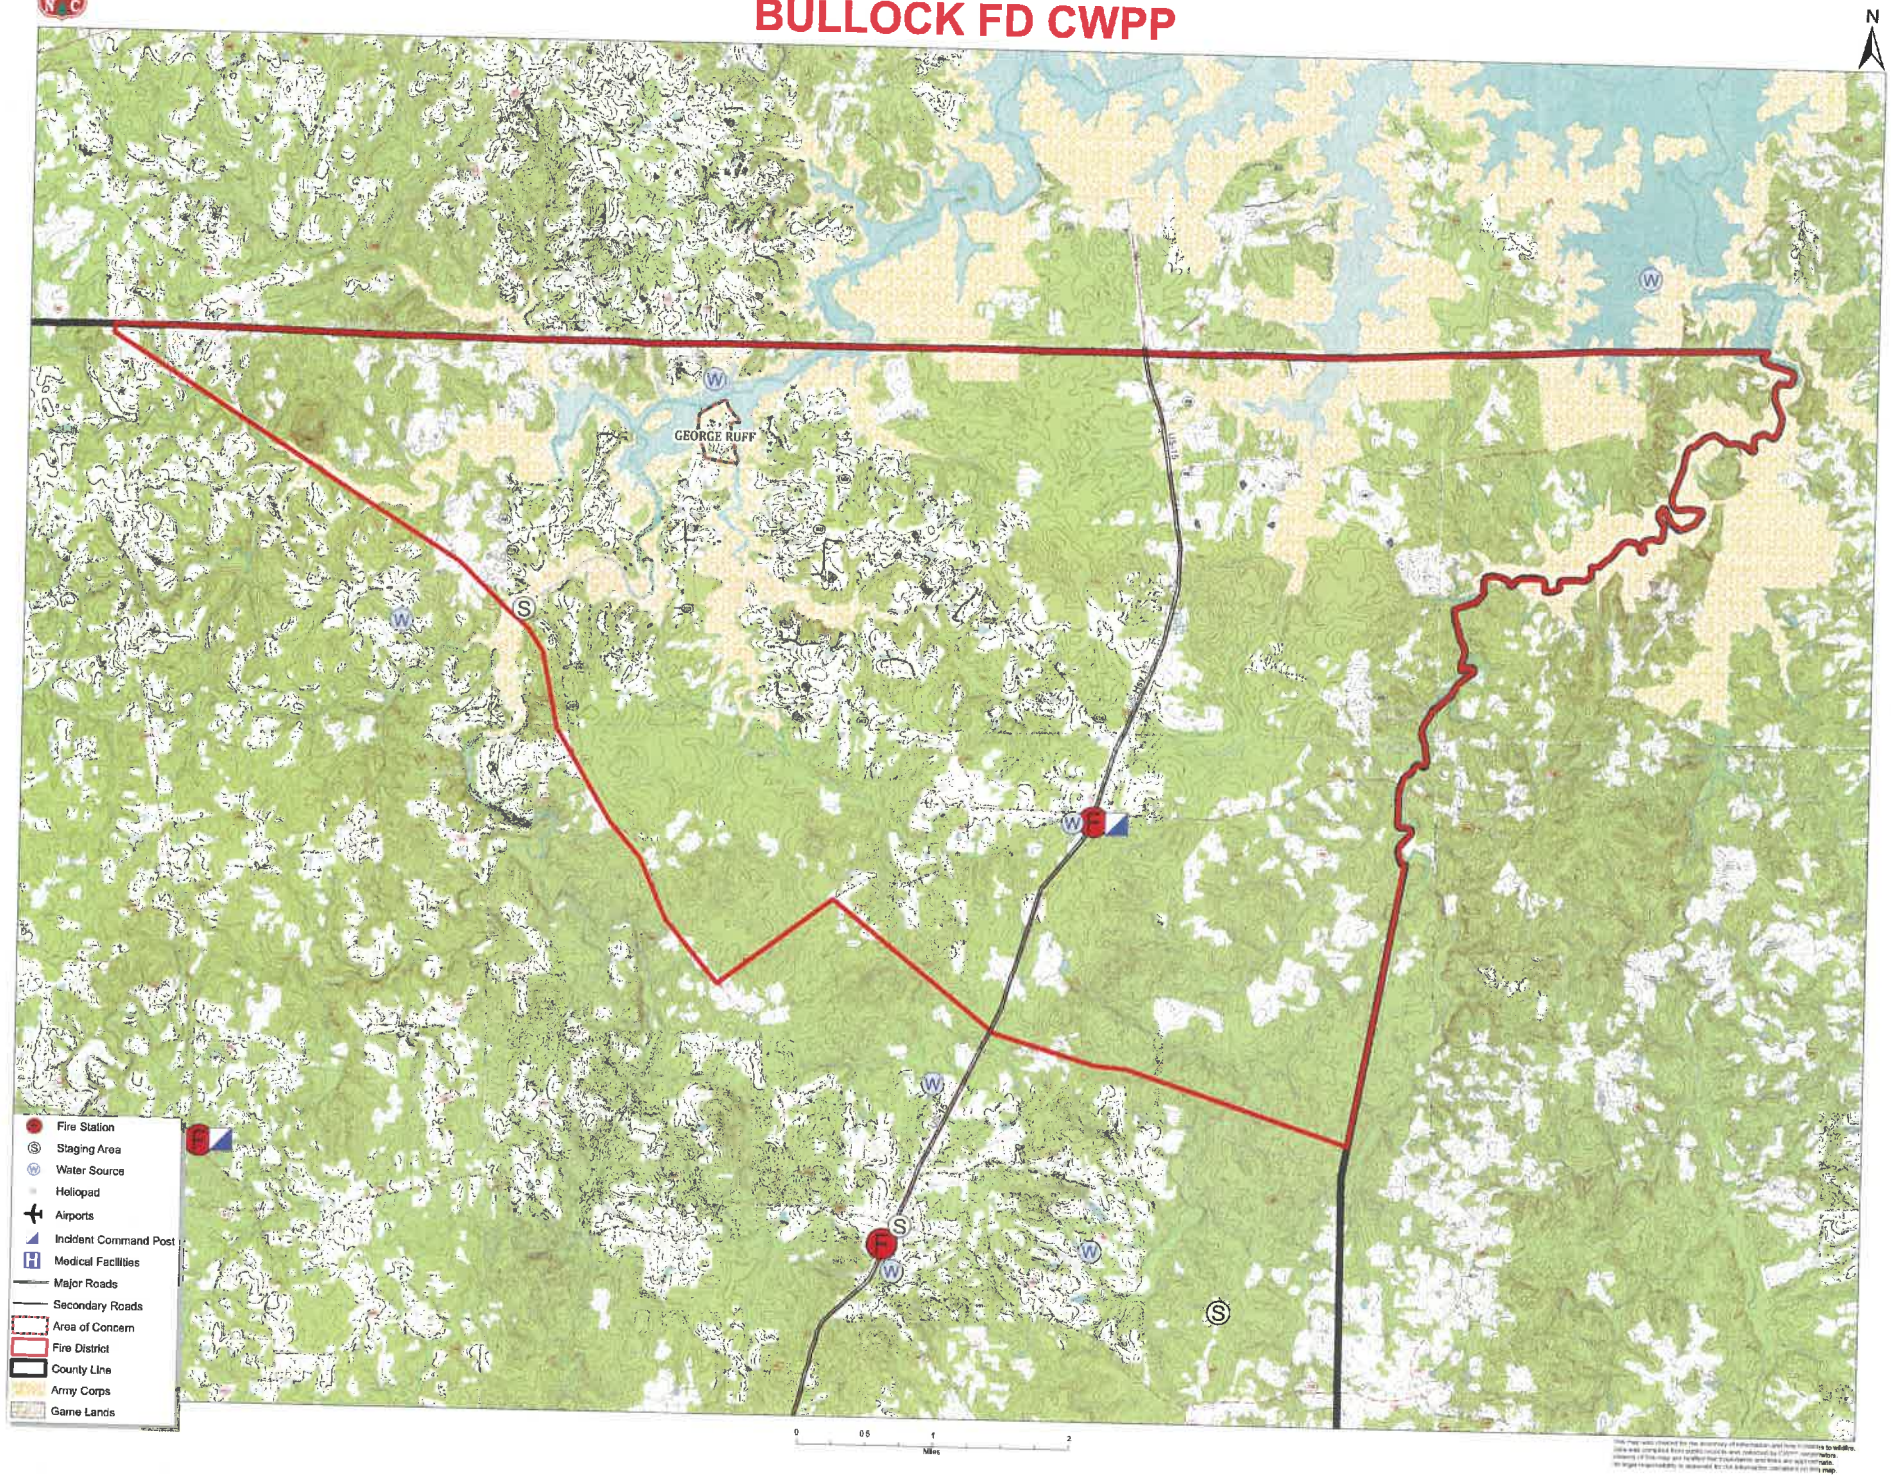

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Purchase 15 sets of wildland forestry nomex shirts and pants. Purchase 500 ft. of 1 inch NST flat forestry hose with 1 inch NST adjustable fog nozzles.	4/18/2013		To be determined	Bullock Fire Department

The
Brassfield Vol. Fire Dept.
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/31/2012

Prepared By: Granville County Ranger

Organization: North Carolina Forest Service

Contact Information:

Address: 5087 Herbert Henley Road
Oxford, NC 27565

Phone: 919-691-2227

E-Mail: rob.montague@ncagr.gov

Fax: NA

DOI Name: BRASSFIELD FD

DOI Number: NC10095025

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

Wildfire History or Fuel Type Notes: NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Nottingham

Latitude: 36.06917 **Longitude:** -78.61187 **Number of Homes:** 9 **Hazard Rating:** High

Dominant Fuel Type: 5. Brush **Community Contact Person:** NA **Number of Lots:** 100

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Forest encroachment near main access.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	5	Predominant Veg.	15	Roof Composition	10	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	15	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	4	Slope	1	Building Setback	0	Total Points	88
Fire Service Turnaround	5	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	2	Water Source Avail.	5		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
Cut back brush and trees from edge of roadway.	Fuel Reduction	3/27/2013		Residents

Notes:

2 Area Name: Willow Creek

Hazard Rating: High

Latitude: 36.04939 **Longitude:** -78.59998 **Number of Homes:** 120 **Number of Lots:** 140

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Mid-rotation pine forest fuels exist throughout residential areas.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities

5) Attachments

All Longitude (-78.23456) and Latitude (35.23456) entries in this plan must be in decimal degrees with five degree points after the decimal.

Corinth Volunteer Fire Department

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Granville **County ID Number:** 039
PFD Name: Corinth Volunteer FD
PFD Latitude: 36.21633 **PFD Longitude:** -78.58167
PFD Street: 3660 Hwy 96
City: Oxford **State:** NC **Zip Code:** 27565
PFD Mailing Address (if different than Street Address): 3678 Hwy 96
City: Oxford **State:** NC **Zip Code:** 27565
PFD Phone Number: 919-690-0808 **PFD Fax Number:** 919-690-0808
PFD Email Address: NA
Ground Directions: From Wilton/Hwy 56, head north on Hwy 96 (SR 1456). Fire department is 5.3 miles on the right across from Sam Usry Rd (SR 1618).

From I-85/Oxford, head south on Hwy 96 (SR 1456), station is 5.9 miles on left.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	28
Number Trained in Wildland Fire:	16	**Number Trained in Fire Prevention:**	0
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 6	Brush 46	1
Engine Type 2	Engine 43	1
Engine Type 1	Engine 41	1
Engine Type 1	Engine 40	1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Granville Cty Expo & Convention Center
ICP Latitude: 36.24616 **ICP Longitude:** -78.61668
ICP Street Address: 2185 US-15 South
City: Oxford **State:** NC **Zip Code:** 27565
Paved Parking Acres: 2 **Unpaved Parking Acres:** 3 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 30000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From I-85: facility is approximately 1.75 miles South on US-15 (SR 1500), on the right.
Comments: 919-693-5240
Serves as an ICP for Corinth FD and Providence FD

---

1 **Staging Area (SA):** Corinth: Granville Livestock Arena

SA Latitude: 36.24835 **SA Longitude:** -78.55357
SA Street Address: 4200 Cannady Mill Rd
City: Oxford **State:** NC **Zip Code:** 27565
Paved Parking Acres: 0 **Unpaved Parking Acres:** 5 **Entrances:** 1
 # Buildings: 2 **Indoor Square Footage:** 12500
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From Fairport Rd (SR 1613), head South on Cannadys Mill Rd (SR 1622). Entrance is 0.3 miles on left.
Comments: 919-693-6179

---

1 **Nearest Medical Facility (NMF):** Granville Health System
NMF Latitude: 36.32653 **NMF Longitude:** -78.59361 **Phone Number:** (919) 690-3000
NMF Street Address: 1010 College St
City: Oxford **State:** NC **Zip Code:** 27565
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Heading North on Hwy 15 (SR 1500) from Oxford, go past Roxboro Rd. Hospital entrance is 0.25 miles on the right.

---

2 **Nearest Medical Facility (NMF):** UNC Hospital
NMF Latitude: 35.90458 **NMF Longitude:** -79.04869 **Phone Number:** (919) 966-4131
NMF Street Address: 101 Manning Drive
City: Chapel Hill **State:** NC **Zip Code:** 27514
Trauma Center Level: I ✔ **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton St. Take a left on Erwin Rd. Then turn right into the Emergency Department.

---

4 **Nearest Medical Facility (NMF):** Maria Parham Medical Center
NMF Latitude: 36.33143 **NMF Longitude:** -78.44926 **Phone Number:** (252) 438-4143
NMF Street Address: 566 Ruin Creek Road
City: Henderson **State:** NC **Zip Code:** 27536
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☐ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Located at exit 212-Ruin Creek Road (SR 1128) off of interstate 85 in Henderson, NC.

Facility does have a helipad available.

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%
Average Road Grade: 0 - 9%
Maximum Road Grade: 0 - 9%
Maximum time to provide fire services to community: < 10 Minutes

AVIATION

Airport	Three Letter Designation	Degrees From ICP	Miles From ICP
Henderson-Oxford Airport	HNZ	0	0

Latitude: 36.36158 **Longitude:** -78.52916 ☑ **Has Fuel: Jet A** ☑ **Has Fuel: Aviation Gasoline**

Ground Directions: From I-85, take exit 206 (US Highway 158) toward Oxford. Follow US Highway 158 West, and bear right onto Tabbs Creek Rd. Bear right onto Salem Rd (SR 1522), and turn left onto Airport Rd.

Comments: This Airport is publicly owned by the Henderson-Oxford Airport Authority.
Runway dimensions: 5002' x 97'

6514 Airport Road
Oxford, NC 27565-6459

Managed by Mike Kellogg
919-693-5769

HELICOPTER LANDING ZONES

1 **Helispot:** Henderson-Oxford Airport-11,08,05 **Capacity:** Type 1 - 3
Latitude: 36.36169 **Longitude:** -78.52921
Ground Directions: 4 miles NE of Oxford, NC
Comments: Closed Thanksgiving and Christmas Day; attended from 0800-1800; Raleigh approach and departure of 132.35; managed by Mike Kellogg: 919-693-5769.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 0 - 24%

1 **Water Source:** Corinth: Bryan Pond Hydrant **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.22962 **Longitude:** -78.62237
Ground Directions: From intersection of Sam Ursy Rd and Hwy 15 (SR 1500).
Comments:

2 **Water Source:** Corinth: Joe Milton Pond **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.17502 **Longitude:** -78.57216
Ground Directions: From Corinth FD, head South on Hwy 96 (SR 1456). Turn left Cannady Mill Rd (SR 1632). Pond is 1/2 mile on the left.

Comments:

---

3 **Water Source:** Corinth: Land's Pond **Contact Telephone:** (919) 691-3445
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.21613 **Longitude:** -78.58857
Ground Directions: 0.4 mile to the west of Corinth Fire Department on Sam Usry Rd.

Comments: Contact: Robert Land (Chief)

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 24,482 **Number of Lots:** 1,416
Number of Structures: 1,085 **Percentage Residential:** 70%
Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 12/yr.
Common Causes: Debris burning, incendiary devices, and miscellaneous
Area of Future Concern: NA
Additional Comments: NA
Dominant Vegetation(Fuel Type): 9. Hardwood Litter
Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes: NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** Sandy Creek **Hazard Rating:** High
Latitude: 36.17082 **Longitude:** -78.57248 **Number of Homes:** 24 **Number of Lots:** 30
Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA
Address:
City: **State:** NC **Zip Code:**

Dominant Community Risk: Large, young pine forest located to the South of development
Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	6	Predominant Veg.	10	Roof Composition	10	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	9	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	0	Total Points	80
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	1	Water Source Avail.	10		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Fuel Reduction	Planned Date	Completed Date	Activity to be Completed by
Install pre-attack fire lines along north and east sides of adjacent pine stand.		4/17/2013		Landowners

Notes: Landowners are Glen and Jeff Preddy

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 38,429 **Number of Lots:** 1,883
Number of Structures: 1,461 **Percentage Residential:** 60%
Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 12/yr.
Common Causes: Debris burning, incendiary devices, and miscellaneous
Area of Future Concern: NA
Additional Comments: NA
Dominant Vegetation(Fuel Type): 9. Hardwood Litter
Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes: NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** Walnut Creek **Hazard Rating:** High
Latitude: 36.34252 **Longitude:** -78.75507 **Number of Homes:** 60 **Number of Lots:** 100
Dominant Fuel Type: 10. Timber **Community Contact Person:** NA
Address:
City: **State:** NC **Zip Code:**
Dominant Community Risk: In the back of the subdivision, roads become narrower; turnaround areas are inadequate.
Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	12	Roof Composition	10	Placement of Utilities	0
Road Width	4	Fuel Clearance Zone	10	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	0	Total Points	80
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	1	Miscellaneous	0	Water Source Avail.	9		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
Schedule a community meeting for specific recommendations on access limitations. Encourage residents to widen roads and install additional turnaround areas.		8/21/2013		NCFS or FD

Notes:

---

2 Area Name: Shelton Hills **Hazard Rating:** High

Latitude: 36.31588 **Longitude:** -78.72106 **Number of Homes:** 0 **Number of Lots:** 0

Dominant Fuel Type: 10. Timber **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Timber very close proximity to most homes; a lot of planted pines towards the back of the subdivision.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	12	Roof Composition	10	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	15	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	2	Building Setback	0	Total Points	88
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	2	Water Source Avail.	7		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
Schedule a meeting with community residents for specific recommendations on fire prevention techniques to employ around homes and landscaping.		9/18/2013		NCFS or FD

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Open house/fundaiser **Population Reached:** Berea fire district residents

Project Description: Annual fire department open house

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Incorporate additional fire prevention presentations such as Smokey the Bear and Smokehouse into existing steak supper fundraiser.	10/2/2013		Berea FD and NCFS personnel	

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: Purchase Brush Truck

Planning Office: Berea Fire Department

Preparedness Need: Outdated brush truck

Preparedness Action

Category Equipment Purchase

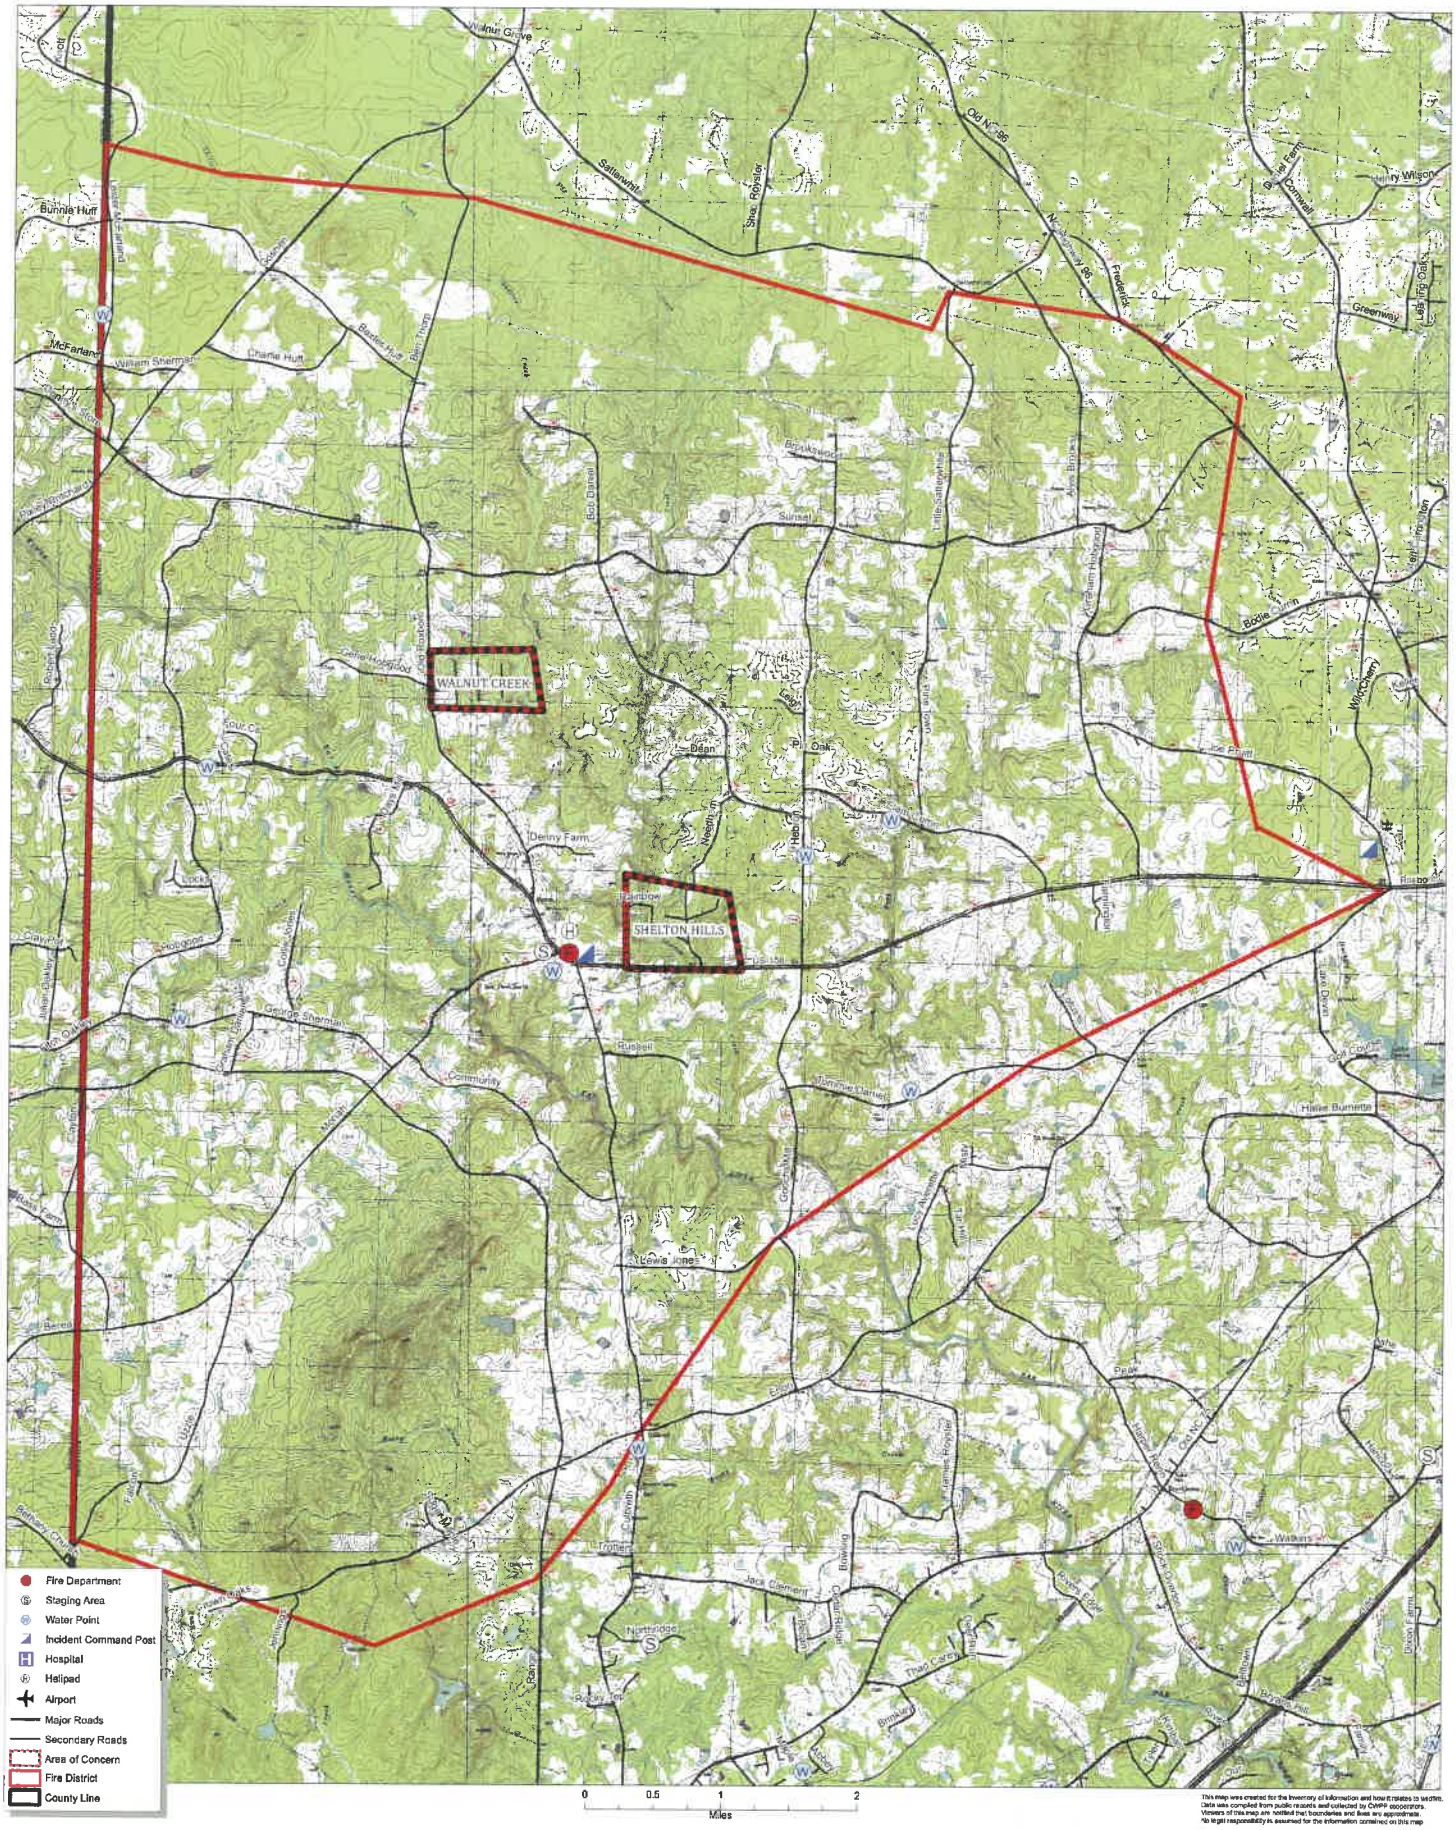

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Obtain an updated brush truck	4/13/2013		To be determined	Berea Fire Department

Notes: Fire department currently has limited funding for equipment purchases. A vehicle for wildland fire response would need to meet minimum Type VI engine standards.

The
Stovall Volunteer Fire Department
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/31/2012

Prepared By: Granville County Ranger

Organization: North Carolina Forest Service

Contact Information:

Address: 5087 Herbert Henley Rd
Oxford, NC 27565

Phone: 919-691-2227

E-Mail: rob.montague@ncagr.gov

Fax: NA

DOI Name: STOVALL

DOI Number: NC10096200

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

Stovall Volunteer Fire Department

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Granville **County ID Number:** 039
PFD Name: Stovall V.F.D.
PFD Latitude: 36.44559 **PFD Longitude:** -78.57181
PFD Street: 204 Hwy 15 N
City: Stovall **State:** NC **Zip Code:** 27582
PFD Mailing Address (if different than Street Address): P.O. Box 323
City: Stovall **State:** NC **Zip Code:** 27582
PFD Phone Number: 919-693-5290 **PFD Fax Number:** 919-693-6062
PFD Email Address: stovallfire@gmail.com
Ground Directions: From intersection of US-15 and Grassy Creek Rd (SR 1430), go South on US-15, 0.17 miles. Fire Deparment is on west side.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	24
Number Trained in Wildland Fire:	3	**Number Trained in Fire Prevention:**	0
Number Trained in Hazard Assessment:	1	**Number of Pick Up Firefighters**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 2	Unit 93	1
Engine Type 1	Unit 91	1
Engine Type 1	Unit 90	1
Engine Type 5	Unit 99	1
Engine Type 6	Unit 96	1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Stovall Volunteer Fire Department
ICP Latitude: 36.44555 **ICP Longitude:** -78.57162
ICP Street Address 204 Hwy 15 N
City: Stovall **State:** NC **Zip Code:** 27582
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 1
 # Buildings: 1 **Indoor Square Footage:** 3500
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From intersection of US-15 and Grassy Creek Rd (SR 1430), go South on US-15, 0.17 miles. Fire Deparment is on west side.
Comments: Small truck shed behind building; paved.

Meeting: 2nd and LAST Monday @ 7pm

1 **Staging Area (SA)** Stovall United Methodist Church
SA Latitude: 36.44751 **SA Longitude:** -78.56948
SA Street Address: 109 US Hwy 15
City: Stovall **State:** NC **Zip Code:** 27582
Paved Parking Acres: 1 **Unpaved Parking Acres:** 0 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 8000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: Going North on Hwy 15 (SR 1500), turn right on Main Street (SR 1430) at the flashing light. Entrance is the first driveway on the right.
Comments: Entrance off of Main St/Rockwell Rd (SR 1430); entrance also off of Gillis Street. *No heavy trucks.

---

2 **Staging Area (SA)** Stovall: Michael Creek Missionary Baptist Church
SA Latitude: 36.43903 **SA Longitude:** -78.52721
SA Street Address: 7683 John Penn Rd
City: Stovall **State:** NC **Zip Code:** 27582
Paved Parking Acres: 1 **Unpaved Parking Acres:** 1 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 9000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From US Hwy-15 (SR 1500) N, go 2.6 miles East on Main St/Rockwell Rd (SR 1430). Turn left onto John Penn Rd. Church is located 0.7 miles at the end of the paved portion of the road.
Comments: Good turn around

---

1 **Nearest Medical Facility (NMF):** Granville Health System
NMF Latitude: 36.32653 **NMF Longitude:** -78.59361 **Phone Number:** (919) 690-3000
NMF Street Address: 1010 College St
City: Oxford **State:** NC **Zip Code:** 27565
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Heading North on Hwy 15 (SR 1500) from Oxford, go past Roxboro Rd. Hospital entrance is 0.25 miles on the right.

---

2 **Nearest Medical Facility (NMF):** UNC Hospital
NMF Latitude: 35.90458 **NMF Longitude:** -79.04869 **Phone Number:** (919) 966-4131
NMF Street Address: 101 Manning Drive
City: Chapel Hill **State:** NC **Zip Code:** 27514
Trauma Center Level: I ☑ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton St. Take a left on Erwin Rd. Then turn right into the Emergency Department.

---

4 **Nearest Medical Facility (NMF):** Maria Parham Medical Center
NMF Latitude: 36.33143 **NMF Longitude:** -78.44926 **Phone Number:** (252) 438-4143
NMF Street Address: 566 Ruin Creek Road
City: Henderson **State:** NC **Zip Code:** 27536
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☐ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Located at exit 212-Ruin Creek Road (SR 1128) off of interstate 85 in Henderson, NC.

Facility does have a helipad available.

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%
Average Road Grade: 0 - 9%

HELICOPTER LANDING ZONES

1 **Helispot:** Henderson-Oxford Airport-11,08,05 **Capacity:** Type 1 - 3
Latitude: 36.36169 **Longitude:** -78.52921
Ground Directions: 4 miles NE of Oxford, NC

Comments: Closed Thanksgiving and Christmas Day; attended from 0800-1800; Raleigh approach and departure of 132.35; managed by Mike Kellogg: 919-693-5769.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 0 - 24%

1 **Water Source:** Granville Rural: Meadowview Memori **Contact Telephone:** (919) 691-3191
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Public (Restricted)
Latitude: 36.35438 **Longitude:** -78.59281
Ground Directions: From Oxford outer loop, head North on NC Hwy 15 (SR 1500) 1.25 miles. Turn left just past Sterl Carrington Rd. Stay to right. Pond access is on the NW side of cemetery.

Comments: Contact name: Bill Wilkerson

2 **Water Source:** Lake Devin **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Lake **Water Source Acess:** Public
Latitude: 36.30072 **Longitude:** -78.61899
Ground Directions: From Oxford, take Hillsboro St/Old NC 75 South. Turn right on Lake Devin Rd (SR 1164). Lake access is 0.3 miles on the right.

Comments: Used for Granville Rural FD & Oxford FD

3 **Water Source:** Sam Crews Pond **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No
Type: Dry Hydrant **Water Source Acess:** Private
Latitude: 36.36667 **Longitude:** -78.53861
Ground Directions: at 6549 Harold Obrien Rd, just south of Pleasants Rd.

Comments:

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres:	24,303	**Number of Lots:**	2,255
Number of Structures:	1,695	**Percentage Residential:**	60%

Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency:	13/yr.
Common Causes:	Debris burning, incendiary devices, and miscellaneous
Area of Future Concern:	NA
Additional Comments:	NA
Dominant Vegetation(Fuel Type):	9. Hardwood Litter
Dominant Building Construction Type:	NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes:	NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** Henry Wilson **Hazard Rating:** High
Latitude: 36.39573 **Longitude:** -78.59875 **Number of Homes:** 62 **Number of Lots:** 95
Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA
Address:
City: **State:** NC **Zip Code:**
Dominant Community Risk: Small developments adjacent to unmanaged cutovers
Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	5	Predominant Veg.	11	Roof Composition	10	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	12	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	8	Total Number of Scoresheets Completed	1
Fire Service Access	4	Slope	2	Building Setback	0	Total Points	79
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	1	Miscellaneous	4	Water Source Avail.	7		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
Schedule a meeting with community residents and present Firewise program information.		1/18/2013		NCFS or Granville Rural FD

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: NONE **Population Reached:**

Project Description:

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	No	No	No	No	No	No	No

Number of Structures: 1,797 **Percentage Residential:** 60%
Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 17/yr.
Common Causes: Debris burning, incendiary devices, and miscellaneous
Area of Future Concern: NA
Additional Comments: NA
Dominant Vegetation(Fuel Type): 9. Hardwood Litter
Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes: NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** Crosswinds/Seven Winds **Hazard Rating:** High
Latitude: 36.20572 **Longitude:** -78.68268 **Number of Homes:** 40 **Number of Lots:** 50
Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA
Address:
City: **State:** NC **Zip Code:**
Dominant Community Risk: Limited access, poor management, and houses in close proximity to fuels
Notes:

Butner Public Safety

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Granville **County ID Number:** 039
PFD Name: Butner Public Safety
PFD Latitude: 36.14001 **PFD Longitude:** -78.76485
PFD Street: 611 Central Avenue
City: Butner **State:** NC **Zip Code:** 27509
PFD Mailing Address (if different than Street Address): NA
City: NA **State:** NC **Zip Code:**
PFD Phone Number: 919-575-6561 **PFD Fax Number:** 919-575-6045
PFD Email Address: sstrickland@nccrimecontrol.org
Ground Directions: From Interstate 85, take exit 189, turn left on Gate #2 Rd (SR 1103), go 1.70 miles on left, near the intersection of F Street.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	47	**Number of Volunteer Firefighters:**	0
Number Trained in Wildland Fire:	8	**Number Trained in Fire Prevention:**	2
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 1	Ladder 1	1
Engine Type 1	Engine 2	1
Engine Type 1	Engine 1	1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Butner Public Safety
ICP Latitude: 36.14001 **ICP Longitude:** -78.76485
ICP Street Address: 611 Central Avenue
City: Butner **State:** NC **Zip Code:** 27509
Paved Parking Acres: 1 **Unpaved Parking Acres:** 0 **Entrances:** 2
 # Buildings: 1 **Indoor Square Footage:** 7500
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From Interstate 85, take exit 189, turn left on Gate #2 Rd (SR 1103), go 1.70 miles on left, near the intersection of F Street.
Comments: Full Time, M-F 8am- 5pm

2 **Incident Command Post (ICP):** Butner: National Guard Armory
ICP Latitude: 36.13046 **ICP Longitude:** -78.75547
ICP Street Address: 105 Central Ave
City: Butner **State:** NC **Zip Code:** 27509
Paved Parking Acres: 1 **Unpaved Parking Acres:** 1 **Entrances:** 2
 # Buildings: 1 **Indoor Square Footage:** 17000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From I-85, take exit 189. Head North on Gate #2 Rd (SR 1103). Cross A Street. Office is on left.

Comments:

---

1 **Staging Area (SA):** Butner: Sports Arena
SA Latitude: 36.14186 **SA Longitude:** -78.74974
SA Street Address: 24th Street
City: Butner **State:** NC **Zip Code:** 27509
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 1
 # Buildings: 0 **Indoor Square Footage:** 0
☐ **Utilities (Water/Sewer)** ☐ **Telephone Service** ☐ **Internet Service**
Ground Directions: Just North of the intersection of D St and 24th St.

Comments:

---

1 **Nearest Medical Facility (NMF):** Granville Health System
NMF Latitude: 36.32653 **NMF Longitude:** -78.59361 **Phone Number:** (919) 690-3000
NMF Street Address: 1010 College St
City: Oxford **State:** NC **Zip Code:** 27565
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Heading North on Hwy 15 (SR 1500) from Oxford, go past Roxboro Rd. Hospital entrance is 0.25 miles on the right.

---

2 **Nearest Medical Facility (NMF):** UNC Hospital
NMF Latitude: 35.90458 **NMF Longitude:** -79.04869 **Phone Number:** (919) 966-4131
NMF Street Address: 101 Manning Drive
City: Chapel Hill **State:** NC **Zip Code:** 27514
Trauma Center Level: I ✔ **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton St. Take a left on Erwin Rd. Then turn right into the Emergency Department.

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%
Average Road Grade: 0 - 9%
Maximum Road Grade: 0 - 9%
Maximum time to provide fire services to community: < 10 Minutes

AVIATION

Airport	Three Letter Designation	Degrees From ICP	Miles From ICP
Henderson-Oxford Airport	HNZ	0	0

Latitude: 36.36158 **Longitude:** -78.52916 ☑ **Has Fuel: Jet A** ☑ **Has Fuel: Aviation Gasoline**

Ground Directions: From I-85, take exit 206 (US Highway 158) toward Oxford. Follow US Highway 158 West, and bear right onto Tabbs Creek Rd. Bear right onto Salem Rd (SR 1522), and turn left onto Airport Rd.

Comments: This Airport is publicly owned by the Henderson-Oxford Airport Authority.

Private grass strip

HELICOPTER LANDING ZONES

1 **Helispot:** Butner: SGWSA Plant **Capacity:** Type 1 - 3
Latitude: 36.14195 **Longitude:** -78.76729

Ground Directions: From Hwy 56 (East C St.) head northwest on Central Avenue for 0.8 miles, bear left on Westbrook Dr and take an immediate left into the plant. Helispot is on the left.

Comments: Approximately 1/4 mile northwest of Butner Public Safety. Contact South Granville Water & Sewer Authority at 919-575-3367 for more information.

---

2 **Helispot:** Berea Fire Dept **Capacity:** Type 1 - 3

Latitude: 36.31467 **Longitude:** -78.73651

Ground Directions: From Oxford, take West 158 (SR 1194) 7.25 miles. Fire department is on the right.

Comments:

---

3 **Helispot:** Henderson-Oxford Airport-11,08,05 **Capacity:** Type 1 - 3

Latitude: 36.36169 **Longitude:** -78.52921

Ground Directions: 4 miles NE of Oxford, NC

Comments: Closed Thanksgiving and Christmas Day; attended from 0800-1800; Raleigh approach and departure of 132.35; managed by Mike Kellogg: 919-693-5769.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 25 - 49%

1 **Water Source:** Butner Beef Lab Pond **Contact Telephone:** (919) 471-6872

Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No

Type: Pond **Water Source Acess:** Public (Restricted)

Latitude: 36.16624 **Longitude:** -78.78441

Ground Directions: From Old NC 75, go North on Range Road (SR 1121). Pond is 1 mile on right.

Comments: Pond is gated.
Dean Askew - Superintendent
8800 Cassam Road
Bahama, NC 27503
dean_askew@ncsu.edu

---

2 **Water Source:** Butner Lake/Lake Holt **Contact Telephone:** (919) 575-3110

Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No

Type: Lake **Water Source Acess:** Public (Restricted)

Latitude: 36.17033 **Longitude:** -78.76605

Ground Directions: From. 33rd Street, cross Old Route 75/Butner Road (SR 1004). Bear right at fork, landing is 0.9 miles.

Comments: Contact: Bob Thompson

---

3 **Water Source:** Butner: National Guard **Contact Telephone:** (919) 575-5185

Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No

Type: Hydrant **Water Source Acess:** Private

Latitude: 36.17867 **Longitude:** -78.79716

Ground Directions: Intersection of Range Road (SR 1121) and Roberts Chapel Road (SR 1123)

Comments: Permission must be obtained from National Guard to use these hydrants.

Office: 105 Central Avenue
Butner, NC 27509

---

4 **Water Source:** Lake Rogers **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Lake **Water Source Acess:** Public
Latitude: 36.12906 **Longitude:** -78.70437
Ground Directions: From the intersection of Hwy 56 and Hwy 15 (SR 1500) in Creedmoor, head West on Hwy 56. Lake entrance is 0.9 miles on the right.
From I-85, take exit 191. Head East on Hwy 56. Lake entrance is 1.5 miles on the left.
<1711 Lake Rd (Hwy 56)>

Comments: Used for Creedmoor FD and Butner FD

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Action Items

Action	Category: Referral to Mitigation Program	Planned Date	Completed Date	Activity to be Completed by
Recommendation of prescribed burning		9/18/2013		NCFS

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Butner Fire Prevention **Population Reached:** Butner-Stem Elementary

Project Description: Fire prevention and safety education (during Fire Prevention Week - 2nd week in Oct.)

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	No	No	No	No	Yes	Yes	No

Community(s) Targeted (if applicable): Butner-Stem Elementary school students

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Fire prevention and safety education (during Fire Prevention Week - 2nd week in Oct.)	10/12/2011		N/A	Butner Public Safety & NCFS

Notes:

2 Project Name: Institution Education **Population Reached:** Murdoch Center & Central Regional Hospital

Project Description: Fire prevention education for institution residents and fire awareness for staff.

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	No	No	No

Community(s) Targeted (if applicable): Murdoch Center & Central Regional Hospital

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Educate residents and staff on fire prevention and awareness.	1/3/2012		N/A	Butner Public Safety

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: Purchase Brush Truck

Planning Office: Butner Public Safety

Preparedness Need: Current brush truck is not dependable

Preparedness Action

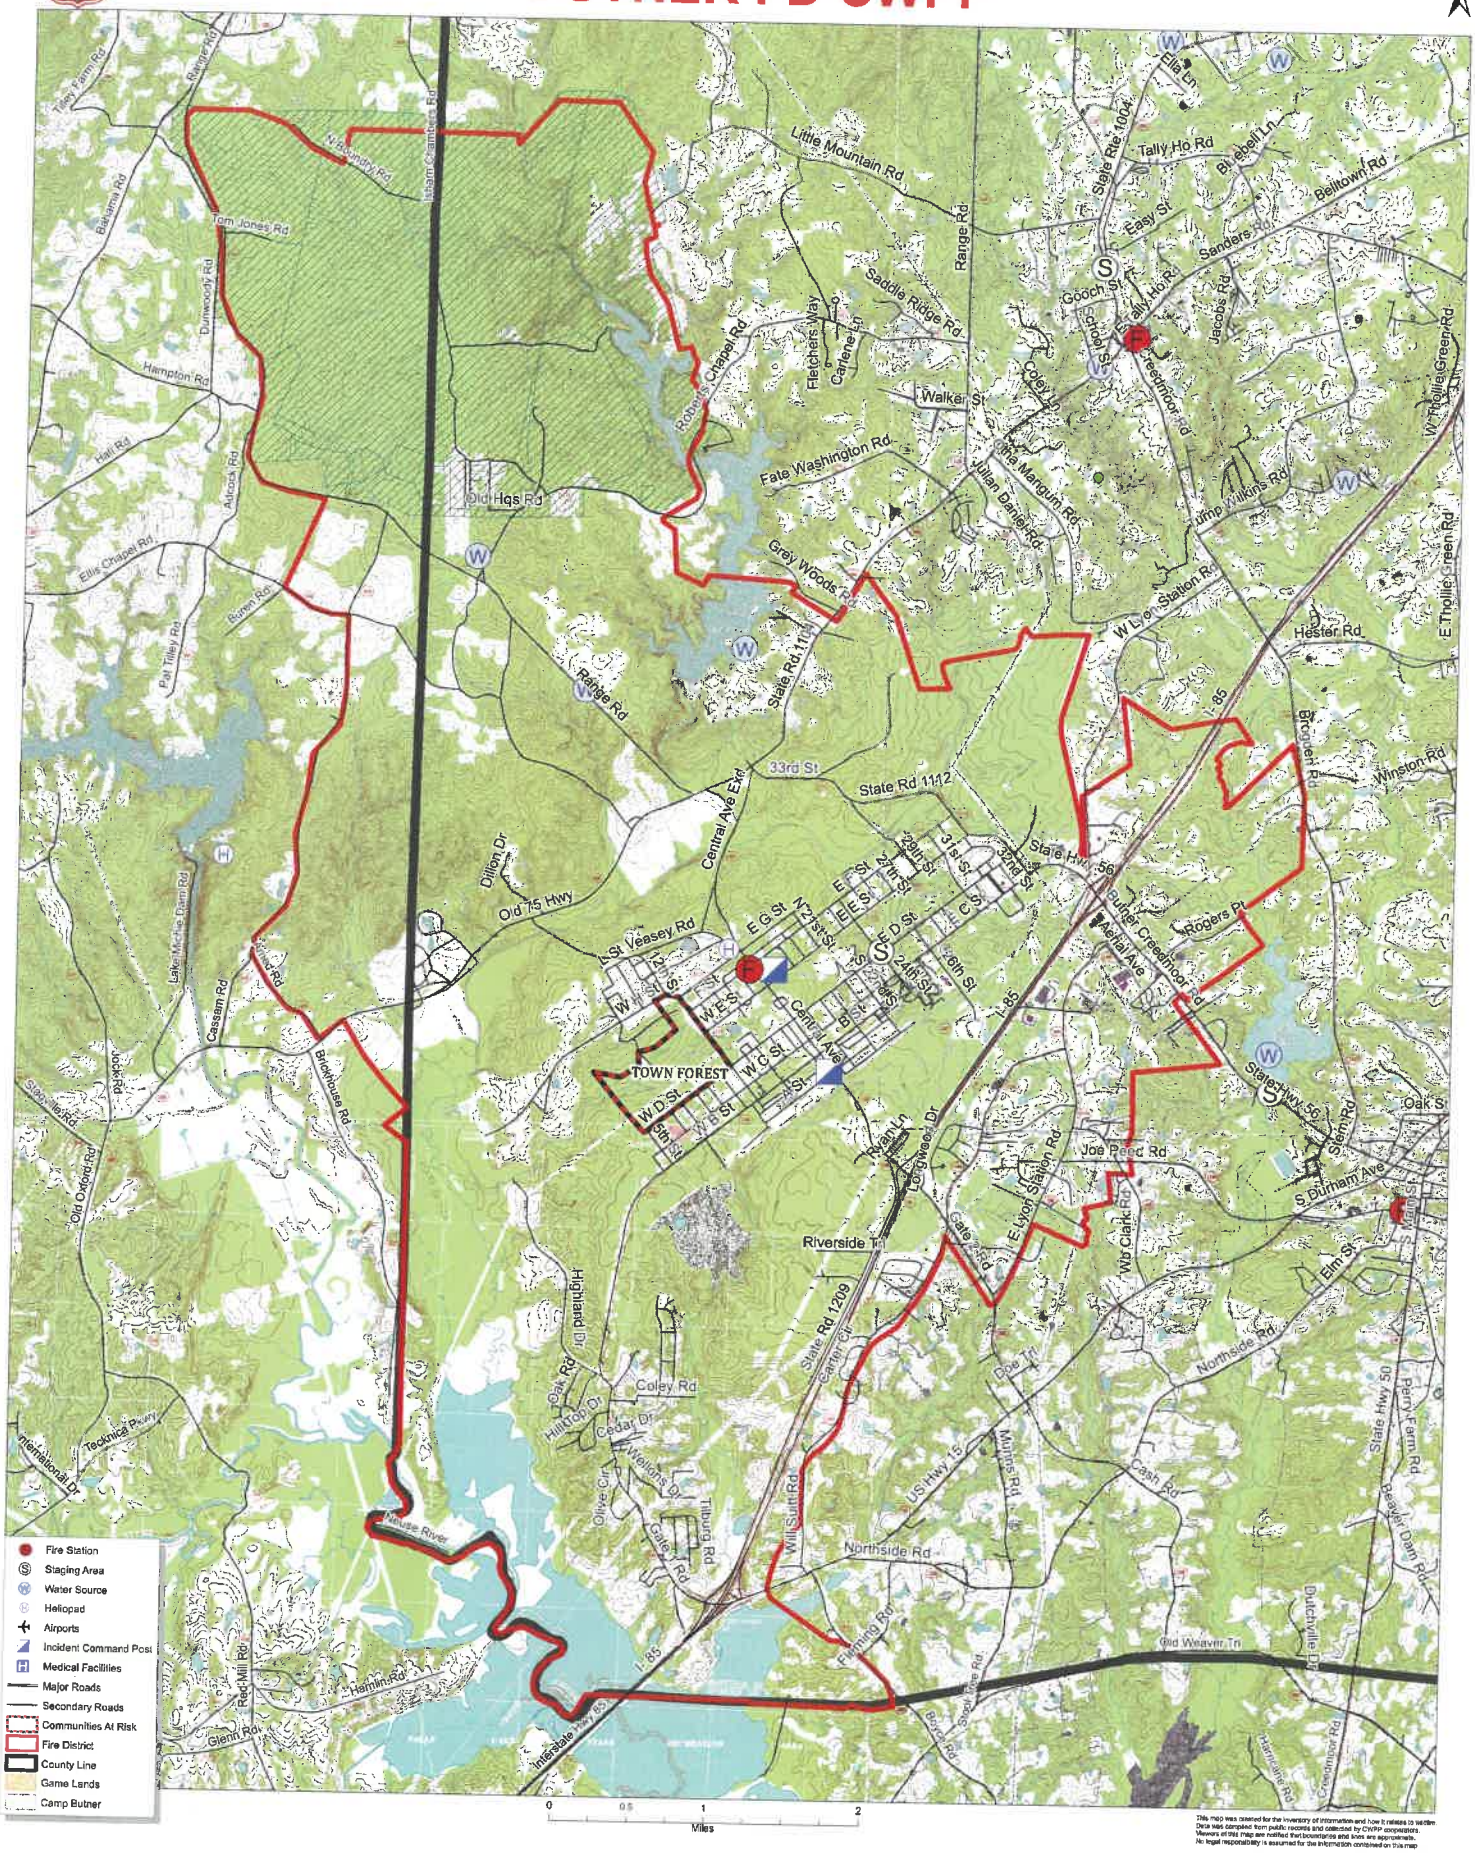

Category	Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Equipment Purchase	Obtain an updated brush truck.	9/18/2013		To be determined	Butner Public Safety

Notes: Fire department currently has limited funding for equipment purchases. A vehicle for wildland fire response would need to meet minimum Type VI engine standards.

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Granville County Emergency Management
ICP Latitude: 36.32612 **ICP Longitude:** -78.62899
ICP Street Address: 5662 Cornwall Rd
City: Oxford **State:** NC **Zip Code:** 27565
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 1
 # Buildings: 2 **Indoor Square Footage:** 3200
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From Oxford outer loop, head West on US-158/Roxboro Rd (SR 1194). Travel 0.7 miles. Turn right onto Cornwall Rd (SR 1300). Office is 0.25 miles on the right.
Comments: Granville Rural FD, Oxford FD, Total Community Fire Dept. of Berea, and Antioch-Fishing Creek FD will use this site.
919-603-1310

---

1 **Staging Area (SA):** Granville Athletic Park
SA Latitude: 36.26063 **SA Longitude:** -78.62319

SA Street Address: 4600 Belltown Rd
City: Oxford **State:** NC **Zip Code:** 27565
Paved Parking Acres: 2 **Unpaved Parking Acres:** 5 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 10000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From Oxford, head South on US-15 (SR 1500). Turn right on Belltown Rd, (SR 1133) just before I-85 interchange. Entrance is 1.25 miles on right.
Comments: Used for Oxford FD & Providence FD

---

2 **Staging Area (SA):** Granville Cty Expo & Convention Center
SA Latitude: 36.24616 **SA Longitude:** -78.61668
SA Street Address: 2185 US-15 South
City: Oxford **State:** NC **Zip Code:** 27565
Paved Parking Acres: 2 **Unpaved Parking Acres:** 3 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 30000
✔ **Utilities (Water/Sewer)** ✔ **Telephone Service** ✔ **Internet Service**
Ground Directions: From I-85: facility is approximately 1.75 miles South on US-15 (SR 1500), on the right.
Comments: 919-693-5240
Used for Providence FD & Oxford FD

---

1 **Nearest Medical Facility (NMF):** Granville Health System
NMF Latitude: 36.32653 **NMF Longitude:** -78.59361 **Phone Number:** (919) 690-3000
NMF Street Address: 1010 College St
City: Oxford **State:** NC **Zip Code:** 27565
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Heading North on Hwy 15 (SR 1500) from Oxford, go past Roxboro Rd. Hospital entrance is 0.25 miles on the right.

---

2 **Nearest Medical Facility (NMF):** UNC Hospital
NMF Latitude: 35.90458 **NMF Longitude:** -79.04869 **Phone Number:** (919) 966-4131
NMF Street Address: 101 Manning Drive
City: Chapel Hill **State:** NC **Zip Code:** 27514
Trauma Center Level: I ✔ **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton St. Take a left on Erwin Rd. Then turn right into the Emergency Department.

---

4 **Nearest Medical Facility (NMF):** Maria Parham Medical Center
NMF Latitude: 36.33143 **NMF Longitude:** -78.44926 **Phone Number:** (252) 438-4143
NMF Street Address: 566 Ruin Creek Road
City: Henderson **State:** NC **Zip Code:** 27536
Trauma Center Level: NA **Facility Has Burn Unit** **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: Located at exit 212-Ruin Creek Road (SR 1128) off of interstate 85 in Henderson, NC.

Facility does have a helipad available.

VEHICLE ACCESS

Roads Paved (Percentage): 100%

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 28,862 **Number of Lots:** 4,282

Number of Structures: 3,993 **Percentage Residential:** 70%

Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 20/yr.

Common Causes: Debris burning, incendiary devices, and miscellaneous

Area of Future Concern: NA

Additional Comments: NA

Dominant Vegetation(Fuel Type): 9. Hardwood Litter

Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles

Wildfire History or Fuel Type Notes: NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Davenport-Granville Subdivision **Hazard Rating:** Moderate

Latitude: 36.11075 **Longitude:** -78.69753 **Number of Homes:** 46 **Number of Lots:** 80

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Development is surrounded by a large, contiguous block of young pines.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	2	Predominant Veg.	12	Roof Composition	12	Placement of Utilities	0
Road Width	2	Fuel Clearance Zone	5	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	0	Slope	1	Building Setback	0	Total Points	56
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	3	Water Source Avail.	1		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Fuel Reduction	Planned Date	Completed Date	Activity to be Completed by
Installation of pre-suppression lines on southwest and northwest sides of development.		6/12/2013		NCFS or Private contractor

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Creedmoor Fire Prevention **Population Reached:** Creedmoor elementary school students

Project Description: Fire prevention and safety education (during Fire Prevention Week - 2nd week in Oct.)

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	No	No	No	No	Yes	Yes	No

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Fire prevention and safety education for Creedmoor elementary school students. (during Fire Prevention Week - 2nd week in Oct.)	8/14/2011		NA	NCFS & Creedmoor FD

Notes: During fire prevention wk (2nd wk in October)

D. PREPAREDNESS ACTIONS

1 Preparedness Item: Hose Purchase

Planning Office: Creedmoor Fire Department

Preparedness Need: Department is in need of additional hose.

Preparedness Action

Category	Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Equipment Purchase	Purchase 500 feet of 1 inch NST flat forestry hose with 1 inch adjustable fog nozzles.	5/23/2012		To be determined	Creedmoor Fire Department

Notes:

---

2 Preparedness Item: Wildland Fire Suppression Training

Planning Office: Granville County NCFS

Preparedness Need: Updated training

Preparedness Action

Category	Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Other	Wildland Fire Suppression Training		5/21/2014	NA	Granville County NCFS

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 28/yr.
Common Causes: Debris burning, incendiary devices, and miscellaneous
Area of Future Concern: NA

Additional Comments: NA

Dominant Vegetation(Fuel Type): 9. Hardwood Litter

Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles

Wildfire History or Fuel Type Notes: NA

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Cedar Ridge Farm **Hazard Rating:** High

Latitude: 36.24077 **Longitude:** -78.70641 **Number of Homes:** 35 **Number of Lots:** 45

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Poor landscaping practices around homes.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	10	Roof Composition	10	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	12	**Building Construction**		**Total**	
All-Season Road Cond.	3	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	2	Building Setback	0	Total Points	83
Fire Service Turnaround	4	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	1	Miscellaneous	1	Water Source Avail.	5		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
Disseminate wildland fire prevention literature to encourage creation of defensible space around homes.		8/21/2013		NCFS

Notes:

2 Area Name: Deer Run **Hazard Rating:** High

Latitude: 36.23906 **Longitude:** -78.68423 **Number of Homes:** 60 **Number of Lots:** 75

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Limited turnarounds

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/31/2012

Prepared By: Franklin County Ranger

Organization: North Carolina Forest Service

Contact Information:

Address: 2177 Fire Tower Road
Louisburg, NC 27549

Phone: 919-496-3665

E-Mail: franklin.ncfs@ncagr.gov

Fax: NA

DOI Name: EPSOM FD

DOI Number: NC10095329

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

HELICOPTER LANDING ZONES

1 **Helispot:** Henderson-Oxford Airport **Capacity:** Type 1 - 3
Latitude: 36.36158 **Longitude:** -78.52916
Ground Directions: From I-85, take exit 206 (US Highway 158) toward Oxford. Follow US Highway 158 West and bear right onto Tabbs Creek Road. Bear right onto Salem Road and then turn left onto Airport Road.
Comments: Look under the airports section of the CWPP for more detailed information on this airport.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 0 - 24%

1 **Water Source:** Kittrell: Herbie Grissom Pond **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.21812 **Longitude:** -78.44085
Ground Directions: From Kittrell FD, head East on Main St. Take first right onto N. Williams St/Oak

Ridge Chruch Rd (SR 1251/SR 1555). Travel 0.25 miles. Take a left into pond access.

Comments:

---

2 **Water Source:** Kittrell: Plank Chapel Pond **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.22301 **Longitude:** -78.39819
Ground Directions: From Kittrell FD, go East on Kittrell Rd (SR 1551). Turn left on Bobbitt Rd (SR 1550). Pond is 0.1 miles on the left.

Comments:

---

3 **Water Source:** Kittrell: Preston Floyd's Pond **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.22174 **Longitude:** -78.46918
Ground Directions: From Kittrell, go West on Kittrell College Rd. Turn left on Lynnbank Rd (1101). Road changes names to Beechtree Trl (SR 1104). Pond is behind house at mailbox 110.

Comments:

---

4 **Water Source:** South Lake **Contact Telephone:**
Uses: **Ground:** No **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Lake **Water Source Acess:** Private
Latitude: 36.25407 **Longitude:** -78.43612
Ground Directions: Ground access is very difficult at this lake. Consult with Kittrell Fire Department or Bear Pond Fire Department before attempting access. The lake is located on S. Lake Lodge Rd.

Comments:

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 20,220 **Number of Lots:** 1,734
Number of Structures: 1,762 **Percentage Residential:** 60%
Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 20/yr.
Common Causes: Debris burning, incendiary devices, and miscellaneous
Area of Future Concern: N/A
Additional Comments: N/A
Dominant Vegetation(Fuel Type): 9. Hardwood Litter
Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles

Wildfire History or Fuel Type Notes: N/A

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

1 Project Name: Egypt Mountain **Acres:** 0

Latitude: 36.17849 **Longitude:** -78.46001

Landowner Name: N/A

Planning Office: Landowner(s)

Dominant Fuel Type: 9. Hardwood Litter

Risks: Inaccessibility and difficult topography in large contiguous forest

Mitigation Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Recommend prescribed burning & road installation		3/20/2013	To be determined	NCFS

Notes:

---

2 Project Name: Tower Farm **Acres:** 200

Latitude: 36.19141 **Longitude:** -78.43711

Landowner Name: Preston Floyd

Planning Office: N/A

Dominant Fuel Type: 9. Hardwood Litter

Risks: Potentially destructive wildfire

Mitigation Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Prescribed burning	3/1/2012		N/A	Preston Floyd

Notes: Annual hazard reduction burning

B. COMMUNITIES AT RISK

1 Area Name: Lynnbank North **Hazard Rating:** High

Latitude: 36.22277 **Longitude:** -78.44160 **Number of Homes:** 85 **Number of Lots:** 110

Dominant Fuel Type: 10. Timber **Community Contact Person:** N/A

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Pine plantation to the south and pines in unmanaged fuel loads between houses

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	2	Predominant Veg.	12	Roof Composition	10	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	15	**Building Construction**		**Total**	
All-Season Road Cond.	4	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	3	Slope	2	Building Setback	0	Total Points	87
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	4	Water Source Avail.	10		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Referral to Mitigation Program	Planned Date	Completed Date	Activity to be Completed by
	Encourage landowner and offer cost share options for hazard reduction burning in timber stand found to the immediate south of community.	12/6/2012		NCFS

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: Kittrell Job Corps **Population Reached:** Kittrell residents

Project Description: Training in the use of fire extinguishers and home and workplace fire safety.

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	No	No	Yes	Yes	No	No	No

Community(s) Targeted (if applicable): NA

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Train Kittrell residents in the use of fire extinguishers and home and workplace fire safety.	6/18/2012		NA	Kittrell Fire Department

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: Wildland Fire Suppression Training

Planning Office: Vance County NCFS

Preparedness Need: Updated training

Preparedness Action

Category Other

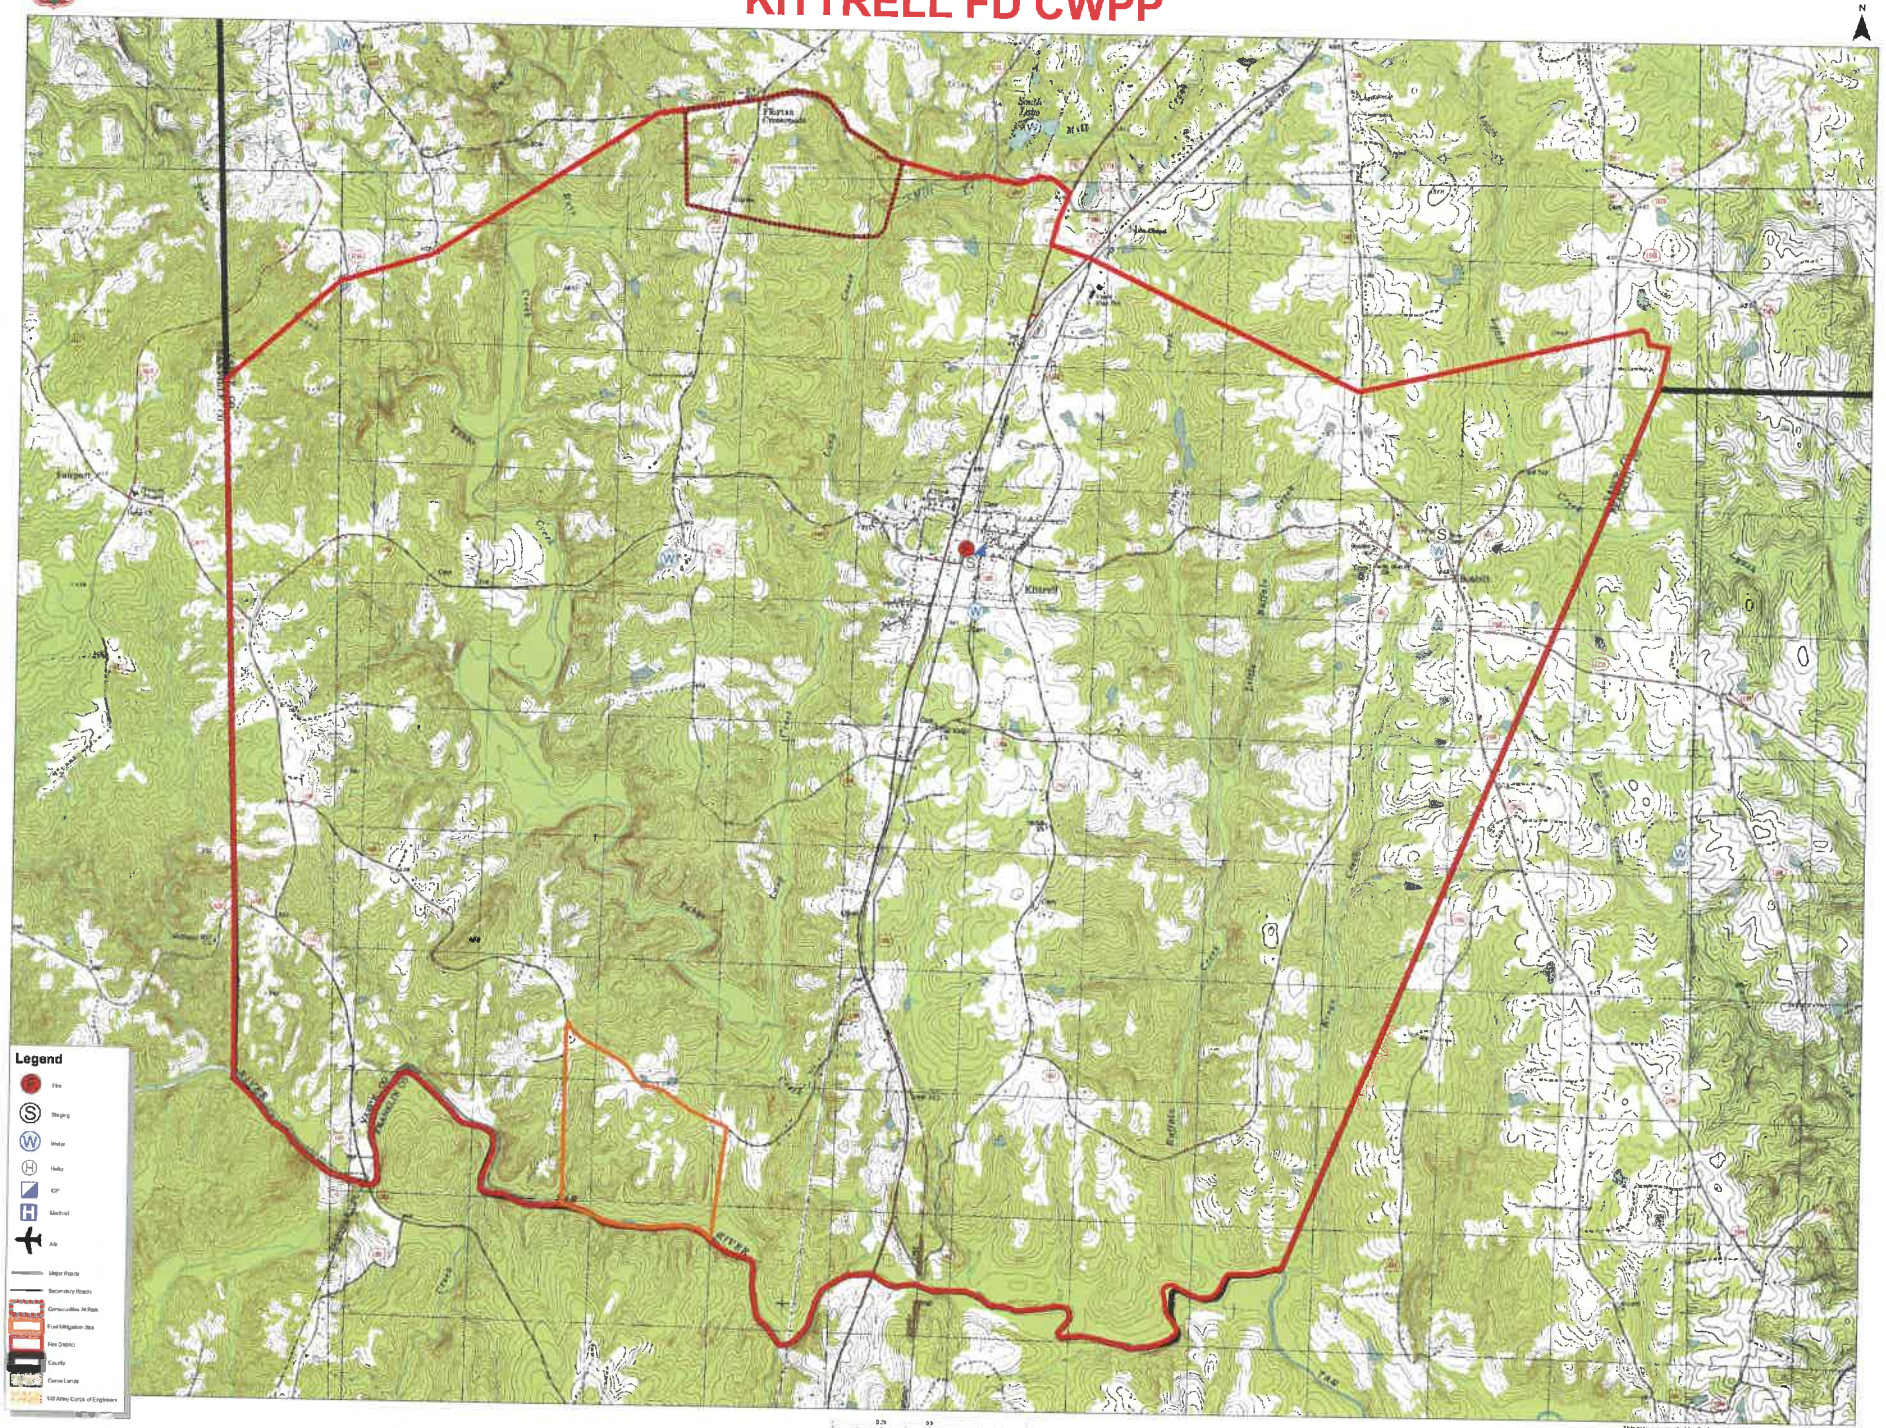

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Wildland Fire Suppression Training	2/28/2013	1/31/2015	N/A	Vance County NCFS

Cokesbury V.F.D.
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/31/2012

Prepared By: Vance County Ranger

Organization: North Carolina Forest Service

Contact Information:

Address: 3054 US 1/158 Highway
Henderson, NC 27536

Phone: 252-432-4270

E-Mail:

Fax: NA

DOI Name: COKESBURY FD

DOI Number: NC10095167

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

Cokesbury V.F.D.

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Vance **County ID Number:** 091
PFD Name: Cokesbury Volunteer Fire Department, Inc
PFD Latitude: 36.33637 **PFD Longitude:** -78.30209
PFD Street: 1516 S. Cokesbury
City: Henderson **State:** NC **Zip Code:** 27537
PFD Mailing Address (if different than Street Address): P.O. Box 1458
City: Henderson **State:** NC **Zip Code:** 27536
PFD Phone Number: 252-492-5667 **PFD Fax Number:** 252-738-0463
PFD Email Address: NA
Ground Directions: From U.S. 1, take Hwy. 39 South 0.25 miles. Turn left on Vicksboro Rd and go 4.25 miles. Turn left (North) on S. Cokesbury Rd (SR 1515). Fire dept. is 1.5 miles on the right.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	26
Number Trained in Wildland Fire:	3	**Number Trained in Fire Prevention:**	3
Number Trained in Hazard Assessment:	3	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 6	Brush 43	1
Water Tender Type 3	Tanker 42	1
Engine Type 2	Engine 41	1
Engine Type 1	Engine 40	1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Cokesbury Fire Department
ICP Latitude: 36.33637 **ICP Longitude:** -78.30209
ICP Street Address: 1516 S. Cokesbury
City: Henderson **State:** NC **Zip Code:** 27537
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 1
 # Buildings: 2 **Indoor Square Footage:** 2800
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From U.S. 1, take Hwy. 39 South 0.25 miles. Turn left on Vicksboro Rd and go 4.25 miles. Turn left (North) on S. Cokesbury Rd (SR 1515). Fire dept. is 1.5 miles on the right.
Comments: Outside cook shed present; meets on Tuesday nights (7 PM)

---

1 **Staging Area (SA):** Aycock Recreation Complex
SA Latitude: 36.32217 **SA Longitude:** -78.36227

SA Street Address: Carey Chapel Rd
City: Henderson **State:** NC **Zip Code:** 27537
Paved Parking Acres: 2 **Unpaved Parking Acres:** 2 **Entrances:** 1
 # Buildings: 2 **Indoor Square Footage:** 6000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: From Cokesbury FD go South on Cokesbury Rd (SR 1515). Turn West on Vicksboro Rd. Go North on Cary Chapel Rd (SR 1519). Turn left at second entrance. From US-1, head East on Vicksboro Rd. Turn North on Cary Chapel Rd. Entrance is on the left.
Comments: Behind Aycock Elementary School
Used for Cokesbury FD and Henderson FD

---

2 **Staging Area (SA):** Cokesbury Fire Department
SA Latitude: 36.31959 **SA Longitude:** -78.34399
SA Street Address: 1516 S. Cokesbury
City: Henderson **State:** NC **Zip Code:** 27537
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 1
 # Buildings: 2 **Indoor Square Footage:** 2800
✔ **Utilities (Water/Sewer)** ✔ **Telephone Service** ✔ **Internet Service**
Ground Directions: From U.S. 1, take Hwy. 39 South 0.25 miles. Turn left on Vicksboro Rd and go 4.25 miles. Turn left (North) on S. Cokesbury Rd (SR 1515). Fire dept. is 1.5 miles on the right.

Trauma Center Level: I ✔ **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton Street. Take a left on Erwin Road. Then turn right into the Emergency Department.

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%
Average Road Grade: 0 - 9%
Maximum Road Grade: 0 - 9%
Maximum time to provide fire services to community: < 10 Minutes

AVIATION

Airport	Three Letter Designation	Degrees From ICP	Miles From ICP

Henderson-Oxford Airport HNZ 0 0

Latitude: 36.36158 **Longitude:** -78.52916 ☑ **Has Fuel: Jet A** ☑ **Has Fuel: Aviation Gasoline**

Ground Directions: From I-85, take exit 206 (US Highway 158) toward Oxford. Follow US Highway 158 West and bear right onto Tabbs Creek Road. Bear right onto Salem Road and then turn left onto Airport Road.

Comments: This Airport is publicly owned by the Henderson-Oxford Airport Authority
6514 Airport Road
Oxford, NC 27565-6459

Runway dimensions are: 5002' x 97'

Managed by Mike Kellogg
919-693-5769

HELICOPTER LANDING ZONES

1 **Helispot:** Henderson-Oxford Airport **Capacity:** Type 1 - 3

Latitude: 36.36158 **Longitude:** -78.52916

Ground Directions: From I-85, take exit 206 (US Highway 158) toward Oxford. Follow US Highway 158 West and bear right onto Tabbs Creek Road. Bear right onto Salem Road and then turn left onto Airport Road.

Comments: Look under the airports section of the CWPP for more detailed information on this airport.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 0 - 24%

1 **Water Source:** Watkins: Barnett Pond **Contact Telephone:**

Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No

Type: Pond **Water Source Acess:** Private

Latitude: 36.25969 **Longitude:** -78.49945

Ground Directions: From Watkins FD, head South on Horeseshoe Bend Rd (SR 1122)to stop sign. Turn left on Old Watkins Rd (SR 1110). Go 0.75 miles. Turn left on Community House Rd (SR 1107). Travel 0.4 miles, paved entrance driveway #2425 is on the right, just past BL Harris Rd.

Comments:

---

2 **Water Source:** Watkins: Vance-Granville Community **Contact Telephone:** (252) 492-2061

Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No

Type: Hydrant **Water Source Acess:** Public (Restricted)

Latitude: 36.32468 **Longitude:** -78.49079

Ground Directions: From I-85, take exit 209 to Poplar Creek Rd (SR 1126). Destination will be 0.1 miles on the right at Community College Rd.

Comments: Large pond at the back of the property could be used as a water source with a long draft tube. The use will be difficult due to steep banks.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres:	13,844	**Number of Lots:**	1,565
Number of Structures:	1,556	**Percentage Residential:**	60%

Estimated Population Growth (next 30 Years): Low

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: 11/yr.

Common Causes: Debris burning, incendiary devices, and miscellaneous

Area of Future Concern: N/A

Additional Comments: N/A

Dominant Vegetation(Fuel Type): 9. Hardwood Litter

Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles

Wildfire History or Fuel Type Notes: N/A

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Stratford Hills **Hazard Rating:** High

Latitude: 36.32865 **Longitude:** -78.48291 **Number of Homes:** 90 **Number of Lots:** 150

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** N/A

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Landscaping techniques have resulted in forest litter concentrations between residential properties.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	12	Roof Composition	15	Placement of Utilities	0

The
Townsville V.F.D.
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/31/2012

Prepared By: Vance County Ranger

Organization: North Carolina Forest Service

Contact Information:

Address: 3054 US 1/158 Highway
Henderson, NC 27536

Phone: 252-432-4270

E-Mail:

Fax: NA

DOI Name: TOWNSVILLE FD

DOI Number: NC10096251

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

PLAN CONTENTS

1) Fire District, History and Pre-Attack Information
2) Fire District Base Map and Other Visual Aids
3) Recommendations and Action Items
4) Additional Comments
5) Attachments

All Longitude (-78.23456) and Latitude (35.23456) entries in this plan must be in decimal degrees with five degree points after the decimal.

Townsville V.F.D.

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Vance **County ID Number:** 091
PFD Name: Townsville Volunteer Fire Department
PFD Latitude: 36.49552 **PFD Longitude:** -78.42091
PFD Street: 12729 NC 39 N.
City: Henderson **State:** NC **Zip Code:** 27537
PFD Mailing Address (if different than Street Address): P.O. Box 2
City: Townsville **State:** NC **Zip Code:** 27584
PFD Phone Number: 252-430-1445 **PFD Fax Number:** 252-738-0480
PFD Email Address: NA
Ground Directions: Fire Dept is on Hwy 39 North, 12 miles from Henderson on the left, next to Tungsten Mine Rd (SR 1348).

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	29
Number Trained in Wildland Fire:	1	**Number Trained in Fire Prevention:**	12
Number Trained in Hazard Assessment:	1	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Water Tender Type 2	Tanker 33	1
Engine Type 1	Engine 32	1
Engine Type 1	Engine 31	1
Engine Type 6	Squad 30	1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** Townsville Rural Volunteer Fire Department
ICP Latitude: 36.49552 **ICP Longitude:** -78.42091
ICP Street Address: 12729 NC 39 N.
City: Henderson **State:** NC **Zip Code:** 27537
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 5100
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: Fire Dept is on Hwy 39 North, 12 miles from Henderson on the left, next to Tungsten Mine Rd (SR 1348).
Comments: Meets on Tuesday nights (7 PM); large field to the west of the building

---

1 **Staging Area (SA):** Townsville: Henderson Point
SA Latitude: 36.53361 **SA Longitude:** -78.34426
SA Street Address: 1429 Reverend Henderson Rd.

City: Henderson **State:** NC **Zip Code:** 27537
Paved Parking Acres: 2 **Unpaved Parking Acres:** 0 **Entrances:** 1
 # Buildings: 1 **Indoor Square Footage:** 3700
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**

Ground Directions: From Henderson, travel on Hwy 39 N, go 13.5 miles to Rockspring Church Rd (SR 1356), take right onto Reverend Henderson Rd (SR 1359). Staging area is at the end of the road.

Comments: Army Corp of engineers property managed by the NC Division of Parks and Recreation; all paved - approximately 80-90 spaces

Community Building with an entrace also, adress for that building: 1469 Reverend Henderson Rd, Henderson

*concerns with pavement damage (previous use by Townsville Fire Dept lead to the parking lot needing to be repaved)

---

2 **Staging Area (SA):** Townsville: Hibernia Point
SA Latitude: 36.50359 **SA Longitude:** -78.37659
SA Street Address: Hibernia Rd
City: Townsville **State:** NC **Zip Code:** 27584
Paved Parking Acres: 2 **Unpaved Parking Acres:** 0 **Entrances:** 1
 # Buildings: 0 **Indoor Square Footage:** 0
✓ **Utilities (Water/Sewer)** ✓ **Telephone Service** ✓ **Internet Service**

Ground Directions: From exit 214 on I-85, travel 12.5 miles North on Hwy 39. Turn right onto Hibernia Rd (SR 1347). Boat ramp is at the end of the first road to the right before the state park entrance.

Comments:

---

3 **Staging Area (SA):** Townsville: Old school
SA Latitude: 36.49677 **SA Longitude:** -78.41691
SA Street Address: See comments
City: Townsville **State:** NC **Zip Code:** 27584
Paved Parking Acres: 0 **Unpaved Parking Acres:** 2 **Entrances:** 2
 # Buildings: 3 **Indoor Square Footage:** 10000
Utilities (Water/Sewer) **Telephone Service** **Internet Service**

Ground Directions: From Townsville FD, go North on Hwy. 39. Go 0.1 miles. The school will be on the left.

Comments: Across from the intersection of NC Hwy 39 and Townsville Landing Rd.

---

1 **Nearest Medical Facility (NMF):** Maria Parham Medical Center
NMF Latitude: 36.33143 **NMF Longitude:** -78.44926 **Phone Number:** (252) 438-4143
NMF Street Address: 566 Ruin Creek Road
City: Henderson **State:** NC **Zip Code:** 27536
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☐ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)

Ground Directions: Located at exit 212-Ruin Creek Road (SR 1128) off of interstate 85 in Henderson, NC.

Facility does have a helipad available.

---

2 **Nearest Medical Facility (NMF):** UNC Hospital
NMF Latitude: 35.90458 **NMF Longitude:** -79.04869 **Phone Number:** (919) 966-4131
NMF Street Address: 101 Manning Drive
City: Chapel Hill **State:** NC **Zip Code:** 27514
Trauma Center Level: I ✔ **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: I-85 South to 15/501 South to Manning Drive.

The activation line for UNC Aircare is 919-966-4131 (Flightwatch).

---

3 **Nearest Medical Facility (NMF):** Duke University Medical Center
NMF Latitude: 36.00819 **NMF Longitude:** -78.93728 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 Erwin Rd
City: Durham **State:** NC **Zip Code:** 27710
Trauma Center Level: I **Facility Has Burn Unit** ✔ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: From I-85, take Exit 174-B (Hillandale Road - SR 1321). Turn left and the road becomes Fulton Street. Take a left on Erwin Road. Then turn right into the Emergency Department.

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres:	5,274	**Number of Lots:**	8,611
Number of Structures:	7,722	**Percentage Residential:**	70%
Estimated Population Growth (next 30 Years):	Low		
Majority Population is Full-Time:	Yes	NA	**If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Moderate

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency:	35/yr.
Common Causes:	Debris burning, incendiary devices, and miscellaneous
Area of Future Concern:	N/A
Additional Comments:	N/A
Dominant Vegetation(Fuel Type):	9. Hardwood Litter
Dominant Building Construction Type:	NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes:	N/A

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: Oxford Road **Hazard Rating:** Moderate

Latitude: 36.31446 **Longitude:** -78.42024 **Number of Homes:** 225 **Number of Lots:** 200

Dominant Fuel Type: 9. Hardwood Litter **Community Contact Person:** NA

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Development planning has created increased wildfire hazard potential due to proximity of homes to forestland.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	4	Predominant Veg.	10	Roof Composition	12	Placement of Utilities	3
Road Width	2	Fuel Clearance Zone	7	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	7	Total Number of Scoresheets Completed	1
Fire Service Access	3	Slope	1	Building Setback	0	Total Points	63
Fire Service Turnaround	4	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	2	Miscellaneous	3	Water Source Avail.	1		
				Organized Response	1		
				Fixed Fire Protection	3		

Action Items

Action	Category:	Planned Date	Completed Date	Activity to be Completed by
Schedule a meeting with community residents to present wildfire hazard information and make specific recommendations to reduce hazards for individual landowners. Encourage community to consider installation of turnarounds and culdesacs.	Awareness	5/23/2013		NCFS or Henderson FD

Notes: Young unmanaged forest is found immediately south of residencies. Multiple dead end streets in close proximity to contiguous forest land.

C. FIRE PREVENTION PROGRAMS

1 Project Name: Henderson Fire Prevention **Population Reached:** Henderson City/Vance County residents

Project Description: Education in child safety, fire safety and prevention

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable): Civic centers, schools, senior groups, and youth groups

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Education in child safety and fire safety and prevention for Henderson City and Vance county residents.	10/11/2011		NA	Henderson FD & NCFS

Notes:

Ground Directions: At the intersection of Drewry Rd (SR 1200) and Kimball Pt (SR 1204) travel west on SR 1204 approximately 1.75 miles and turn right onto boat ramp road.

Comments: This is part of lake gaston and is a public access point to the lake.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 13,174 **Number of Lots:** 1,183
Number of Structures: 690 **Percentage Residential:** 70%
Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: No data reported
Common Causes: Debris burning, incendiary devices, and miscellaneous
Area of Future Concern: N/A
Additional Comments: N/A
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: NFPA 220 Type V Construction - Conventional wood frame structure, wood or vinyl siding, asphalt shingles
Wildfire History or Fuel Type Notes: N/A

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

1 Project Name: Kimbell Point **Acres:** 25

Latitude: 35.84087 **Longitude:** -78.70330

Landowner Name: State of North Carolina

Planning Office: NCFS and NC Dept. of Parks and Recreation

Dominant Fuel Type: 8. Closed Timber Litter

Risks: Fuel loading in the public park and campground sites

Mitigation Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Install permanent fire breaks around the campgrounds	12/31/2016		ARRA	NC State Parks

Notes:

B. COMMUNITIES AT RISK

1 Area Name: Wilson Brothers **Hazard Rating:** Moderate

Latitude: 36.49015 **Longitude:** -78.33974 **Number of Homes:** 140 **Number of Lots:** 200

Dominant Fuel Type: 10. Timber **Community Contact Person:** N/A

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: Scattered fuels near structures

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

The
Goldenbelt: Vance Cty Fire & EMS
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/31/2012

Prepared By: Vance County Ranger

Organization: North Carolina Forest Service

Contact Information:

Address: 3054 US 1/158 Highway
Henderson, NC 27536

Phone: 252-432-4270

E-Mail:

Fax: NA

DOI Name: GOLDEN BELT FD

DOI Number: NC10095428

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

NORLINA VFD

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Warren **County ID Number:** 093
PFD Name: NORLINA VFD
PFD Latitude: 36.44576 **PFD Longitude:** -78.19595
PFD Street: 102 CENTER STREET
City: NORLINA **State:** NC **Zip Code:** 27563
PFD Mailing Address (if different than Street Address): PO BOX 606
City: NORLINA **State:** NC **Zip Code:** 27563
PFD Phone Number: 252-456-3650 **PFD Fax Number:** 252-456-3605
PFD Email Address: norlinafire@centurylink.net
Ground Directions: LOCATED ON US HIGHWAY #1 IN NORLINA APPROXIMATELY 0.1 MILE NORTH FROM INTERSECTION WITH HIGHWAY 158.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	25
Number Trained in Wildland Fire:	0	**Number Trained in Fire Prevention:**	25
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Generator (< 25 KW)		3
Rescue Vehicle		0
Suburban	FOR COMMAND AND PERSONNEL	1
Generator (> 26 KW)	LOCATED ON CRASH TRUCK (RESCUE VEHICLE)	1
Engine Type 1		3

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** NORLINA VFD
ICP Latitude: 36.44576 **ICP Longitude:** -78.19595
ICP Street Address: 102 CENTER STREET
City: NORLINA **State:** NC **Zip Code:** 27563
Paved Parking Acres: 1 **Unpaved Parking Acres:** 0 **Entrances:** 2
 # Buildings: 2 **Indoor Square Footage:** 9300
☐ **Utilities (Water/Sewer)** ☐ **Telephone Service** ☐ **Internet Service**
Ground Directions: LOCATED ON US HIGHWAY #1 IN NORLINA APPROXIMATELY 0.1 MILE NORTH FROM THE INTERSECTION WITH HIGHWAY 158

1 **Staging Area (SA):** COMMUNITY POOL
SA Latitude: 36.45161 **SA Longitude:** -78.19937
SA Street Address: TERRELL STREET
City: NORLINA **State:** NC **Zip Code:** 27563
Paved Parking Acres: 0 **Unpaved Parking Acres:** 1 **Entrances:** 1
 # Buildings: 1 **Indoor Square Footage:** 7000
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: FROM THE FIRE STATION TURN SOUTH ON US HIGHWAY 1 AND TRAVEL 2 BLOCKS. TURN RIGHT ON TERRELL STREET. TRAVEL TO THE END OF THIS ROAD.
Comments: THIS IS THE SITE OF THE COMMUNITY POOL.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 50 - 74%

1 **Water Source:** NORLINA WATER POINT **Contact Telephone:**

Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No

Type: Pond **Water Source Acess:** Private

Latitude: 36.44800 **Longitude:** -78.21233

Ground Directions: FROM NORLINA TRAVEL SOUTH APPROXIMATELY 0.4 MILES AND TURN RIGHT (NORTH) ONTO STATE ROUTE 1231. TRAVEL APPROXIMATELY 0.3 MILES AND TURN LEFT ONTO FARM ROAD. TRAVEL APPROXIMATELY 0.25 MILES AND TURN RIGHT TO ACCESS THE POND.

Comments: THOMAS G. TRAYLOR
PO BOX 206
NORLINA, NC 27563

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 14,720 **Number of Lots:** 1,650

Number of Structures: 1,402 **Percentage Residential:** 25%

Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 1 WILDLAND FIRE PER YEAR

Common Causes: DEBRIS BURNING

Area of Future Concern:

Additional Comments:

Dominant Vegetation(Fuel Type): 10. Timber

Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES

Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

C. FIRE PREVENTION PROGRAMS

D. PREPAREDNESS ACTIONS

1 Preparedness Item: EQUIPMENT PURCHASE

Planning Office:

Preparedness Need: PURCHASE 4 FIRE SHELTERS FOR USE BY THE FIRE DEPARTMENT AT WILDLAND FIRES.

Preparedness Action

Category	Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
Equipment Purchase	PURCHASE 4 FIRE SHELTERS TO BE KEPT ON RESPONDING EQUIPMENT FOR USE IN THE EVENT OF AN EMERGENCY AT A WILDLAND FIRE.	12/31/2016		TO BE DETERMINED AT A LATER DATE BY	

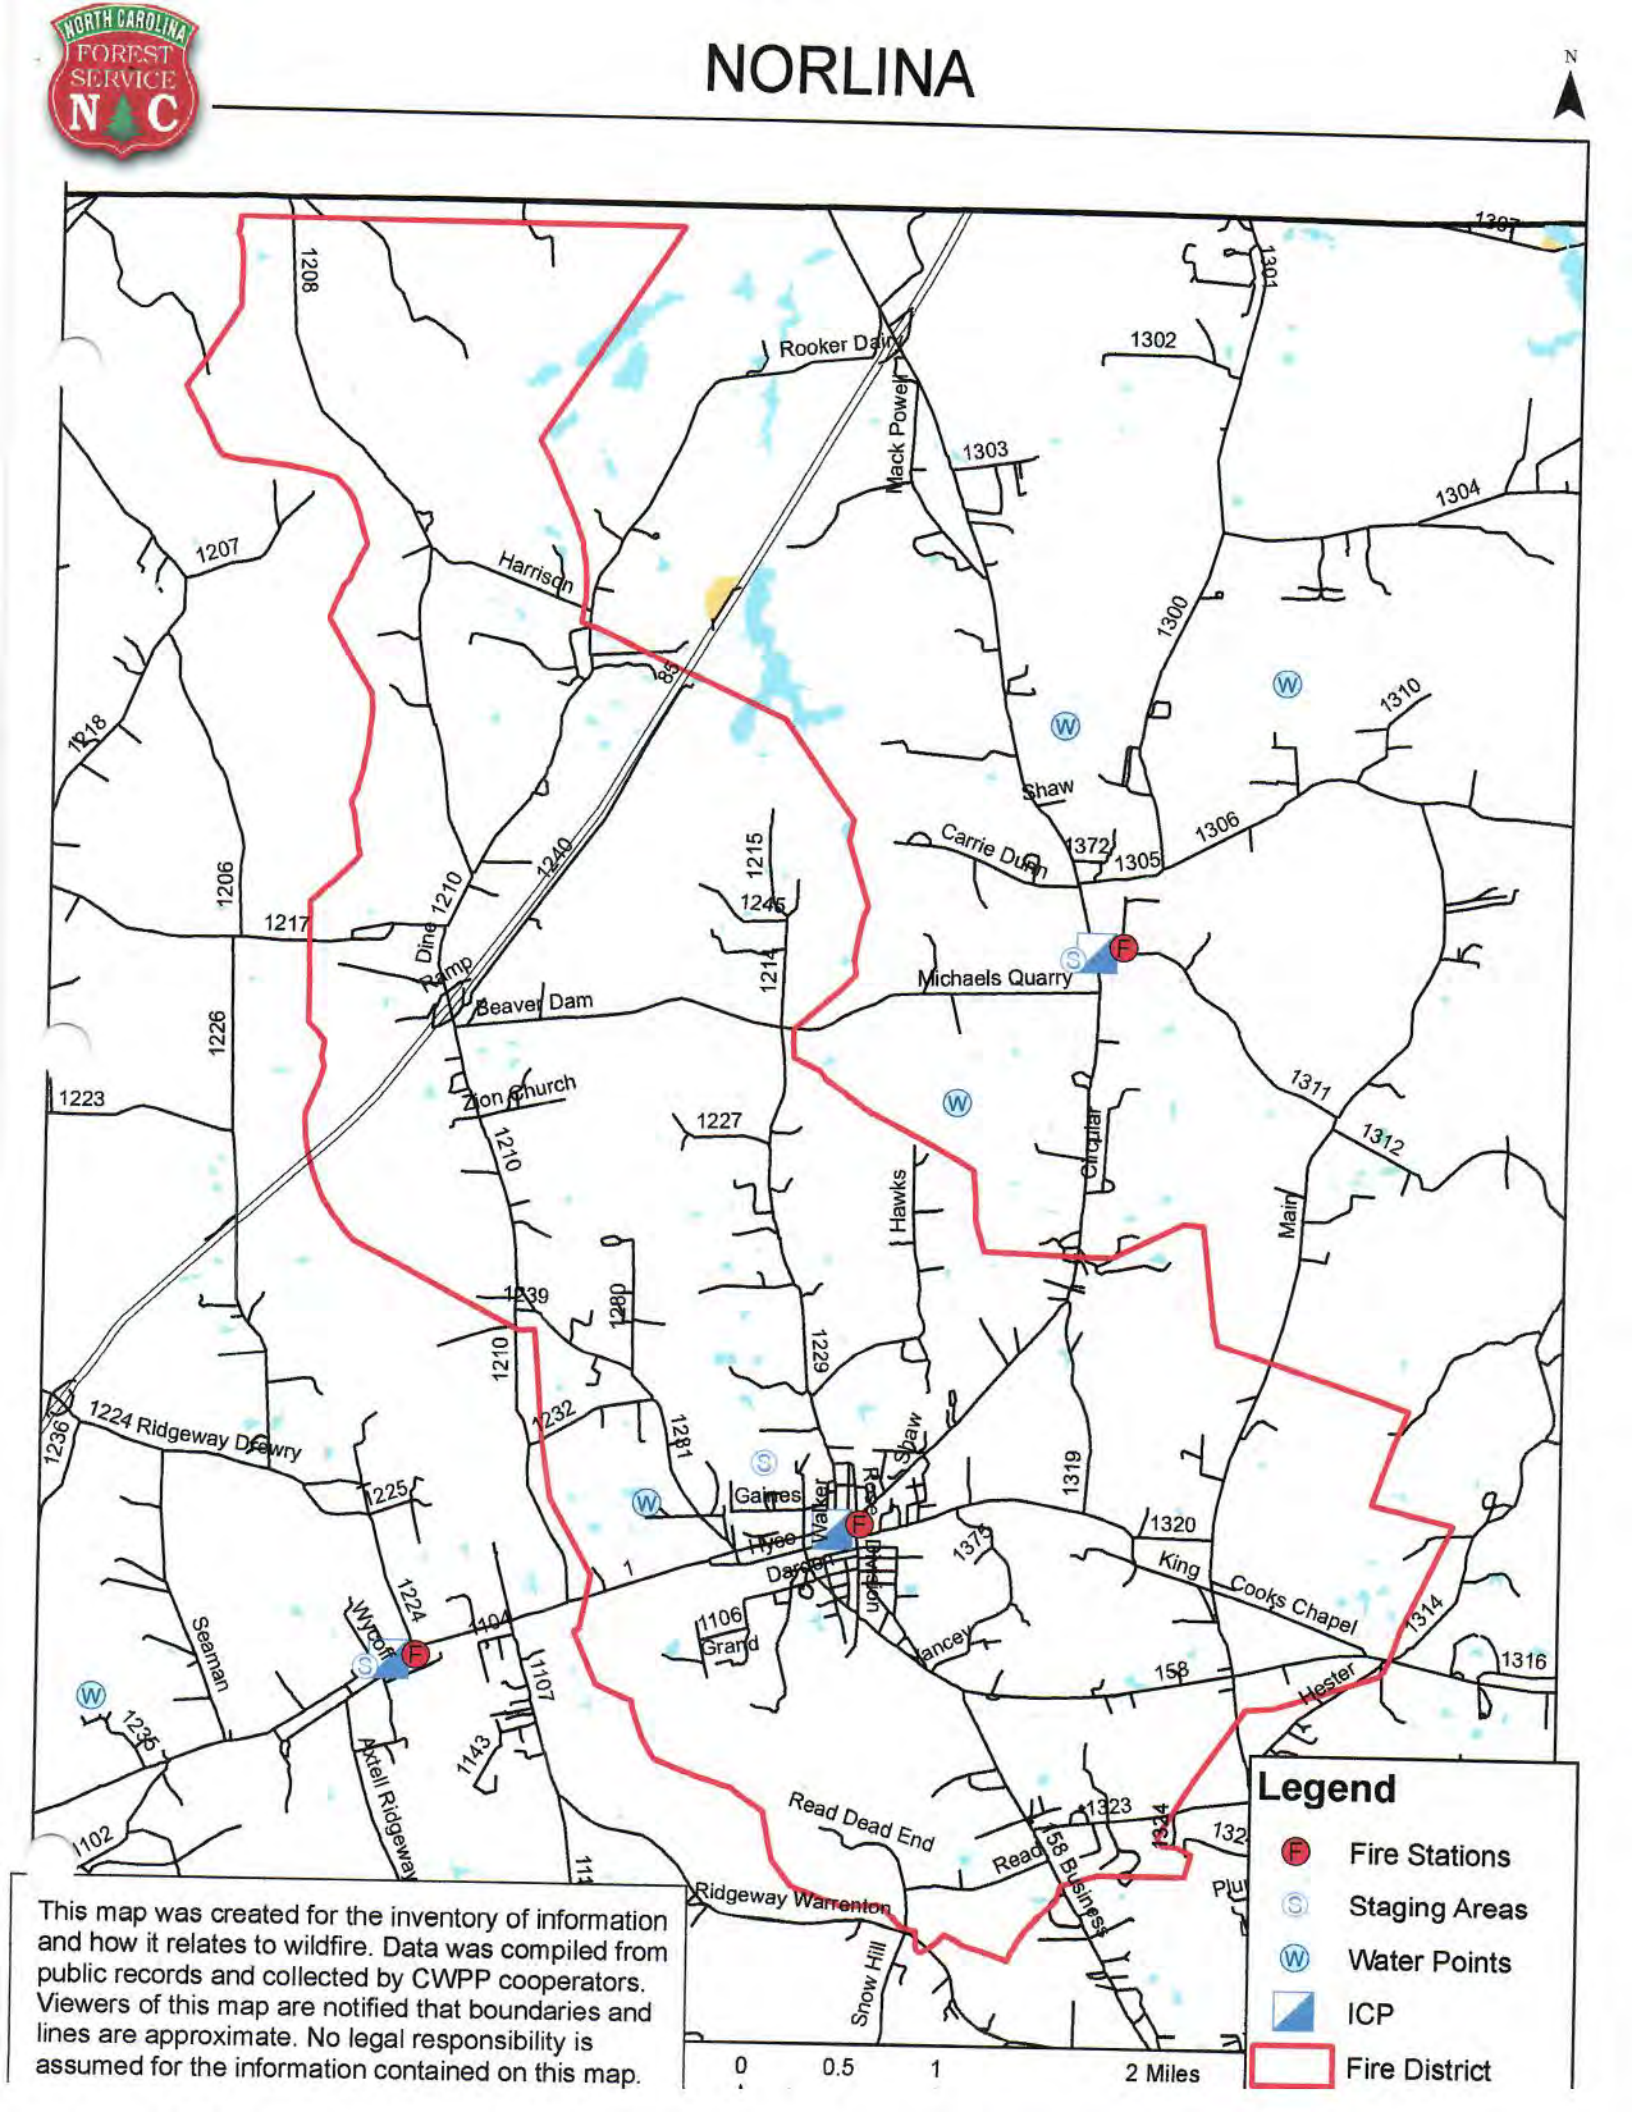

Notes:

PRESENT PROGRAMS ON WILDLAND FIRE PREVENTION AND ADVISE RESIDENTS OF THE RISKS OF WILDFIRE. THIS CAN BE COMPLETED BY PRESENTING PROGRAMS ON FIREWISE.		12/31/2012		NCFS AND HAWTREE VFD

Notes:

Action	Category: Infrastructure Improvement	Planned Date	Completed Date	Activity to be Completed by
IMPROVE ACCESS TO THIS AREA FOR RESPONDING EQUIPMENT BY CREATING TURNAROUNDS AND WIDENING THE ROADS AND ALSO BY HAVING EACH YARD MAINTAIN A DEFENSIBLE SPACE AROUND IT (FIREWISE).		12/31/2016		PROPERTY OWNERS, PRIVATE CONTRACTORS AND NCDOT

Notes:

2 Area Name: COLE FARM **Hazard Rating:** High

Latitude: 36.52018 **Longitude:** -78.14722 **Number of Homes:** 25 **Number of Lots:** 50

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS AREA CONTAINS A LARGE AMOUNT OF HOUSES THAT ARE SURROUNDED BY YOUNG PLANTATION WOODS.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	10	**Building Construction**		**Total**	
All-Season Road Cond.	7	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	0	Total Points	108
Fire Service Turnaround	5	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	5	Miscellaneous	0	Water Source Avail.	10		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Other	Planned Date	Completed Date	Activity to be Completed by
INSTALL A FIRE BREAK AROUND THE PINE PLANTATIONS.		12/31/2016		NCFS AND PRIVATE CONTRACTORS

Notes:

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
ADVISE RESIDENTS OF THE RISKS OF WILDLAND FIRES AND WAYS TO PREVENT THEM.		12/31/2016		HAWTREE VFD AND NC DEPT. OF FORESTRY

Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/28/2011

Prepared By: MORGAN, HAGAN, BOWYER, WILLIAMS AND BOYD

Organization: WOODS WORK, INC.

Contact Information:

Address: 4213 LAUREL RIDGE DRIVE
RALEIGH, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: SOUL CITY FD

DOI Number: NC10096141

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

All Longitude (-78.23456) and Latitude (35.23456) entries in this plan must be in decimal degrees with five degree points after the decimal.

SOUL CITY VFD

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Warren **County ID Number:** 093
PFD Name: SOUL CITY VFD
PFD Latitude: 36.41546 **PFD Longitude:** -78.2663
PFD Street: 103 CRESCENT DRIVE
City: MANSON **State:** NC **Zip Code:** 27553
PFD Mailing Address (if different than Street Address): PO BOX 447
City: MANSON **State:** NC **Zip Code:** 27553
PFD Phone Number: 252-456-3505 **PFD Fax Number:** 252-456-3505
PFD Email Address: soulcityvfd@embarqmail.com
Ground Directions: LOCATED ON STATE ROUTE 1151 APPROXIMATELY 0.64 MILES SOUTH OF THE INTERSECTION WITH US HIGHWAY 1

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	33
Number Trained in Wildland Fire:	3	**Number Trained in Fire Prevention:**	25
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Generator (< 25 KW)	TWO-7500 WATTS AND ONE-6500 WATTS	3
Generator (< 25 KW)	LOCATED AT FIRE DEPARTMENT	1
Engine Type 5		1
Engine Type 1		2
Chain saw		1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** SOUL CITY VFD
ICP Latitude: 36.41546 **ICP Longitude:** -78.26630
ICP Street Address: 103 CRESCENT DRIVE

Comments: LOOK UNDER THE AIRPORTS SECTION OF THE CWPP FOR MORE DETAILED INFORMATION ON THIS AIRPORT.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 75 - 99%

1 **Water Source:** SOUL CITY WATER POINT **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Public
Latitude: 36.41316 **Longitude:** -78.26316
Ground Directions: LOCATED APPROXIMATELY 0.1 MILES SOUTH OF THE SOUL CITY FIRE DEPARTMENT ON STATE ROUTE 1151.
Comments: OWNED BY THE STATE OF NORTH CAROLINA

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 8,960 **Number of Lots:** 715
Number of Structures: 489 **Percentage Residential:** 20%
Estimated Population Growth (next 30 Years): Below Average
Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 1 WILDLAND FIRE PER YEAR
Common Causes: DEBRIS BURNING
Area of Future Concern:
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: SOUL CITY **Hazard Rating:** High

Latitude: 36.41058 **Longitude:** -78.26423 **Number of Homes:** 200 **Number of Lots:** 1,200

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS IS AN AOC OF CONCERN DUE TO THE AREA CONTAINING A STATE PRISON WITH A LARGE INMATE POPULATION WHICH WOULD REQUIRE A LOT OF PERSONNEL AND TIME TO EVACUATE IN THE EVENT OF AN EMERGENCY. THE PRISON IS SURROUNDED BY LARGE WOODS.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	3	Predominant Veg.	20	Roof Composition	10	Placement of Utilities	0
Road Width	0	Fuel Clearance Zone	7	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	1	Slope	1	Building Setback	0		
Fire Service Turnaround	2	**Additional Rating Factors**		**Available Fire Protection**		Total Points	63
Street Signs	0	Miscellaneous	2	Water Source Avail.	1		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
ADVISE RESIDENTS OF THIS AREA AS WELL AS THE PRISON OFFICIALS OF THE DANGERS OF WILDLAND FIRE AND WAYS THEY CAN PREVENT THEM.		2016		NCFS

Notes:

C. FIRE PREVENTION PROGRAMS

D. PREPAREDNESS ACTIONS

1 Preparedness Item: EQUIPMENT PURCHASE

Planning Office:

Preparedness Need: PURCHASE 4 FIRE SHELTERS FOR USE BY THE FIRE DEPARTMENT AT WILDLAND FIRES.

Preparedness Action

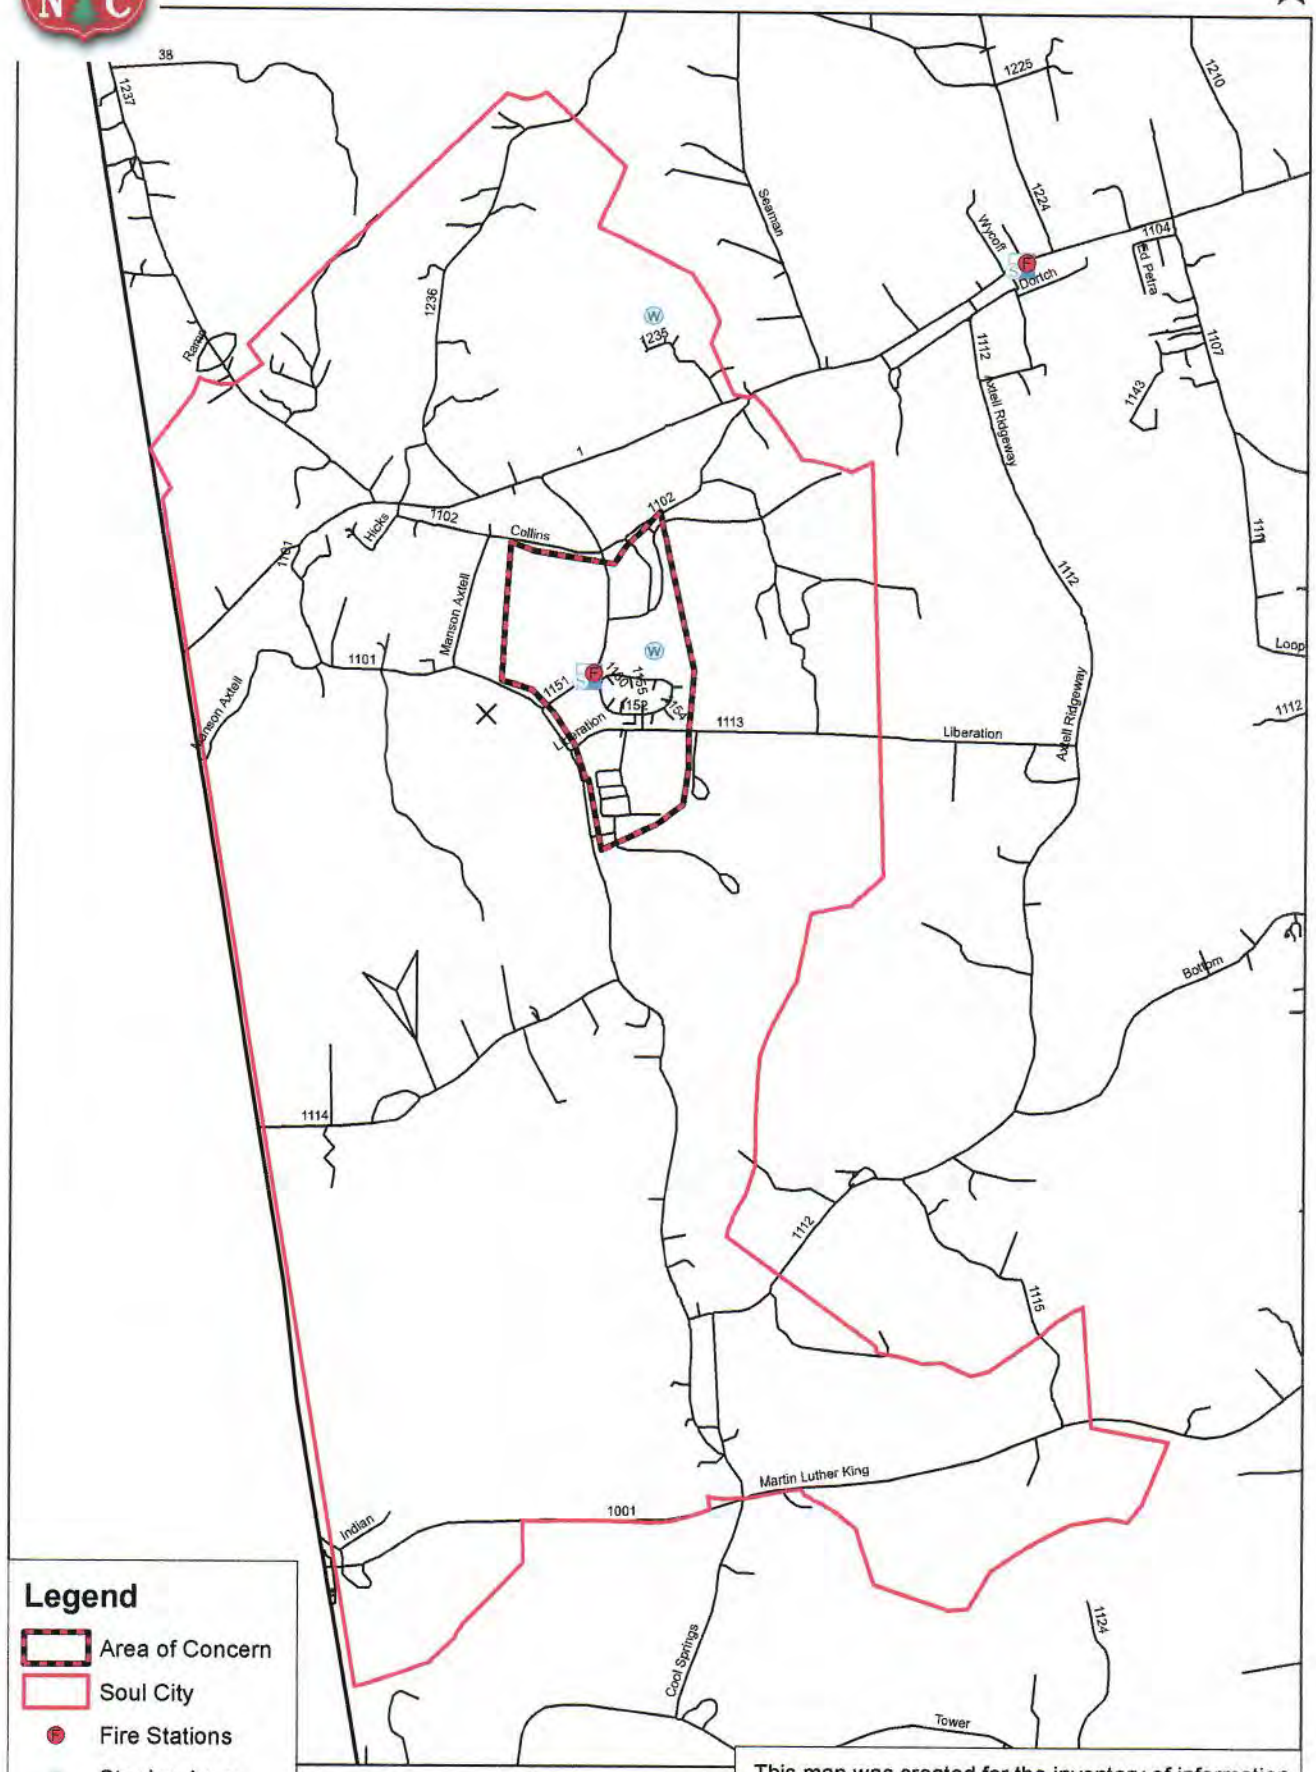

Category	Equipment Purchase				
Action		**Planned Date**	**Completed Date**	**Funding Source**	**Activity to be Completed by**
PURCHASE 4 FIRE SHELTERS TO BE KEPT ON RESPONDING EQUIPMENT FOR USE IN THE EVENT OF AN EMERGENCY AT A WILDLAND FIRE.		12/31/2016		TO BE DETERMINED AT A LATER DATE BY

Ground Directions: HIGHWAY 903 EAST APPROXIMATELY 1/2 MILE EAST OF INTERSTATE 95. TURN RIGHT ONTO AURELIANSPRINGS ROAD AND TRAVEL APPROXIMATELY 1/4 MILE AND THEN TURN LEFT ONTO GRAPEVINE ROAD. TRAVEL APPROXIMATELY 2.5 MILES AND THE AIRPORT WILL BE LOCATED ON THE LEFT.

Comments: LOOK UNDER THE AIRPORTS SECTION OF THE CWPP FOR MORE DETAILED INFORMATION ON THIS AIRPORT.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 25 - 49%

1 **Water Source:** SALMONS LANDING-LONG BRIDG **Contact Telephone:**

Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** Yes

Type: Lake **Water Source Acess:** Public

Latitude: 36.48628 **Longitude:** -77.95030

Ground Directions: AT THE INTERSECTION OF HIGHWAY 903 AND STATE ROUTE 1357 TRAVEL SOUTH ON STATE ROUTE 1357 TO THE BOAT RAMP WHICH IS LOCATED ON THE SOUTH SIDE OF THE BRIDGE.

Comments: THIS IS A PART OF LAKE GASTON AND IS A PUBLIC ACCESS POINT FOR THE LAKE.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 10,880 **Number of Lots:** 1,916

Number of Structures: 1,040 **Percentage Residential:** 25%

Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 1 WILDLAND FIRE PER YEAR

Common Causes: DEBRIS BURNING

Area of Future Concern:

Additional Comments:

Dominant Vegetation(Fuel Type): 10. Timber

Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES

Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 Area Name: MACONS GROVE **Hazard Rating:** High

Latitude: 36.48153 **Longitude:** -77.99553 **Number of Homes:** 75 **Number of Lots:** 275

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS IS LAKEFRONT PROPERTY THAT IS SURROUNDED BY BIG WOODS. THIS AREA HAS MULTIPLE DEAD END ROADS THAT LEAD INTO THE LAKE WITH LOTS OF BOAT STORAGE, OUTDOOR GRILLS AND FUEL STORAGE FOR BOATS.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	3	Placement of Utilities	3
Road Width	2	Fuel Clearance Zone	10	**Building Construction**		**Total**

INEZ VFD
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/27/2011

Prepared By: MORGAN, HAGAN, BOWYER, WILLIAMS AND BOYD

Organization: WOODS WORK, INC.

Contact Information:

Address: 4213 LAUREL RIDGE DRIVE
RALEIGH, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: INEZ FD

DOI Number: NC10095547

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 38,400 **Number of Lots:** 1,177

Number of Structures: 571 **Percentage Residential:** 10%

Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 4 WILDLAND FIRES PER YEAR

Common Causes: DEBRIS BURNING

Area of Future Concern:

Additional Comments:

Dominant Vegetation(Fuel Type): 10. Timber

Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES

Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

1 **Project Name:** DILLARD ROAD **Acres:** 500

Latitude: 36.26465 **Longitude:** -78.11819

Landowner Name: NC WILDLIFE COMMISSION **Dominant Fuel Type:** 8. Closed Timber Litter

Planning Office: **Risks:** FUEL LOADING

Mitigation Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
INSTALL AND MAINTAIN FIRE BREAKS.	12/31/2012		ARRA	NC WILDLIFE COMMISSION

Notes:

B. COMMUNITIES AT RISK

1 Area Name: HORACE PERRY ROAD **Hazard Rating:** High

Latitude: 36.23648 **Longitude:** -78.11537 **Number of Homes:** 7 **Number of Lots:** 57

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS IS A LONG ROAD WITH HOUSE ON IT AND THERE IS ONLY ONE WAY IN AND ONE WAY OUT. WOODS SURROUND THIS ENTIRE PROPERTY ON BOTH SIDES.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3
Road Width	2	Fuel Clearance Zone	3	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	0	Total Points	78
Fire Service Turnaround	5	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	0	Water Source Avail.	1		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Infrastructure Improvement	Planned Date	Completed Date	Activity to be Completed by
IMPROVE ROAD CONDITIONS TO THIS AREA AND POSSIBLY TRY TO CREATE TURNAROUND AREAS FOR RESPONDING EQUIPMENT AND ALSO TRY TO CREATE ANOTHER EXIT FOR RESIDENTS IN THE EVENT OF AN EMERGENCY.		12/31/2016		PRIVATE CONTRACTORS, PROPERTY OWNERS AND NCDOT

Notes:

North Carolina Community Wildfire Protection Plan

2 Area Name: STATE ROUTE 1627-OLD NECK ROAD **Hazard Rating:** High

Latitude: 36.24055 **Longitude:** -78.10632 **Number of Homes:** 5 **Number of Lots:** 105

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS AREA IS SURROUNDED BY WOODS AND THERE IS ONLY ONE WAY IN AND ONE WAY OUT WITH NO TURNAROUND CAPABILITY FOR RESPONDING EQUIPMENT.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3
Road Width	4	Fuel Clearance Zone	10	**Building Construction**		**Total**	
All-Season Road Cond.	7	**Topography**		Building Construction	5	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	1	Building Setback	1	Total Points	104
Fire Service Turnaround	5	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	5	Miscellaneous	0	Water Source Avail.	10		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Infrastructure Improvement	Planned Date	Completed Date	Activity to be Completed by
IMPROVE ACCESS TO THIS AREA BY CREATING TURNAROUNDS, POSSIBLY CREATING ANOTHER ENTRANCE/EXIT FOR RESIDENTS AND RESPONDING EQUIPMENT AND ALSO IMPROVE THE ROAD CONDITIONS IN GENERAL.		12/31/2016		PRIVATE CONTRACTORS, PROPERTY OWNERS AND NCDOT

Notes:

3 Area Name: DILLARD ROAD **Hazard Rating:** High

Latitude: 36.27078 **Longitude:** -78.10255 **Number of Homes:** 7 **Number of Lots:** 107

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS AREA HAS A LONG PAVED ROAD WITH HOUSES AT THE END. THERE IS ONE WAY IN AND ONE WAY OUT WITH NO OTHER MEANS OF EXIT/ENTRANCE AND NO TURNAROUND CAPABILITY.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	3
Road Width	0	Fuel Clearance Zone	10	**Building Construction**		**Total**	
All-Season Road Cond.	0	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1

Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/27/2011

Prepared By: MORGAN, HAGAN, BOWYER, WILLIAMS AND BOYD

Organization: WOODS WORK, INC.

Contact Information:

Address: 4213 LAUREL RIDGE DRIVE
RALEIGH, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: WARRENTON

DOI Number: NC10096344

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

Ground Directions: HIGHWAY 903 EAST APPROXIMATELY 1/2 MILE EAST OF INTERSTATE 95. TURN RIGHT ONTO AURELIANSPRINGS ROAD AND TRAVEL APPROXIMATELY 1/4 MILE AND THEN TURN LEFT ONTO GRAPEVINE ROAD. TRAVEL APPROXIMATELY 2.5 MILES AND THE AIRPORT WILL BE LOCATED ON THE LEFT.

Comments: LOOK UNDER THE AIRPORTS SECTION OF THE CWPP FOR MORE DETAILED INFORMATION ON THIS AIRPORT.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 75 - 99%

1 **Water Source:** NC FOREST SERVICE HEADQUAR **Contact Telephone:** (252) 257-5960

Uses: **Ground:** Yes **Helicopter:** No **Fixed-Wing Use:** No

Type: Hydrant **Water Source Acess:** Private

Latitude: 36.36184 **Longitude:** -78.09962

Ground Directions: LOCATED APPROXIMATELY 0.4 MILES OF THE INTERSECTION OF NC HIGHWAY 58 AND NC HIGHWAY 43

Comments:

---

2 **Water Source:** WARRENTON COUNTRY CLUB **Contact Telephone:**
Uses: **Ground:** No **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Pond **Water Source Acess:** Private
Latitude: 36.38830 **Longitude:** -78.11866
Ground Directions: LOCATED ON HIGHWAY 58 APPROXIMATELY 1.6 MILES SOUTH EAST FROM THE INTERSECTION OF US HIGHWAY 158 AND NC HIGHWAY 58.

Comments:

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 26,880 **Number of Lots:** 3,050
Number of Structures: 2,308 **Percentage Residential:** 25%
Estimated Population Growth (next 30 Years): Below Average
Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 3 WILDLAND FIRES PER YEAR
Common Causes: DEBRIS BURNING
Area of Future Concern:
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES FOR RESIDENTIAL STRUCTURES AND BRICK/CONCRETE FOR COMMERCIAL BUILDINGS
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

1 **Project Name:** UNION CAMP TRACT **Acres:** 750
Latitude: 36.39564 **Longitude:** -78.10291
Landowner Name: NC WILDLIFE COMMISSION **Dominant Fuel Type:** 10. Timber
Planning Office: NC WILDLIFE COMMISSION **Risks:** FUEL LOADING NEAR POPULATION CENTER

Mitigation Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
INSTALL AND MAINTAIN FIRE BREAKS	12/31/2016		ARRA	NC WILDLIFE COMMISSION

Notes:

B. COMMUNITIES AT RISK

1 Area Name: WARRENTON **Hazard Rating:** High

Latitude: 36.39859 **Longitude:** -78.15552 **Number of Homes:** 700 **Number of Lots:** 1,700

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THE TOWN OF WARRENTON IS CONSIDERED AND AOC DUE TO NARROW ROADWAYS, THICK WOODS SURROUNDING THE TOWN AND LIMITED TURNAROUND CAPABILITIES.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/27/2011

Prepared By: MORGAN, HAGAN, BOWYER, WILLIAMS AND BOYD

Organization: WOODS WORK, INC.

Contact Information:

Address: 4213 LAUREL RIDGE DRIVE
RALEIGH, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: CHURCHILL FIVE FORKS FD

DOI Number: NC10095140

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

The following federal and other interested parties were consulted and involved in the preparation of this report.

Name	Organization
ERIK CHRISTOFFERSON	NC DIVISION OF WILDLIFE RESOURCES
SHANNON MANESS	US ARMY CORPS OF ENGINEERS
BRYCE FLEMING	NC DIVISION OF PARKS AND RECREATION

Mutual Aid

Number	Name
NC10095494	HAWTREE FD
NC10095679	MACON FD
NC10095656	LONG BRIDGE FD

PLAN CONTENTS

1) Fire District, History and Pre-Attack Information
2) Fire District Base Map and Other Visual Aids
3) Recommendations and Action Items
4) Additional Comments
5) Attachments

All Longitude (-78.23456) and Latitude (35.23456) entries in this plan must be in decimal degrees with five degree points after the decimal.

CHURCHILL-FIVE FORKS VFD

1) FIRE DISTRICT AND PRE-ATTACK INFORMATION

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Warren **County ID Number:** 093
PFD Name: CHURCHILL-FIVE FORKS VFD
PFD Latitude: 36.49416 **PFD Longitude:** -78.04944
PFD Street: 1168 CHURCH HILL ROAD
City: MACON **State:** NC **Zip Code:** 27551
PFD Mailing Address (if different than Street Address): NA
City: NA **State:** NC **Zip Code:**
PFD Phone Number: 252-257-2323 **PFD Fax Number:** 252-257-2323
PFD Email Address: robbyross@embarqmail.com
Ground Directions: LOCATED ON STATE ROUTE 1335 APPROXIMATELY 0.75 MILES NORTH OF INTERSECTION WITH STATE ROUTE 1337.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	36
Number Trained in Wildland Fire:	0	**Number Trained in Fire Prevention:**	0
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 3		1
Engine Type 6		1
Engine Type 1		2
First Responder Vehicle		1

A. PRIMARY FIRE DEPARTMENT (PFD):

County: Warren **County ID Number:** 093
PFD Name: CHURCHILL-FIVE FORKS VFD SUBSTATION
PFD Latitude: 36.53866 **PFD Longitude:** -78.07138
PFD Street: 549 NOCARVA ROAD
City: MACON **State:** NC **Zip Code:** 27551
PFD Mailing Address (if different than Street Address): NA
City: NA **State:** NC **Zip Code:**
PFD Phone Number: 252-257-4292 **PFD Fax Number:** NA
PFD Email Address:
Ground Directions: LOCATED ON STATE ROUTE 1335 APPROXIMATELY 100 FOOT NORTH OF INTERSECTION WITH STATE ROUTE 1306.

B. PFD RESOURCE CAPACITY:

PERSONNEL

Number of Paid Firefighters:	0	**Number of Volunteer Firefighters:**	0
Number Trained in Wildland Fire:	0	**Number Trained in Fire Prevention:**	0
Number Trained in Hazard Assessment:	0	**Number of Pick Up Firefighters (if Applicable):**	0

EQUIPMENT

Apparatus Type	Description	Quantity
Engine Type 3		1
Engine Type 2		1
Engine Type 1		1

C. INCIDENT PLANS AND INTELLEGENCE

INCIDENT MANAGEMENT INFRASTRUCTURE LOCATION(S)

1 **Incident Command Post (ICP):** CHURCHILL-FIVE FORKS VFD
ICP Latitude: 36.49416 **ICP Longitude:** -78.04944
ICP Street Address: 1168 CHURCH HILL ROAD
City: MACON **State:** NC **Zip Code:** 27551
Paved Parking Acres: 1 **Unpaved Parking Acres:** 1 **Entrances:** 2
 # Buildings: 1 **Indoor Square Footage:**
☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**
Ground Directions: LOCATED ON STATE ROUTE 1335 APPROXIMATELY 0.75 MILES NORTH OF INTERSECTION WITH STATE ROUTE 1337.
Comments:

1 **Staging Area (SA):** CHURCHILL-FIVE FORKS VFD
SA Latitude: 36.49416 **SA Longitude:** -78.04944
SA Street Address: 1168 CHURCH HILL ROAD
City: MACON **State:** NC **Zip Code:** 27551
Paved Parking Acres: 1 **Unpaved Parking Acres:** 1 **Entrances:** 2
 # Buildings: 1 **Indoor Square Footage:**

☑ **Utilities (Water/Sewer)** ☑ **Telephone Service** ☑ **Internet Service**

Ground Directions: LOCATED ON STATE ROUTE 1335 APPROXIMATELY 0.75 MILES NORTH OF THE INTERSECTION WITH STATE ROUTE 1337.

Comments:

---

1 **Nearest Medical Facility (NMF):** MARIA PARHAM MEDICAL CENTER
NMF Latitude: 36.06460 **NMF Longitude:** -78.45680 **Phone Number:** (252) 438-4143
NMF Street Address: 566 RUIN CREEK ROAD
City: HENDERSON **State:** NC **Zip Code:** 27536
Trauma Center Level: NA ☐ **Facility Has Burn Unit** ☐ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: LOCATED AT EXIT 212-RUIN CREEK ROAD OFF OF INTERSTATE 85 IN HENDERSON, NC.

FACILITY DOES HAVE A HELIPAD AVAILABLE

---

2 **Nearest Medical Facility (NMF):** DUKE UNIVERSITY MEDICAL CENTER
NMF Latitude: 36.01320 **NMF Longitude:** -78.93430 **Phone Number:** (800) 362-5433
NMF Street Address: 2301 ERWIN ROAD
City: DURHAM **State:** NC **Zip Code:** 27710
Trauma Center Level: I ☐ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: TAKE EXIT 174-B (HILLANDALE ROAD) OFF OF INTERSTATE 85. TURN LEFT AND THE ROAD BECOMES FULTON STREET. TAKE A LEFT ON ERWIN ROAD AND TAKE A RIGHT INTO THE EMERGENCY DEPARTMENT.

---

3 **Nearest Medical Facility (NMF):** UNC HOSPITAL
NMF Latitude: 35.90430 **NMF Longitude:** -79.04910 **Phone Number:** (919) 966-4131
NMF Street Address: 101 MANNING DRIVE
City: CHAPEL HILL **State:** NC **Zip Code:** 27514
Trauma Center Level: I ☑ **Facility Has Burn Unit** ☑ **Facility Has Air Service**
Medical Facility Type: Primary Care (Hospital)
Ground Directions: INTERSTATE 85 SOUTH TO 15/501 SOUTH TO MANNING DRIVE

THE ACTIVATION LINE FOR UNC AIRCARE IS 919-966-4131 (FLIGHTWATCH)

VEHICLE ACCESS

Roads Paved (Percentage): 75 - 99%
Average Road Grade: 0 - 9%
Maximum Road Grade: 0 - 9%
Maximum time to provide fire services to community: 10 - 14 Minutes

AVIATION

Airport	Three Letter Designation	Degrees From ICP	Miles From ICP

HELICOPTER LANDING ZONES

1 **Helispot:** FRANKLIN COUNTY AIRPORT **Capacity:** Type 1 - 3
Latitude: 36.02330 **Longitude:** -78.33020
Ground Directions: LOCATED 5 MILES SOUTHWEST OF LOUISBURG, NC LOCATED OFF OF SAM HORTON ROAD OFF OF MC WILDEER ROAD OFF OF HIGHWAY 401 SOUTH
Comments: LOOK UNDER THE AIRPORTS SECTION OF THE CWPP FOR MORE DETAILED INFORMATION ON THIS AIRPORT.

2 **Helispot:** HALIFAX-NORTHAMPTON REGIONAL AIRP **Capacity:** Type 1 - 3
Latitude: 36.32983 **Longitude:** -77.63516
Ground Directions: HIGHWAY 903 EAST APPROXIMATELY 1/2 MILE EAST OF INTERSTATE 95. TURN RIGHT ONTO AURELIANSPRINGS ROAD AND TRAVEL APPROXIMATELY 1/4 MILE AND THEN TURN LEFT ONTO GRAPEVINE ROAD. TRAVEL APPROXIMATELY 2.5 MILES AND THE AIRPORT WILL BE LOCATED ON THE LEFT.
Comments: LOOK UNDER THE AIRPORTS SECTION OF THE CWPP FOR MORE DETAILED INFORMATION ON THIS AIRPORT.

WATER RESOURCES

Percent of Fire District in reach of hydrants or connected to county water: 25 - 49%

1 **Water Source:** CHURCHILL WATER SOURCE **Contact Telephone:**
Uses: **Ground:** Yes **Helicopter:** Yes **Fixed-Wing Use:** No
Type: Lake **Water Source Acess:** Public
Latitude: 36.52999 **Longitude:** -78.07254
Ground Directions: LOCATED APPROXIMATELY 0.6 MILES SOUTH OF THE SUBSTATION ON NOCARVA ROAD BRIDGE

Comments: WATER SOURCE IS LOCATED WHERE STATE ROUTE 1334 CROSSES LAKE GASTON

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 19,200 **Number of Lots:** 2,350
Number of Structures: 1,144 **Percentage Residential:** 20%
Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 2 WILDLAND FIRES PER YEAR
Common Causes: DEBRIS BURNING
Area of Future Concern:
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** LAKE FRONT **Hazard Rating:** High
Latitude: 36.54590 **Longitude:** -78.05624 **Number of Homes:** 500 **Number of Lots:** 1,000
Dominant Fuel Type: 10. Timber **Community Contact Person:**
Address:
City: **State:** NC **Zip Code:**
Dominant Community Risk: THIS IS A LARGE LAKEFRONT AREA WITH LOTS OF DEAD END ROADS INTO THE LAKE. THIS AREA CONTAINS LOTS OF BOAT STORAGE, OUTDOOR GRILLS AND FUEL STORAGE. SOME DRIVEWAYS TO THE PROPERTIES ARE STEEP AND MANY OF THE ROADS ARE DIFFERENT WIDTHS.
Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities	
Ingress and Egress	7	Predominant Veg.	20	Roof Composition	15	Placement of Utilities	5
Road Width	2	Fuel Clearance Zone	15	**Building Construction**		**Total**	
All-Season Road Cond.	2	**Topography**		Building Construction	10	Total Number of Scoresheets Completed	1
Fire Service Access	5	Slope	2	Building Setback	0	Total Points	96
Fire Service Turnaround	5	**Additional Rating Factors**		**Available Fire Protection**			
Street Signs	0	Miscellaneous	1	Water Source Avail.	1		
				Organized Response	1		
				Fixed Fire Protection	5		

Action Items

Action	Category: Infrastructure Improvement	Planned Date	Completed Date	Activity to be Completed by
IMPROVE ROADS INTO THIS AREA AND WIDEN TURN AROUNDS		12/31/2016		PROPERTY OWNERS AND NCDOT

Notes:

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
ADVISE RESIDENTS OF THE POTENTIAL FOR WILDFIRES AND WAYS THEY CAN PREVENT THEM BY PRESENTING PROGRAMS SUCH AS FIREWISE TO THE HOMEOWNERS ASSOCIATION.		12/31/2012		CHURCHILL-FIVE FORKS VFD AND NCFS

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: OPEN HOUSE **Population Reached:** ALL AGES

Project Description: THE FIRE DEPARTMENT HOSTS AN ANNUAL OPEN HOUSE FOR THE LOCAL COMMUNITY TO COME OUT AND TOUR THE FIRE DEPT, VIEW THE EMERGENCY EQUIPMENT, RECEIVE EDUCATION AND HANDOUTS ON FIRE SAFETY AND FIRE PREVENTION AND ENJOY REFRESHMENTS.

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
CONTINUE TO HOST THIS ANNUAL OPEN HOUSE AS THIS IS A WAY FOR THE FIRE DEPARTMENT TO REACH A DIVERSE POPULATION IN A COMFORTABLE AND CONVENIENT SETTING.	7/4/2011		CHURCHILL-FIVE FORKS VFD	CHURCHILL-FIVE FORKS VFD

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: EQUIPMENT PURCHASE

Planning Office:

Preparedness Need: PURCHASE 4 FIRE SHELTERS FOR USE BY THE FIRE DEPARTMENT AT WILDLAND FIRES.

Preparedness Action

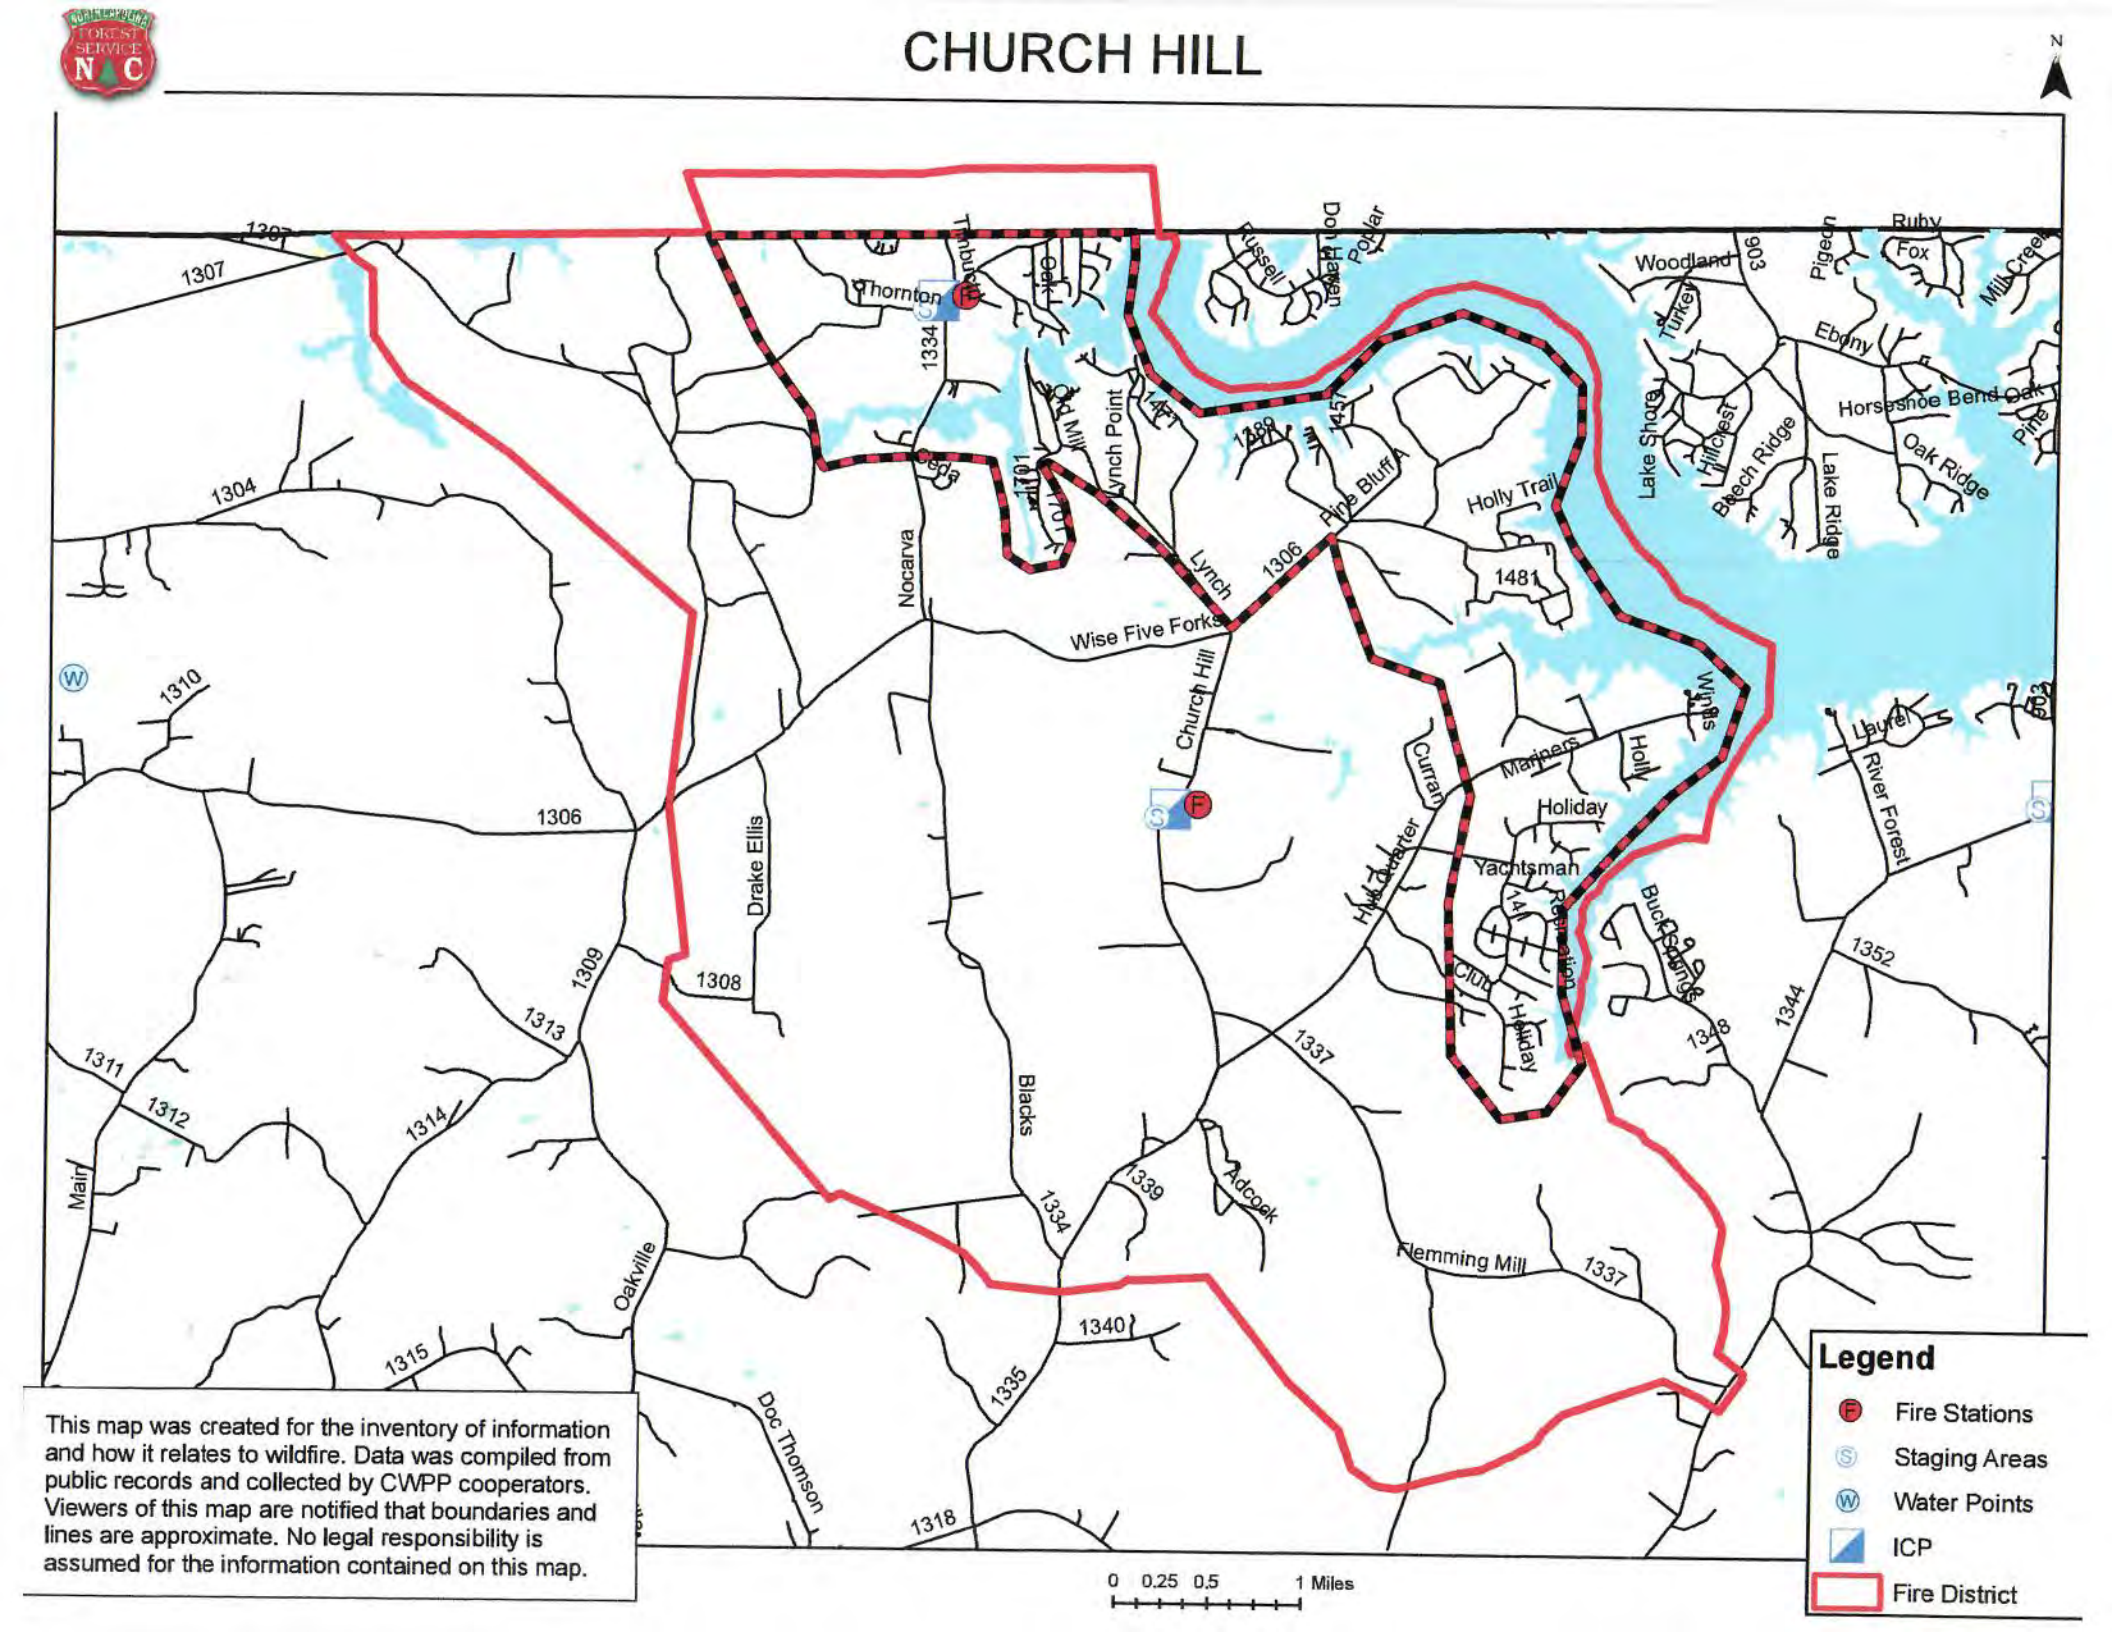

Category Equipment Purchase Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
PURCHASE 4 FIRE SHELTERS TO BE KEPT ON RESPONDING EQUIPMENT FOR USE IN THE EVENT OF AN EMERGENCY AT A WILDLAND FIRE.	12/31/2016		TBD BY THE FIRE CHIEF	CHURCHILL-FIVE FORKS VFD

Notes:

Comments: FIRE HYDRANT AT THE FIRE STATION

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 5,120 **Number of Lots:** 1,812
Number of Structures: 1,054 **Percentage Residential:** 50%
Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 1 WILDLAND FIRE PER YEAR
Common Causes: DEBRIS BURNING
Area of Future Concern:
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

B. COMMUNITIES AT RISK

1 **Area Name:** LAKE GASTON **Hazard Rating:** High
Latitude: 36.51732 **Longitude:** -77.91352 **Number of Homes:** 150 **Number of Lots:** 300
Dominant Fuel Type: 10. Timber **Community Contact Person:**
Address:
City: **State:** NC **Zip Code:**
Dominant Community Risk: THIS IS ALL LAKEFRONT PROPERTY THAT CONTAINS BOAT STORAGE, OUTDOOR GAS GRILLS, AND FUEL STORAGE. ALL OF THE ROADS IN THIS AREA ARE DEAD ENDS WHICH RUN INTO THE LAKE WITH NO ROOM FOR TURNAROUNDS.

Notes:

Wildfire Hazard & Risk Assessment - Average Scores for Community

Means of Access		Vegetation		Roofing Assembly		Placement of Utilities

				Fixed Fire Protection	5		

Action Items

Action	Category: Infrastructure Improvement	Planned Date	Completed Date	Activity to be Completed by
IMPROVE ROAD CONDITIONS AND WIDEN TURN AROUNDS.		12/31/2016		PROPERTY OWNERS AND NCDOT

Notes:

Action	Category: Awareness	Planned Date	Completed Date	Activity to be Completed by
PROVIDE INFORMATION TO THE PROPERTY OWNERS AND RESIDENTS CONCERNING WILDLAND FIRE PREVENTION AND SAFETY BY PRESENTING PROGRAMS SUCH AS FIREWISE TO THE HOMEOWNERS ASSOCIATION.		12/31/2012		ROANOKE-WILDWOOD VFD AND NCFS

Notes:

C. FIRE PREVENTION PROGRAMS

1 Project Name: FIRE PREVENTION PROGRAM **Population Reached:** ELEMENTARY SCHHOL AGED CHILDREN

Project Description: DURING FIRE PREVENTION WEEK IN OCTOBER THE FIRE DEPARTMENT PRESENTS A PROGRAM ON FIRE PREVENTION AND AWARENESS TO THE ELEMENTARY SCHOOLS IN NORTHAMPTON AND WARREN COUNTIES.

Age Group Targeted (select all that apply)	>50	50 - 35	34 - 20	19 - 15	14 - 10	9 - 6	<6
	No	No	No	No	Yes	Yes	Yes

Community(s) Targeted (if applicable):

Action

Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
PRESENT A PROGRAM ON FIRE PREVENTION AND AWARENESS DURING FIRE PREVENTION WEEK IN OCTOBER.	10/15/2011		ROANOKE-WILDWOOD FIRE DEPARTMENT	ROANOKE-WILDWOOD FIRE DEPARTMENT

Notes:

D. PREPAREDNESS ACTIONS

1 Preparedness Item: EQUIPMENT PURCHASE

Planning Office:

Preparedness Need: PURCHASE 4 FIRE SHELTERS TO BE USED BY THE DEPT. AT FOREST FIRES

Preparedness Action

Category Equipment Purchase Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
PURCHASE 4 FIRE SHELTERS TO BE KEPT ON THE DEPARTMENT'S RESPONDING EQUIPMENT TO BE USED IN THE EVENT OF AN EMERGENCY AT A WILDLAND FIRE.	12/31/2016		TBD BY THE FIRE CHIEF	ROANOKE-WILDWOOD VFD

Notes:

---

2 Preparedness Item: EQUIPMENT PURCHASE

Planning Office:

Preparedness Need: PURCHASE FOR USE BY THE DEPARTMENT A FIRE BOAT.

Preparedness Action

Category Equipment Purchase Action	Planned Date	Completed Date	Funding Source	Activity to be Completed by
PURCHASE A FIRE BOAT THAT IS OUTFITTED AND CAN BE USED BY PROPERLY TRAINED MEMBERS OF THE DEPARTMENT WHEN RESPONDING TO WILDLAND FIRES ON THE LAKE THAT CANNOT BE EASILY ACCESSED BY GROUND EQUIPMENT.	12/31/2016		TBD BY THE FIRE CHIEF	ROANOKE-WILDWOOD VFD

DREWRY VFD
Community Wildfire Protection Plan

AN ACTION PLAN FOR WILDFIRE MITIGATION

Date: 1/27/2011

Prepared By: MORGAN, HAGAN, BOWYER, WILLIAMS AND BOYD

Organization: WOODS WORK, INC.

Contact Information:

Address: 4213 LAUREL RIDGE DRIVE
RALEIGH, NC 27612

Phone: 919-787-3460

E-Mail: woodswork@nc.rr.com

Fax: 919-787-3460

DOI Name: DREWRY FD

DOI Number: NC10095258

This plan is a collaborative effort between various entities. The signing representatives listed in this plan comprise the core decision-making team responsible for this report and mutually agree on the plan's contents and are committed to act on its recommendations. The objectives are to set clear priorities for the implementation of wildfire mitigation in this fire district. This includes prioritized recommendations for the fire district as a whole and also for community members where appropriate.

D. COMMUNITY INFORMATION

FIRE DISTRICT SIZE & DEMOGRAPHICS

Estimated Acres: 14,720 **Number of Lots:** 1,183
Number of Structures: 690 **Percentage Residential:** 15%
Estimated Population Growth (next 30 Years): Below Average

Majority Population is Full-Time: Yes NA **If NOT Full Time please indicate what Percentage of Population is part-time**

HAZARD ASSESSMENT RATING (from NFPA 1144): Low

WILDFIRE HISTORY & FUEL TYPE

Relative Frequency: AVERAGE OF 1 WILDLAND FIRE PER YEAR
Common Causes: DEBRIS BURNING
Area of Future Concern:
Additional Comments:
Dominant Vegetation(Fuel Type): 10. Timber
Dominant Building Construction Type: WOOD FRAME WITH ASPHALT SHINGLES
Wildfire History or Fuel Type Notes:

2) FIRE DISTRICT BASE MAP AND OTHER VISUALS

Minimally should include fire district boundary, major roads, fire Stations, ICPs, staging areas, medical facilities, helispots, water resources, and local, state, and federal ownership boundaries on the base map. May want to include: major land marks, police stations, evacuations routes, forest service offices, and large forest land parcel boundaries. Attach or insert community base map and other visuals.

3) RECOMMEDATIONS AND ACTION ITEMS

A. FUEL MITIGATION SITES

1 **Project Name:** KIMBELL POINT **Acres:** 25
Latitude: 35.84087 **Longitude:** -78.70330
Landowner Name: STATE OF NORTH CAROLINA
Planning Office: NCFS AND NC DEPT. OF PARKS AND RECREATION
Dominant Fuel Type: 8. Closed Timber Litter
Risks: FUEL LOADING IN THE PUBLIC PARK AND CAMPGROUND SITES

Mitigation Action

Action	Planned Date	Completed Date	Funding	Activity to be

1 Area Name: COUNTY LINE-KIMBELL POINT **Hazard Rating:** High

Latitude: 35.84087 **Longitude:** -78.70330 **Number of Homes:** 400 **Number of Lots:** 800

Dominant Fuel Type: 10. Timber **Community Contact Person:**

Address:

City: **State:** NC **Zip Code:**

Dominant Community Risk: THIS IS LAKEFRONT PROPERTY WITH MANY DEAD END ROADS RUNNING INTO THE LAKE. THIS AREA HAS LOTS OF BOAT STORAGE, OUTDOOR GRILLS AND FUEL STORAGE.

Notes:
